

Increase Visibility And Recognition Of Oral Health Efforts

- Improve oral health webpage, social networking, and branding
- Engage and involve community stakeholders to identify oral health needs, impact of inequities, and solutions.
- Improve data visibility
- Produce webinars for providers, CBOs
- Engage Community Partner Outreach Program

Internal

Facilitate Healthcare Workforce (HCWF) Growth

- Partner with external stakeholders to identify opportunities in workforce development and retention
- Offer oral health training for non-oral health providers
- Provide training on trauma-informed care to oral health providers
- Increase oral health sites in National Health Services Corp
- Increase diversity of providers through collaboration with OHSU School of Dentistry

External - Access

Leverage Technology Through Investment In Telehealth

- Identify telehealth opportunities through engagement with delivery systems and the HCWF Committee
- Engage Office of Health Information Technology in continued research, to improve the interoperability of electronic medical/dental records
- Provide TA to systems of care and providers to support teledentistry

External - Integration

Optimize Use Of Existing Clinical Infrastructure

- Identify opportunities to advance oral health activities at School-based Health Centers
- Collaborate with CCOs and DCOs providing care at SBHCs
- Increase participation in school oral health and dental sealant programs
- Provide resources to support closed-loop referrals
- Support development of CDT codes for oral health provider HbA1c testing and vaccination; improve reimbursement, training issues for dentists
