

Acknowledgement for Yellow Fever Vaccination Certification

- The yellow fever stamp is issued for authentication of International Certificates of Vaccination or Prophylaxis (ICVP). The stamp holder is fully knowledgeable concerning the procedures necessary for issuing a valid ICVP document.
[Instructions for completing the ICVP](#)
- The health care provider signing the ICVP may be the stamp owner, or another health care provider authorized by the stamp holder to administer or supervise the administration of the vaccine.
- [The CDC Yellow Book](#): Health Information for International Travel is a resource for those providing care to international travelers
-
- The stamp holder, or designate, is fully knowledgeable of yellow fever vaccine storage, refrigeration, handling, and proper administration. Yellow fever vaccine product information can be found [Here](#).
- If available, ALERT Immunization Information System (IIS) is used to check vaccine history and to forecast what vaccines are due for the patient. Once the vaccine is administered, patient and vaccine dose information must be entered in the ALERT Immunization Information System (IIS) within 14 days of administration.

Information on enrolling in ALERT IIS: [Here](#)

- The stamp holder will notify OHA of any change in their registered yellow fever administration sites.
- The stamp holder will notify OHA if no longer providing YF vaccine. Reach out to yellowfever.vaccine@odhsoha.oregon.gov for instructions on returning the YF stamp.
- Reports of any serious vaccine adverse events must be made promptly to the [Vaccine Adverse Events Reporting System \(VAERS\)](#)
- Oregon Health Authority (OHA) maintains authority over the stamp and can revoke the stamp or privileges at its discretion.
