

**Department of Human Services
Addictions and Mental Health Division**

**Mental Health Planning and Management Advisory Council
2009 Priorities**

The top priority is Wellness. Issues identified to focus on are:

Wellness (including prevention and recovery)

- Early Mortality (integration of physical and behavioral health: mitigating risk factors; holistic approach; across the age span; alternative and complimentary treatment)
- Peer Delivered Services
- Suicide Prevention
- Stigma

System integration and collaboration was identified as the vehicle supporting wellness. Particular issues MHPAMAC would like to see tracked and/or included in meeting agendas are:

- Housing/homelessness (women veterans noted as a population to which MHPAMAC should pay particular attention)
- Transition Age Youth (TAY)
- Autism Spectrum Disorder
- Supported education and employment
