OPERATION & MAINTENANCE MANUAL

DFI No. : D01166
Facility Type: Stormwater Planter

September 2018

INDEX

1. Identification

Drainage Facility ID (DFI):	**D01166**
Facility Type:	Stormwater Planter
Construction Drawings:	(V-File Number) 52V-005
Location:	District: 2B
	Highway No.: 026
	Mile Post: 7.26; 7.27 (beg./end)
	Description: This facility is located along the north side of SE Powell Boulevard approximately 200 feet east of SE 122nd Avenue.

2. Facility Contact Information

Contact the Engineer of Record, Region Technical Center, or Geo-Environmental's Senior Hydraulics Engineer for:

- Operational clarification
- Maintenance clarification
- Repair or restoration assistance

Engineering Contacts:

Region Technical Center Hydro Unit Manager

Or

Geo-Environmental Senior Hydraulics Engineer (503) 986-3365.

3. Construction

Engineer of Record:

ODOT Designer – Region 1 Hydraulics, Bruce Council, PE, (503) 731-8319

Consultant Designer – HDR, Christine Higgins, PE, (503) 423-3700

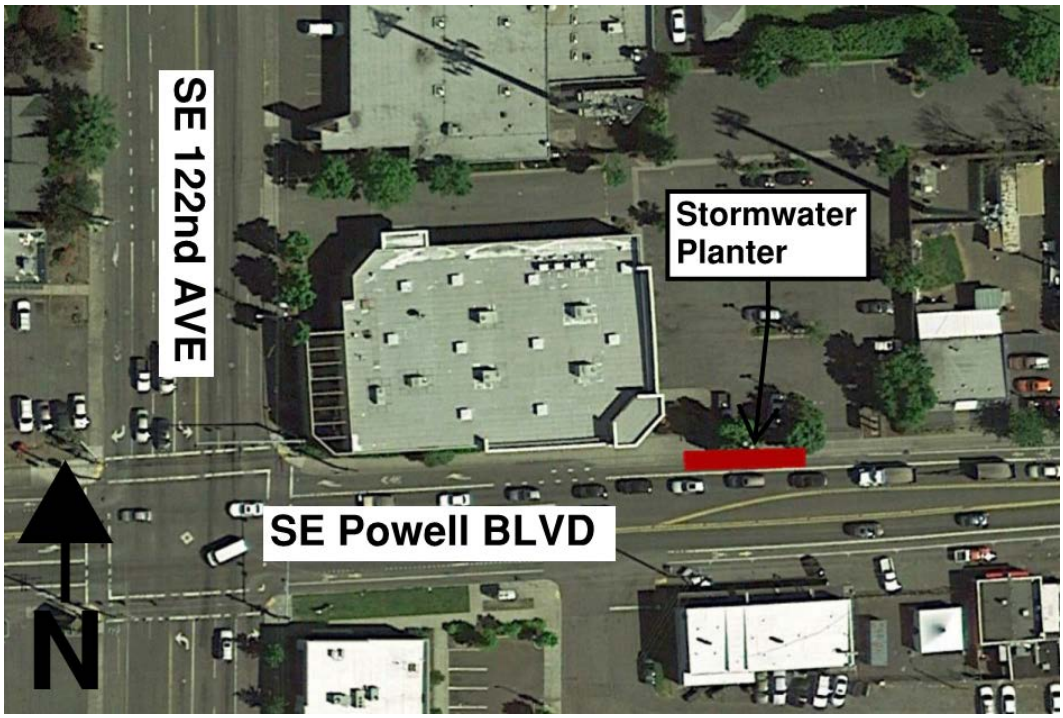
Facility construction:	2019
Contractor:	To be Determined

4. Storm Drain System and Facility Overview

Stormwater planters are structural landscaped reservoirs used to collect, filter, and infiltrate stormwater, allowing pollutants to settle and filter out as the water percolates through the vegetation, growing medium, and gravel. Depending on site conditions, planters can be designed to completely or partially infiltrate the stormwater they receive. They can also be designed as lined facilities where stormwater is temporarily stored. Excess stormwater collects in a perforated pipe at the bottom of the lined planter and drains to an approved discharge location.

This facility is located along the north side of SE Powell Blvd. approximately 200 feet east of SE 122nd Avenue. Refer to Figure 1 for facility location. This facility is approximately 5 inches lower than the adjacent roadway, with 18 inches of water quality soil on top of 18 inches of storage rock.

