#### **OPERATIONS AND MAINTENANCE MANUAL**

**DFI No. D00650** 

# Facility Type: Water Quality Detention Pond/ Swale Combo

## **April, 2018**

#### **INDEX**

- 1. Identification
- 2. Contact Information
- 3. Construction
- 4. Overview
- 5. Haz Mat Spill Feature
- 6. Auxiliary Outlet(High Flow Bypass)
- 7. Maintenance Requirements
- 8. Waste Material Handling

APPENDIX A: Operations Plan and Profile Drawing(s)

APPENDIX B: As-Construction Drawings

Facility Types: WQ Detention Pond/ Swale Combo

DFI- D00650

Location: Pacific Highway 001

Milepost 251.52 to 251.57

#### 1. Facility Contact Information

Chris Carman, ODOT Hydraulics Engineer (503) 986-2691.

#### 2. Construction

Engineer of Record: ODOT Designer - Region 2 Tech. Center,

Chris Carman, (503) 986-2691

Facility construction: 2015 V-File: 48V-008

#### 3. Overview

The swale is located in the NW infield of the I-5/Keubler Interchange. Treatment of pollutants from the highway are achieved through sedimentation and infiltration through the water quality mix shown in section B-B in the operational plan.

#### 4. Facility Haz Mat Spill Feature

The swale can be used to store a volume of liquid by blocking the outlet of the swale. A barrier such as a temporary berm made of sandbags could be used to prevent liquid from draining from the swale.

#### 5. Auxiliary Outlet (High Flow Bypass)

Auxiliary Outlets are provided if the primary outlet control structure can not safely pass the projected high flows. Broad-crested spillway weirs and over flow risers are the two most common auxiliary outlets used in stormwater treatment facility design. The auxiliary outlet feature is either a part of the facility or an additional storm drain feature/structure.

The auxiliary outlet feature for this facility is:

X Designed into facility

#### 6. Maintenance Requirements

Routine maintenance table for non-proprietary stormwater treatment and storage/detention facilities have been incorporated into ODOT's Maintenance Guide. These tables summarize the maintenance requirements for ponds, swales, filter strips, bioslopes, and detention tanks and vaults. Special maintenance requirements in addition to the routine requirements are noted below when applicable.

The ODOT Maintenance Guide can be viewed at the following website:

https://www.oregon.gov/ODOT/HWY/OOM/mg/02/act125\_waterqualityfacilandtables.pdf

The following stormwater facility maintenance table (See ODOT Maintenance Guide) should be used to maintain the facility outlined in this Operation and Maintenance Manual or follow the Maintenance requirements outlined in Appendix C when proprietary structure is selected below:

☑ Table 1 (general maintenance)
∑ Table 3 (water quality biofiltration swales)
∃ Table 4 (water quality filter strips)
∃ Table 5 (water quality bioslopes)
∃ Table 6 (detention tank)
∃ Table 7 (detention vault)
☐ Appendix C (proprietary structure)
☐ Special Maintenance requirements:

