Oregon Military Department

Federal Funds Capital Construction		\$ 2,082,893	\$ 2,082,893
------------------------------------	--	--------------	--------------

⁽¹⁾ Includes adjustments through December 2014

Summary of Revenue Changes

Other Funds revenues include proceeds from the issuance of general obligation bonds authorized under Article XI-Q, XI-G, XI-F (1), and Article XI, Section 7 of Oregon's Constitution, the depreciation component of the Uniform Rent program and other deposits in the Department of Administrative Services Capital Projects Fund established by ORS 276.005, reserves of the Veterans' Home Program, Oregon Military Department Capital Construction Account (surplus property sale proceeds), aircraft registration fees assessed in accordance with ORS 837.040 and 837.045, and state gasoline tax and driver and vehicle related fees. Federal Funds revenues are from the National Guard Bureau, the Federal Aviation Administration's General Aviation Entitlement Program, the Federal Airport Improvement Program, the U.S. Department of Veterans' Affairs construction grant program, and the U.S. Fish and Wildlife Service.

Summary of Capital Construction Subcommittee Action

House Bill 5006 provides six-year expenditure limitation for new capital construction projects. Projects in excess of \$1.0 million that build, acquire, adapt, replace, or change the use or function of a facility are categorized as capital construction projects. All capital projects in excess of \$1.0 million require a separate Capital Construction expenditure limitation established by the Legislature or the Emergency Board. House Bill 5006 also extends the six-year expiration dates and expenditure limitations for specified projects.

Oregon Housing and Community Services

Family Affordable Housing: \$40,000,000 Other Funds (Article XI-Q bonds) is approved to fund the state's equity (ownership) interest in a variety of projects to provide affordable housing to low-income Oregonians. The form of projects may include small scale and mid-size new construction, land or building acquisition, or modular construction. Debt service will be paid with General Fund.

Oregon Military Department

Military Headquarters Facility: \$6,700,000 Other Funds (Article XI-Q bonds) and \$18,463,000 Federal Funds (National Guard Bureau) is approved to fund the planning, design, and construction of a new Joint Force Headquarters building to be located in Salem.

Youth Challenge Armory: \$4,977,000 Other Funds (Article XI-Q bonds) is approved for the expansion and renovation of the current facility located in Bend to increase capacity for at-risk youths participating in the Youth Challenge Program.

Planning and Pre-Design: \$136,281 Other Funds (Capital Construction Account) and \$140,770 Federal Funds (National Guard Bureau) is approved for planning and preliminary design work at various sites throughout the state where the agency is planning future capital construction projects.

Medford Armory: \$1,943,648 Federal Funds (National Guard Bureau) is approved for the service life extension project to renovate the facility. The project includes upgrades to the building envelope, HVAC system, seismic resilience, utility system, lighting, restrooms, and finishes throughout the building.

Baker City Readiness Center: \$750,000 Federal Funds (National Guard Bureau) is approved to construct a new military vehicle compound, expand the parking lot, and move an HF antenna from the old armory to the new readiness center.

Military Museum: \$2,082,893 Federal Funds (National Guard Bureau) is approved to update the primary building at the Military Museum located at Camp Withycombe. The project includes expansion of the building entrance and lobby, installation of a fire protection system, upgrades of facility utilities, modifications to classrooms, additional restrooms, and a weapons storage vault. The expenditure limitation will expire June 30, 2019.

The Subcommittee approved the extension of the project expiration date and expenditure limitation for the Roseburg Armory Service Life Extension project (Federal Funds) to June 30, 2016.

Department of Corrections

Deferred Maintenance: \$14,220,432 Other Funds (Article XI-Q bonds) is approved to address highest priority deferred maintenance projects. Projects are located at facilities throughout the state and address a range of needs including HVAC repairs, security and electrical systems changes, and some structural improvements.

Revenue Summary

General Fund pays wages and salaries of state employees and provides matching funds for various facilities management activities, as well as matching funds for various Oregon National Guard activities.

Other Funds revenues include 9-1-1 tax (84.5%); proceeds from real property sales (6.4%); facility rental fees (3.9%); miscellaneous funds from vending machines, pay telephones, and other miscellaneous sources (2.3%); indirect cost transfers within the agency (2.2%); the Average Daily Membership revenue received from Bend-LaPine School District for the Youth Challenge Program (0.4%); donations (0.2%); and a transfer from the Department of Aviation (0.1%). Facility rental fees contribute to, but do not fully cover, armory maintenance and operations costs. If the Joint Ways and Means Capital Construction Subcommittee approves one or more of the agency's requested bond-funded capital construction projects, there will be additional Other Funds revenue from the sale of bonds.

Federal Funds come from a variety of federal-state cooperative agreements with the National Guard Bureau and grants from the Federal Emergency Management Agency (FEMA). They fund the majority of facilities' operating costs, pay wages and salaries of state employees

assigned to Oregon National Guard duties; provide construction funds for a variety of maintenance, armory, training, and reserve center facilities; fund several programs for at-risk youth; and contribute to central administrative costs through an interagency transfer. The Office of Emergency Management receives federal dollars from the Department of Homeland Security, Department of Defense, and FEMA.

The Department has a federal budget that is administered separately from its state budget and is not subject to State Federal Funds expenditure limitation.

Summary of Public Safety Subcommittee Action

The Oregon Military Department provides combat-ready units and equipment to be deployed in support of national defense under the direction of the President, and trained personnel and equipment to protect life and property in Oregon during natural disasters or civil unrest under the direction of the Governor.

The Subcommittee approved a budget of \$380,377,998 total funds consisting of \$25,317,919 General Fund, \$98,352,463 Other Funds, and \$256,707,616 Federal Funds, including 448 positions (405.01 FTE). The total funds budget is a 5.3 percent decrease from the 2015-17 Current Service Level (CSL) and a 7.9 percent decrease from the 2013-15 Legislatively Approved Budget. The reduction from the 2015-17 CSL is due to a policy package that phases out \$30.9 million Federal Funds limitation for the Readiness Sustainment Maintenance Site that closed at Camp Withycombe in Clackamas. The additional reduction from the 2013-15 Legislatively Approved Budget is due to the phase-out of Services and Supplies expenditure limitation associated with limited duration positions funded by the Umatilla Caretaker Contract and to the phase-out of capital construction limitation.

The Subcommittee deferred a formal recommendation on expenditure limitation for Package 498: New Debt Service, and Package 499: Capital Construction to the Joint Ways and Means Capital Construction Subcommittee.

Administration – SCR 001

The Administration program consists of the Command Group, the Financial Administration Division, the State Personnel Office, Public Affairs, and the Reintegration/Emergency Financial Assistance Programs. The Subcommittee approved a budget of \$6,972,125 total funds consisting of \$4,877,671 General Fund and \$2,094,454 Other Funds, including 24 positions (22.88 FTE).

The Subcommittee recommended Package 801: LFO Analyst Adjustments. The package makes reductions to the budget due to scant available General Fund. It eliminates one position (1.00 FTE) from the Command Group and shifts funding to 100 percent Other Funds on a part-time position (0.50 FTE) from Public Affairs, for a total of -\$113,243 General Fund and -\$14,893 Other Funds. It reduces Services and Supplies expenditures by \$88,203 General Fund to switch from the state motor pool to federal General Services Administration vehicles.

Operations – SCR 002

The Operations Program Unit includes operation and maintenance of Army National Guard facilities and operation of the Portland Air Base at the Portland International Airport, Kingsley Field in Klamath Falls, and the Camp Rilea Air Station in Warrenton. The Program also includes Capital Construction staff to oversee the Department's Capital Construction projects. Other federally funded programs include drug interdiction and education; repair of unserviceable U.S. Army equipment; installation of intrusion detection systems at armories and other facilities; and video teleconferencing, computer-based training, interactive audio and video services, e-mail, and electronic network systems provided to National Guard members and their communities. The Subcommittee approved a budget of \$95,382,254 total funds consisting of \$8,973,062 General Fund, \$4,751,092 Other Funds, and \$81,658,100 Federal Funds, including 336 positions (293.51 FTE).

The Subcommittee approved Package 201: Air National Guard Fire Protection State Funds. This package funds fire and emergency services support for the Air National Guard missions at the Portland Air National Guard Base and the Kingsley Field Air National Guard Base in Klamath Falls. Recent changes in federal requirements have capped the amount of federal payroll reimbursements at a level lower than the amount bargained by the state in 2013. The total approved is \$1,390,116 General Fund.

The Subcommittee approved Package 203: Umatilla Caretaker Agreement. This package continues 23 limited duration positions (23.00 FTE) to fulfill a caretaker agreement with the U.S. Army to support functional activities at the Umatilla Chemical Depot. The agreement is expected to last until 2018. \$6,500,000 is 100 percent federally funded.

The Subcommittee recommended Package 801: LFO Analyst Adjustments. This package was added to fund shift one position - a Principal Executive Manager E - from 75.0 percent Federal Funds and 25.0 percent General Fund to 100 percent Federal Funds for a General Fund reduction of \$48,482 and to reduce General Fund for Services and Supplies by \$18,558, affecting office supplies, recognition awards, and travel expenditures.

The Subcommittee recommended Package 802: Armory Lead Abatement. This package was added in light of new information about lead levels at armories with indoor shooting ranges. The Forest Grove Armory provides the agency its most severe challenge so far. The armory was closed in January 2015 after a National Guard Bureau survey revealed high lead levels on surfaces in the building from the indoor firing range. Also, the fire suppression pipes in this armory have failed. A total of \$1,881,600, of which half is Federal Funds and the other half General Fund match, is required to clean the firing range and convert it to storage, replace contaminated ventilation ductwork, and replace fire suppression pipes above the ceiling. Other armories' indoor firing ranges have also been closed and tested. To date, no other armory appears to require this level of abatement and cost.

The Subcommittee approved Package 803: Phase out Readiness Sustainment Maintenance. This package was added to recognize the federal phase-out of the Readiness Sustainment Maintenance Site effective November 30, 2014. The reduction is \$30,927,771 Federal Funds and 62 positions (62.00 FTE). The Site was responsible for equipment refurbishment. The drawdown of military troops in the Middle East reduced the amount of military equipment that needed refurbishment. This program may be started up again by the federal government, but it is not currently foreseen.

Oregon Emergency Management – SCR 003

Oregon Emergency Management manages and maintains an emergency services system that coordinates local and state resources to prepare for, respond to, and recover from disaster conditions. It distributes 9-1-1 and FEMA revenues to local governments. The Subcommittee approved a budget of \$252,818,910 total funds consisting of \$1,855,317 General Fund, \$89,105,319 Other Funds, and \$161,858,274 Federal Funds, including 42 positions (42.62 FTE).

The Subcommittee approved Package 301: Statewide Next Gen 9-1-1 Implementation. This package provides \$500,000 Other Funds (9-1-1 Tax) expenditure limitation to enable Emergency Management to proceed with one portion of the Next Generation 9-1-1 conversion. This funding supports DAS Enterprise Technology Services to coordinate the conversion of the existing frame-relay system to an internet protocol broadband network at all 43 Public Safety Answering Points. This work is consistent with work in other states and will need to be accomplished regardless of Next Gen 9-1-1 migration.

During the 2013-15 biennium, OMD OEM and the Office of the State Chief Information Officer (OSCIO) jointly determined to focus first on the planning and implementation of the 9-1-1 network transition from frame relay to an internet protocol based network, which will set the stage for future, incremental planning and implementation of other project components.

The project's next critical component involves the identification, planning and coordination of the geographic data and geographic information systems (GIS) capabilities required to implement and operate Oregon's Next Generation 9-1-1 system into the future. With that in mind, the Legislature developed the following budget note.

Budget Note:

Oregon Emergency Management (OMD) is directed to work with the Oregon State Chief Information Officer (OSCIO) to produce a Next Generation 9-1-1 GIS Project Plan for the collection, management, and sharing of geographic data sets and geographic information systems capabilities required to effectively implement Next Generation 9-1-1 throughout the state of Oregon.

The Next Generation 9-1-1 GIS Project Plan is to be submitted to the Legislative Fiscal Office in December 2015, and jointly presented by OMD and the OSCIO to the Joint Legislative Committee on Information Management and Technology and to the Joint Committee on Ways and Means during the 2016 Annual Legislative Session.

The Subcommittee recommended Package 801: LFO Analyst Adjustments. This package was added to capture General Fund savings. Services and Supplies are reduced by \$93,284 for non-essential purchases in both General Fund and Federal Funds. In view of scarce General Fund resources, the balance of the Local Disaster Assistance Loan and Grant Account (\$283,250 General Fund) is eliminated.

