

Summary of Oregon Immunization Program (OIP) Office Hours - December 02, 2024

- **Welcome and Introduction:**

- Jill Johnson hosted the meeting and thanked participants for attending.
- **Help Desk and Information Access:** Reminders were given about the OIP Help Desk and staying connected.
- **OIP Help Desk:** VFC.help@odhsoha.oregon.gov or 1-800-980-9431
- **OIP Partner Listserv:** To receive Immunization Program updates via email, contact the Help Desk to be added to the distribution list.
- [OIP Office Hours Summaries](#)

- **Announcements:**

- [Dr. Offit Webinar \(CHOP\)](#) – “Preventing the Next Pandemic: Why it’s important to know the origin of SARS-CoV-2” on 12/4 at 9 a.m.
- [Boost Oregon Webinar](#) – “Addressing Vaccine Hesitancy: Lessons from Motivational Interviewing”, 12/10 at noon.
- [Healthcare provider 2025 immunization schedules \(CDC\)](#)
- [Parent-friendly 2025 immunization schedules \(CDC\)](#)
- [VFC Participation Survey](#) – OIP would like feedback about the VFC and VAP programs, whether your clinic is enrolled or not. The survey is confidential, takes about 10 mins. to complete and closes Friday, 12/13. Thanks!

- **Updates from OIP Staff:**

- **Amy Kost** informed participants that VFC flu vaccine is available to request in ALERT. Very few doses of flu mist are available upon special request by messaging or emailing the help desk.
- **Irma Murauskas** mentioned about imbalance between demand and supply of SpikeVax and reminded everyone to promptly draw down allocated vaccines for equitable redistribution. All

the unclaimed doses will continue to be taken back on a two-week schedule.

- **Jill Johnson** shared that several immunization protocols were updated and posted to the OIP website recently.
 - **Adult Hepatitis B Vaccines:** PreHevbrio was discontinued and removed from the protocol. Adults who previously received PreHevbrio should continue their HepB series with another licensed product.
 - **Meningococcal Vaccines:** ACIP now recommends MenB-4C (Bexsero) as:
 - A 2-dose series spaced 6 months apart for patients 16-23 years of age based on shared clinical decision making.
 - A 3-dose series for persons aged ≥ 10 years at increased risk for serogroup B meningococcal disease.
 - **RSV Monoclonal Antibody**
CDC updated guidance regarding administration of nirsevimab (Beyfortus) outside of October through March using clinical judgment.