#### 7. Waste Material Handling

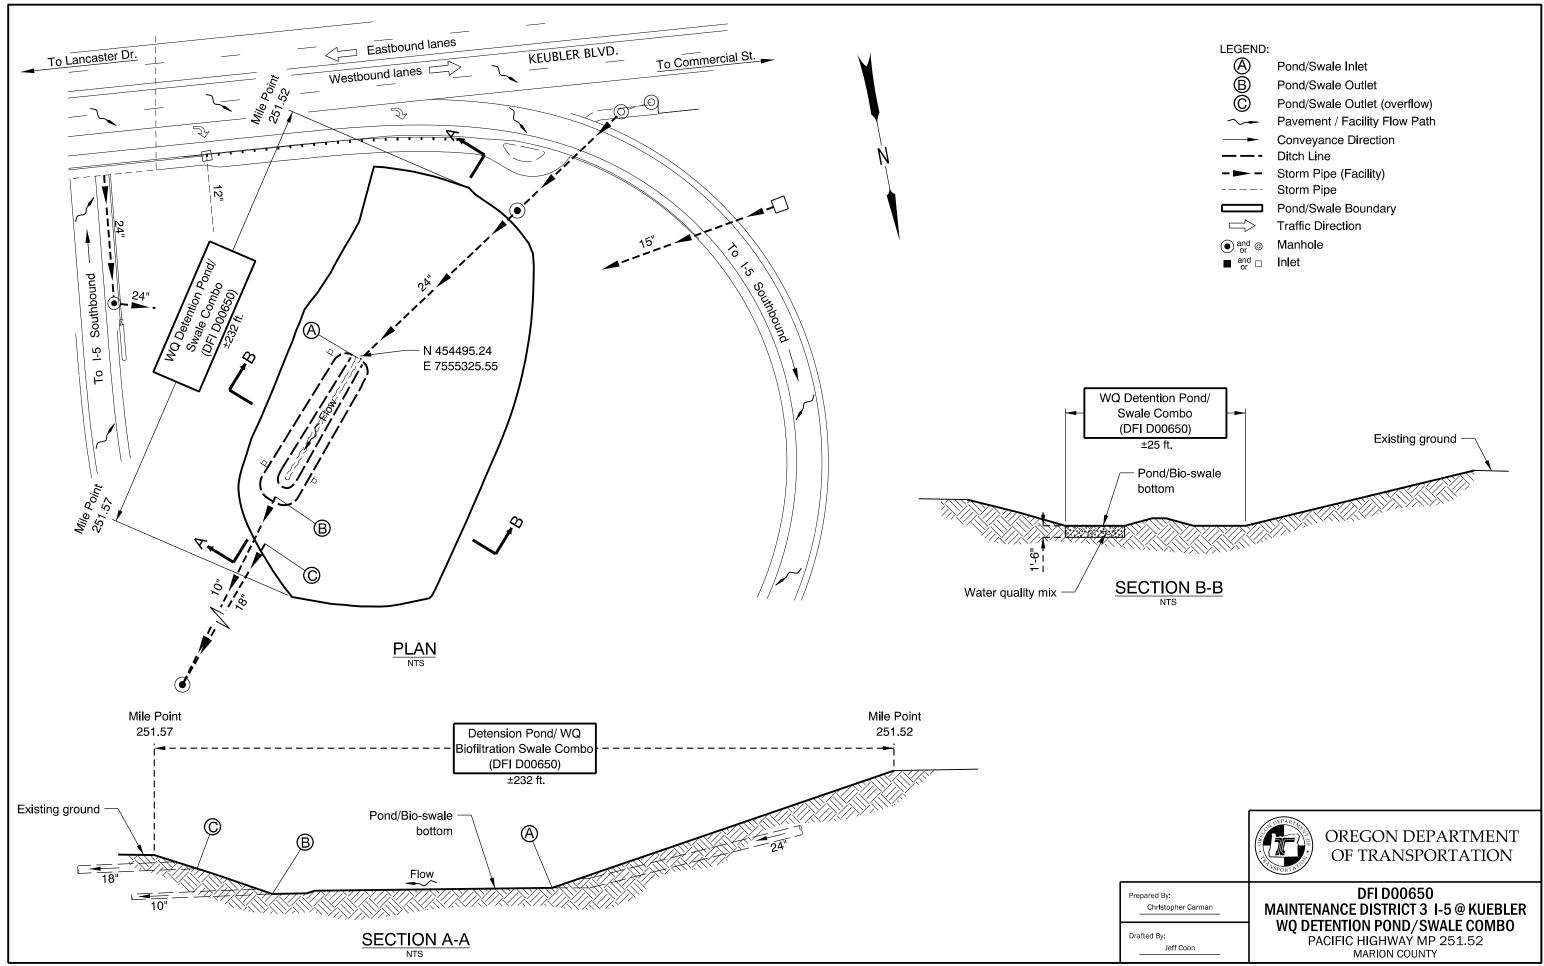

Material removed from the facility is defined as waste by DEQ. Refer to the roadwaste section 5.18 of the ODOT Maintenance Yard Environmental Management System (EMS) Policy and Procedures Manual for disposal options:

https://www.oregon.gov/ODOT/HWY/OOM/EMSdoc/ems manual.pdf

Contact any of the following for more detailed information about management of waste materials found on site:

ODOT Clean Water Unit	(503) 986-3008
ODOT Statewide Hazmat Coordinator	(503) 229-5129
ODOT Region Hazmat Coordinator	(503) 986-2647
ODEQ Northwest Region Office	(503) 229-5263
