## 1. Identification

Drainage Facility ID (DFI): **D00776**  
Facility Type: Water Quality Biofiltration Swale  
Construction Drawings: (V-File Number) 46V-125  
Location: District: 1  
Highway No.: 047  
Mile Post: 16.28;16.30 (beg./end), Left  
Description: This facility is located on the north side of Sunset Highway (US26) at the east end of the West Humbug Creek Bridge (No. 22057).

## 2. Facility Contact Information

Contact the Engineer of Record, Region Technical Center, or Geo-Environmental's Senior Hydraulics Engineer for:

- Operational clarification
- Maintenance clarification
- Repair or restoration assistance

### Engineering Contacts:

Region Technical Center Hydro Unit Manager

Or

Geo-Environmental Senior Hydraulics Engineer (503) 986-3365.

## 3. Construction

Engineer of Record: Consultant Designer – [OBEC Consulting Engineers, Amy Jones, 971-634-2005]

Facility construction: 2014

Contractor: Oregon State Bridge Construction

#### 4. Storm Drain System and Facility Overview

A water quality swale is a flat-bottomed open channel designed to treat stormwater runoff from highway pavement areas. This type of facility is lined with grass. Treatment by trapping sedimentation occurs when stormwater runoff flows through the grass.

This biofiltration swale is designed to treat runoff from the water quality design storm and provide infiltration prior to entering West Humbug Creek. It is located on the south side of Sunset Highway, west of the bridge.

The stormwater runoff sheet flows from paved areas along the north and south sides of Sunset Highway (US 26) Alignment to a drainage curb on both sides of the roadway. Type "G-2" inlets have been constructed to direct the flows from the Highway and into the swale. The location of these are noted on the Operation Plan as points A and B in Appendix A. The inlets outfall to the swale at point C as indicated in Appendix A

Runoff exits the swale through a combination of sheet flow, infiltration, and a 6-inch underdrain pipe. See Figure 2 and Point D on the Operational Plan in Appendix A.

The receiving waterway for the runoff is West Humbug Creek.

A. Maintenance equipment access:

The swale can be accessed directly from the shoulder of the Sunset Highway westbound lane.

B. Heavy equipment access into facility:

- Allowed (no limitations)
- Allowed (with limitations)
- Not allowed

C. Special Features:

- Amended Soils
- Porous Pavers
- Liners
- Underdrain system (6" drain, granular drain backfill & drainage geotextile)

Figure 2: Looking North

## 5. Facility Haz Mat Spill Feature(s)

Spills along the highway can be blocked by placing a cap at the pipe outlet to the swale the inlets indicated as point C in Appendix A.

## 6. Auxiliary Outlet (High Flow Bypass)

There is no auxiliary outlet provided for the water quality swale. Storm events larger than the water quality storm will overtop the swale and sheet flow to the creek downstream of the swale.

## 7. Maintenance Requirements

Routine maintenance table for non-proprietary stormwater treatment and storage/detention facilities have been incorporated into ODOT's Maintenance Guide. These tables summarize the maintenance requirements for ponds, swales, filter strips, bioslopes, and detention tanks and vaults. Special maintenance requirements in addition to the routine requirements are noted below when applicable.

The ODOT Maintenance Guide can be viewed at the following website, under the **Operations and Maintenance Manuals and Maintenance Tables** section:

<https://www.oregon.gov/ODOT/GeoEnvironmental/Pages/Stormwater.aspx>  
[X](#)

The following stormwater facility maintenance table (See ODOT Maintenance Guide) should be used to maintain the facility outlined in this Operation and Maintenance Manual:

- Table 1 (general maintenance)
- Table 2 (stormwater ponds)
- Table 3 (water quality biofiltration swales)
- Table 4 (water quality filter strips)
- Table 5 (water quality bioslopes)
- Table 6 (detention tank)
- Table 7 (detention vault)
- Appendix C (proprietary structure)
- Special Maintenance requirements:

## **8. Waste Material Handling**

Material removed from the facility is defined as waste by DEQ. Refer to the roadwaste section of the ODOT Maintenance Yard Environmental Management System (EMS) Policy and Procedures Manual for disposal options: <http://egov.oregon.gov/ODOT/HWY/OOM/EMS.shtml>

