

120Water™

Your Compliance Journey Partner

120Water is Oregon's chosen LCRR/I solution, informed by your data and powered by our platform.

What Makes Us Different?

At 120Water, we believe effective data management translates into efficient program management. With our software, you can centralize key service line data and make that data actionable to execute the various programs and communication required under LCRR/LCRI.

The Lead and Copper Rule Revisions and Lead and Copper Rule Improvements are a new and uncharted space for utilities to navigate.

Trusted by states and recommended by the National Rural Water Association, this is the only tool that enables utilities to tackle the compliance journey as comprehensively as 120Water.

In Just One Platform, You Can:

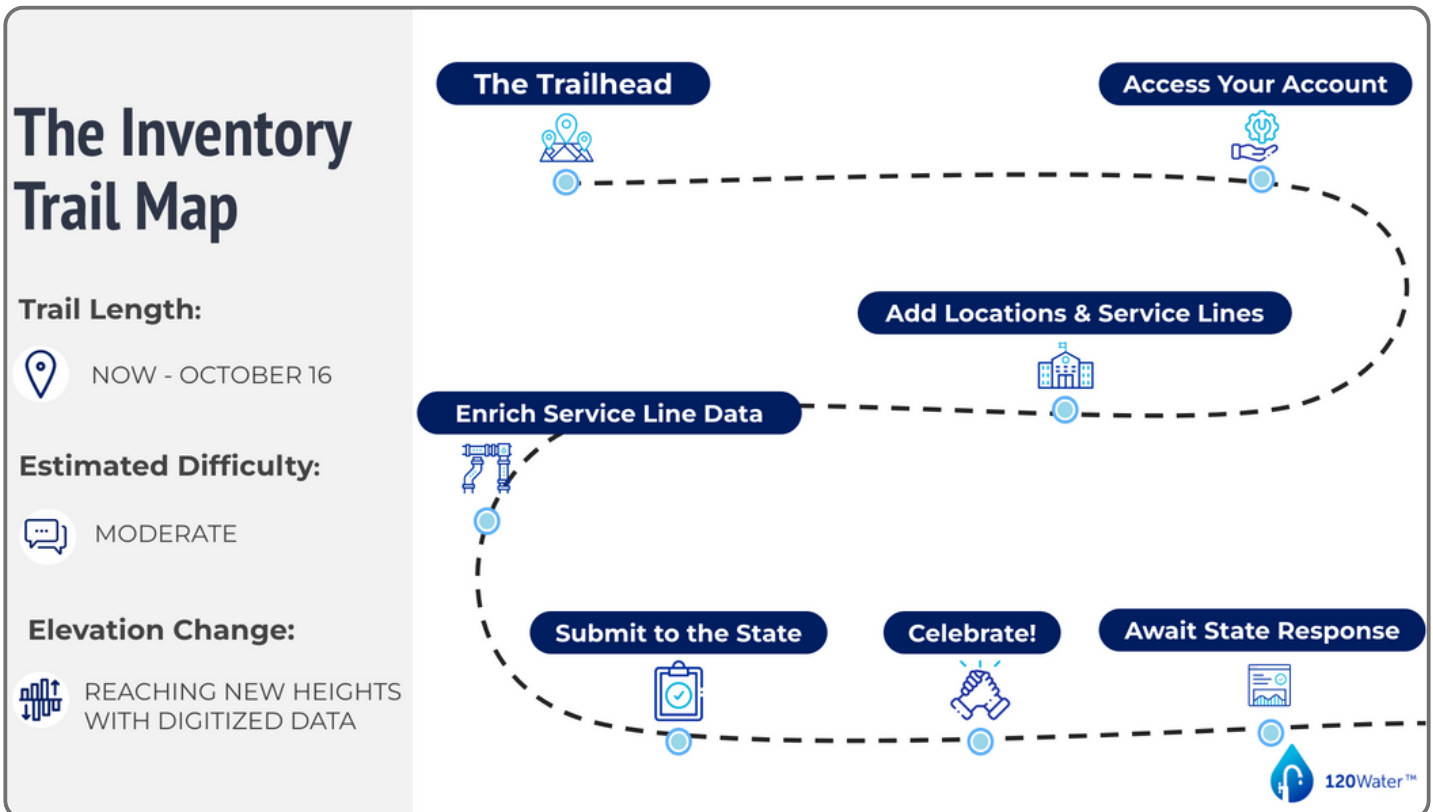

- ✓ Upload your location, contact, and service line data into a centralized database
- ✓ Add material classifications, verification information, and create your service line inventory
- ✓ Submit your inventory directly to OHA
- ✓ Upgrade to our Pro Portal and power your inventory communications, sampling, replacement programs and more!

PWS Portal is a free tool you can use to develop and submit your service line inventory to the Oregon Health Authority due to our partnership. Scan the QR code to gain access to your account and training information.

Get Started on the Journey Now

Every journey needs a good map. All Community Water Systems and Non-Transient Non-Community Water Systems in Oregon are required to submit a location-based inventory to OHA by Wednesday, October 16, 2024. Below is the path to success.

120Water contains built-in data validation and QA/QC checks to ensure that you are adding all the required data for a valid submission. Once completed, you will have the foundation to power the next phase in your compliance journey: communications, sampling, verification, and replacement.

From gaining access to your account to enriching your service line data, the Support Team at 120Water is there to help along the way. If you have questions as you navigate the platform, utilize our Help Center or contact support@120water.com.

Help is here.

Navigate compliance confidently with the newly launched 120Water PWS Help Center.
