

gabbii™

Making all late stage
breast cancer obsolete.

- Breast cancer is affecting women earlier and earlier, in fact, breast cancer rates amongst women 40 and under have increased by 3% for the last 5 years.
- If breast cancer is caught early, the survival rate is 99% vs. if it is caught late, the survival rate is less than 30%!
- The only way to ensure early detection, is to know your risk. Which is where Gabbi comes in...

gabbi.

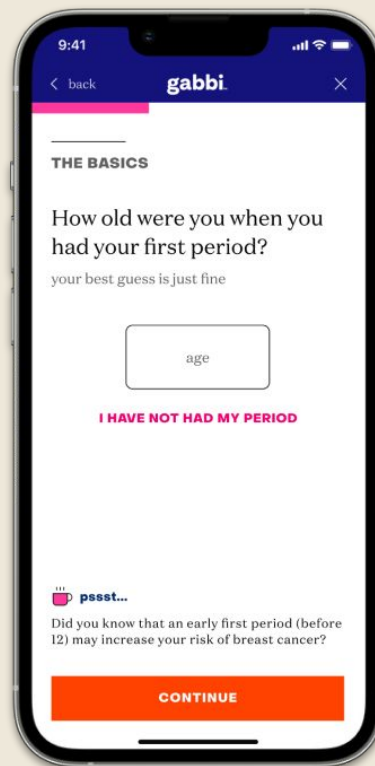

WHO WE ARE:

Gabbi is a woman's virtual breast specialist—ensuring every woman knows her risk and has access to early detection via telehealth.

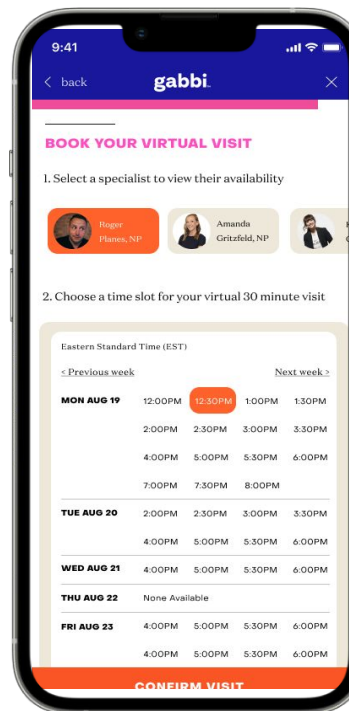

LEARN YOUR RISK of breast cancer by completing a simple, easy to use questionnaire.
