From 1995 forward, the estimate of identified providers is supplied to the Child Care Division by child care resource and referral agency. No data is reported for counties without a CCD funded child care resource and referral agency. Prior to 1995, the number of identified providers was obtained using a combination of CCR&R and CCD regulatory data method which resulted in an inflated number. *1998 estimates use 1997 population figures from CPRC.

*Statewide data listed in this county data table may differ slightly from the published Benchmark data which are derived from the Oregon Population Survey. The OPS data does not have a large enough sample size to provide county level data. For that reason, Census Bureau data are used in the county data table.

1993 data released January 1998. *1995 data released February 1999.

*Statewide data listed in this county data table may differ slightly from the published Benchmark data which are derived from the Oregon Population Survey. The OPS data does not have a large enough sample size to provide county level data. For that reason, Census Bureau data are used in the county data table.

1993 data released January 1998. *1995 data released February 1999.