Community Support – SCR 004

The Community Support program unit includes the Youth Challenge Program that provides educational and other services to 16-18 year old youth who have dropped out of high school, the Science and Technology Academy Reinforcing Basic Aviation and Space Exploration (STARBASE) program that demonstrates real-world applications of math and science to students in third to eighth grades in Portland and Klamath Falls through tours of the Portland Air Base and Kingsley Field, and the Emergency Operations program that coordinates the use of National Guard resources in

HB 5032 A

response to state emergencies as directed by the Governor. The Subcommittee approved a budget of \$10,719,231 total funds consisting of \$197,381 General Fund, \$2,101,207 Other Funds, and \$8,420,643 Federal Funds, including 46 positions (46.00 FTE).

Capital Debt Service and Related Costs – SCR 087

Capital Debt Service and Related Costs provides the funding to make payments on the principal, interest, and financing costs associated with the issuance of Article XI-Q bonds and Certificates of Participation (COPs). COPs and XI-Q bonds are tax exempt government securities. The Subcommittee approved a budget of \$9,520,502 total funds, consisting of \$9,414,488 General Fund and \$106,014 Other Funds.

The Subcommittee reviewed and deferred a formal recommendation on expenditure limitation for Package 498: New Debt Service to the Joint Ways and Means Capital Construction Subcommittee. Package 498 provides General Fund appropriation to pay debt service on bonds issued for a new Joint Forces Headquarters building which was not approved in the Governor's budget due to siting concerns. Those concerns have been mitigated by means of a wetland and land condition study, which shows that the preferred construction location - near the Anderson Readiness Center in Salem - is stable. If bonds for the project were sold in 2016 and 2017, the 2015-17 biennium General Fund Debt Service would likely be \$434,833.

Capital Improvements – SCR 088

The program provides for capital projects less than \$1,000,000, which includes deferred maintenance. The Subcommittee approved a budget of \$4,964,976 total funds consisting of \$194,377 Other Funds and \$4,770,599 Federal Funds.

The Subcommittee approved Package 801: LFO Analyst Adjustments. This package provides limitation to use Heritage Outreach Foundation (HOF) funds to enhance a federally funded capital project to relocate and restore Building 6100 at Camp Withycombe to its historic structure as the Quarter Master Supply Building. The building, as restored, will be used as military museum display space. The HOF funds are to be used to update the building's restrooms.

Capital Construction – SCR 089

Expenditure limitation for Capital Construction projects will be included in House Bill 5005, the statewide bonding bill, and House Bill 5006, the statewide capital construction bill.

The Subcommittee recommended to the Joint Committee on Ways and Means – Capital Construction Subcommittee that the following capital construction expenditure limitation requests be considered for approval.

Package 499: Major Construction. Package 499 includes Other Funds capital construction expenditure limitation for:

- (1) A new Joint Forces Headquarters building - \$6,706,000 Other (Article XI-Q Bond) Funds, \$18,463,000 Federal Funds. This was not approved in the Governor's budget due to siting concerns. Those concerns have been mitigated by means of a wetland and land condition study, which shows that the preferred construction location - near the Anderson Readiness Center in Salem - is stable.
- (2) Expansion at the Oregon Youth Challenge Program (YCP) facility - \$4,977,000 Other (Article XI-Q Bond) Funds.
- (3) A Regional Training Institute (RTI) in Umatilla - \$6,500,000 Other (Article XI-Q Bond) Funds, \$5,000,000 cash from the sale of current RTI building at Western Oregon University campus.

If bonds for the Joint Forces Headquarters project were sold in 2016 and 2017, the 2015-17 biennium General Fund Debt Service would likely be \$434,833. Bonding for the Youth Challenge Program and Regional Training Institute projects could occur in the spring of 2017 without jeopardizing either construction schedule. Also, the National Guard Bureau would need to approve new operational funding for the Youth Challenge project to accommodate the additional students (60 males and 24 females).

In addition, the agency identified new federal fund match for projects already approved in Baker City, \$750,000, and in Medford, \$1,943,648.

A May 2015 request for the Military Museum seeks \$2,082,893 Federal Funds Capital Construction limitation for the 2013-15 biennium and \$613,163 Other Funds Capital Construction limitation for the 2015-17 biennium for refurbishment and rehabilitation of several museum areas. The Other Funds are a donation from the Heritage Outreach Foundation.

Finally, the Department is requesting capital construction limitation for planning/pre-design work on 2017-19 biennium projects in the following amounts: \$136,281 Other Funds and \$140,770 Federal Funds.

Summary of Performance Measure Action

See attached Legislatively Adopted 2015-17 Key Performance Measures form.

Legislatively Approved 2015-2017 Key Performance Measures

Agency: MILITARY DEPARTMENT, STATE of OREGON

Mission: The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizens soldiers and airmen, equipped and trained to respond to any contingency, natural or manmade.

Legislatively Proposed KPMs	Customer Service Category	Agency Request	Most Current Result	Target 2016	Target 2017
1 - RECRUITING - Percent of soldiers and airmen recruited vs. recruiting goal.		Approved KPM	95.00	100.00	100.00
2 - ARMORY CONDITION - Percent of statewide armories in adequate or better condition.		Approved KPM	79.00	80.00	80.00
3 - REVENUE GENERATION - Percent of available armory time		Approved KPM	27.00	40.00	40.00
4 - EQUIPMENT AVAILABILITY - Percent of equipment on hand in Oregon vs. equipment authorized.		Approved KPM	129.00	95.00	95.00
5 - YOUTH CHALLENGE - Percentage of accepted cadets who complete the program and receive either a GED, a high-school diploma, or earn 8 certified credits and return to their home high-school.		Approved KPM		85.00	85.00
6 - REINTEGRATION - Percent of members successfully referred for reintegration services.		Approved KPM	100.00	98.00	98.00
7 - DOMESTIC PREPAREDNESS PLANS - Percentage of counties with National Incident Management System (NIMS) compliant Emergency Operations Plans (EOPS).		Approved KPM	100.00	100.00	100.00
8 - HAZARD MITIGATION PLANS - Percentage of state population covered by a FEMA approved local hazard mitigation plan.		Approved KPM	81.00	90.00	90.00
9 - CUSTOMER SATISFACTION - Percent of customers rating their satisfaction with Military Department customer service as "good" or "excellent": overall customer service, timeliness, accuracy, helpfulness, expertise and availability of information.	Accuracy	Approved KPM	75.00	75.00	75.00
9 - CUSTOMER SATISFACTION - Percent of customers rating their satisfaction with Military Department customer service as "good" or "excellent": overall customer service, timeliness, accuracy, helpfulness, expertise and availability of information.	Availability of Information	Approved KPM	75.00	75.00	75.00

LFO Recommendation:

KPM #2 - Percent of armories in adequate or better condition. Change target from 50% to 80% in view of recent assessments.

KPM #3 - Revenue generation from available armory time rented. Change target from 60% to 40% in view of recent experience, which is actually closer to 28%. Fewer organizations need to rent armories due to competition with other rural venues.

KPM #5 - Percent of 17-18 year olds completing GED or HS diploma. Substitute new KPM to measure percent of accepted cadets of all ages who complete program and receive a GED, high school diploma, or earn 8 certified credits and return to their home high school. Target: 85%. The current KPM omits some of the students and the 8-credit criteria.

KPM #9 - Customer satisfaction. Change overall target to 75% from 55% in light of recent responses.

Sub-Committee Action:

The Public Safety Subcommittee approved the LFO recommendation.

Summary of Revenue Changes

The General Fund appropriations made in the bill are within resources available as projected in the May 2015 economic and revenue forecast by the Department of Administrative Services, Office of Economic Analysis, supplemented by transfers from various agency accounts to the General Fund for general governmental purposes as authorized in Senate Bill 501, plus other actions to reduce state agency expenditures.

Summary of Capital Construction Subcommittee Action

Senate Bill 5507 appropriates General Fund to the Emergency Board for general purpose and targeted special purpose appropriations, and makes other adjustments to individual agency budgets and position authority as described below.

Adjustments to Approved 2015-17 Budgets

OMNIBUS ADJUSTMENTS

Omnibus adjustments reflect budget changes in multiple agencies based on reductions in Department of Administrative Services' assessments and charges for services, Audits Division assessments, Attorney General rates, and debt service. Total savings are \$30.1 million General Fund, \$0.7 million Lottery Funds, \$28.5 million Other Funds, and \$11.1 million Federal Funds.

ADMINISTRATION

Department of Administrative Services

The Subcommittee approved a one-time \$951,393 Other Funds expenditure limitation increase and establishment of six limited-duration positions (1.71 FTE) for the Chief Human Resources Office to review the Human Resource Information System project (HRIS). The positions will review and update the preparations in the current project for business processes realignment that will be necessary with the adoption and deployment of any new HR IT system, review and update existing IT modernization plans, and study and improve conversion planning for implementation of HRIS. The Department will report initial findings of this review to the appropriate subcommittees of the Joint Committee on Ways and Means during the 2016 legislative session.

The Subcommittee also approved a \$293,314 Other Funds expenditure limitation increase and the addition of two positions for Shared Financial Services to accommodate service provision for the Department of Geology and Mineral Industries, which will now have financial functions carried out by DAS.

The Subcommittee also approved continuing to give nonlimited authority to DAS to make Other Funds expenditures necessary to disburse general obligation bonds sold during the 2013-15 biennium for the benefit of public universities. Disbursement of future bond sales will be done by the Higher Education Coordinating Commission (HECC), but during the 2013-15 biennium, the Department of Administrative Services (DAS) was given initial authority to disburse these proceeds. As the bond project duties related to issuance of Article XI-F and XI-G general obligation bonds transition from DAS to HECC per House Bill 3199, both agencies were given nonlimited authority to disburse proceeds of bonds issued during 2013-15. The total amount of undisbursed proceeds as of June 30, 2015 from 2013-15 bond sales is \$196,523,642. The initial estimate of the amount of 2013-15 proceeds DAS will disburse in 2015-17 per agreements with public universities is \$145,875,000, with HECC assumed to disburse \$50,648,642. These amounts will likely change once the timing of final transition from DAS to HECC is known.

Senate Bill 5507 includes one-time General Fund appropriations to the Department of Administrative Services for the following purposes:

- \$1,100,000 for disbursement to the National Urban Housing and Economic Community Development Corporation (NUHECDC) for implementation of an affordable homes, skills training, and jobs for unemployed prior-offenders, at-risk youth, and veterans. NUHECDC is directed to provide written status reports to the Department of Administrative Services and the Legislative Fiscal Officer each quarter during the 2015-17 biennium to document progress in meeting the program's objectives of providing affordable housing for low to

CSEAS Project will be dependent upon OSCIO and LFO concurrence that DOJ is both ready and able to initiate project execution activities.

The Subcommittee established a \$2 million General Fund special purpose appropriation to the Emergency Board for the Defense of Criminal Convictions as a contingency for potential caseload increases.

The Subcommittee also appropriated \$240,550 General Fund to support the Oregon Crime Victims Law Center. This will bring total funding for the program to \$367,800 for the biennium, including \$77,250 General Fund of existing General Fund and \$50,000 Other Funds from the renewal of a state grant.

Oregon Military Department

Senate Bill 5507 includes \$89,563 General Fund and \$358,253 Federal Funds expenditure limitation for three permanent full-time federal operations and maintenance (FOMA) positions (3.00 FTE). These are 3 of 8 positions eliminated from the Portland Air National Guard (PANG) base in 2009 budget cuts, which brought the FOMA workforce to 18, of 26 National Guard authorized positions. In 2013 the Legislature restored the 8 positions as Limited Duration (LD). This funding restores 3 of the LD positions as permanent. The National Guard pays 80% of the cost, General Fund covers the rest. The restored positions will maintain liquid jet fuel receiving, storage, and distribution for all 21 F-15's at PANG; maintain pesticide and herbicide certifications to keep grassy areas in compliance with Port of Portland mandated wildlife standards, which are meant to deter birds from the airfield; and maintain HVAC systems for climate control of critical communications equipment, as well as base fire alarm systems.

Also included is \$250,000 one-time General Fund for the Oregon Military Museum for creation of exhibits and other capital expenditures directly related to the establishment and maintenance of the museum.

Two projects are approved for Article XI-Q bonding (House Bill 5005) and capital construction expenditure limitation (House Bill 5006). The first project is a new Joint Forces Headquarters facility to be located in Salem. Two-thirds of the total bonds will be sold in 2016 and the remainder in 2017. Debt Service in 2015-17 is approved in this bill at \$434,833 General Fund. Second is expansion of the Oregon Youth Challenge Armory in Bend. Those bonds will be issued in 2017, with debt service beginning in the 2017-19 biennium. Cost of issuance is \$153,000 for the two projects; expenditure limitation is included in this bill. Debt service for the two projects in 2017-19 is \$2.3 million General Fund.

