

# Most Common VFC Site Visit Findings

Marie Martinez

June 25, 2024

VFC Sites

# Goals! After participating in this session, you should be able to:

- List **three** things that will be **reviewed during a VFC Site Visit.**
- Identify the **five** components needed in the **temperature logs.**
- Describe how to **properly store vaccine.**

# Vaccines for Children is over 30 years old!

- Bill Clinton signed the Omnibus Budget Reconciliation Act of 1993, making VFC law.
- Started as a response in a resurgence of measles in the U.S.
- Betty Bumpers & First Lady Rosalynn Carter attempted to take the Every Child By 74 (months) campaign nationwide in 1974.
- They went on to found “Every Child by Two” in 1991.
- Found assistance for childhood immunizations with the Clintons.

## PROVIDER AGREEMENT

*To receive publicly funded vaccines at no cost, I agree to the following conditions, on behalf of myself and all the practitioners, nurses, and others associated with the health care facility of which I am the medical director or equivalent:*

1.	I will annually submit a provider profile representing populations served by my practice/facility. I will submit more frequently if 1) the number of children served changes or 2) the status of the facility changes during the calendar year.
2.	<p>I will screen patients and document eligibility status at each immunization encounter for VFC eligibility (i.e., federally or state vaccine-eligible) and administer VFC-purchased vaccine by such category only to children who are 18 years of age or younger who meet one or more of the following categories:</p> <p>A. Federally Vaccine-eligible Children (VFC eligible)</p> <ol style="list-style-type: none"> <li>1. Are an American Indian or Alaska Native;</li> <li>2. Are enrolled in Medicaid;</li> <li>3. Have no health insurance;</li> <li>4. Are underinsured: A child who has health insurance, but the coverage does not include vaccines; a child whose insurance covers only selected vaccines (VFC-eligible for non-covered vaccines only). Underinsured children are eligible to receive VFC vaccine only through a Federally Qualified Health Center (FQHC), or Rural Health Clinic (RHC) or under an approved deputization agreement.</li> </ol> <p>B. State Vaccine-eligible Children</p> <ol style="list-style-type: none"> <li>1. In addition, to the extent that my state designates additional categories of children as “state vaccine-eligible”, I will screen for such eligibility as listed in the addendum to this agreement and will administer state-funded doses (including 317 funded doses) to such children.</li> </ol> <p>Children aged 0 through 18 years that do not meet one or more of the eligibility federal vaccine categories (VFC eligible), are <b>not</b> eligible to receive VFC-purchased vaccine.</p>
3.	<p>For the vaccines identified and agreed upon in the provider profile, I will comply with immunization schedules, dosages, and contraindications that are established by the Advisory Committee on Immunization Practices (ACIP) and included in the VFC program unless:</p> <ol style="list-style-type: none"> <li>a) In the provider’s medical judgment, and in accordance with accepted medical practice, the provider deems such compliance to be medically inappropriate for the child;</li> <li>b) The particular requirements contradict state law, including laws pertaining to religious and other exemptions.</li> </ol>
	I will maintain all records related to the VFC program for a minimum of three years and upon request make these records available for review. VFC records include, but are not limited to, VFC screening and eligibility.

# Your VFC Compliance Site Visit

- Every 18-24 months
- Lasts about 2-3 hours
- Will be contacted by a site visitor to schedule a date and time
- Email will contain a checklist for what will be reviewed
- They will be reviewing 10 charts they have randomly selected.

# List of findings we frequently see:

- Documentation issues
- Vaccine storage & handling
- Temperature Logs
- Vaccine/Immunization Information Sheets (VIS)/IIS
- Borrowing/Eligibility Codes

# Documentation

- Updating your Vaccine Management Guide
- Updating ALERT:
  - Addresses, and
  - VFC Primary Coordinator & Back-up Coordinator
- Training requirements every 2 years
- Documentation requirements in patient charts

Back-up VFC contact:

## VFC task list

VFC clinic staff must ensure that vaccine is appropriately stored and managed at all times.