Figure 1. Facility Location



Stormwater is conveyed into the stormwater planter through evenly spaced curb cut inlets along the side of the stormwater planter adjacent to the roadway, and through notches along the sides of the planter adjacent to the sidewalk. Once the stormwater percolates through the vegetation and water quality soil, it drains out of the facility through a perforated drain pipe located within the storage at the bottom of the facility. The drain pipe is connected directly to a stormwater system located immediately downstream of the stormwater planter. The stormwater will travel to a

sedimentation manhole and eventually to a drywell where it will be infiltrated.

A. Maintenance equipment access:
The facility can be accessed from SE Powell Boulevard

B. Heavy equipment access into facility:

☐ Allowed (no limitations)
☐ Allowed (with limitations)
☒ Not allowed

C. Special Features:

☒ Amended Soils
☐ Porous Pavers
☒ Liners
☒ Underdrains

5. Maintenance Requirements

Routine maintenance table for non-proprietary stormwater treatment and storage/detention facilities have been incorporated into ODOT's Maintenance Guide. These tables summarize the maintenance requirements for ponds, swales, filter strips, bioslopes, and detention tanks and vaults. Special maintenance requirements in addition to the routine requirements are noted below when applicable.

The ODOT Maintenance Guide can be viewed at the following website:

https://www.oregon.gov/ODOT/GeoEnvironmental/Pages/Stormwater.aspx

The stormwater facility maintenance table (See ODOT Maintenance Guide) should be used to maintain the facility outlined in this Operation and Maintenance Manual:

Mark as Required and always include Table 1:

☒ Table 1 (general maintenance)
☐ Table 2 (stormwater ponds)
☐ Table 3 (water quality biofiltration swales)
☒ Table 4 (water quality filter strips)
☐ Table 5 (water quality bioslopes)
☐ Table 6 (detention tank)
☐ Table 7 (detention vault)
☐ Appendix C (proprietary structure)

6. Waste Material Handling

Material removed from the facility is defined as waste by DEQ. Refer to the Roadwaste section of the ODOT Maintenance Yard Environmental Management System (EMS) Policy and Procedures Manual for disposal options:
https://www.oregon.gov/ODOT/Maintenance/Documents/ems_manual.pdf

Contact any of the following for more detailed information about management of waste materials found on site:

ODOT Clean Water Unit	(503) 986-3008
ODOT Statewide Hazmat Coordinator	(503) 229-5129
ODOT Region 1 Hazmat Coordinator	(503) 731-8290
ODEQ Northwest Region Office	(503) 229-5263

Const. type "CG-3" inlet with sump
Inst. 12" storm sew. pipe - 74'
5' depth

(18) Maintain and protect PWB Conduit No. 3
Water pipes over 12-inch in diameter are not shown for confidentiality. Contact Portland Water Bureau for locations.

(19) Remove Pipe - 78'

(20) Remove existing abandoned phone booth

(21) Adjust BES sanitary manhole to finish grade
Minor adjust manhole - 2
Method "B"
(See drg. no. RD360)

(22) Maintain and protect BES sanitary line

(23) Adjust NWN gas valve box to finish grade - 4

(24) Locate buried NWN gas valve box and adjust to finish grade - 3

(25) Relocate NWN gas line (by others)

(26) Maintain and protect NWN gas line

(27) Pothole buried PWB manhole - 1

(28) Adjust PWB water valve box to finish grade - 11

(29) Relocate PGE pole (by others)

(30) Relocate PGE junction box (by others)

(31) Relocate PGE underground electric line (by others)

(32) Relocate PGE meter (by others)

(33) Relocate PGE transformer (by others)

(34) Maintain and protect extg. PGE pole

(35) Relocate CTL underground communication line (by others)

(36) Maintain and protect extg. CTL underground communication line

(37) Maintain and protect extg. CTL pole

(38) Relocate CTL pole (by others)

(39) Adjust inlet - 2
(See drg. no. RD376)

