Rotational Sessions - Don't Miss It!

Don't miss the next Datamart User Group Meeting! We'll kick off the meeting with about 15 minutes of general Datamart business and then focus on learning different processes and skills from our peers.

Each rotational session will last around 15 minutes. The presenters will stay at one table. The audience will divide into four groups and rotate to a different table every 15 minutes. Everyone attending will have the opportunity to participate in each session.

This should be a fun and casual learning environment for all. Hope to see you there!

<u>Rotational Presenter</u>	<u>Session Topic</u>
Robin Barnes	Building Interactive EIS Screens
Michael Cutler	Computed & Grouped Columns
Michele Nichols	ORBITS Budget Actuals Table
Terry Polston	Inactivating D23 Funds

**Rotational Sessions
A Great Learning
Experience!**

**When: Wednesday,
October 31st
9:00 to 11:00 a.m.**

**Where: L&I Building,
Room 260**

New Datamart Server Update

First, a big "Thanks" to all the agencies which provided their connection information regarding the Datamart. It's interesting to learn how people use the Datamart to integrate with their business needs.

Currently, the State Data Center (SDC) is working on a process to secure a backup from the current Datamart server to image onto

the new server. Technology changes are always fascinating and a great learning opportunity for all involved. Once this process is complete, the initial testing will be done by SARS.

There's not a definite completion date for this server transition. We want to make sure connections work smoothly prior to any conversion to the new server.

Finish

Planned Datamart Downtime

Starting Friday, October 12th at 6:00 p.m. and ending around 10:00 a.m. Saturday, October 13th the Datamart will be down for the weekly load of data. This is a day earlier than our regular weekly load schedule. So, if you come in the office to work on October 13th, you will have updated information from October 12th.

Datamart Purge

Just a reminder of the latest Datamart purge. As of August 31, 2007 fiscal year 2001 (July 1, 2000 to June 30, 2001) was purged from the SCD Accounting Datamart. This means the oldest data available now dates back to July 1, 2001. Capital Construction data is available if the appropriation is still active.

Hyperion 411 - Creating Free-Form Reports

1. To create a new Free-Form Report

Select **Insert > New Report**

Hint...Reports are much easier to work with if you turn on the "Section Boundaries" before starting to work with the Report.

To do this, select **Report > Section Boundaries**.

2. Drag non-quantifiable items to the Report Groups Pane.

All of the item labels are immediately displayed in the corresponding Report Group Header on the Content Pane.

3. Drag non-quantifiable items to the Table Dimension Pane.

All of the items are immediately displayed in a table in the body of the report, categorized by Report Group Labels.

4. Drag quantifiable items to the Table Facts Pane.

All of the item values are immediately summed in a table in the body of the report, categorized by the Table Dimension Labels.