<b>Daily tasks</b>	Take once daily minimum and maximum temperatures. Do so at the start of the day.
	Document all immunizations.
<b>Weekly</b>	Download and review data loggers.
	Rotate vaccine stock.
<b>Monthly</b>	Do a vaccine inventory count.
	Adjust ALERT IIS inventory to match physical inventory.
	Troubleshoot any data quality issues you discover due to inventory count.
<b>Annually</b>	VFC Recertification (January).
	Flu vaccine management: <ul style="list-style-type: none"> <li>• Prebook flu vaccine for upcoming season (January)</li> <li>• Return expired flu vaccine (July)</li> </ul>
	Review/update Vaccine Management Guide, sign and date.
	Take VFC overview and self-assessment training (primary and back-up contacts).
<b>Every other year</b>	Take Vaccine Management Trainings (at least two staff).
	The trainings cover: <ul style="list-style-type: none"> <li>• Storing vaccines</li> <li>• Preparing vaccines, and</li> <li>• Administering vaccines.</li> </ul>
	Complete a VFC site visit.
	Calibrate thermometers.
<b>As needed</b>	Place vaccine orders (after you submit the reconciled inventory count).
	Document borrowed doses and pay them back within 90 days.
	Add private stock into ALERT IIS inventory upon receipt of inventory.
	Complete vaccine transfer documentation in ALERT IIS.
	Update VIS.
	Submit temperature logs to Oregon Immunization Program (when requested).
	Respond to and document temperature excursions in your clinic's vaccine storage troubleshooting record.
	Update clinic shipping hours in ALERT IIS.
	Report changes of key staff to VFC program.
	Manage short-dated vaccine.

### Pro Tip:

Translate this into a schedule on your calendar

## VFC task list

VFC clinic staff must ensure that vaccine is appropriately stored and managed at all times.

<b>Daily tasks</b>	Take once daily minimum and maximum temperatures. Do so at the start of the day.
	Document all immunizations.
<b>Weekly</b>	Download and review data loggers.
	Rotate vaccine stock.
<b>Monthly</b>	Do a vaccine inventory count.
	Adjust ALERT IIS inventory to match physical inventory.
	Troubleshoot any data quality issues you discover due to inventory count.
<b>Annually</b>	VFC Recertification (January).
	Flu vaccine management: <ul style="list-style-type: none"> <li>• Prebook flu vaccine for upcoming season (January)</li> <li>• Return expired flu vaccine (July)</li> </ul>
	Review/update Vaccine Management Guide, sign and date.
	Take VFC overview and self-assessment training (primary and back-up contacts).
<b>Every other year</b>	Take Vaccine Management Trainings (at least two staff).
	The trainings cover: <ul style="list-style-type: none"> <li>• Storing vaccines</li> <li>• Preparing vaccines, and</li> <li>• Administering vaccines.</li> </ul>
	Complete a VFC site visit.
	Calibrate thermometers.
<b>As needed</b>	Place vaccine orders (after you submit the reconciled inventory count).
	Document borrowed doses and pay them back within 90 days.
	Add private stock into ALERT IIS inventory upon receipt of inventory.
	Complete vaccine transfer documentation in ALERT IIS.
	Update VIS.
	Submit temperature logs to Oregon Immunization Program (when requested).
	Respond to and document temperature excursions in your clinic's vaccine storage troubleshooting record.
	Update clinic shipping hours in ALERT IIS.
	Report changes of key staff to VFC program.
	Manage short-dated vaccine.

## Bigger Pro Tip:

 Best results come from checking inventory more than once per month

	Troubleshoot any data quality issues you discover due to inventory count.
<b>Annually</b>	VFC Recertification (January).
	Flu vaccine management: <ul style="list-style-type: none"> <li>• Prebook flu vaccine for upcoming season (January)</li> <li>• <del>Return expired flu vaccine (July)</del></li> </ul>
	Review/update Vaccine Management Guide, sign and date.
	<del>Take VFC overview and self-assessment training (primary and back-up contacts).</del>
<b>Every other year</b>	Take Vaccine Management Trainings (at least two staff).

**Another Excellent Pro Tip:**  
Translate this into a schedule on  
your calendar

You must update your clinic's vaccine management guide:

- Annually
- Whenever key staff changes, and
- Whenever requested by the Vaccines for Children (VFC) program.