Department of State Police

The Subcommittee increased the Other Funds expenditure limitation in the Fish and Wildlife Enforcement Division by \$993,640 for capital equipment replacements costs. Expenditure limitation is increased by \$78,830 Other Funds in the Administrative, Agency Support, Criminal Justice Information systems, and Office of the State Fire Marshal Other Funds limitation to pay for costs associated with reclassifying fourteen positions in the Firearms Background Check program to better address complexity and volume of firearm background checks.

Measure 76 Lottery Funds for Fish and Wildlife Enforcement are increased by \$278,788 for fish and wildlife enforcement. Fish and Wildlife troopers are reduced by (0.50) FTE due to the phase-in of one position approved for patrolling the Columbia River late in the 2015-17 biennium.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT 2015-2017 BIENNIAL BUDGET Agency Summary

b. Mission Statement and Statutory Authority - The Oregon Military Department provides the state of Oregon and the United States with a ready force of Citizen-Soldiers, Airmen and Civilians, trained and equipped to respond to any contingency.

Article X of the Oregon Constitution establishes a State Militia. The Oregon Military Department is established by ORS 396.305; while ORS Chapters 396, 398, 399, 401, 403 and 404 contain the authorities and duties of the Oregon Military Department, Oregon National Guard and Office of Emergency Management.

c. Agency Plans - The Oregon National Guard has a long tradition and history dating back to 1843. The National Guard is found in both the United States Constitution and the Oregon Constitution. The tradition and history of the Oregon National Guard is grounded on its mission statement. The Oregon Military Department, Oregon National Guard and the Office of Emergency Management perform to our creed: *“Always Ready, Always There.”* The Oregon Military Department’s priorities are to:

1. Provide trained and ready operational forces to our State and Nation;
2. Be effective stewards of our resources;
3. Sustain the Oregon Military Department community; and
4. Forge and maintain partnerships.

• **Long-Term Plan:**

The Oregon Military Department’s primary purpose is to advance the Oregon National Guard and Emergency Management missions while maintaining our legacy - service to the citizens of Oregon. The Oregon Military Department and the Oregon National Guard are both a state and federal agency able to access many resources to further its state and federal mission.

Nearly every generation in American history can attest to the significant contribution citizen-soldiers and subsequently airmen have made in defense of our freedoms and way of life. Long before our nation’s War on Terrorism, the Oregon National Guard, both at home and abroad, had served this nation and our state at unparalleled levels. In the near past, the Oregon National Guard contributed substantial forces, equipment and people to critical stabilization forces in Bosnia; peacekeeping forces in the Sinai; no-fly zone operations in Southern and Northern Watch; State to State partnerships; domestic emergencies; humanitarian operations in rapid response to the Gulf Coast in the

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

aftermath of Hurricane Katrina and on the scene for Hurricane Rita; and numerous combat operations across the world, particularly in the Persian Gulf, Iraq and Afghanistan.

The Oregon National Guard continues deployments of citizen-soldiers and airmen to dangerous and austere conditions in places like Afghanistan and Southwest Asia where we conduct ground, air and space combat operations in support of the Global War on Terrorism.

The Oregon National Guard is a unique instrument, commanded by the Governor, but the majority of its funding is derived from the federal government. It serves Oregon and the United States. The Oregon Military Department's long and short-term plans focus on our state mission, the critical support we provide for the citizens of Oregon, while at the same time maintaining effective readiness and response in support of National Military Strategy. Issues concerning the Oregon National Guard's federal mission and response are interwoven in our planning strategies.

Assure a Ready Trained Force for Rapid Response to Statewide Emergencies; and Enhance Community Support and Readiness for Emergency Response and Recovery: These strategic goals are at the heart of the agency's core state mission. The Oregon Military Department offers key performance measures aligned with its mission. Actions needed to achieve these goals include:

- Continuing recruiting efforts to assure force strength;
- Managing and improving emergency management and response coordination efforts through the agency's emergency coordination center;
- Effectively partnering with Federal, State and Local Governments in securing funds and identifying emergency and Homeland Security requirements;
- Strategically stationing equipment assets and maintaining asset accountability;
- Supporting its volunteer organization - the Oregon State Defense Force;
- Maintaining real property assets to a standard for assuring immediate emergency use of armories, buildings, and installations located throughout Oregon;
- Maintaining and upgrading our Information Systems infrastructure for ensuring effective communication and security.

The Military Support to Civil Authorities (MSCA) section of the Oregon Military Department performs as a conduit for the coordination of Oregon National Guard personnel and equipment assets and resources in times of crisis and emergency. At the State level, MSCA provides liaison to state and county officials, conducts and creates emergency plans and coordination, operates the Oregon National Guard Joint Emergency Operations Center (JOC), and identifies and mobilizes Oregon National Guard resources in response to emergencies. Nationally, MSCA provides linkage to the United States Northern Command (NORTHCOM), the National Guard Bureau, Regional State Partners, and Homeland Security. MSCA remains able to expand in support of all incident areas.

MSCA continues its support of Homeland Security and Force Protection by providing security at critical military facilities throughout Oregon, maintaining 24 hour, 7 days a week Joint Emergency Operations Center operations, support to soldiers' federal activation, and

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

coordination with the Office of Emergency Management for Search and Rescue (SAR). MSCA updates and maintains the Joint Emergency Operations Plan to reflect the changing requirements of the State and Homeland Security missions.

MSCA partners with many agencies and participates in various emergency councils including: the Governor’s Security Council, State Interoperability Executive Council, Oregon Office of Emergency Management; Oregon Emergency Response System Council; Federal Emergency Management Agency Region 10; Oregon State Drought Council; and the Oregon Department of Forestry Incident Command System. MSCA and the Office of Emergency Management also participate in county and state emergency preparedness exercises to include: earthquake; flood; chemical and biological attacks; power outages; and drought support.

As the Department of Defense works to define its role in providing Homeland defense and security for the nation, it includes the National Guard as a primary player because of our inherent capability to promote a better federal/state relationship. In nearly every conceivable scenario, National Guard units—under the control of their Governor and Adjutant General—will be the first military responders on the scene. Northern Command and the Department of Homeland Security have established the lines of coordination with the National Guard Bureau, fulfilling our role as the statutory “channel of communications on all matters pertaining to the National Guard.” This will ensure effective military support for the full spectrum of Homeland Security preparation, training, exercise and operations.

The Oregon Military Department has recognized a need for improved efficiency in the tracking, accounting, monitoring and reporting of its capital assets. The agency’s capital assets are put to use on a daily basis and many are placed into 24 hour operation during state emergencies. The Oregon Military Department currently administers 38 armories and readiness centers, 2 Air National Guard bases, and 15 training/logistic sites. The location of these facilities throughout the state allow for the stationing of units and equipment able to respond to regional emergencies. The Installations Division recently completed an extensive analysis of all Oregon Army National Guard facilities. This analysis, titled “Installation Status Report” (ISR), is an annual requirement by the Department of the Army through the National Guard Bureau. The ISR concept is a decision support system designed to improve management of limited resources for facilities and environmental programs. The 2013 ISR results for Oregon’s Armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition.

Infrastructure and facilities are increasingly important. Inadequate facilities impact both the training and quality of life of our members as well as drain valuable resources. Our facilities have to reflect the developing roles and missions for increased Oregon National Guard participation in both global warfare and Homeland Security. We need to ensure decision-makers know and understand the value of our infrastructure for both Homeland Security and distributed wartime capability. Infrastructure includes our tremendous information technology distributed capabilities and the security of data. Information Technology is both a current and future response enabler—both at home and abroad.

Agency Request Governor’s Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

The ability to respond to state emergencies requires the Oregon Military Department to continually improve and maintain its statewide network of facilities and military units. The Oregon Military Department must have the people, equipment, and facilities throughout the state to ensure immediate response to Oregon communities in times of need. New Department of Defense missions—including the Global War on Terrorism and Homeland Security—require end strength (human) resources above the pre- “9/11” assessments. Our facilities throughout the state serve as the physical center where soldiers and airmen assemble as collective military units. Maintaining these facilities also ensures their ready access to communities.

The Oregon National Guard is ready to accomplish its mission. One of the most important lessons that Oregonians can take from the past decade is a fuller appreciation of the adaptability and ability to react quickly provided by the National Guard’s three different duty statuses: State active duty as the state militia; our federal role as the National Guard of the United States in Title 10 status; and the federally funded and state-executed operations under Title 32 as the Oregon National Guard under the control of the Governor. This flexibility must be protected and well-resourced at all times. In addition, many discovered that while partial mobilization authority is critical at times of great need, the use of volunteerism in combination with the necessary Partial Mobilization authority gives National Guard commanders the proper tools to insure sustained, ready forces.

- **Agency Process Improvement Efforts:**

The Oregon Military Department is a dynamic organization with a critical mission that has both domestic and foreign implications. To successfully accomplish this mission in an environment which demands efficiencies and effectiveness the Military Department must strive to continuously improve its operations. In order to gauge improvements at the state level, the Military Department utilizes a series of nine performance measures. Each measure is uniquely designed to provide insight into different areas of our operations. On an annual basis the Military Department gathers data on recruitment levels, armory condition, revenue generation, and equipment availability, completion percentages of the Oregon Youth Challenge Program, reintegration services, local emergency operations plans, hazard mitigation plans, and overall customer satisfaction. This data is reviewed and analyzed and then centralized into the Annual Performance Progress Report, a copy of which is located in the Special Reports section, and then sent to agency leadership for review. In addition to the aforementioned nine state approved performance measures the Oregon National Guard utilizes a series of federal performance standards to gauge progress.

During the 2013-15 biennium the Military Department has seen success with several of our performance measures while facing challenges with others. Measures showing success during this period included armory condition, equipment availability, reintegration, emergency operations plans, hazard mitigation plans, and customer satisfaction. All of these measures were within 5% of their legislatively approved targets. Agency leadership has focused on working to maintain the high levels of success the Military Department has seen with regards to these measures. This has included the development of sound policy packages for executive and legislative consideration, partnering with the federal government to fully

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

leverage state resources, and providing support and insight to local governments. Measures which provided challenges included recruitment and revenue generation. Agency leadership is aware of the challenges associated with these two measures, and they are working to develop solutions in order to improve the outcomes in future reporting periods.

As the department moves towards the 2015-17 biennium and beyond the leadership of the organization is focused and determined to continually improve our levels of performance. This includes working with the Governor's Office and the Legislature to ensure we are measuring processes and outcomes which are valuable to both the agency and the state of Oregon. The increased importance being placed on performance management and measurement at the upper echelons of state government is being replicated within the Oregon Military Department. This is shown through the involvement and dedication of key agency leaders in the continual review, analysis, and modification of the Military Department's key performance measures.

- **2015-2017 Short-Term Plan:**

Agency Programs: The Oregon Military Department, as established by ORS 396.305, is responsible for the supervision and administration of the military affairs and emergency management of the state. The agency prepares and promulgates necessary regulations for the organization, government, armament, equipment, training, and compensation of the militia of the state in conformity with the provisions of ORS Chapters 396, 398, and 399, and the laws of the United States, and in conformity with ORS Chapter 401, 403 and 404 for emergency preparedness, planning, mitigation, response and recovery. Oregon Military Department primary budget program units include:

(001) Administration Program – The Administration Program provides senior-level leadership and support for the command, control, and administration of the Oregon National Guard and the Office of Emergency Management. There are five major programs within the Administration Program:

The Command Group consists of The Adjutant General, the Joint Force Headquarters, including the Assistant Adjutants Generals for the Air Guard Component and the Army Guard Component, and the Deputy Director for the State Affairs Component and the Oregon State Defense Force. The purpose of the Command Group is to administer all components of the Oregon National Guard and Oregon Emergency Management.

The Financial Administration Division provides fiscal management of the agency and oversight of the agency's state and federal budgets. The division also manages agency risk, financial accounting and reporting, agency wide payroll for state employees and the National Guard when called to state service, public procurement activities, and accounts for agency property.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

The State Personnel Office is responsible for human resource management and labor relations activities for state employees of the Oregon Military Department.

The Service Member and Family Support Program as part of the organization’s service support for soldiers, airmen and their families provides a centralized referral service to soldiers and airmen. The program provides referrals to various organizations on issues such as military pay, medical problems, job searches, and emotional and spiritual counseling.

The Public Affairs Office is responsible for providing information to the public concerning activities of the State’s Emergency Management and the Oregon National Guard, responding to requests for information from the public and private sector, and providing information to include our active and retired members of the Oregon National Guard.

Legislatively Adopted Budget -	General Fund	\$3,961,858
	Other Funds	<u>\$2,094,454</u>
	TOTAL	\$6,056,312

Legislatively Adopted Budget Positions – 24 positions – 22.88 FTE.

Revenue Source – General Fund – The Command Group and Public Affairs are primarily supported by General Fund. The Financial Administration Division and State Personnel Office is partially General Fund.