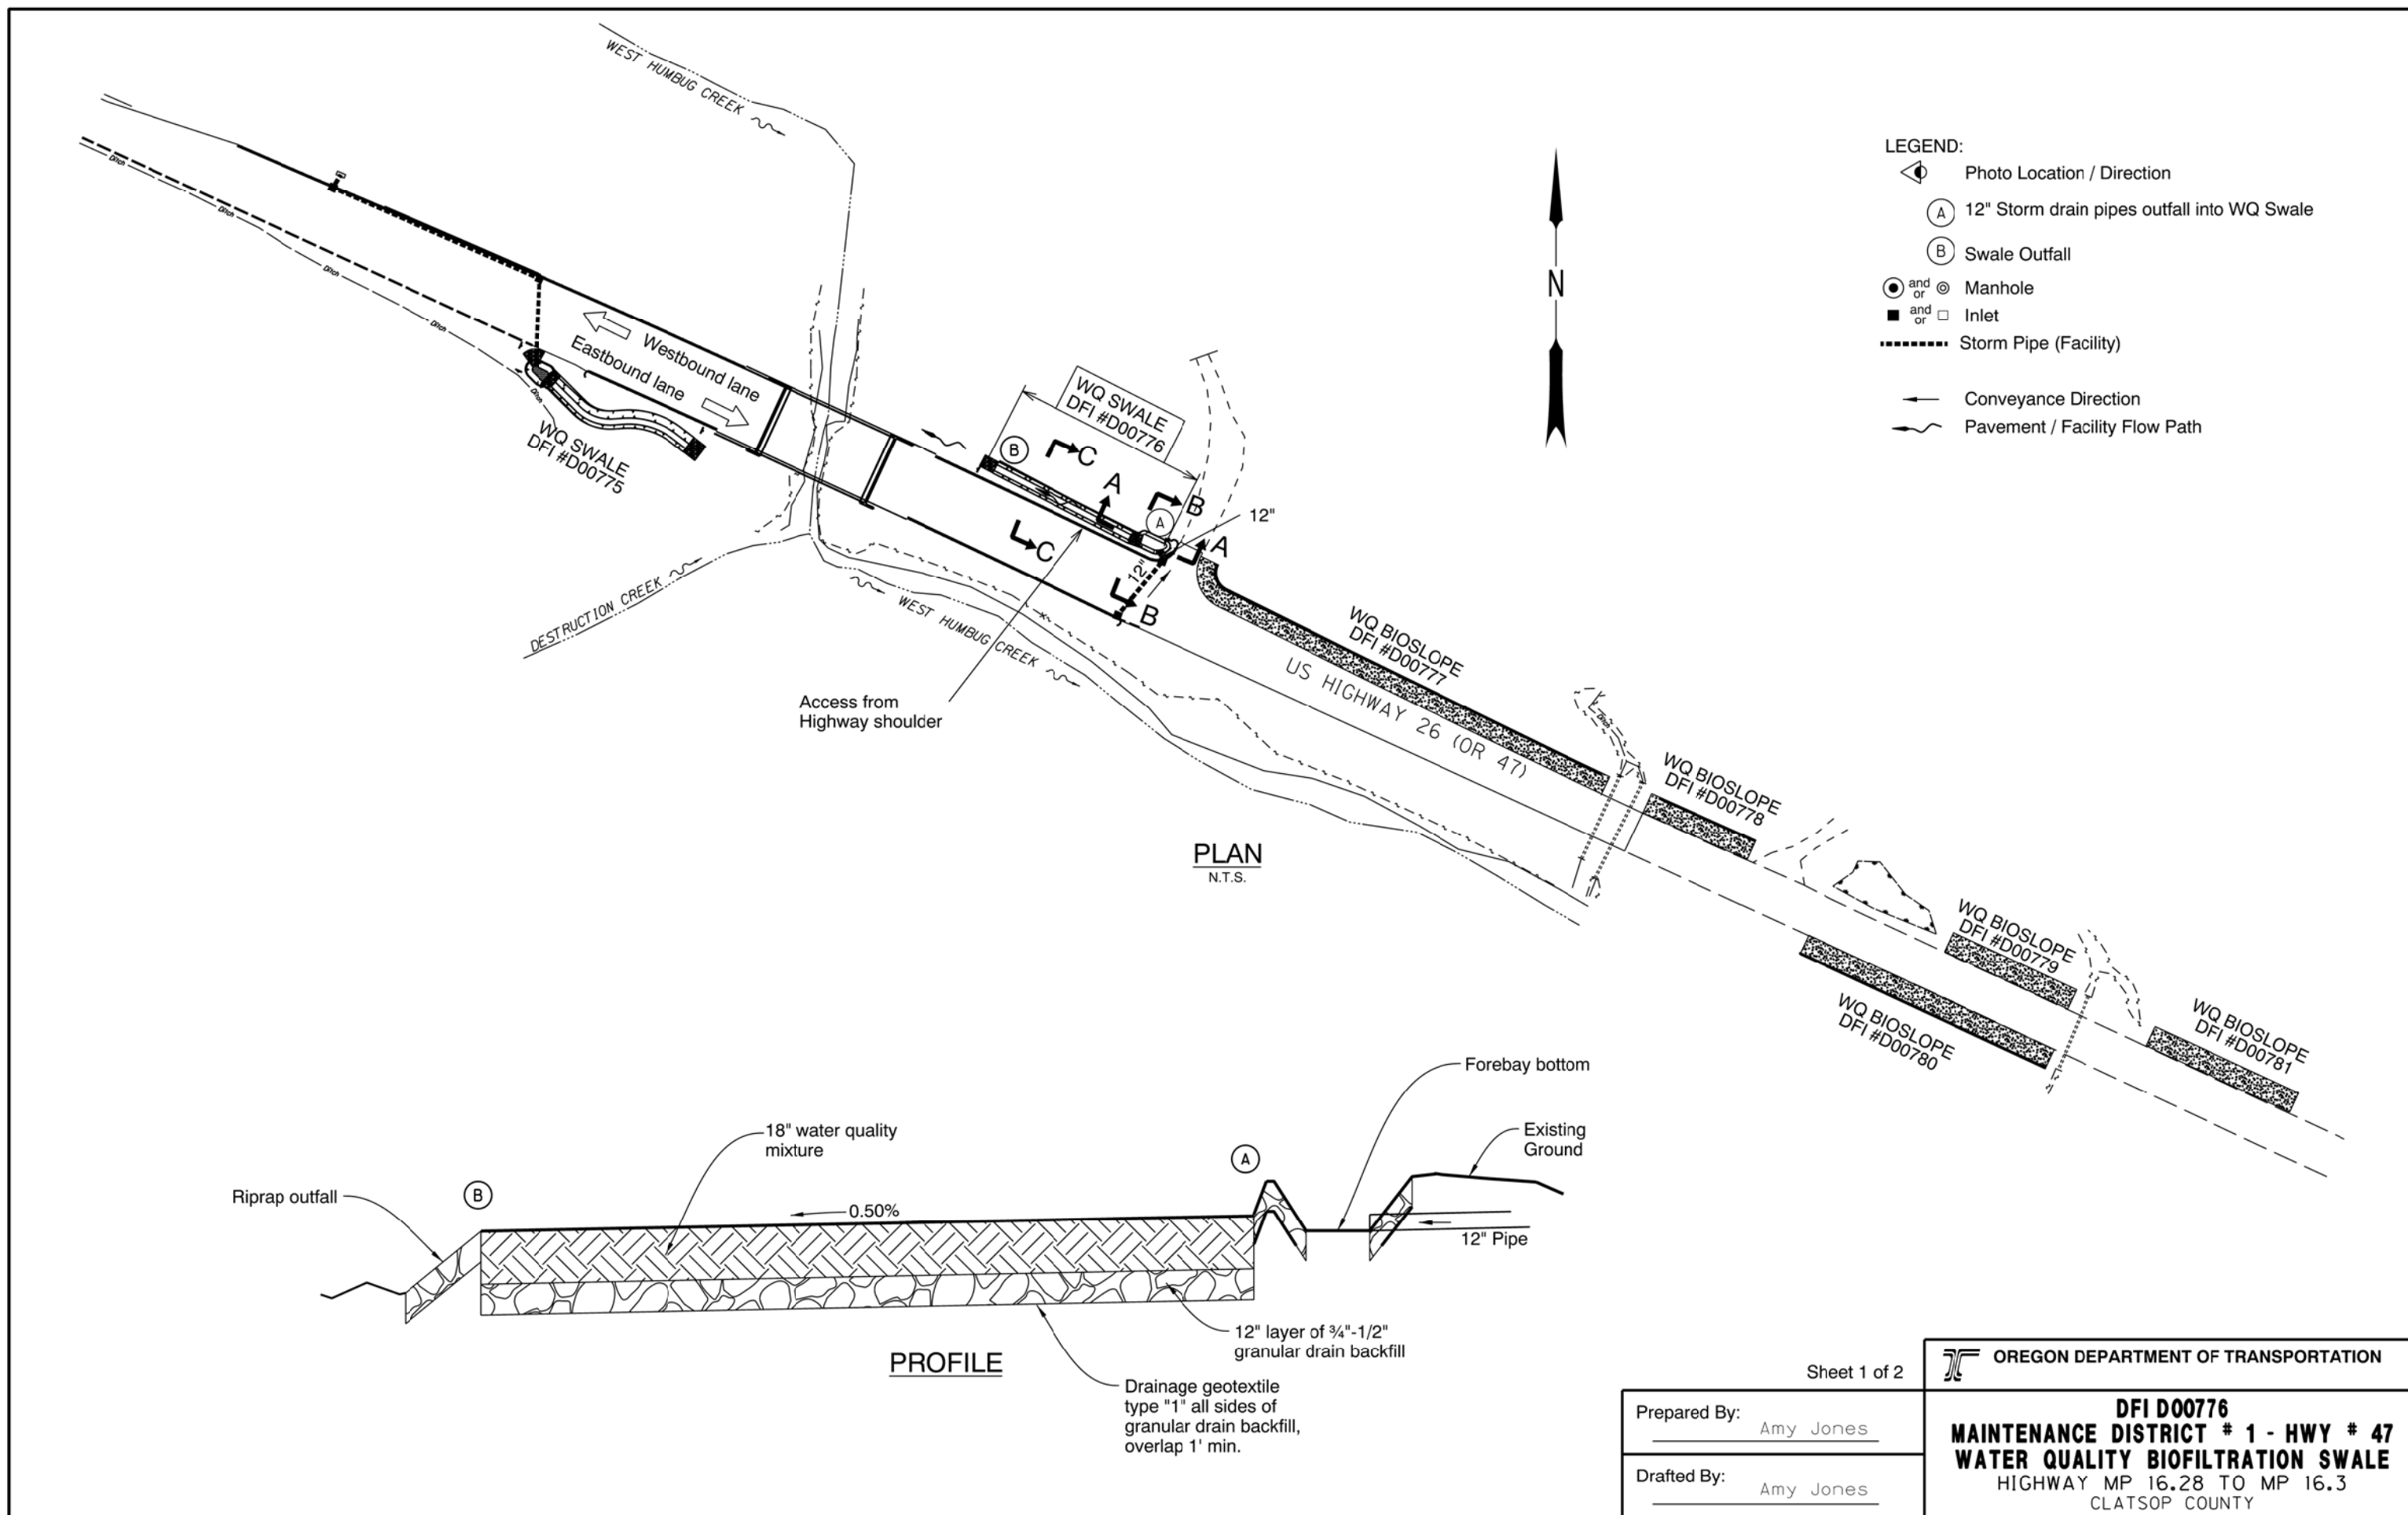

Contact any of the following for more detailed information about management of waste materials found on site:

ODOT Clean Water Unit	(503) 986-3008
ODOT Statewide Hazmat Coordinator	(503) 229-5129
ODOT Region Hazmat Coordinator	(503) 986-2647
ODEQ Northwest Region Office	(503) 229-5263
