Program Overview: Federally funded weatherization programs have operated in Oregon since 1979. Currently, there are four federally funded programs: LIEAP, DOE-WAP, PVE, BPA; and one program ECHO, is the result of electric deregulation public purpose funds. Weatherization Assistance programs provides conservation services, health & safety repairs, heating system repair and replacement, baseload measures and energy education to households at or below 60 percent of Oregon’s median income. The programs are administered through local Community Based Organizations, including CAP agencies, Senior Centers, Housing Authorities and Tribes. Once an application has been made and approved, the qualifying household is placed on a weatherization waiting list. Priority is given to senior (60 years of age and older) and disabled persons who are qualified applicants and households with children under the age of six.

Funding Source: United States Department of Energy, United States Department of Health & Human Services, Public Purpose funds (ECHO only) and the Bonneville Power Administration