Other Funds - Internal Centralized Personnel Plan assessments are budgeted as transfers from federally funded programs and provide funding for Financial Administration Division and State Personnel Office employees supporting federal programs.

Customers - Citizens and communities of Oregon; all Oregon National Guard members.

(002) Operations Program - There are 15 major programs within the Operations Program.

The Army National Guard Facilities Operations and Maintenance program provides operation, maintenance, repair, and alteration of existing Oregon Army National Guard facilities.

The Army National Guard Construction Operations program provides construction management services for our Army National Guard Major Construction Program.

BUDGET NARRATIVE

The Army National Guard Environmental Program provides environmental management services for Oregon Army National Guard facilities.

The Counterdrug Program supports efforts to combat illegal drug use within Oregon's communities. The program uses National Guard personnel, equipment and facilities to add capabilities that otherwise might not be available to law enforcement agencies and community-based organizations.

The Wildland Fire Protection Program began in the 2009-11 biennium and is 100% federally reimbursed. The goals of the program are to comply with fire protection requirements set forth in Oregon Revised Statute 477.095 and related statutes; support and sustain the Oregon National Guard's training mission; sustain the natural environment and native vegetation of the Oregon Military Department's training ranges and lands; enhance both military and public fire safety in the vicinity of Oregon Military Department training ranges and lands; and to enhance Oregon National Guard support during State declared wildland fire emergencies or natural disasters.

The Air National Guard Civil Engineering Program provides facility operations and maintenance for the Portland Air Base, Kingsley Field, and Air National Guard facilities located on Camp Rilea.

The Air National Guard Security Program provides security police protection at the Portland Air Base and Kingsley Field.

The Air National Guard Fire Protection Program provides fire protection at the Portland Air Base and Kingsley Field.

The Air National Guard Environmental Program manages environmental issues and ensures environmental compliance at the Portland Air Base, Kingsley Field, and Air National Guard facilities located on Camp Rilea.

The Air National Guard Billeting Program provides lodging to Oregon National Guard members, F-15 fighter pilot students, and flight medicine students receiving training at Kingsley Field.

The Electronic Security System Program provides alarm systems for all Oregon Army National Guard small arms and ammunition storage facilities.

The Equipment Refurbishment Program repairs unserviceable US Army electronics, power generation, and support equipment to fill critical equipment shortages throughout the National Guard.

The Telecommunications Program procures and maintains telecommunications systems for the Oregon Army National Guard.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

The Distributed Learning Program (DLP) is a nationwide National Guard program providing access to video conferencing, video programming, computer based training, web based training, interactive audio, interactive video, electronic mail and electronic network systems.

The Anti-Terrorism Program provides 100% federal funding for one position to develop, implement, manage and monitor a comprehensive Anti-Terrorism program for protecting state and installation personnel, information, infrastructure and other assets from acts of terrorism.

Legislatively Adopted Budget -	General Fund	\$9,057,681
	Other Funds	\$4,751,092
	<u>Federal Funds</u>	<u>\$82,013,077</u>
	TOTAL	\$95,821,850

Legislatively Adopted Budget Positions – 339 positions – 296.51 FTE.

Revenue Source – General Fund – General Fund is used to support portions of the Army National Guard (ARNG) Facilities Operations and Maintenance Program, ARNG Construction Operations Program, and Air National Guard (ANG) Administration Program. General Fund is also used for the state matching fund requirement for portions of the ARNG Environmental Program, ANG Civil Engineering Programs, and ANG Environmental Programs.

Other Funds - Other Fund revenue is received primarily from the rental of facilities.

Federal Funds - All programs receive Federal Fund revenue through National Guard Bureau Federal/State Cooperative Agreements.

Customers - Citizens and communities of Oregon; Oregon National Guard members; Port of Portland; US Army and US Air Force; local, state, and federal law enforcement agencies.

(003) Office of Emergency Management – The Office of Emergency Management (OEM) includes the Oregon Emergency Administration Program, 9-1-1 Emergency Telephone Program, Terrorism Program and the Disasters Program.

BUDGET NARRATIVE

The purpose of the Office of Emergency Management is to execute the Governor's responsibilities to maintain an emergency services system as prescribed in ORS 401 and ORS 403 by planning, preparing and providing for the prevention, mitigation and management of emergencies or disasters that present a threat to the lives and property of citizens of and visitors to the State of Oregon.

The program is responsible for coordinating and facilitating emergency planning, preparedness, response and recovery activities with the state and local emergency services agencies and organizations, and shall;

Make rules that are necessary and proper for the administration of ORS 401;

- Coordinate the activities of all public and private organizations specifically related to providing emergency services within this state;
- Maintain a cooperative liaison with emergency management agencies and organization of local governments, other states, and the Federal Government;
- Have such additional authority, duties and responsibilities authorized by ORS 401.015 to 401.105, 401.260 to 401.325 and 401.355 to 401.580 or as may be directed by the Governor;
- Administer grants relating to emergency program management and emergency services for the state;
- Provide for and staff a State Emergency Operations (Emergency Coordination) Center to aid the Governor and the office in the performance of duties;
- Serve as the Governor's authorized representative for coordination of certain response activities and managing the recovery process;
- Establish training and professional standards for local emergency program management personnel;
- Establish task forces and advisory groups to assist the office in achieving mandated responsibilities; and
- Enforce compliance requirements of federal and state agencies for receiving funds and conducting designated emergency functions.

The OEM Administration Program provides overall administration and direction over the emergency management functions of the division as prescribed by ORS 401.

The 9-1-1 Emergency Telephone Program administers ORS 403.120 – 403.250 governing emergency telecommunications systems for the state. The program receives 9-1-1 excise tax of \$.75 per month per landline and wireless device capable of accessing 9-1-1 services. This tax is distributed quarterly to the 43 Public Service Answering Points across Oregon who provide 9-1-1 services.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

The Domestic Preparedness Program administers and distributes federal grant funds from the US Department of Homeland Security. These grants are used by state and local governments to increase security and preparedness for a full spectrum of natural and man-made hazards.

The Disasters Program distributes federal funds from the Federal Emergency Management Agency (FEMA) to state and local jurisdictions following federally-declared disasters. It also distributes pre-disaster and flood mitigation grants for projects that prevent future loss during natural disasters.

Legislatively Adopted Budget -	General Fund	\$1,855,221
	Other Funds	\$89,099,316
	Federal Funds	<u>\$161,857,041</u>
	TOTAL	\$252,811,578

Legislatively Adopted Budget Positions – 42 positions – 42.62 FTE.

Revenue Source – General Fund – General Fund is used to support portions of the Office of Emergency Management Administration, as a 50% match under the Emergency Management Performance Grant.

Other Funds - Other Fund revenue is received from 9-1-1 tax.

Federal Funds - Office of Emergency Management Administration and Domestic Preparedness Programs receive Federal Fund revenue through the US Department of Homeland Security’s Homeland Security Grant Program.

Customers - Citizens and communities of Oregon; Oregon National Guard members; Port of Portland; US Army and US Air Force; local, state, and federal law enforcement agencies.

(004) Community Support Program - The Community Support Program includes the Oregon Youth Challenge Program, the STARBASE Program and the Emergency Operations Program.

The Youth Challenge Program offers at-risk high school dropouts an opportunity to build a future. The program consists of two phases. The first phase is a 22 week residential program. Students learn self-discipline, leadership, responsibility, and work skills that enable them to be successful in society. Students have the opportunity to complete educational credit with a goal of reintegrating into high school to earn a diploma or to prepare for General Education Development (GED) examinations. The second phase of the program is a 12-month nonresident mentoring

BUDGET NARRATIVE

program. Program continuity is provided in this phase by incorporating positive role models from the community as mentors for the students. This furthers student independence by making it possible to meet personally set goals and provide the groundwork to build productive and contributing Oregon citizens. The Oregon Youth Challenge Program has been recognized as the Best Program nationally three times. Since its inception in October 1994 through June 2015, 4,394 students have graduated the Oregon Youth Challenge Program.

The Science and Technology Academy Reinforcing Basic Aviation and Space Exploration (STARBASE) Program is designed to increase at-risk third through eighth grade students' awareness of the importance of math and science in today's high-technology work environment. No state funds are required to operate this program.

The Emergency Operations Program provides critical National Guard manpower and equipment support for emergencies in Oregon when called upon by the Governor, the Commander-in-Chief of the Oregon National Guard. Because such emergencies and associated State Active Duty requirements cannot be foreseen, there is no budget for this program. Other Fund limitation is requested at Legislative Emergency Boards after State Active Duty missions are completed.

Legislatively Adopted Budget-	General Fund	\$197,381
	Other Funds	\$2,101,015
	Federal Funds	\$8,419,836
	TOTAL	\$10,718,232

Legislatively Adopted Budget Positions – 46 positions – 46 FTE.

Revenue Source – General Fund – General Fund provides a portion of the 25% state matching fund requirement for the Youth Challenge Program.

Other Funds - The Youth Challenge Program receives Average Daily Membership Other Fund revenue through the Bend-LaPine School District. The funds support a portion of the program's 25% state matching fund requirement.

Federal Funds - All programs receive Federal Fund revenue through National Guard Bureau Federal/State Cooperative Agreements.

Customers - Citizens and communities of Oregon; at-risk youth.

BUDGET NARRATIVE

(087) Debt Service – The Debt Service Program provides funding to make payments on principal, interest and financing costs for Article XI-Q bonds used to construct Army National Guard facilities throughout Oregon.

Legislatively Adopted Budget -	General Fund	\$9,697,828
	Other Funds	\$259,014
	Federal Funds	\$0
	TOTAL	\$9,956,842

Legislatively Adopted Budget Positions - 0 positions - 0 FTE.

Revenue Source – General Fund - General Fund is used for a small portion of Debt Service payments.

Other Funds - Revenue is received from Article XI-Q bonds for financing costs related to issuance. Armory rental revenue has been used to pay debt service on the 2011-O and 2014-A Article XI-Q bond refunding of the 2004-A COP for the Baker City Readiness Center.

Customers – Soldiers, citizens and communities of Oregon who utilize the new facilities constructed with XI-Q bond funding.

(088) Capital Improvements –

Legislatively Adopted Budget -	General Fund	\$250,000
	Other Funds	\$194,377
	Federal Funds	\$4,770,599
	TOTAL	\$5,214,976

Legislatively Adopted Budget Positions - 0 positions - 0 FTE.

Revenue Source – General Fund - One-time General Fund is approved for creation of exhibits and other capital expenditures at the Oregon Military Museum.

Other Funds - Donations from the Historical Outreach Foundation will be used toward restoration of the Quartermaster supply building at the Oregon Military Museum.

BUDGET NARRATIVE

Federal Funds - Federal Funds for Capital Improvement projects are received through National Guard Bureau Federal/State Cooperative Agreements.

(089) Major Construction – The Major Construction Program accomplishes projects over \$1,000,000 involving constructing or changing the use or function of a facility. It includes planning for the construction or acquisition of future facilities. The program is not federally or state mandated.

Legislatively Adopted Budget -	General Fund	\$	0
	Other Funds	\$11,813,281	
	Federal Funds	\$21,297,418	
	<u>TOTAL</u>	\$33,110,699	

Legislatively Adopted Budget Positions - 0 positions - 0 FTE.

Revenue Source – General Fund - General Fund is occasionally used to support portions of the Capital Construction Program.

Other Funds - All revenue is dedicated specifically for Major Construction projects and cannot be utilized to support other activities. Revenue is received from Article XI-Q bonds and the sale of facilities.

Federal Funds - Revenue is received through National Guard Bureau Federal/State Cooperative Agreements.

Customers - Citizens and communities of Oregon, and Oregon Army National Guard units.

Environmental Factors:

Factors that Aid Achievement of Desired Results:

1. The Oregon National Guard will invest in Oregon's future through at-risk youth programs, mentor programs, counterdrug programs, and community improvement civil-military projects.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

2. The Oregon National Guard will add value to Oregon by providing equipment and a highly skilled emergency force available for response to civil unrest and natural disasters (flood, windstorm, forest fire, and earthquake).
3. Enter into partnerships with governmental agencies for:
 - a. Improved State of Oregon response to natural disasters, Homeland Security and civil emergencies.
 - b. Joint use of facilities.
 - c. Marketing and management of rental programs.
4. Increase revenue through improved marketing and management of rental programs.

Factors that Hinder Achievement of Desired Results:

1. Insufficient state General Fund to fully leverage available Army and Air National Guard federal funding, as well as Department of Homeland Security federal funding.
2. Insufficient state positions and funding to manage programs at an acceptable level.
3. Insufficient state General Fund to fully support Armory operations, maintenance, and sustainment.
4. Inefficient and poorly maintained facilities hinder the marketing and rental of facilities to assist in the funding for operations and maintenance.