At that time, primary and back-up contacts as well as all staff who give vaccinations must review and sign the guide. All clinic staff are responsible to ensure the practice of proper vaccine management as outlined in this guide. The most current version is always available on the Oregon VFC website: <http://bit.ly/VFCProviderResources>

# Patient Record Documentation

Site Visitor will review **10 patient charts**. They will be **preselected at random by the Site Visitor**.

- Patient Name
- Patient DOB
- Patient's VFC Eligibility Status
- **Address of Clinic**
- Name, Lot #, Manufacturer of vaccine
- Name **and Title** of individual administering the vaccine
- Date **when VIS/IIS was given** **and** **VIS/IIS publication date**

# Vaccine Storage & Handling

- Refrigerators, Freezers and Ultra-cold storage
- Electrical outlets
- Emergency Plan
- Full suite of ACIP vaccines

**C** Temperature Log for Refrigerator - Celsius  
Days 1-15

Month/Year: \_\_\_\_\_ VFC Pin: \_\_\_\_\_

Facility Name: \_\_\_\_\_

Monitor temperatures closely!

1. Write your initials below in "Staff Initials" and note the time in "Exact Time."
2. Record the maximum and minimum temperatures at the beginning of each clinic day. Max and min are the highest and lowest temps reached since the last time you checked them. Documenting the current temperature is optional.
3. If any out-of-range temps, see instructions to the right.
4. Keep this documentation, data logger logs, and vaccine storage troubleshooting records for three years.

- Take action if temp is out of range—too warm (above 8°C) or too cold (below 2°C).
1. Label the vaccines "Do Not Use". Store vaccine in proper conditions as quickly as possible. Do not discard vaccines unless directed to by the Oregon Immunization Program.
  2. Call the Oregon VFC Helpdesk at 971-673-4832 to determine vaccine viability and next steps.
  3. Document the event on your clinic's Vaccine Storage Troubleshooting Record.

Do **NOT** unplug  
**REFRIGERATOR!**

The background of the image is a dark, moody sky filled with heavy, dark blue and black clouds. Several bright, jagged lightning bolts are visible, striking downwards from the upper right towards the center and lower right. The lightning bolts are a pale yellowish-white color, contrasting sharply with the dark background. The overall atmosphere is one of a powerful, stormy weather system.

What happens when the  
lights go out?

# Emergency Plan:

- Have a plan ready to go
- Should be easy for anyone to understand
- Template in the Vaccine Management Guide

After-hours building access	
Alarm codes and instructions:	
Doors, locks and keys:	
Light switches and flashlights:	
Circuit breaker location and instructions:	
Generator instructions:	
Location of generator and fuel:	
Routine maintenance and generator testing instructions:

### Sample Refrigerator

- ✓ Clearly label VFC and private vaccines.
- ✓ Group vaccines (pediatric, adolescent, adult).
- ✓ Label shelf space or baskets to make vaccines easy to find.
- ✓ Position vaccines or baskets 2-3 inches away from walls, floor, and other baskets.
- ✓ Store vaccines in original packaging with earliest expiration date in front.
- ✓ Diluents may be stored next to refrigerated vaccines unless manufacturer states otherwise. Never store diluents in the freezer.
- ✓ If necessary, medications or biologics may be stored below vaccines and on a different shelf.

Usable space for vaccine is inside dashed lines.

- ✗ Do not block air vents.
- ✗ Do not stack baskets on top of each other.
- ✗ No vaccines in doors.
- ✗ No food or beverages.

**Refrigerator temperatures**

36.0°F ——— 46.0°F

OK

**Freezer temperatures**

-58.0°F ——— 5.0°F

OK

**Sample Chest Freezer**

VFC Field Rep:

# Good or bad?

[This Photo](#) by Unknown Author is licensed under [CC BY-SA-NC](#)

# Good or bad?

# Both Good *and* Bad

## GOOD:

- Centrally placed probe,
- Separated in baskets,
- Enough room for airflow

## BAD:

- VFC vs Private stock labeling is not evident
- Close to being too crowded

# Good or Bad?

**BAD!**

- *Way too FULL*

# Good or Bad?

Oh, the  
**HUMANITY!**

**VERY BAD!**

## Temperature Log for Refrigerator - Celsius Days 1-15

Month/Year: March/2024 VFC Pin: (

Facility Name: TJ McChuckle Shoppe

### Monitor temperatures closely!

1. Write your initials below in "Staff Initials" and note the time in "Exact Time."
2. Record the maximum and minimum temperatures at the beginning of each clinic day. Max and min are the highest and lowest temps reached since the last time you checked them. Documenting the current temperature is optional.
3. If any out-of-range temps, see instructions to the right.
4. Keep this documentation, data logger logs, and vaccine storage troubleshooting records for three years.

