

P001

*Payroll Time Capture
Establish Session Default Values*

SCREEN PURPOSE

The Time Capture module in OSPA gives agency payroll staff members and timekeepers the ability to enter employee time and attendance into OSPA from paper timesheets.

The screens include:

- P001 Payroll Time Capture – Establish Session Default Values
- P003 Time Capture, an update screen to enter the employee's time
- P002 Time Capture, an inquiry only summary of time entered

OSPA maintains time records for the current and three prior months.

The P001 Payroll Time Capture establishes the pay period and agency for which the user will enter time. It governs only the P002 and P003 Payroll Time Capture screens.

P001

SCREEN ELEMENTS

Legend

No.	Description
A	Screen designation. Screen access key sequence, required
B	System message area, protected. See Screen Message Codes.
C	Screen title, protected
D	Agency number, #####. Determines the agency for which the user will enter time.
E	Must always be the first day of the month for which you will enter time, MMDDYY
F	Generally, the last day of the month, MMDDYY. For separating or transferring employees it is the last day of employment. For deceased employees, it is the last day worked or date of death.
G	Last day of the month, MMDDYY
H	3-digit, agency assigned number, optional. The B065A Timesheet Audit and Control by Agency Report prints time entered on the P003 Time Capture screen in batch number order.

OSPA Reference Manual

NOTES

Accepting Defaults – When you access the P001, OSPA will supply a default agency number and default dates for the current pay period. If these are correct, press [PAUSE].

Batch Numbers – If your agency uses different batch numbers, we recommend that you record the batch total for each batch number entered as a mechanism for checking your entry.

SCREEN MESSAGE CODES

Code	Message with Code	Description
TC01	INV AGENCY	The agency number entered is not a valid agency.
TC02	INV TS START	The timesheet start date is not numeric or is not the beginning of the pay period.
TC03	INV TS END	Timesheet end date is invalid. Make sure the date is a valid calendar date between the timesheet start date and the pay period ending date, MMDDYY
TC04	INV PAY END	Pay period ending date \neq the end of the month.
TC05	INV BATCH NO	The batch number entered is invalid.
TC06	MONTHS NOT =	The timesheet start date, timesheet end date, and pay period ending dates must all be in the same month.
TC07	YEARS NOT =	The timesheet start date, timesheet end date, and pay period ending dates must all be in the same year.
TC08	PAY LESS THAN TE	The pay period ending date is earlier than the timesheet end date. The pay period ending date must be \geq the timesheet end date..
TC09	TE LESS THAN TB	The timesheet end date is earlier than the timesheet start date Use the first day of month as the timesheet start date. The timesheet end date must be \geq the timesheet start date.
TC10	SIGN ON AGENCY DIF	The agency number you entered on the P001 is different than the agency number you used to sign-on.
TC11	BAD DATE FORMAT	Dates entered are not numeric
TC20	CUR DEFAULTS	The transaction as entered is the same as the currently existing defaults.
TC21	NO DEFAULTS	No data has been established.
TC90	SECURITY ERROR	An operator is not logged on through "PUIS" or only has display access.
TC91	TRANSACTION COMPLETE	The transaction has come to a normal conclusion.

Code	Message with Code	Description
TC92	OSTMPRD FILE CLOSED	File is closed. Document action being taken, send screen print of error to OSPS, who will fax information to a programmer

For a complete alphabetical listing of OSPA message codes see Appendix E.

OSPA REASONABILITY EDITS

Timesheet start date, timesheet end date, and pay period ending date must be numeric.

Timesheet start date, timesheet end date, and pay period ending date must all have the same month and the same year.

Timesheet start date ≤ timesheet end date and pay period ending date.

Timesheet end date ≥ timesheet start date and ≤ pay period ending date.

Pay period ending date = last day of month for the month entered

The month entered is >00 and <13.