Agency Initiatives:

The Oregon Military Department's initiatives for the 2015-2017 budget focus on providing the citizens of the State of Oregon with a ready force of citizen soldiers and airmen equipped and trained to respond to any contingency. Our standards in leadership, equipment and training are geared to produce a professional military force, capable of meeting any state or national challenge. Federal activations continue as national policy and national military strategy relies more heavily on the reserve components of the military. Though the Oregon National Guard continues to experience federal mobilization efforts, our commitment to Oregon will not diminish.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

1. Administration Program Initiatives:

The Administration Program provides command, control, and oversight of agency operations and military assistance during times of natural disaster, civil disturbance, and other emergencies declared by the Governor. Maintaining a viable force is the critical component of meeting our commitment and relies heavily on recruiting and retaining members.

The Oregon Military Department continues to operate and support the Oregon State Defense Force without any Legislative approved funding for the administration and training so as to assure readiness in providing volunteer assistance to the National Guard and communities at times of state emergencies. Another recent and significant reduction was ordered by the Legislature which impacted the agency's information systems network by cutting I.T. staffing to one individual, creating a serious situation.

2. Operations Program Initiatives:

The Oregon Military Department operates and maintains state-supported facilities and installations in a condition of readiness to support the agency mission. The Oregon Military Department also administers cooperative agreements between the state and federal government to operate and maintain federally supported facilities and installations to Department of Defense standards. These initiatives include providing environmental compliance oversight, construction management services, fire protection, aircraft crash/rescue response, and installation security. Through state and federal cooperative agreements, the Oregon Military Department assists local, county, state, and federal law enforcement agencies in reducing illegal drug demand and supply in Oregon communities. Additional administration of cooperative agreements provide for the repair of unserviceable US Army electronics, power generation, and support equipment for distribution throughout the Department of Defense military components. The operation and maintenance of Oregon Army National Guard telecommunications systems, and providing storefront recruiting office spaces in cities throughout Oregon are also administered through cooperative agreement with the federal government.

The construction, operation, and maintenance of facilities and installations are examined and evaluated to federal standards, and are reported each year. The Oregon Military Department will strive to meet facility and installation high quality and quantity condition ratings based on the annual Installations Status Report. Facility and Installation targets are established for making sure these assets provide the required training platforms for our soldiers and airmen. Meeting these facility and installation targets ensures readiness of these assets in support of the agency goal for enhancing community support and readiness for emergency response. These public facility assets also provide Oregon communities and citizens with facilities for use by rentals, that otherwise may not be available. Funding requested in this

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

budget should have positive impacts on Key Performance Measures #2 (Armory Condition), #3 (Revenue Generation - % of available armory time rented), and #9 (Customer Service - % of customers satisfied with service provided by the agency).

3. Office of Emergency Management Initiatives:

The missions of the Oregon Military Department and the Office of Emergency Management are very complementary as are our training needs, our planning efforts, our exercising responsibly and our roles during small or large scale disasters. Placing these charges under the same agency models the structures in Washington, Idaho, Alaska and Montana. These states are our regional partners and by having a similar structure, our ability to work together during times of regional crisis will only be enhanced. Expected results are a more unified structure for response and planning which will eliminate the potential for confusion and delay in emergency response at the state level and will facilitate inclusion of military department response capabilities in all disaster and large scale emergency response plans. Funding in this budget should have positive impacts on Key Performance Measures #7 (Domestic Preparedness - % of Counties with NIMS Compliant Emergency Operations Plan), and #8 (Hazard Mitigation Plans - % Population covered by a FEMA approved Hazard Mitigation Plan).

4. Community Support Program Initiatives:

The Oregon Military Department administers state and federal cooperative agreements to operate Oregon Youth Challenge, and STARBASE. Our initiatives support these activities, and also identify other enhancements to provide for Oregon youth. These programs result in benefits for the state and the Oregon National Guard by:

- a. Increasing grade school students' awareness of the importance of math and science through the STARBASE program.
- b. Providing high school dropouts an opportunity to obtain a high school diploma, academic credit or prepare for the GED exam and receive job skill training through the Oregon National Guard Youth Challenge Program.

The Emergency Operations Program remains prepared to identify and mobilize resources in response to emergencies within the borders of Oregon and as directed by the Governor. We will manage, monitor, and improve the agency's emergency coordination efforts. The Oregon National Guard's Joint Emergency Operations Center (JOC): The JOC will identify and mobilize assets and resources within 24 hours of notification in response to emergencies. The Oregon Military Department will continue to seek Emergency Funds at the completion of emergency operations as the agency operates without Legislative funding appropriation for the immediate employment of personnel in state active duty status for placing the JOC into enhanced operation, and to provide other active state duty requirements pursuant to ORS 399.065 and 399.075.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

d. Criteria for 2015-2017 Budget Development:

Agency Goals: Assure a Ready Trained Force for Rapid Response to Statewide Emergencies, and Enhance Community Support and Readiness for Emergency Response.

1. Support the Oregon National Guard mission by ensuring federal readiness standards and strength levels are achieved or exceeded. This is accomplished through active and passive recruiting activities to attract a continual stream of members.

2. Ensure the Oregon National Guard is prepared to respond to natural disasters or civil unrest and Homeland Security, and to assist communities in recovering fully from the effects. The Oregon Military Department will manage, monitor, and continually improve its emergency coordination efforts by conducting and evaluating semi-annual Emergency Operations Center exercises. Annual alert notifications will be conducted and evaluated, including annual updates of alert notification rosters. The Military Support to Civil Authorities section will participate in multi-agency emergency exercises and councils, and modify and update the agency's emergency procedures and plans each year. The Oregon Military Department will continue to administer and train its volunteer force, the Oregon State Defense Force, to be ready to assist the National Guard and Oregon communities at times of state emergencies.

2.a. Account for and control agency capital assets to assure their availability when needed in response to state emergencies.

2.b. Ensure Oregon National Guard facilities are available and meet requirements for use during a state emergency. The Oregon Military Department administers its facilities and installations located throughout the state for the stationing of units and equipment. The readiness of the facilities and installations remain a vital component in emergency response. The Oregon Military Department will continue to pursue sufficient funding and personnel to support facilities operations, maintenance and construction. Federal participation is utilized to the maximum extent. Standardized annual facilities and installations status inspections will be conducted and reported to the National Guard Bureau. Facilities sustainment, rehabilitation, and modernization plans will be developed and executed based on available funding. Long range construction plans will be developed and executed.

e. **Major Information Technology Projects/Initiatives:** The Oregon Military Department is in the planning stages for a transition to Next Generation 9-1-1 Technology. Pursuant to a budget note in 2013 Senate Bill 5534, OMD is developing a comprehensive set of foundational project management documents for the design, installation and implementation of a statewide Next Generation 9-1-1 Internet Protocol Network. The agency is working closely with the Oregon State Chief Information Officer (OSCIO) and Legislative Fiscal Office to ensure proper planning.

OMD received a subsequent budget note in 2015 HB 5032 that directs OMD to work with OSCIO to “produce a Next Generation 9-1-1 GIS Project Plan for the collection, management, and sharing of geographic data sets and geographic information systems capabilities required to

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

effectively implement Next Generation 9-1-1 throughout the state of Oregon.” The plan is to be submitted to the Legislative Fiscal Office in December 2015 and presented to the Joint Legislative Committee on Information Management and Technology and to the Joint Committee on Ways and Means during the 2016 Annual Legislative Session.

The current 9-1-1 system operates on outdated analog technology which is increasingly expensive to maintain and cannot accommodate the need to receive and process a steadily increasing call-load from modern personal communications devices used by our citizens which are based upon digital technologies. The current analog network will not accommodate digital communications, thus the need to migrate the current 9-1-1 system.

The constant evolution of communications technology impacts the functionality of the 9-1-1 system and the public’s expectation of the system. Next Generation features available today such as the increased ability to handle and recover from a disaster, obtain accurate caller location information, and enable applications such as text, video, and telematics can greatly improve emergency response by local and state resources.

Currently the state expends millions of dollars from the Emergency Communications Tax on an annual basis for analog 9-1-1 services. These costs are reflective of both tariffed and contracted expenses. 9-1-1 funds are also used to support local PSAP activities including call-taking and 9-1-1 mapping data.

Remaining on the current network will cost the State financially and hinder its ability to deliver emerging personal communication technologies. It is clear that change is required to the networks delivering 9-1-1 messages for the benefit of the citizens and visitors of Oregon. The Office of Emergency Management, in conjunction with OSCIO, is working to replace this outdated network with a state of the art digital system.

- 12 Social Support

19. Legal Requirement Code

- C Constitutional
- D Debt Service
- FM Federal - Mandatory
- FO Federal - Optional (once you choose to participate, certain requirements exist)
- S Statutory

Within each Program/Division area, prioritize each Budget Program Unit (Activities) by detail budget level in ORBITS

Document criteria used to prioritize activities:

The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizen soldiers and airmen, equipped and trained to respond to any contingency, natural or man-made. When we are needed, we are there. The Oregon Military Department is responsible for administering the Oregon National Guard and for coordinating and facilitating emergency planning, preparedness, response and recovery activities with state, county and local emergency service agencies and organizations.

Article X of the Oregon Constitution establishes a State Militia. The Oregon Military Department is established by ORS 396.305; while ORS Chapters 396, 398, 399, and 401 contain the Oregon Military Department, Oregon National Guard and Oregon Emergency Management authorities and duties.

The Oregon National Guard has a long tradition and history dating back to 1843. The National Guard is found in both the United States Constitution and the Oregon Constitution. The tradition and history of the Oregon National Guard was grounded on the basis of its mission statement; "Ready force equipped and trained to respond to any contingency. When we are needed, we are there." The Oregon Military Department administers, houses, equips and trains the Oregon National Guard – a ready force to support the Governor during unrest or natural disasters and as a reserve force to the United States Air Force and the United States Army; And plans, prepares and provides for the prevention, mitigation and management of emergencies or disasters presenting a threat to the lives and property of Oregon's citizens and visitors to the State of Oregon.

The Oregon Military Department sets the basis for the prioritization of programs and projects upon its mission and the service to Oregon. The specific criteria for prioritizing agency activities are concerned with the public safety of Oregon. Successful mission preparedness and execution of this large organization (Oregon Military Department, Oregon National Guard, and Oregon Emergency Management) depends upon the balanced command, control, administration, and appropriate physical infrastructure for ensuring a ready and trained force in response to the immediate needs of Oregon. Highest rankings include command and administration followed by emergency management. The next higher to medium rankings include the agency's physical infrastructure of bases, camps and armories required for the assembly and training of the force with its equipment. Following rankings require the central activities for financial, resources and administrative functions that support the mission and force. Medium to low rankings include statutory and enforcement requirements, incentive and education programs, and youth programs.

- S Statutory

Within each Program/Division area, prioritize each Budget Program Unit (Activities) by detail budget level in ORBITS

Document criteria used to prioritize activities:

The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizen soldiers and airmen, equipped and trained to respond to any contingency, natural or man-made. When we are needed, we are there. The Oregon Military Department is responsible for administering the Oregon National Guard and for coordinating and facilitating emergency planning, preparedness, response and recovery activities with state, county and local emergency service agencies and organizations.

Article X of the Oregon Constitution establishes a State Militia. The Oregon Military Department is established by ORS 396.305; while ORS Chapters 396, 398, 399, and 401 contain the Oregon Military Department, Oregon National Guard and Oregon Emergency Management authorities and duties.

The Oregon National Guard has a long tradition and history dating back to 1843. The National Guard is found in both the United States Constitution and the Oregon Constitution. The tradition and history of the Oregon National Guard was grounded on the basis of its mission statement: "Ready force equipped and trained to respond to any contingency. When we are needed, we are there." The Oregon Military Department administers, houses, equips and trains the Oregon National Guard – a ready force to support the Governor during unrest or natural disasters and as a reserve force to the United States Air Force and the United States Army; And plans, prepares and provides for the prevention, mitigation and management of emergencies or disasters presenting a threat to the lives and property of Oregon's citizens and visitors to the State of Oregon.

The Oregon Military Department sets the basis for the prioritization of programs and projects upon its mission and the service to Oregon. The specific criteria for prioritizing agency activities are concerned with the public safety of Oregon. Successful mission preparedness and execution of this large organization (Oregon Military Department, Oregon National Guard, and Oregon Emergency Management) depends upon the balanced command, control, administration, and appropriate physical infrastructure for ensuring a ready and trained force in response to the immediate needs of Oregon. Highest rankings include command and administration followed by emergency management. The next higher to medium rankings include the agency's physical infrastructure of bases, camps and armories required for the assembly and training of the force with its equipment. Following rankings require the central activities for financial, resources and administrative functions that support the mission and force. Medium to low rankings include statutory and enforcement requirements, incentive and education programs, and youth programs.