### Take action if temp is out of range—too warm (above 8°C) or too cold (below 2°C).

1. Label the vaccines "Do Not Use". Store vaccine in proper conditions as quickly as possible. Do not discard vaccines unless directed to by the manufacturer (COVID-19 vaccine) Oregon Immunization Program (all other vaccines).
2. For **COVID-19 vaccine**, call the manufacturer. For other vaccines call the OIP Helpdesk at 971-673-4832 to determine vaccine viability and next steps.
3. Document the event on your clinic's Vaccine Storage Troubleshooting Record.

# You GET A CAR!

If temperatures are out of range:

1. Restrict use of the refrigerator or freezer. Place a “DO NOT USE” sign on the unit. Also, notify your clinic’s primary responsible staff.
2. Determine the cause and take action. The temperature excursion scenarios below give examples of how you might handle different types of excursions.
3. Notify the VFC Help Desk at 971-673-4VFC (4832) or [vfc.help@dhsosha.state.or.us](mailto:vfc.help@dhsosha.state.or.us) (You don’t need to notify VFC if temperatures go out of range for less than half an hour or less than one degree Celsius.)
4. Document the incident. Include the:
  - » Length of excursion
  - » Minimum and maximum temperatures
  - » Steps taken to address the excursion, and
  - » Outcome in your vaccine storage troubleshooting record, available here: <http://bit.ly/VFCProviderResources>.

# Vaccine Storage Troubleshooting Record (check one) Refrigerator Freezer Ultra-Cold Freezer

Use this form to document any unacceptable vaccine storage event, such as exposure of refrigerated vaccines to temperatures that are outside the manufacturers' recommended storage ranges.

<b>Date &amp; Time of Event</b> <small>If multiple, related events occurred, see Description of Event below.</small>	<b>Storage Unit Temperature</b> <small>at the time the problem was discovered</small>		<b>Room Temperature</b> <small>at the time the problem was discovered</small>	<b>Person Completing Report</b>	
Date:	Temp when discovered:		Temp when discovered:	Name:	
Time:	Minimum temp:	Maximum temp:	Comment (optional):	Title:	Date:
<p><b>Description of Event</b> <i>(If multiple, related events occurred, list each date, time, and length of time out of storage.)</i></p> <ul style="list-style-type: none"> <li>• General description (i.e., what happened?)</li> <li>• Estimated length of time between event and last documented reading of storage temperature in acceptable range (2° to 8°C [36° to 46°F] for refrigerator; -50° to -15°C [-58° to 5°F] for freezer; -80° to -60°C [-112° to -76°F] for ultra-cold freezer (may be used for Pfizer COVID-19 vaccine).</li> <li>• Inventory of affected vaccines, including (1) lot #s and (2) whether purchased with public (for example, VFC) or private funds (Use separate sheet if needed, but maintain the inventory with this troubleshooting record.)</li> <li>• At the time of the event, what else was in the storage unit? For example, were there water bottles in the refrigerator and/or frozen coolant packs in the freezer?</li> <li>• Prior to this event, have there been any storage problems with this unit and/or with the affected vaccine?</li> <li>• Include any other information you feel might be relevant to understanding the event.</li> </ul>					
<p><b>Action Taken</b> <i>(Document thoroughly. This information is critical to determining whether the vaccine might still be viable!)</i></p> <ul style="list-style-type: none"> <li>• When were the affected vaccines placed in proper storage conditions? (Note: Do not discard the vaccine. Store exposed vaccine in proper conditions and label it "do not use" until after you can discuss with your state/local health department and/or the manufacturer[s].)</li> <li>• Who was contacted regarding the incident? (For example, supervisor, state/local health department, manufacturer—list all.)</li> <li>• IMPORTANT: What did you do to prevent a similar problem from occurring in the future?</li> </ul>					
<p><b>Results</b></p> <ul style="list-style-type: none"> <li>• What happened to the vaccine? Was it able to be used? If not, was it returned to the distributor? (Note: For public-purchase vaccine, follow your state/local health department instructions for vaccine disposition.)</li> </ul>

