

**Table I**  
**OAR 333-077-0125**

**MEDICAL HISTORY or OBSTETRIC HISTORY that**  
**Requires Transfer or Consultation**

Conditions in red boxes indicate high-risk conditions that, when present on intake, will require the transfer of a client to hospital-based care.

Conditions in the yellow boxes indicate potentially risky conditions that require consultation with a provider of perinatal care<sup>1</sup> as defined under OAR 333-077-0125.

The list of high-risk conditions and potentially risky conditions is not comprehensive, and other physical, behavioral health, obstetric, or fetal conditions may arise that require consultation or transfer to hospital-based care. Having multiple risk conditions requiring consultation may increase the risk sufficiently to indicate the need to transfer care.

Delivery history and uterine conditions	<ul style="list-style-type: none"> <li>• Conception occurred less than 12 months following surgery or uterine procedure</li> <li>• Absence of ultrasound to rule out placenta previa or placental placement to the surgical site</li> <li>• History of two or more Cesareans sections without a prior successful vaginal delivery</li> <li>• History of myomectomy which invaded the endometrium</li> <li>• History of a known uterine perforation</li> <li>• History of cesarean section which included classical incision</li> <li>• History of cesarean section and complications including postoperative infection, diabetes, or steroid use</li> <li>• Uterine rupture</li> <li>• Hysterotomy, other than cesarean</li> </ul>
Diabetes mellitus	<ul style="list-style-type: none"> <li>• Type 1 or Type 2; currently requiring oral medication or insulin</li> </ul>
Endocrine conditions	<ul style="list-style-type: none"> <li>• Significant endocrine conditions other than diabetes (e.g. hyperthyroidism)</li> </ul>

<sup>1</sup> OAR 333-077-0125 – Provider of perinatal care means a physician or certified nurse midwife as those terms are defined under OAR 333-077-0010, a physician associate licensed under ORS chapter 677, a nurse practitioner licensed under ORS chapter 678, or a a licensed direct entry midwife licensed under ORS chapter 687.

Fetal demise/prior still birth	<ul style="list-style-type: none"> <li>• Prior stillbirth/neonatal death</li> </ul>
Hematologic disorders	<ul style="list-style-type: none"> <li>• Maternal bleeding disorder</li> </ul>
	<ul style="list-style-type: none"> <li>• Hemoglobinopathies</li> <li>• History of thrombosis or thromboembolism</li> <li>• History of postpartum hemorrhage requiring transfusion or other advanced treatment (e.g. Bakri balloon)</li> </ul>
Hypertensive disorders	<ul style="list-style-type: none"> <li>• Eclampsia with eclamptic seizure</li> </ul>
	<ul style="list-style-type: none"> <li>• HELLP Syndrome</li> <li>• Pre-eclampsia requiring preterm birth</li> </ul>
Infectious conditions	<ul style="list-style-type: none"> <li>• HIV; positive status</li> </ul>
Neonatal encephalopathy in prior pregnancy	<ul style="list-style-type: none"> <li>• Neonatal encephalopathy in prior pregnancy</li> </ul>
Neurological disorders	<ul style="list-style-type: none"> <li>• Neurological disorders or active seizure disorders that would impact maternal or neonatal health (e.g. epilepsy, myasthenia gravis, previous cerebrovascular accident)</li> </ul>
Perineal laceration or obstetric anal sphincter injury	<ul style="list-style-type: none"> <li>• Fourth-degree laceration without satisfactory functional recovery</li> </ul>
Placental conditions	<ul style="list-style-type: none"> <li>• Placenta accreta</li> <li>• Placenta increta</li> <li>• Placenta percreta</li> </ul>
	<ul style="list-style-type: none"> <li>• Retained placenta requiring surgical removal</li> </ul>
Psychiatric conditions	<ul style="list-style-type: none"> <li>• History of postpartum mood disorder with high risk to the infant (e.g. psychosis)</li> <li>• Schizophrenia, other psychotic disorders, bipolar I disorder or schizotypal disorders</li> </ul>
Pulmonary disease	<ul style="list-style-type: none"> <li>• Chronic pulmonary disease (e.g. cystic fibrosis)</li> </ul>
Renal disease	<ul style="list-style-type: none"> <li>• Renal disease requiring supervision by a renal specialist</li> <li>• Renal failure</li> </ul>