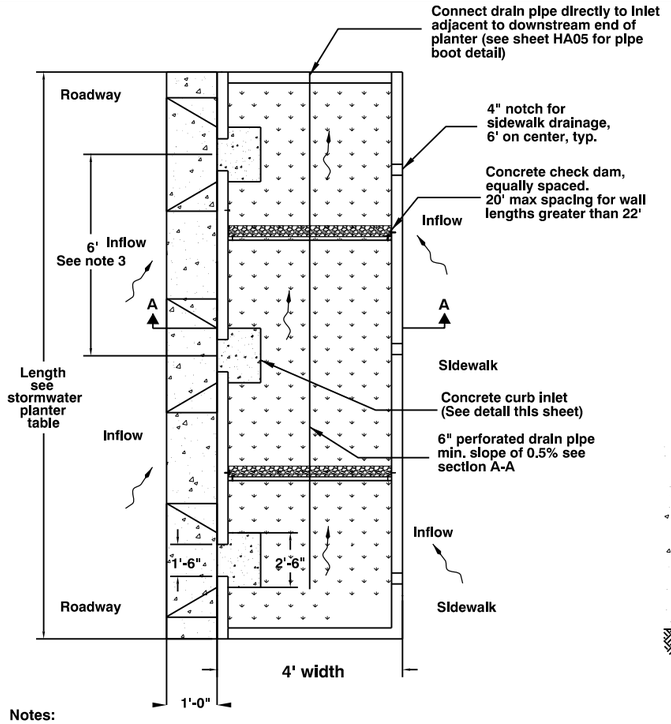
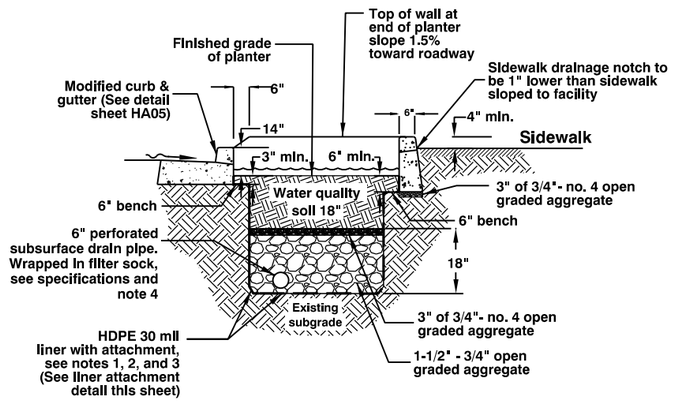
DRAINAGE AND UTILITIES - NOTES

SHEET NO.
C02D



Notes:
1. Match longitudinal slope of planter to slope of the road.
2. If less than 18" is between splash pad and planter end wall, extend pad to wall.
3. Install inlets (6' on center) on all sides of facility that are not adjacent to sidewalk. install 4" notch (6' on center) where adjacent to sidewalk.

PLAN VIEW



SECTION A-A

STORMWATER PLANTER DETAIL
NOT TO SCALE

Notes:
1. Partial or full liner required. See stormwater planter table (this sheet) for requirement.
2. Partial liner located along side of planter adjacent to roadway.
3. Full liner located along all sides of planter.
4. Drain pipe only required for fully lined planters.
5. Scarify the native soil 12" following the initial excavation and before installing water quality soil and rock.

STORMWATER PLANTER TABLE

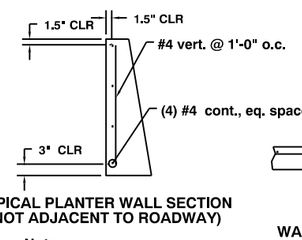
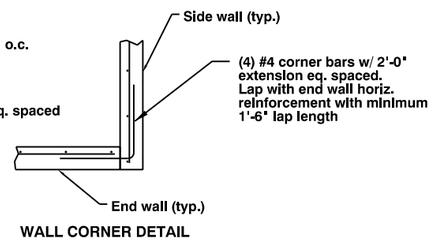
Notes:
1. Adhere liner to concrete with top coat tc moldable sealant, or approved equal.
2. Liner to extend from top of water quality soil to the bottom of excavation.
3. 3" of concrete is required on all sides of attachment. Adjust sidewalk depth as necessary.
4. Secure liner to concrete with 2" aluminum flat bar, placed as directed (around entire facility).
5. Attach flat bar with concrete hit anchors, 24" o.c.
6. Trim excess liner to the top of the flat bar.

LINER ATTACHMENT DETAIL
NOT TO SCALE



TYPICAL PLANTER WALL SECTION (NOT ADJACENT TO ROADWAY)



WALL CORNER DETAIL

Notes:
1. Top of planter walls to be 4" higher than adjacent sidewalk.
2. Bottom of planter walls to be 6" below top of water quality soil.

PLANTER WALL
