MEMO

WX-2025-1

TO: Agency Directors, Weatherization Coordinators
FROM: Danielle Safford, Weatherization Program Coordinator
RE: Energy Star & UL2158A
DATE: 01/02/2025

Greetings,

Effective immediately-

As a result of OHCS's recent technical monitoring from the Department of Energy (DOE), we have two new essential program requirements that must be implemented. These changes are imperative to ensure compliance with federal guidelines.

- 1. Newly installed Ductless and Conventional heat pumps need to meet Energy Star certified or equivalent standards. Standard Work Specifications (SWS) 5.0108.4b Equipment Selection.**
- 2. Newly installed dryer transition duct must be UL2158A approved. Standard Work Specifications (SWS) 6.0202.1a**

Both references will be added to our field guide for review during our next submission period in November 2025.