Within each Program/Division area, prioritize each Budget Program Unit (Activities) by detail budget level in ORBITS

Document criteria used to prioritize activities:

The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizen soldiers and airmen, equipped and trained to respond to any contingency, natural or man-made. When we are needed, we are there. The Oregon Military Department is responsible for administering the Oregon National Guard and for coordinating and facilitating emergency planning, preparedness, response and recovery activities with state, county and local emergency service agencies and organizations.

Article X of the Oregon Constitution establishes a State Militia. The Oregon Military Department is established by ORS 396.305; while ORS Chapters 396, 398, 399, and 401 contain the Oregon Military Department, Oregon National Guard and Oregon Emergency Management authorities and duties.

The Oregon National Guard has a long tradition and history dating back to 1843. The National Guard is found in both the United States Constitution and the Oregon Constitution. The tradition and history of the Oregon National Guard was grounded on the basis of its mission statement; "Ready force equipped and trained to respond to any contingency. When we are needed, we are there." The Oregon Military Department administers, houses, equips and trains the Oregon National Guard – a ready force to support the Governor during unrest or natural disasters and as a reserve force to the United States Air Force and the United States Army; And plans, prepares and provides for the prevention, mitigation and management of emergencies or disasters presenting a threat to the lives and property of Oregon's citizens and visitors to the State of Oregon.

The Oregon Military Department sets the basis for the prioritization of programs and projects upon its mission and the service to Oregon. The specific criteria for prioritizing agency activities are concerned with the public safety of Oregon. Successful mission preparedness and execution of this large organization (Oregon Military Department, Oregon National Guard, and Oregon Emergency Management) depends upon the balanced command, control, administration, and appropriate physical infrastructure for ensuring a ready and trained force in response to the immediate needs of Oregon. Highest rankings include command and administration followed by emergency management. The next higher to medium rankings include the agency's physical infrastructure of bases, camps and armories required for the assembly and training of the force with its equipment. Following rankings require the central activities for financial, resources and administrative functions that support the mission and force. Medium to low rankings include statutory and enforcement requirements, incentive and education programs, and youth programs.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT 2015-2017 BIENNIAL BUDGET REDUCTION OPTIONS

The Oregon National Guard (ORNG) is the state’s militia, authorized under Article X of the Oregon Constitution. Section 1 reads, “The Legislative Assembly shall provide by law for the organization, maintenance and discipline of a state militia for the defense and protection of the State.”

The Oregon Military Department (OMD), established by ORS 396.305, is responsible for supervision of the military affairs of the state: namely, to administer, house, equip and train the Oregon National Guard to be ready to respond to any contingency, natural or man-made. The Oregon Military Department and the Oregon National Guard are both a state and federal agency. The state budget for the Military Department provides funding to administer and house the Oregon National Guard. The federal budget for the Military Department provides the majority of funding to pay, train and equip the Oregon National Guard.

The Oregon Military Department also includes the Office of Emergency Management (OEM). The purpose of OEM is to execute the Governor's responsibilities to maintain an emergency services system as prescribed in ORS 401 by planning, preparing and providing for the prevention, mitigation and management of emergencies or disasters that present a threat to the lives and property of Oregon citizens and visitors. This system is intended to facilitate, organize, resource, and manage a methodology in support of Oregon citizens and visitors for both pre-event and post-event activities.

The Oregon Military Department is one of the State’s oldest and largest agencies, with 9,074 employees (2,540 full-time and 6,534 part-time), serving in 38 armories, four training areas, and two air bases across the state; with over \$4 billion in facilities and equipment.

The General Fund for the Military Department is less than 1% of the State’s General Fund revenues, and generates over \$262 million in payroll (\$232 million federal, \$30 million state). The top four counties receiving economic impact from the OMD (federal payroll, counter drug expenses, community services and youth programs, construction and services and supplies) include: Marion (\$111 million), Multnomah (\$91 million), Klamath (\$55 million), and Clackamas (\$21 million).

In the 2015-2017 biennium, the Oregon Military Department’s Budget is 86% Federal, 11% Other Funds, and 3% General Fund. Although the OMD budget is mainly federally funded, through cooperative agreements with the National Guard Bureau and federal grants from the United States Department of Homeland Security, OMD could not accomplish its mission without its State General Fund resources.

General Fund is used for required State match on a number of federal cooperative agreements and grants, for the overall leadership and administration of Oregon’s National Guard, and for debt service on our Article XI-Q bonds and Certificates of Participation used for new construction. Of note, \$9.4

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

million or 40% of the agency's General Fund is Debt Service on outstanding bonds for construction. As we cannot reduce Debt Service, a 10% reduction in the agency's General Fund equates to a 17% cut to the operational programs.

The Military Department has experienced numerous reductions over the previous two decades. In 1991, 101 positions out of a total of 244 were 100% General Funded; in the 2015-17 Agency Request Budget, only 16 positions from a total of 533 are paid with 100% General Fund, a decrease of 84%. The Installations Division within the Operations Program has been hit particularly hard; it lost \$1.5 million General Fund in the 2009-11 budget, including 6 maintenance positions. In the 2011-13 Biennium, the Installations Division suffered another General Fund reduction of \$2.5 million and lost an additional 15 positions. The 2013-15 biennium followed up with a reduction to Current Service Level and an additional loss of 3 more critical positions. Maintenance and repairs on Oregon's 38 armories and two Air National Guard bases have been limited to immediate and critical situations only. These reductions have severely decreased our ability to adequately maintain facilities that house the Oregon Army and Air National Guard and provide emergency infrastructure in times of natural disaster.

Any further reductions in General Fund would jeopardize the agency's ability to meet its constitutional mission, and will adversely affect the future of the Oregon Military Department.

The following table provides an overview of General Fund reductions OMD has taken over the past 7 biennia:

Biennium	General Fund reduction	% of Current Service Level	Number of Positions abolished
2001-03	\$1,544,125	12%	5
2003-05	\$1,458,303	10%	4
2005-07	\$94,446	.7%	0
2007-09	\$1,945,599	11%	12
2009-11	\$4,514,281	16%	7
2011-13	\$6,074,325	19%	65
2013-15	\$1,605,684	6%	3

In compliance with ORS 291.216, the Oregon Military Department submits the following 10% reduction options for the 2015-17 biennium:

Office of Emergency Management - Administration Program

Fiscal Impact: (\$87,722) reduction in General Fund, resulting in a loss of (\$87,722) in federal matching funds.

Agency Impact: Reduces OEM Services and Supplies expenditures on office supplies, travel, and related purchases through management imposed restrictions. This reduction would have a moderate impact to service delivery. The loss of both General Fund and matching Federal Funds

Agency Request
 Governor's Budget
 X
 Leglatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

results in a loss to OEM of \$175,444. **Governor recommended; included in Policy Package 090. Legislature approved a \$93,284 General Fund and \$93,284 Federal Funds reduction in Services and Supplies in Policy Package 801.**

Operations Program - Installations Division (Environmental Branch)

Fiscal Impact: (\$48,482) General Fund reduction, \$48,482 increased Federal Funds.

Agency Impact: Shifts one position currently budgeted at 25% General Fund and 75% Federal Funds to 100% Federal Funds. This fund shift would have minimal operational impact to the Army National Guard Environmental operations. **Governor recommended; included in Policy Package 090. Legislature approved this reduction in Policy Package 801.**

Operations Program - Air Guard Administration

Fiscal Impact: (\$17,452) reduction in General Fund.

Agency Impact: Eliminates a budget line established for Services and Supplies support to the office of the Director of Staff, Oregon Air National Guard. Expenditures on office supplies, recognition awards, travel, and related purchases will be curtailed through management imposed restrictions. This reduction would have a moderate operational impact. **Governor recommended; included in Policy Package 090. Legislature approved an \$18,558 General Fund reduction in Services and Supplies in Policy Package 801.**

Administration Program – ORNG Reintegration

Fiscal Impact: (\$82,944) reduction in General Fund.

Agency Impact: Eliminates the remaining State supported Services and Supplies for the Service Member and Family Support activity of the Oregon National Guard. The Service Member and Family Support activity would rely solely on and be dependent on funding from the Federal Government. There would be a moderate operational impact with the loss of this secondary Services and Supplies function supporting Service Member and Family Support, particularly since direct Federal Funding is expected to be affected by reductions in future federal fiscal years. **Legislature approved an \$88,203 General Fund reduction in Services and Supplies in Policy Package 801.**

Administration Program - Command Group

Fiscal impact: (\$64,068) reduction in General Fund, (\$64,068) reduction in Other Funds limitation.

Agency Impact: Elimination of an Office Specialist 2 in the Command Group. This position maintains state military records of former Oregon National Guard members and processes state military awards. These duties will be spread among remaining resources (when they have time available) resulting in potentially degraded quality in records management and information retrieval. This reduction would have a significant impact. The loss of both General Fund and Other Funds results in a loss to the ORNG of \$128,136. **Legislature approved this reduction in Policy Package 801.**

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

J:\17 Budget\LAB\Reductions\Reduction narrative.docx

107BF02

BUDGET NARRATIVE

Administration Program - Public Affairs

Fiscal impact: (\$49,175) reduction in General Fund, (\$49,175) reduction in Other Funds limitation.

Agency Impact: Eliminates one part-time state position in the Public Affairs Office. This will result in limited state resources available for public outreach, public information and community affairs. Additional burdens would be placed on the existing federal resources in Public Affairs. There would be a moderate impact to service delivery. The loss of both General Fund and Other Funds results in a loss to the ORNG of \$98,350.

Legislature approved a fund shift on this position from 50% General Fund and 50% Other Funds to 100% Other Funds in Policy Package 801.

Operations Program - Kingsley Field (Klamath Falls) Air National Guard Base (Civil Engineering & Environmental)

Fiscal Impact: (\$171,485) reduction in General Fund, a loss of (\$971,747) in Federal Funds limitation.

Agency Impact: Kingsley Field in Klamath Falls is home to the 173rd Fighter Wing and the 270th Air Traffic Control Squadron. The 173rd Fighter Wing trains all U.S. Air Force F-15 fighter pilots for air-to-air and air defense roles. The 270th Air Traffic Control Squadron operates air traffic control for civilian and military operations at Kingsley Field. Kingsley Field is the 3rd largest employer in the Klamath Basin. The state-federal match is 15% General Fund to 85% Federal funds. The State investment of \$1.03 million (GF-CSL) brings \$15.7 million (FF-CSL) to Oregon, most of which is spent in the local economy. Kingsley Field is also being impacted with the assignment of a Total Force Integration (TFI) mission scheduled for the air base beginning in October 2014. The TFI mission brings an additional seven aircraft and 84 active duty personnel (regular Air Force) to Kingsley Field in order to train additional F-15 fighter pilots. Reductions at Kingsley Field would include the abolishment of up to eight operations and maintenance positions and Services and Supplies. Grounds and facilities would not be properly maintained. Facilities would deteriorate to unacceptable conditions. This reduction would have a profound and serious impact to mission delivery. If Oregon is unable to fully support operations at Kingsley Field, the Air Force could consider moving the mission to another state. The loss of both General Fund and matching Federal Funds at Kingsley Field results in a loss to the ORNG of \$1,143,232.

Operations Program - Portland Air National Guard Base (Civil Engineering & Environmental)

Fiscal Impact: (\$180,535) reduction in General Fund, loss of (\$706,525) in Federal Funds limitation.

Agency Impact: The Portland Air National Guard Base is located at Portland International Airport and is home to the 142nd Fighter Wing and the Combat Operations Group. The 142nd Fighter Wing's mission is to provide air defense of the northwest United States from northern California to the Canadian border. The Combat Operations Group provides command and control for missions in tactical communications in support of theater operations and weather analysis support to several worldwide deployable Air Force and Army units. The state-federal match is 20% General Fund to 80% Federal Funds. For the relatively small investment from the State in the amount of \$1.09 million (GF-CSL), Portland Air Base brings \$12.5 million (FF-CSL) to Oregon, most of which is spent in the local economy. Reductions would result in layoffs of up to six operations and maintenance personnel and serious decreases in Services and Supplies. Grounds and facilities would not be properly maintained. Facilities would deteriorate to unacceptable conditions. This reduction would have a profound and serious impact to mission delivery. If the air

BUDGET NARRATIVE

base cannot be properly maintained, the Air Force may be forced to close or relocate the 142nd Fighter Wing to another state. The loss of both General Fund and matching Federal Funds at Portland Air Base results in a loss to the ORNG of \$887,060.

