List of Provider Organizations for Oregon's Cost Growth Target Program, 2018-2020

About

Oregon's sustainable health care cost growth target applies at four levels: statewide, by market, by payer, and by provider organization. The Cost Growth Target Implementation Committee provided several parameters for determining which provider organizations should be held responsible for their performance relative to the cost growth target (see details on the next page).

- Provider organizations that can be held accountable for Total Medical Expenditures
- Provider organizations that have sufficient patient volume

This document lists the provider organizations that have been identified as meeting the criteria for inclusion in the Cost Growth Target Program from the initial cost growth target data submission covering CY 2018 – 2020.

What does this mean for provider organizations?

Cost Growth Target Program implementation is phased in over the next several years (see Timeline on the next page). OHA will not publicly report performance relative to the cost growth target for this initial measurement period for any provider organizations on this list, nor will any accountability measures such as Performance Improvement Plans be applied.

OHA will reach out to provider organizations on this list this spring to provide more information about the Cost Growth Target Program and to share and validate data from the initial data submission. This will be an opportunity for provider organizations to better understand the Cost Growth Target Program and discuss their cost growth and underlying cost drivers. These conversations will be a 'practice run' before future years where cost growth target performance is publicly reported and any accountability measures apply.

Cost Growth Target Implementation Timeline¹

| CGT Year | Initial | 1 | 2 | 3 | 4 | 5 |
|-----------------------|-------------|---------|---------|---------|---------|-----------------------------|
| Cost growth between | 2018 – 2020 | 20 – 21 | 21 – 22 | 22 – 23 | 23 – 24 | 24 - 25 |
| Payers submit data in | 2021 | 2022 | 2023 | 2024 | 2025 | 2026 |
| Performance reported? | No | Yes | Yes | Yes | Yes | Yes |
| PIPs? | No | No | Yes | Yes | Yes | Yes |
| \$ Penalty? | No | No | No | No | No | Yes (based on Years 1-5) |

Implementation Committee Parameters for Provider Organizations²

Provider organizations that can be held accountable for Total Medical Expenditures

Provider organizations that can be held accountable for Total Medical Expenditures include only those organizations that could in theory take on contracts where they are responsible for the total cost of care because they (1) include primary care providers who direct a patient's care, and/or (2) can influence where a patient receives care to promote high value providers and

These include health systems, hospitals with primary care providers, medical groups with primary care providers, and a subset of specialists that provide care coordination (e.g., some oncologists) or provide a majority of primary care-like services.

Health care cost growth is measured for provider organizations, not individual clinicians.

care.

List of Provider Organizations for Oregon's Cost Growth Target Program, 2018 - 2020

Provider organizations that have sufficient patient volume

Provider organizations must have sufficient patient volume to be able to detect accurate and reliable changes in annual per capita Total Medical Expenditures, and to help prevent situations where smaller provider organizations may exceed the health care cost growth target due to a few unusually complex and expensive cases.

Sufficient patient volume is defined as: Provider organizations with at least 10,000 unique all-payer attributed lives, or at least 5,000 attributed lives within any one market (Medicaid, Medicare, Commercial). To align with CGT data submissions, these thresholds were converted to provider organization member months: at least 120,000 member months across all markets or at least 60,000 member months within one market.

How Attribution Works

The provider organizations in Oregon that meet the above criteria for inclusion in the Cost Growth Target Program are identified using payer data submissions each year. Payers attribute members to specific provider organizations using a primary care-based attribution method.³

Primary care attribution includes attribution to organizations (i.e., hospitals, health systems, medical groups, federally qualified health centers, independent practice associations, etc.) that employ or contract with primary care providers.

