# OPERATION & MAINTENANCE MANUAL Water Quality Planter

#### Manual prepared: November 2018

DFI No. D00580, D00581, D00582

Figure 1: DFI No D00581, looking South

Facility Specific O&M Manual – Planted Water Quality Planter

D00580, D00581, D00582

#### 1. Identification

Drainage Facility ID (DFI): Facility Type: Construction Drawings: Locations:	D00580 Water Quality Planter 45V-038 District: 2B Highway No.: 123 Mile Post: 12.57-12.58
Drainage Facility ID (DFI): Facility Type: Construction Drawings: Locations:	D00581 Water Quality Planter 45V-038 District: 2B Highway No.: 123 Mile Post: 12.60-12.61
Drainage Facility ID (DFI): Facility Type: Construction Drawings: Locations:	D00582 Water Quality Planter 45V-038 District: 2B Highway No.: 123 Mile Post: 12.67-12.68

#### 2. Manual Purpose

The purpose of this manual is to outline inspection needs and summarize maintenance actions for water quality planters.

#### 3. Facility Location

The location map below details the facility location. The highway, mile posts, side streets, access location, and stormwater flow directions are noted on the map.

Facility location type: In Sidewalk

Flow direction: East

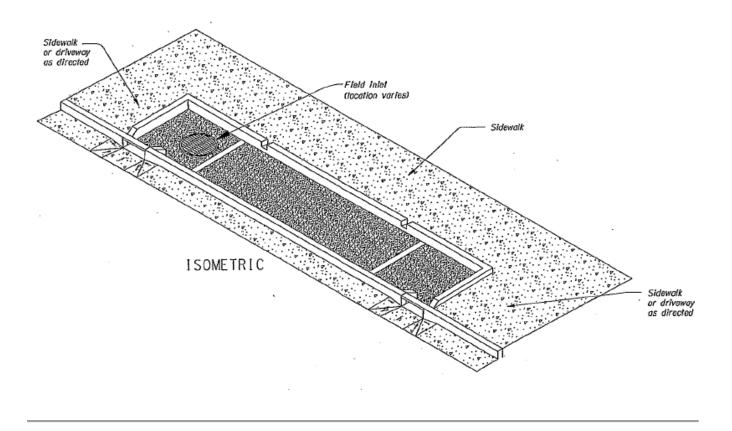

Figure 2: Facility Location Map

#### 4. Facility Summary

The length and width of the WQ Planter is based on the dimensions of the inside of the treatment cell.

The length and width of the WQ Planters are:

Facility DFI	Length (Feet)	Width (Feet)
D00580	64	3.5
D00581	32	3.5
D00582	38	3.5

**<u>Site Specific Information</u>**: The planters have blended compost and topsoil mixture. There are also three types of grasses in the planters and two curb inlets. There are no bypass inlets on the planters.

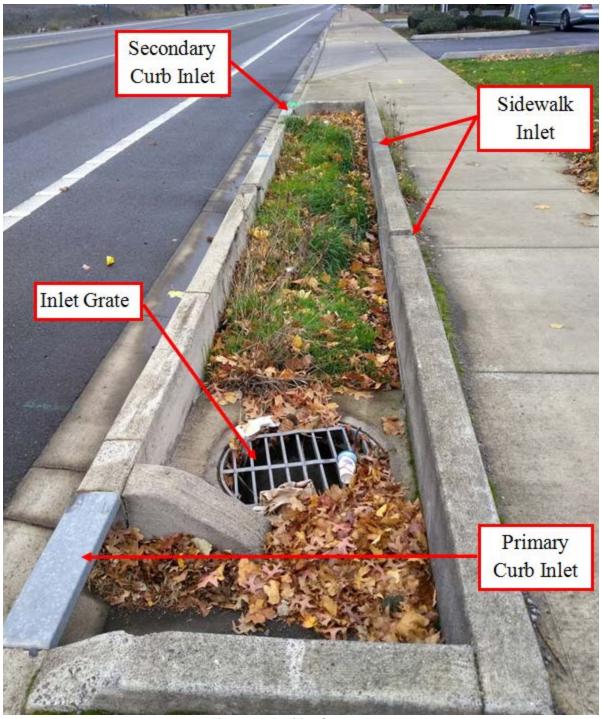

Figure 3: Facility Components

Figure 4: Facility Components

#### 5. Facility Access

Maintenance access to the facility: Curb and gutter (travel lane)

#### Lane Closure Needed

Water quality planters do not typically have access roads/access pads, nor are they gated, as they are located in urban areas alongside sidewalks and curbs. Use caution when accessing these facilities as there may be pedestrians or cyclists in the vicinity.