Certificates of  
Calibration

# Vaccine/Immunization Information Sheets VIS/IISs

- Should be given before every vaccination
- Must be up to date
- Two different best practices:
  - Printing off from the CDC website before vaccination will help make sure they are up to date
  - If not, keep them in one place & only print off enough for a couple weeks at a time

# Meningococcal ACWY Vaccine:

## What You Need to Know

Many vaccine information statements are available in Spanish and other languages. See [www.immunize.org/vis](http://www.immunize.org/vis)

Hojas de información sobre vacunas están disponibles en español y en muchos otros idiomas. Visite [www.immunize.org/vis](http://www.immunize.org/vis)

### 1. Why get vaccinated?

Meningococcal ACWY vaccine can help protect against **meningococcal disease** caused by serogroups A, C, W, and Y. A different meningococcal vaccine is available that can help protect against serogroup B.

**Meningococcal disease** can cause meningitis (infection of the lining of the brain and spinal cord) and infections of the blood. Even when it is treated, meningococcal disease kills 10 to 15 infected people out of 100. And of those who survive, about 10 to 20 out of every 100 will suffer disabilities such as hearing loss, brain damage, kidney damage, loss of limbs, nervous system problems, or severe scars from skin grafts.

Meningococcal disease is rare and has declined in the United States since the 1990s. However, it is a severe disease with a significant risk of death or lasting disabilities in people who get it.

Anyone can get meningococcal disease. Certain people are at increased risk, including:

- Infants younger than one year old
- Adolescents and young adults 16 through 23 years old
- People with certain medical conditions that affect the immune system
- Microbiologists who routinely work with isolates of *N. meningitidis*, the bacteria that cause meningococcal disease
- People at risk because of an outbreak in their community

### 2. Meningococcal ACWY vaccine

**Adolescents** need 2 doses of a meningococcal ACWY vaccine:

- First dose: 11 or 12 years of age
- Second (booster) dose: 16 years of age

In addition to routine vaccination for adolescents, meningococcal ACWY vaccine is also recommended for **certain groups of people**:

- People at risk because of a serogroup A, C, W, or Y meningococcal disease outbreak
- People with HIV
- Anyone whose spleen is damaged or has been removed, including people with sickle cell disease
- Anyone with a rare immune system condition called "complement component deficiency"
- Anyone taking a type of drug called a "complement inhibitor," such as eculizumab (also called "Soliris"<sup>®</sup>) or ravulizumab (also called "Ultomiris"<sup>™</sup>)
- Microbiologists who routinely work with isolates of *N. meningitidis*
- Anyone traveling to or living in a part of the world where meningococcal disease is common, such as parts of Africa
- College freshmen living in residence halls who have not been completely vaccinated with meningococcal ACWY vaccine
- U.S. military recruits

U.S. Department of

People sometimes faint after medical procedures, including vaccination. Tell your provider if you feel dizzy or have vision changes or ringing in the ears.

As with any medicine, there is a very remote chance of a vaccine causing a severe allergic reaction, other serious injury, or death.

about filing a claim.

---

## 7. How can I learn more?

---

- Ask your health care provider.
- Call your local or state health department.
- Visit the website of the Food and Drug Administration (FDA) for vaccine package inserts and additional information at [www.fda.gov/vaccines-blood-biologics/vaccines](http://www.fda.gov/vaccines-blood-biologics/vaccines).
- Contact the Centers for Disease Control and Prevention (CDC):
  - Call **1-800-232-4636 (1-800-CDC-INFO)** or
  - Visit CDC's website at [www.cdc.gov/vaccines](http://www.cdc.gov/vaccines).

