Name of Organization	Type of Organization	Funding Amount	Geography	Project Description
African American Alliance for Homeownership	Nonprofit organization	\$750,000	Statewide	This project will address energy efficiency, home remediation, and deferred maintenance issues found after conducting home energy assessments. This will be completed for and in partnership with low-income households, particularly from the Black community and other communities of color in Portland and surrounding areas.
American Lung Association	Nonprofit organization	\$750,000	Statewide	The project will serve 150 low-income households in Coos, Crook, Harney, Grant, and Union counties, in which at least one household member is living with a chronic lung disease. Each household (homeowners and renters) will receive a virtual whole home assessment and action plan; 60 of the households will receive remediation services or supplies to improve health and safety in the home.
APANO Communities United Fund	Nonprofit organization	\$523,952	Tri-County	This project will expand the service area and capacity of the Healthy Home and Energy Saving Program, serving members of Asian Americans, Native Hawaiians, and Pacific Islander community, specifically residing in East and Southeast Portland neighborhoods, including the Jade District and the surrounding tri-county area.
Central Oregon Regional Housing Authority	Local housing authority	\$583,370	Central Oregon	The project aims to make health, accessibility, safety, and preservation improvements on three Housing Works-owned properties with a total of (33) units that serve disabled and very low-income people.
City of Portland, Oregon	Local government	\$750,000	Multnomah Only	This project expands the scope and capacity for eligible households participating in the City of Portland’s repair programs including Portland’s Empowered Neighborhoods Program (with a focus on areas east of 82 nd Ave.); Portland Housing Bureau’s HUD Healthy Homes Program; and Community Development Block Grant funded repairs within the city.

Name of Organization	Type of Organization	Funding Amount	Geography	Project Description
Columbia Cascade Housing Corp.	Nonprofit organization	\$750,000	Columbia Gorge	Re-starting Columbia Cascade Housing Corp’s Home Repair Program to provide critical repairs to low-income households in Hood River, Sherman, and Wasco Counties.
Communities in Action dba Community in Action	Community Action Agency	\$211,191	Eastern Oregon	Completion of home repair projects that will leverage with current available funding from Federal and/or private weatherization, Community Development Block Grant and Rural Development funds for low-income clients in rural Malheur and Harney Counties.
Community Action Team of Columbia County, Oregon	Community Action Agency	\$750,000	North Coast	Community Action Team of Columbia County, Oregon will provide Healthy Home repairs to qualified client households in Clatsop, Columbia, and Tillamook counties in rural Northwest Oregon. This program will provide more holistic approach to necessary repairs when possible, by leveraging other funding sources to provide the most comprehensive project possible to the clients. These sources may include other sources such as Weatherization, other State and private funding sources and will utilize the OHA Healthy Homes funds for the necessary repairs to low- and very-low-income households as grants and 0% no payment loans.
Community Connection of Northeast Oregon, Inc.	Community Action Agency	\$438,013	Eastern Oregon	This project supplements existing Weatherization work and supports needed health and safety repairs for homeowners and renters in incorporated and unincorporated Wallowa, Union, Baker, and Grant counties.
Community Energy Project	Nonprofit organization	\$750,000	Tri-County	Project will expand health-focused critical repair services to Black, Indigenous, and People of Color / low-income households throughout Multnomah, Washington, and Clackamas Counties. Project braids existing funding to address climate-related hazards through energy retrofits, home energy scores, and other existing processes.
