

U.S. 26 (Sunset Highway) Paving Project: Cornelius Pass Road to Glencoe Road

Project Overview

Work begins this month to repave U.S. 26 (Sunset Highway) in both directions from Cornelius Pass Road to Glencoe Road. We are also making repairs on two bridges and replacing a culvert under the highway.

Work will finish by the end of the year.

Project Benefits

- A new road surface will improve the overall quality of U.S. 26, resulting in a smoother and safer highway for drivers.
- Repairing and resurfacing two bridges preserves and extends their lifespan, allows them to continue to meet all safety standards and reduces the need for costlier replacements.
- Culvert replacement ensures that water continues to drain away from the highway.

Construction Impacts

In order to maintain a safe work zone for travelers and construction crews, travel lanes and on- and off-ramps will close to traffic at night and during non-commute hours. Emergency vehicles will have access through work zones. Nighttime traffic delays during work are expected. Specifics include:

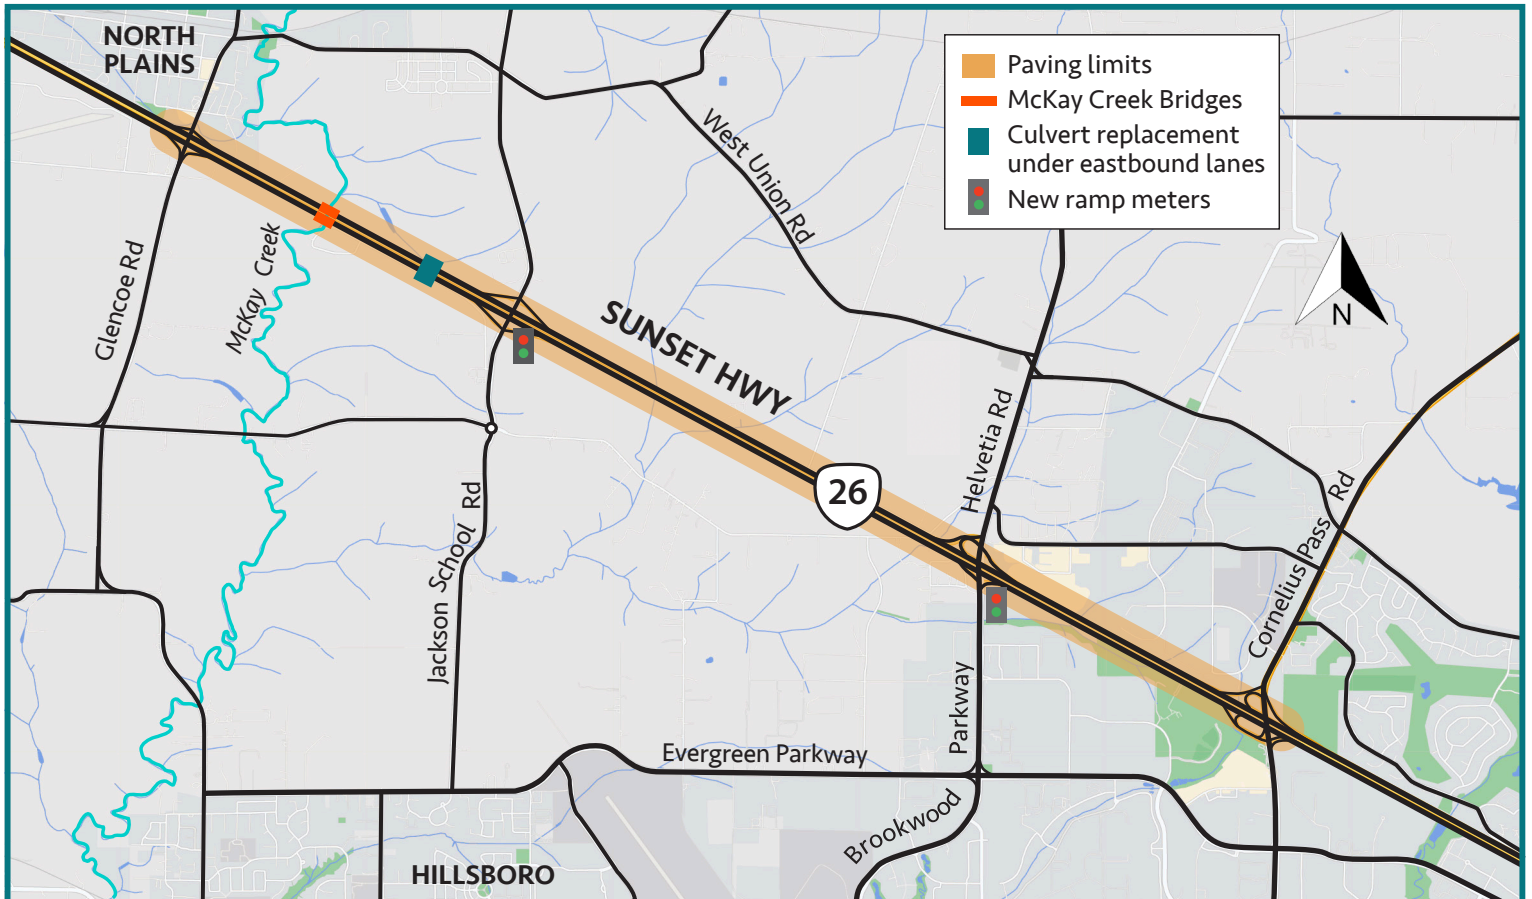

- Intermittent nighttime lane and ramp closures on U.S. 26.
- Up to seven nights of U.S. 26 traffic detoured off the highway (one direction at a time) between Cornelius Pass Road and Brookwood Parkway. A detour will be in place.
- Highway shoulder closures with detours for people who bike along U.S. 26.

Noise Impacts During Construction

Expect periodic construction noise, from heavy equipment, construction trucks, paving machines, generators and compressors. Those working or living near the work areas may hear construction noise.

Please sign up for email alerts and check the project website for updates.

Overview of Work Area

U.S. 26 (Sunset Highway) Paving Project: Cornelius Pass Road to Glencoe Road

Project Elements

- **Paving:** Repave approximately six miles of U.S. 26 in both directions from Cornelius Pass Road to Glencoe Road. This section of U.S. 26 travels through Washington County and includes Hillsboro and North Plains. Crews will repair surface cracking, pavement rutting and deterioration before paving.
- **Bridges:** Repair and resurface the bridge deck and replace bridge joints on both U.S. 26 bridges over McKay Creek.
- **Culvert:** Remove and replace a partially collapsed 30-inch culvert under U.S. 26 eastbound.
- **Ramp meters:** Install new ramp meters on the Jackson School Road eastbound on-ramp and the Brookwood Parkway eastbound on-ramp.

Funding

The total project cost is \$12.9 million.

ODOT
123 NW Flanders St
Portland, OR 97209

Coming this month

ODOT is repaving U.S. 26 between Cornelius Pass Road and Glencoe Road.
