

CD 101 - The Basics of Communicable Disease Control July 9 & 10, 2024 – 8:30 AM-12:30 PM

AGENDA - DAY 1

Welcome, Introductions, and Pre test		8:30 – 8:55	
Communicable Diseases: A Primer	Meagan McLafferty	8:55 – 10:00	
List six types of communicable pathogens; describe the difference between droplet and airborne transmission and name three diseases typically transmitted via the airborne route; give an example of an incubation period and a communicable period.			
Break		10:00 – 10:15	
Disease Reporting Meagan McLafferty10:15 – 11:30 Define what diseases/conditions are reportable, the rationale and deadlines; to include reporting laws, reporting progression, and confidentiality.			
Break		11:30 – 11:45	
Laboratory Tests Overview Sarah King			
Wrap Up and Post-Test		12:25 – 12:30	
AGENDA – DAY 2			
Welcome and Pre-Test		8:30 – 8:45	
Investigative Guidelines Heather Hertzel			
Break		9:50 – 10:05	
OSPHL Overview Determine what tests are available Health Lab (OSPHL) and how to ord requirements for common tests, a	der them; to include specimen	10:05 – 11:05	

Break	11:05 – 11:20
Communicable Disease Exercises and Resources Heather Hertzel Use the Investigative Guidelines and testing algorithms to determine appropriate public health interventions given example scenarios. Reviewing emerging topics of interest and available resources.	11:20 – 12:15
Wrap up, Post-test and Evaluation	12:15 – 12:30