Operations Program - Installations Division (Operations & Maintenance Branch)

Fiscal Impact: (\$1,661,339) reduction in General Fund, loss of (\$246,090) in Other Funds limitation and (\$1,635,058) in Federal Funds limitation.
Agency Impact: This would have a severe and detrimental impact to our mission. It would eliminate up to 21 positions paid with General Fund in facilities and grounds maintenance and allied trades positions, and would require “shuttering” 9 armories and readiness centers in Albany, Burns, Dallas, Grants Pass, Hermiston, Hood River, Gresham, Lebanon and Redmond. These locations would be closed every day except for drill weekends, and the Armory Rental Program will be discontinued. Closing the Armory Rental Program would result in a projected loss in Other Fund rental revenues of \$1,570,084 and the layoff of 43 part-time Armory Rental Program employees. It would also result in the layoff of 33 full-time maintenance staff supporting other facilities who are also funded with armory rental revenues. The Installations Division is reliant on Other Funds revenue to pay utility bills and repair and maintenance costs, particularly toward the end of each biennium after General Fund has been mostly depleted.

In addition, full time military unit staff would need to be relocated 28 days a month while these facilities are shuttered. This would necessitate Soldiers using limited training time to clean, make repairs, mow lawns, empty trash, coordinate code related fire, backflow and elevator inspections, and help maintain general appearance cleanliness and sanitation standards. The use of Soldiers for facility maintenance could constitute a federal fiscal law “purpose” violation. However, the agency would have no other workforce available or sufficient funds to contract the work to outside firms. There will also be increased physical security concerns as no maintenance staff will be tending the facilities and grounds. Mechanical equipment failures such as HVAC systems, boilers or roofs would become Emergency Board requests. The agency could expect vandalism, graffiti and other conditions that communities may take issue with. These facilities will deteriorate over time and affect National Guard recruiting as well as retention. Loss in unit strength and readiness could potentially result in a loss of federal recognition, with possible transfers of these units to other states. The loss of General Fund, Other Funds and matching Federal Funds results in a loss to the ORNG of \$5,112,571 (appropriation, limitation and the projected loss of Other Funds rental revenue).

Other Funds and Federal Funds Limitation reductions to arrive at a 10% reduction of each fund type as required by ORS 291.216:

OEM - 9-1-1 Program

Fiscal Impact: (\$9,407,965) Other Funds limitation.

Agency Impact: This reduction would negatively impact the distribution of 9-1-1 tax revenue to the Public Safety Answering Points throughout Oregon, who rely on this funding to operate their 9-1-1 call centers. It would also prevent the planned implementation of Next Generation 9-1-1 technology, which would result in reliance on outdated, unsupported systems. A reduction of Other Funds limitation in the 9-1-1 program would negatively impact the entire 9-1-1 system and place the citizens of Oregon at risk if the 9-1-1 system is not properly supported.

BUDGET NARRATIVE

OEM - Disasters Program

Fiscal Impact: (\$25,071,962) Federal Funds limitation. Agency Impact: This reduction would have an impact in the event of a large-scale disaster, where federal assistance from FEMA would not be able to be fully disbursed to Oregon communities.

Within the Disasters Program, the Legislature eliminated all General Fund (\$283,250) for the Local Disaster Loan and Grant Account in Policy Package 801.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT 2015-2017 BIENNIAL BUDGET REVENUE FORECAST NARRATIVE

Source of Revenues - The Oregon Military Department receives Other Funds and Federal Fund revenues from a variety of sources. The funds are received from the following sources and used for the purposes indicated:

Other Funds Revenue:

Beginning Balance - The beginning balance represents the agency projected Other Fund carryover.

Centralized Personnel Plan - The Centralized Personnel Plan allocates the salaries of accounting, personnel, and procurement staff that support multiple programs to each program proportionate to the workload generated by the program. Centralized Personnel Plan allocation assessments are budgeted as transfers from federally funded programs.

Facility Rental Fees - The Military Department rents facilities to a variety of users such as community groups, social clubs, charities, businesses, individuals and other local, state, and federal governmental agencies. Rental purposes include charity fund-raisers, civic events, dances, concerts, vendor shows, weddings, overnight accommodations, sports events, and training. Rental revenues from state supported facilities are used to operate and maintain state facilities.

Sales of Land and Buildings - The Military Department occasionally disposes of land and buildings. The revenue generated from the sales of these properties is used as state matching funds for federally funded construction projects requiring a state match.

Interest - The Military Department maintains a Construction Account with the State Treasury which earns interest on deposits. The interest revenues are used as state matching funds for federally funded construction projects requiring a state match.

Community Partnership Agreements - Occasionally communities contribute funds to the Military Department on construction projects. These partnerships provide communities with usable space such as classrooms and conference or community centers. They diversify and enhance the military facility.

Certificates of Participation/ Article XI-Q general obligation bonds - The Military Department funded a portion of major construction projects through Certificates of Participation during the 1997-99, 1999-2001, 2003-05, 2007-09, 2009-11, 2011-13 and 2013-15 biennia. Policy Package 499 requests \$13,177,000 in XI-Q bond funding to construct/alter Oregon Army National Guard facilities. **Legislature approved \$11,677,000 in XI-Q bond funding in Policy Package 499.**

---	--	---

2015-2017

BUDGET NARRATIVE

Bond Sales - Seismic Rehabilitation Program: In the 2009-11 biennium the Military Department issued \$22.5 million in General Obligation bonds authorized under Article XI-M (Seismic Rehabilitation of Public Education Buildings) and Article XI-N (Seismic Rehabilitation of Emergency Services Buildings) of the Oregon Constitution. In the 2011-13 biennium an additional \$7.5 million in Article XI-M bonds were issued and awarded to public school districts throughout Oregon. This competitive grant program is designed to seismically retrofit public buildings to better withstand earthquakes. This program was managed by the Office of Emergency Management and a Seismic grant committee until January 1, 2014, when it transferred to the Oregon Business Development Department (OBDD) pursuant to 2013 Senate Bill 813. All remaining grant funds were transferred to OBDD in January 2014, and the program is no longer run by the Oregon Military Department.

Average Daily Membership (ADM) School Support - The Youth Challenge Program receives ADM Other Funds revenue through the Bend-LaPine School District. The revenue is based on the number of students enrolled in the Youth Challenge Program. The funds are used to support operation of the program.

Miscellaneous - Revenues received from sources such as vending machines, coin-operated telephones, and recycling programs. The revenues are primarily used to operate and maintain state facilities.

9-1-1 Tax and interest- Other fund received from the Department of Revenue from an excise tax of .75 per device that is charged on all telephone lines (including cellular devices).

Federal Revenues as Other Funds – The Military Department receives federal funds into other funds from federal agencies renting state-owned facilities.

Transfers (Centralized Personnel Plan) - Agency internal Centralized Personnel Plan allocation assessments are budgeted as transfers to the Administration Program from federally funded programs.

Transfers (Interagency) – Interagency transfers are received from other state agencies. The majority is comprised of 9-1-1 excise tax revenue collected by the Department of Revenue and transferred to OMD on a quarterly basis. OMD also receives National School Breakfast and Lunch funds transferred from the Oregon Department of Education to support the 24/7 operations at the Oregon Youth Challenge Program. Also, pilot registration fees transferred from the Department of Aviation and are used to support the air search and rescue (SAR) program within the Office of Emergency Management.

Lottery Funds Revenue:

2011-2013 Biennium - No Lottery Funds received.

2013-2015 Biennium - No Lottery Funds received.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

2015-2017 Biennium – No Lottery Funds requested.

Federal Funds Revenue:

Federal Fund revenues are received through National Guard Bureau Federal/State Cooperative Agreements and the United States Office of Homeland Security. Funds must be expended in accordance with provisions of the agreements. Seventeen Federal/State Cooperative Agreements are projected to be in effect for the 2015-2017 biennium.

The Federal/State agreements are listed below:

Master Cooperative Agreement – Includes the following appendices (agreements):

- Army National Guard Facilities Program - Provides federal funds for operation, maintenance, and related personnel costs for Oregon Army National Guard training and logistical facilities. The state matching share depends upon the type of facility and ranges from 0%-50%.
- Army National Environmental Resources Management - Manages Oregon Army National Guard facilities environmental issues. The program focuses on three management programs: Environmental Compliance, Integrated Training Area Management, and Land Use Planning. The agreement is 100% federally funded.
- Electronic Security Systems Agreement - Provides electronic security for Oregon Army National Guard facilities that store weapons. The agreement is 100% federally funded.
- Telecommunications Agreement - Provides funding for Oregon Army National Guard telecommunications system procurement, maintenance, and monthly charges. The agreement is 100% federally funded.
- Army National Guard Sustainable Range Program – Maintains and repairs Army National Guard ranges equipped with Automated Target Systems. The agreement is 100% federally funded.
- Full Time Dining Facility Operations – Operates dining activities at Camp Rilea in Warrenton, Oregon. The agreement is supported with Other and Federal Funds from users of the camp.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

- Army National Guard Anti-Terrorism Program Manager – Funds one state position to develop, implement, manage and monitor a comprehensive Anti-Terrorism program for protecting state and installation personnel, information, infrastructure and other assets from acts of terrorism. This agreement is 100% federally funded.
- Air Force Facilities Operations and Maintenance Agreements - Provides federal funds for operation, maintenance and related personnel costs for Oregon Air National Guard installations. The Portland Air Base agreement requires a 20% state matching share. The Kingsley Field (Klamath Falls) agreement requires a 15% state matching share. The Camp Rilea Air Station agreement requires a 25% state matching share.
- Kingsley Field Billeting Program - Provides lodging to Oregon National Guard members, F-15 fighter pilot students, and flight medicine students receiving training at Kingsley Field. The Billeting Program is 100% federally funded.
- Air National Guard Environmental Program - Monitors and ensures environmental compliance at the Portland Air Base, Kingsley Field, and Camp Rilea Air National Guard facility. The agreement at Portland Air Base requires a 20% state matching share, while the agreement at Kingsley Field (Klamath Falls) requires a 15% state matching share.
- Fire and Security Agreements - Provides support for the Portland Air Base and Kingsley Field fire fighters and security police. In addition, a security agreement exists for providing security guards for Oregon Army National Guard facilities located at Camp Rilea, Camp Withycombe, Camp Biak, Salem Army Air Support Facility, and Pendleton Limited Army Air Support Facility. The Air and Army National Guard Security agreements are 100% federally funded. However, the Air National Guard Fire Protection Agreement changed in Federal Fiscal Year 2012 (and implemented in Federal Fiscal Year 2014) so that the state must pay for the excess of actual pay versus a federal cap or grandfathered amount. There is no fixed state funding percentage; rather, the state costs are calculated on an employee-by-employee basis and shifted to state costs as they occur.
- Distributed Learning Agreement - Provides video conferencing, video programming, computer based training, web based training, interactive audio, interactive video, electronic mail, and electronic network system to soldiers and their communities. The agreement is 100% federally funded.

Equipment Refurbishment Agreement - Provides funding to repair equipment for use by the National Guard nationwide. The agreement is 100% federally funded. **Note: This program was closed by National Guard Bureau in November 2014. Policy Package 803 eliminates all positions and limitation.**

Youth Program Agreements - Provide funding for the STARBASE and Youth Challenge Program. The STARBASE agreement is 100% federally funded. The Youth Challenge Program agreement requires a minimum of a 25% state match.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Construction Agreements - Provides federal funding for construction of state facilities utilized by the Army National Guard. Federal funding varies from approximately 65% to 90% depending on the type of facility constructed. The state must provide the balance of funding for the project.

FEMA grants

Emergency Management Performance Grant funds may be used for necessary and essential expenses involved in the development, maintenance, and improvement of state and local emergency management programs. The grant is designed to give states more flexibility in deciding how to best use federal dollars to meet state specific needs. Local jurisdictions (32 counties, 5 cities) also receive grant funding and are required to provide a 50% cash match to participate in the program.

Homeland Security Grant Program –This program, funded by the U.S. Department of Homeland Security, includes pass-through funding to local jurisdictions who participate in the Homeland Security Exercise and Evaluation Program. This money also includes funding to support Citizens Corps and Community Emergency Response Team (CERT) programs and the Buffer Zone Protection Program. The Program also makes money available to the Portland Regional Area under the Urban Area Security Initiative Program. Regional agencies in Portland and the surrounding counties work together on projects and investments designed to improve the area’s preparedness for a domestic preparedness event. These funds serve a dual purpose in that most projects also have a benefit in the area of natural hazards preparedness.

FEMA Public Assistance and Hazard Mitigation Grant Programs. The Public Assistance Program pays for the repair/restoration of damaged public infrastructure in the event that the President declares a Major Disaster/Emergency. The Hazard Mitigation Grant Program pays for mitigation efforts after a Presidential declaration by providing 20% of all overall FEMA recovery costs to the State for mitigation projects. The majority of this funding is pass-through Federal Funding. Because this funding is unknown in advance of a disaster, OEM carries ample limitation as part of its budget so that funding is not slowed in the event of a Presidential disaster declaration.