Attribution includes both member choice of provider and methodologies to attribute a member to a specific organization based on utilization or other factors. Not all of a health plan's members will be attributed. Payers must attribute members using three hierarchical tiers:

| Tier 1 | Member selection : Members who were required to select a primary care provider or a primary care home by plan design should be assigned to that primary care provider's organization. |
|--------|---|
| Tier 2 | Contract arrangement: Members not included in #1 who were attributed to a primary care provider or a primary care home during the measurement period pursuant to a contract between the payer and provider should be attributed to that primary care provider's organization. For example, if a provider is engaged in a total cost of care arrangement, than the payer may use its attribution model for that contract to attribute members. |
| Tier 3 | Utilization: Members not included in #1 or #2 who can be attributed to a primary care provider or a primary care home based on the member's utilization, using the payer's own attribution methodology. |

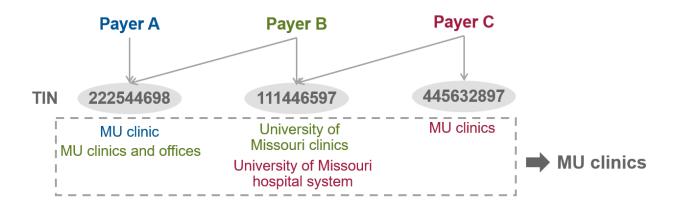

³ Cost Growth Target CGT-2 Data Specification Manual, version 1.2, 2021. https://www.oregon.gov/oha/HPA/HP/Cost%20Growth%20Target%20documents/CGT-2-Data-Specification-Manual.pdf

All attributed lives were included in identifying the provider organizations below.

Methodology

Provider organizations were identified using finalized CGT files from all reporting payers. Data in the PROV_ID tab was analyzed to determine overlapping TINs and the greatest common provider entity. This process created a "Master TIN", a dummy variable OHA can relate back to the TIN and provider organization name lists.

Example of the logic:

In this example, the Master TIN would be 222544698 (identified as the first one listed, it is not the most correct but a unique ID that OHA uses to link back to the original list of TINs). This Master TIN would be associated with the following TINs (222544698, 111446597, and 445632897) since all three TINs have names that are identified to be the same provider organization when all payers' CGT-1 files are examined. OHA would call this provider entity "MU clinics" based on logic and most common name used. This logic was implemented across all finalized payer files. Once the Master TINs were aggregated, OHA reviewed the total member months for each provider organization by year and by market.

Provider Organizations (as of 4/14)

The list of provider organizations is sorted by 2020 member months⁴. Not all provider organizations listed below meet the criteria for each year in the initial measurement period.

For inclusion in the Cost Growth Target Program, a provider organization must have at least 120,000 member months across all markets, and at least 60,000 in at least one market (e.g. Medicaid, Medicare, Commercial). Provider organizations that met the member month criteria for one market are highlighted.

| Provider Organization | 2018 mm | 2019 mm | 2020 mm |
|---|-----------|-----------|-----------|
| Kaiser Permanente | 5,457,821 | 5,648,230 | 5,697,429 |
| Providence Health & Services | 2,319,046 | 2,352,354 | 2,359,993 |
| Legacy Health | 656,522 | 654,824 | 775,990 |
| PeaceHealth | 796,751 | 761,932 | 674,275 |
| Oregon Health & Science University (OHSU) | 550,404 | 550,725 | 580,275 |
| Salem Clinic | 363,117 | 366,277 | 558,645 |
| Oregon Medical Group | 552,483 | 521,893 | 514,191 |
| Yakima Valley Farm Workers Clinic | 229,872 | 249,266 | 497,010 |
| Multnomah County Health Department | 466,029 | 474,165 | 487,153 |
| Praxis Medical Group | 443,565 | 434,250 | 468,973 |
| North Bend Medical Center | 414,034 | 426,270 | 449,190 |
| Adventist Health | 338,171 | 361,856 | 398,695 |
| Virginia Garcia | 330,105 | 371,902 | 379,404 |
| Salem Health | 130,465 | 135,087 | 364,004 |

⁴ This list uses validated CGT files as of 4/14 (three reporters are still in validation and their data is not included here)
