

Veterinary Disease Reporting

By law, Oregon veterinarians must report evidence of the specified infections, diseases and conditions listed on this poster. For immediately reportable diseases, both lab-confirmed and clinically suspect cases are reportable.

Laboratory reporting does not substitute the clinician’s responsibility to report. Reports must be made immediately by telephone to the State Veterinarian (503-986-4711).

- Any unidentified vesicular disease
- Any exotic disease or foreign animal disease, even if only suspected
- Any disease of unknown etiology exhibiting highly pathogenic or lethal effect
- Any exotic vector (flies and fly larvae, mites, and ticks)
- Any emerging disease: A disease, infection, or infestation in domestic or wild animals that is a threat to terrestrial animals, aquatic animals, or humans, and meets one of the following criteria:
 - » An unknown agent that is causing disease in a herd/flock/premise and has the potential to result in a significant animal or public health impact, and applied diagnostic tests have yielded negative or non-definitive results
 - » A newly identified agent that is causing disease in a herd/flock/premise and has the potential to cause significant animal or public health impact, or is occurring in multiple herds/flocks/premises
 - » A previously identified or known pathogenic agent that has a change in epidemiology

Multiple-Species Diseases	Akbane • Anthrax • Bovine Tuberculosis • Bluetongue (serotype 8) • Brucellosis (<i>B. abortus</i> , <i>B. mellitensis</i> , <i>B. suis</i>) • Crimean-Congo hemorrhagic fever • Epizootic hemorrhagic disease • Equine encephalomyelitis (Eastern) • Equine encephalomyelitis (Western) • Equine encephalomyelitis (Venezuelan) • Foot and mouth disease • Glanders • Heartwater • Japanese encephalitis • Melioidosis • New World screwworm • Old World screwworm • Pseudorabies • Rabies • Rift Valley fever • Rinderpest • SARS-CoV-2 • Surra • Trichinellosis • Vesicular Stomatitis • West Nile virus
Poultry Diseases	Duck viral • Fowl typhoid • Highly pathogenic avian influenza • Low pathogenic avian influenza (H5 or H7 subtypes) • Pullorum disease • <i>Salmonella enteritidis</i> • Turkey rhinotracheitis • Virulent Newcastle disease
Cattle Diseases	Babesiosis • Bovine spongiform encephalopathy • Contagious bovine pleuropneumonia • Hemorrhagic septicemia • Lumpy skin disease • Malignant catarrhal fever • Theileriosis • Trichomoniasis • Trypanosomosis
Sheep & Goat Diseases	Contagious caprine pleuropneumonia • Mange • Nairobi sheep disease • Peste des petits ruminants • Scrapie • Sheeppox and goatpox
Horse & other Equine Diseases	African Horse Sickness • Contagious equine metritis • Dourine • Equine infectious anemia • Equine piroplasmiasis • Equine rhinopneumonitis/ equine herpesvirus-1 myeloencephalopathy (EHV1-EHM) • Hendra virus
Farmed Deer and Elk Diseases	Chronic wasting disease
Rabbit & Hare Diseases	Myxomatosis • Rabbit hemorrhagic disease
Swine Diseases	African swine fever • Classical swine fever • Nipah virus • Swine vesicular disease • Vesicular exanthema
Other Diseases in Domestic Animals	Camelpox • Leishmaniasis

Notifiable Disease Reporting

By law, Oregon veterinarians must report laboratory confirmed cases of the specified infections, diseases and conditions listed on this poster within 15 days of confirmation. **Cases confirmed by laboratories which automatically report to the Oregon Department of Agriculture do not need to be reported by the veterinarian.** A list of participating laboratories and reporting forms are available at <https://oda.direct/diseases>

Multiple-Species Diseases	Bluetongue (serotypes other than 8) • Echinococcosis/hydatidosis • Paratuberculosis (Johne’s disease) • Q fever • Tularemia
Poultry Diseases	Avian chlamydiosis/psittacosis • Avian Infectious bronchitis • Avian infectious laryngotracheitis • Avian mycoplasmosis • Infectious bursal disease • Infectious coryza
Cattle Diseases	Anaplasmosis • Bovine genital campylobacteriosis • Bovine viral diarrhea • Enzootic bovine leukosis • Infectious bovine rhinotracheitis • Infectious pustular vulvovaginitis • Malignant catarrhal fever
Sheep & Goat Diseases	Caprine arthritis and encephalitis • Contagious agalactia • Enzootic abortion of ewes • Maedi-visna/ovine progressive pneumonia • Ovine epididymitis • Salmonellosis
Horse & other Equine Diseases	Equine influenza (virus type A) • Equine rhinopneumonitis EHV-1 (non EHM) • Equine viral arteritis • Pigeon fever • Strangles
Swine Diseases	Cysticercosis • Porcine reproductive and respiratory syndrome • Swine Enteric Coronavirus Diseases • Swine Influenza • Transmissible gastroenteritis
Dog & Cat Diseases	Canine Distemper Virus • Canine Parvovirus • Feline Panleukopenia • Heartworm disease • Virulent Feline Calicivirus