#### 6. Operational Components / Maintenance Items

#### Classification and Standard Operational (Op) Plan:

This facility is classified as a:

☐ Filterra (Op Plan A)	⊠ WQ Planter (Op Plan B)	☐ MWS (Op Plan C)											
A Filterra is a single chamber treatment cell that utilizes filter media, a plant, and a perforated underdrain.	A WQ Planter is a single chamber treatment cell that utilizes plants, filter media, and a perforated underdrain. The auxiliary outlet is located inside of the treatment cell.	A <u>Modular Wetland System</u> is a three chamber treatment cell that utilizes plants, filter media, filter media cartridges, and a perforated underdrain network.											
A standard operational plan illustrates the general facility footprint configuration and explains the purpose of each facility component. Operational plans (A and B) are provided in the Standard Operation Manual.													

See Appendix A for the site specific operational plan.

#### **Operational Components**

The facility components table (**Table 1**) has been provided to highlight the applicable components for this facility. The component is in use when the box contains an "x" (e.g.  $\boxtimes$  ).

The Standard Operation Manual for Water Quality Planters (implemented April 2018) outlines facility operation, typical footprint configuration, and component definitions and details. A link to the manual is attached to the feature marker in TransGIS. <u>https://gis.odot.state.or.us/TransGIS/</u>

#### Maintenance Items

Operational components marked in **Table 1** should be inspected and maintained according to Section 7. Each facility component is defined and detailed in the Standard Operation Manual using the associated ID number indicated below.

Table 1: Facility Components		D#
Facility Inlet		
Inlet Grate		P1
Curb Inlet	$\boxtimes$	P2
Sidewalk Chute		P3
Bypass Inlet		P4
Treatment		
Plants (Tree or Shrub)		P5
Grass	$\boxtimes$	P6
Filter Media		P7
Filter Media Cartridge		P8
Planter Components		
Perforated Pipe	$\boxtimes$	P9
Outlet Grate	$\boxtimes$	P10
Outfall Type		
Waterbody (Creek/Lake/Ocean)		P11
Ditch		P12
Storm Drain System	$\boxtimes$	P13

#### 7. Maintenance

#### Maintenance Frequency/Maintain Records

- a. Full inspection annually. Preferably prior to the rainy season.
- b. Clean and maintain as necessary. Refer to Activity 125 for conditions when maintenance is needed.
- c. Keep a record of inspections, maintenance, and repairs.

#### Maintenance Guide/Maintenance Actions

The ODOT Routine Road Maintenance Water Quality and Habitat Guide (the *Blue Book*) outlines the standard maintenance actions for water quality facilities under Activity 125.

There are standard maintenance tables for standard ODOT designs. The maintenance tables describe the maintenance component, the defect or problem, the condition

8

when maintenance is needed, and the recommended maintenance to correct the problem. Use the following tables to maintain these water quality planters:

- Table 1 (General Maintenance): Contains general maintenance and inspection guidelines that are applicable to all ODOT water quality facilities. Maintenance of inlets, outlets, trash removal and noxious weeds is recommended seasonally.
- Table 3 (Maintenance of Water Quality or Biofiltration Swales): Contains maintenance information for swales. The planted area of these planters should be maintained as described for the bottom and sides of swales, by using equipment other than mowers to control plant height. Replant if needed with plants from the original plans, or as recommended by ODOT landscaping and stormwater staff.

The *Blue Book* can be viewed at the following website: http://www.oregon.gov/ODOT/Maintenance/Documents/blue\_book.pdf

#### 8. Limitations

Vactors may be used at the inlet, outlet, and grated areas. No heavy equipment may be used in the planted areas.

#### 9. Waste Material Handling

Material removed from the facility is defined as waste by the Department of Environmental Quality (DEQ). Refer to the road waste section of the ODOT Maintenance Yard Environmental Management System (EMS) Policy and Procedures Manual for disposal options:

http://www.oregon.gov/ODOT/HWY/OOM/pages/ems.aspx

Contact any of the following for more detailed information about management of waste materials found on site:
