

MMIS Provider eCourse

Quick fixes

To take the MMIS Provider eCourse, you need to use Internet Explorer 6, not Internet Explorer 7, and have Adobe Flash Player installed on your computer.

Fix for main eCourse window not displaying

If the main window of the eCourse comes up blank, download the latest version of Adobe Flash Player at www.adobe.com/products/flashplayer.

Fix for Internet Explorer security warning

If you see the following message after clicking a link in the eCourse menu, you need to change your security settings in Internet Explorer 6.

To change your security settings:

1. Go to Tools > Internet Options > Advanced
2. Scroll down to the Security section.
3. Uncheck the “Do not save encrypted pages to disk” box, then click OK.