# Eligibility Coding/Miscoding

VFC providers must have working knowledge of:

- VFC eligibility categories
- Billing practices
- Documentation procedures

Staff must:

- Screen all patients for VFC eligibility
- Document specific VFC eligibility
- Document every vaccine given in ALERT IIS

## Private clinic coding chart

Age	Definition	Eligibility codes	Vaccine stock
0 through 18	Oregon Health Plan (OHP) or Medicaid	M	VFC
	No insurance	N	VFC
	American Indian or Alaska Native	A	VFC
	Underinsured	F (FQHC or RHC only)	VFC
All ages	Privately insured children or adults on OHP or other insurance	B	Private
	OIP special projects (rarely used)	S	Special project

## Private clinic coding chart

Age	Definition	Eligibility codes	Vaccine stock
0 through 18	Oregon Health Plan (OHP) or Medicaid	M	VFC
	No insurance	N	VFC
	American Indian or Alaska Native	A	VFC
	Underinsured	F (FQHC or RHC only)	VFC
All ages	Privately insured children or adults on OHP or other insurance	B	Private
	OIP special projects (rarely used)	S	Special project

# Borrowing

- Borrowing logs
  - Must be kept for 3 years
  - Made available during the Site Visit
  - Must be filled out for *each* borrow
- **Best Practice:** Review monthly using the Ad Hoc Report in ALERT
  - Usually done on a monthly basis
  - Use it to try and catch borrows, & or coding errors

# Oregon Vaccines for Children Borrowing Log

## Directions for use of borrowing log:

When a provider has borrowed a vaccine from VFC stock to administer to a patient not eligible for VFC, or vice versa, the borrowing form must be **COMPLETELY FILLED OUT** for *each* borrowing occurrence with *each* vaccine listed on a separate row of the form. These borrowing logs must be kept as part of the VFC program records for 3 years and be made available to the VFC staff during the VFC Site Visit or upon request by the Oregon Immunization Program.

**Note:** Clinics cannot borrow state-supplied seasonal influenza vaccine for privately insured patients. Providers may use private stock seasonal influenza vaccine to vaccinate VFC eligible children if VFC seasonal influenza stock is not yet available. Those private stock doses used on VFC eligible children can later be replaced when VFC stock becomes available.

For each borrowed vaccine a patient receives, all of the following must be documented:

- Vaccine name
- Patient's name OR unique patient ID
- Patient's date of birth
- Private or VFC dose borrowed
- Date vaccine borrowed
- Reason vaccine borrowed
- Date vaccine paid back to either VFC or Private stock

Provider must sign to certify accuracy and compliance with VFC requirements.

Replacement must be made within 90 days unless clinic can justify delay.

"I hereby certify, subject to penalty under the False Claims Act (31 U.S.C. § 3730) and other applicable Federal and state law, that VFC vaccine dose borrowing and replacement reported on this form has been accurately reported and conducted in conformance with VFC provisions for such borrowing and further certify that all VFC doses borrowed during the noted time period have been fully reported on this form."

Provider Name: \_\_\_\_\_ Provider Signature: \_\_\_\_\_ Date: \_\_\_\_\_

### **Reasons for Borrowing VFC Vaccine:**

1. Private vaccine shipment delay (vaccine order placed on time/delay in shipping)
2. Private vaccine not usable on arrival (vials broken, temperature monitor out of range)
3. Ran out of private vaccine between orders (not due to shipping delay)
4. Short-dated private dose was exchanged with VFC dose
5. Accidental use of VFC dose for private patient
6. Replacement of Private dose with VFC when insurance plan did not cover vaccine
7. Other – Explanation Required

### **Reasons for Borrowing Private Vaccine:**

8. VFC vaccine shipment delay (order placed on time/delay in shipping)
9. VFC vaccine not usable on arrival (vials broken, temperature monitor out of range)
10. Ran out of VFC vaccine between orders (not due to shipping delays)
11. Short-dated VFC dose was exchanged for Private dose
12. Accidental use of Private dose for a VFC eligible patient
13. Other – Explanation Required

---

<sup>1</sup> Replacement must be made within 90 days unless provider can justify delay.

# After Site Visit

- Site Visitors will review findings
- Send an email with findings, Corrective Action Plan (CAP)
- Email will detail what needs to be completed
- Email or phone Site Visitor if you have any questions or need clarification.
- Once all follow-up, if any, is complete, the site visit will be closed out.
- See you in 18 – 24 months!

Asked Midjourney (text to image AI) to show me “Oregon vaccination campaign.” Results given in 4 separate images.

Thank you for your help vaccinating Oregon!