FEMA Pre-Disaster Mitigation Grants and Flood Mitigation Assistance Grants. These funds are made available to the state and its local jurisdictions for natural hazard planning and project implementation. The funds are appropriated on a yearly basis, and vary from year to year. The PDM grant program is a nationally competitive grant program, while the Flood Mitigation Assistance program is a formula driven program. Oregon has been quite successful in acquiring PDM grants for local projects and the State’s overall natural hazard mitigation planning effort. Flood Mitigation Assistance grants are targeted toward repetitive flood loss properties that are insured under the National Floodplain Insurance Program.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Basis for 2015-2017 biennium estimates:

Other Fund revenue estimates are based on historical trends with adjustments for projected changes.

Federal Fund revenue estimates are based on forecasts of future funding levels provided by the National Guard Bureau and US Department of Homeland Security.

Proposed changes in revenue sources or fees - None.

Proposals for new legislation - None.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT ADMINISTRATION PROGRAM

The Administration Program provides senior-level leadership and support for the command, control, and administration of the Oregon Military Department, Oregon National Guard and the Office of Emergency Management. The program supports over 2,400 state and federal full-time Oregon Military Department and Oregon National Guard employees, commands over 8,200 soldiers and airmen, and provides oversight of over \$4 billion in facilities and equipment.

There are six major programs within the Administration Program:

Command Group - The Command Group consists of The Adjutant General, the Joint Force Headquarters, including the Assistant Adjutants General for the Air Guard Component and the Army Guard Component, and the Deputy Director for State Affairs Component and the Oregon State Defense Force. The purpose of the Command Group is to administer all components of the Oregon Military Department, Oregon National Guard and the Office of Emergency Management. Base budget funding supports six positions and provides services and supplies for operations.

Financial Administration Division - The Financial Administration Division provides fiscal management and oversight of the agency's state and federal budgets. The division develops, monitors, and enforces agency fiscal and internal control systems, coordinates and prepares agency budgets, accounts for agency state and federal funds, manages agency information systems, performs payroll functions for the agency's state employees and the National Guard when called to state service, and accounts for agency property. The division also coordinates grants, federal/state cooperative agreements, public procurements, and other agreements. Base budget funding supports nine positions and provides services and supplies for operations.

State Personnel Office - The State Personnel Office is responsible for human resource management and labor relations activities for state employees of the Oregon Military Department. The Department has 488 authorized State positions in the Base Budget. The State Personnel Office provides technical assistance to Oregon Military Department managers, supervisors, and bargaining unit employees to maintain a high performance work force in support of the Oregon National Guard and Oregon's Emergency Management System. The office reviews actions of managers and supervisors to ensure compliance with personnel rules and collective bargaining agreements. The State Personnel Office also determines and recommends actions in disciplinary matters, grievance resolutions, and other personnel matters. Base budget funding supports six positions and provides services and supplies for operations.

Public Affairs - The Public Affairs Office is responsible for disseminating information to the public concerning activities of the Oregon National Guard, responding to requests for information from the public and private sector, and providing information to active and retired members of the Oregon National Guard. The program also prepares and distributes an agency newsletter, prepares video productions, and provides public relations support for the Oregon Military Department.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Public and command information projects include a monthly newsletter with a circulation of approximately 10,500 current and retired Oregon National Guard members, and federal and state agencies. Annual reports are produced for the executive branch of state government. These reports outline activities, provide information used in planning agency activities, and are a source of historical information for the agency. The Public Affairs Program produces all agency videos. The program produces informational videos on Oregon National Guard activities, news release videos, and safety videos. Base budget funding supports two positions and provides services and supplies for operations.

Reintegration Program – The Oregon National Guard Reintegration Program provides post-mobilization assistance to National Guard members and their families when our activated troops returned home from federal deployments to transition back to their families, careers, and communities. The Reintegration Team:

- Provides post-mobilization support to commanders and soldiers by establishing a centralized point of contact;
- Coordinates and disseminates a Resource Manual that lists information on soldier support agencies (Veterans Administration, State Veterans Affairs, and Service Associations);
- Actively participates with command by bringing agency representatives to local armories for seminars and workshops;
- Operates a Help Desk and Helpline to refer Guard members and families for assistance; and
- Works closely with the National Guard Family Readiness Program and the National Guard Career Transition Assistance and Yellow Ribbon Program.

Emergency Financial Assistance Program – The Emergency Financial Assistance Program provides hardship grants and loans to National Guard members and their families. The program began in the 2005-07 biennium and continues with periodic General Fund contributions from the Legislature as well as charitable check-off revenues from Oregon personal income tax returns. The fund has helped over 1,000 individuals with various personal bills; housing, medical care, emergency repairs, transportation, etc.

Expected Results of the 2015–2017 Budget:

The Administration Program will provide continued agency leadership, management, and administration of the Oregon Military Department, the Oregon National Guard, the Oregon State Defense Force and the Office of Emergency Management.

Administration Program objectives and expected results support the agency’s performance measures.

Agency Request Governor’s Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Respond to State Emergencies:

The Command Group provides command and control of Oregon National Guard resources during response to state emergencies. The Financial Administration Division coordinates financial agreements between agencies and vendors, and administers systems for recording personnel and equipment resources mobilized in fire suppression support and other support in response to state emergencies. The Financial Administration Division is also responsible for compensation of personnel resources and the coordination of reimbursements to the federal government regarding military equipment mobilized in response to state emergencies. The Public Affairs Office is responsible for disseminating information to the public concerning activities of the agency and its response to state emergencies.

Revenue Sources:

Command Group – The Command Group is mainly General Fund except for one Office Specialist 2 position which is 50% Other Funds. The agency’s Deputy Director is also funded 50% Other Funds from the 9-1-1 Program; however, this was a temporary measure for the 2013-15 biennium only. Essential Package 050 in the 2015-17 Agency Request Budget fund shifts the position back to 100% General Fund.

Public Affairs - The Public Affairs Program is General Fund for one full-time position and Services and Supplies and General Fund and Other Funds for a part-time position.

Financial Administration Division – The Financial Administration Division receives Other Fund transfers through an agency internal Centralized Personnel Plan. The plan allocates salaries of employees supporting multiple programs based on the amount of support provided to each program. Services and Supplies (training, travel, office machines, office supplies, contracts, etc.) are reliant on General Fund, as the federal government will not pay for Services and Supplies.

State Personnel Office – The State Personnel Office receives Other Fund transfers through the agency internal Centralized Personnel Plan. The plan allocates salaries of employees supporting multiple programs based on the amount of support provided to each program. Services and Supplies are reliant on General Fund, as the federal government will not pay for Services and Supplies.

Reintegration Program – The Reintegration Program is 100% General Fund.

Emergency Financial Assistance Program – The Emergency Financial Assistance Program receives Other Fund charitable check-off revenues from personal income tax returns from the Department of Revenue. It also periodically receives General Fund which is transferred into the Other Funds account at the State Treasury.

Agency Request Governor’s Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Essential Packages:

010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package increases General Fund \$10,216 and Other Funds \$1,518.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases General Fund \$354,121 and Other Funds \$19,186.

032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases Other Funds by \$1.

050 – This package reverses a fund-shift on one position in the Administration Program that had been implemented in the 2013-15 Legislatively Adopted Budget as part of General Fund reductions. Policy Package 813 in the 2013-15 Legislatively Adopted Budget included a partial fund shift from General Fund to Other Funds (9-1-1 revenues) on four positions, one of which is housed in the Administration Program. The fund shift was temporary for the 2013-15 biennium only; Essential Package 050 reverses the fund shift back to the original fund splits, with \$183,605 General Fund and (\$183,605) Other Funds.. Refer to Essential Package 050 in the Emergency Management Program for the remainder of the fund shift actions.

Policy Packages:

302 – Next Generation 9-1-1 Fund Shift - \$186,365 General Fund, (\$186,365) Other Funds. **Governor did not recommend; not included in Legislatively Adopted Budget.**

801 – LFO Analyst Adjustments – (\$201,446) General Fund, (\$14,893) Other Funds. Abolishes one position in Command Group, fund shifts one position in Public Affairs, and reduces Services and Supplies within the Reintegration Program. **Added by the Legislature.**

840 – SB 5507 End of Session – (\$915,813) General Fund. Reduces assessments for the Department of Administrative Services and the Secretary of State Audits Division, and Attorney General fees. **Added by the Legislature.**

Proposed New Laws - None.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT ADMINISTRATION PROGRAM ESSENTIAL PACKAGES

1. **Purpose** - Essential Packages adjust the base budget to reflect the agency’s 2015-17 current service level requirements.

2. **How Achieved** – The following Essential Packages adjust the Administration Program’s base budget to reflect 2015-17 current service level requirements:

010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package increases General Fund \$10,216 and Other Funds \$1,518.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases General Fund \$354,121 and Other Funds \$19,186.

032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases Other Funds by \$1.

050 – This package reverses a fund-shift on one position in the Administration Program that had been implemented in the 2013-15 Legislatively Adopted Budget as part of General Fund reductions. Policy Package 813 in the 2013-15 Legislatively Adopted Budget included a partial fund shift from General Fund to Other Funds (9-1-1 revenues) on four positions, one of which is housed in the Administration Program. The fund shift was temporary for the 2013-15 biennium only; Essential Package 050 reverses the fund shift back to the original fund splits. Refer to Essential Package 050 in the Emergency Management Program for the remainder of the fund shift actions.

Position #	Title	Classification	Type	% in 9-1-1	Impact		
					GF	OF	FF
0034281	Prin Exec Mgr H (Dep Dir.)	MESN Z7014	Fund shift	50%	\$183,605	(\$183,605)	

3. **Staffing Impact** - None.

4. **Revenue Source** - General Fund is increased \$547,942 and Other Funds is decreased (\$162,900).

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
ADMINISTRATION PROGRAM
POLICY PACKAGE 302
PRIORITY 3

1. Purpose– This Policy Package requests a fund shift on a Human Resource Analyst 3 position from 100% Other Funds to 100% General Fund. The Other Funds supporting the position consist of 9-1-1 excise tax revenues. This fund shift is necessary to accommodate the transition to Next Generation 9-1-1 Technology. Refer to Policy Package 302 in the Emergency Management Program for the remainder of the position fund shifts pertaining to 9-1-1.

Administrative costs relating to the 9-1-1 program are capped at 4% of the balance in the Emergency Communications Account per ORS 403.240 (b). Administrative costs include staff payroll, travel, office expenses, rent, government service charges and other administrative costs. While the administrative costs have never equaled or exceeded 4% of the account balance, the agency is requesting 10 new positions in Policy Package 301 to assist with the Next Generation 9-1-1 transition. Without these positions and the necessary technical knowledge in this subject matter area, successful transition to Next Generation 9-1-1 is not feasible. These additional 10 positions will place a greater burden on the 4% administrative cost cap, and the agency anticipates that without approval of this fund shift, the agency will not have sufficient capital available to finance the positions identified within Policy Package 301. Also, as Next Gen 9-1-1 project expenditures are incurred, the balance of the account will decrease, reducing the amount available within the 4% cap.

The position being fund shifted in this package is a Human Resource Analyst 3 in the State Personnel Office, which was shifted to 100% Other Funds funded with 9-1-1 revenues in the 2009-11 Legislatively Adopted Budget as a way to reduce General Fund costs. However, the duties of this position have changed to provide human resource support to all programs within OMD, not only the 9-1-1 program. Therefore, continued use of 9-1-1 funds toward 100% of this position’s costs is no longer appropriate.

2. How Achieved – Approval of this package would free-up 9-1-1 resources that could fund new positions critical for the success of the Next Generation 9-1-1 project.

3. Staffing Impact – Fund shift one position in the Administration Program.

4. Quantifying Results – The results of this policy package can be measured by the overall success of the Next Gen 9-1-1 transition, impacted by sufficient and competent staff dedicated to the project.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT ADMINISTRATION PROGRAM POLICY PACKAGE 801

1. Purpose– This Policy Package was added by the Legislature. It abolishes one Office Specialist 2 position and fund shifts one part-time Public Affairs Specialist 1 from 50% General Fund and 50% Other Funds to 100% Other Funds. It also reduces Services and Supplies in the Reintegration Program by \$88,203 General Fund to switch from the state Motor Pool to federal General Services Administration vehicles. These reductions were taken from the agency’s 10% reduction plan.

The Office Specialist 2 maintains state military records of Oregon National Guard members and processes state military awards. It works with new enlistment and discharge records and keeps the official records of all military orders. This position is funded 50% General Fund and 50% Other Funds. The loss of this position will shift the duties onto federal employees who are frequently re-assigned; a loss of continuity is likely.

A part-time Public Affairs Specialist 1 position is being fund-shifted from 50% General Fund and 50% Other Funds to 100% Other Funds. The Other Funds is comprised of unspent armory rental revenue. There is minimal impact from this fund shift.

The Reintegration Program, also known as the “Service Member and Family Support” program, provides post-mobilization assistance to National Guard members and their families to assist in transitioning back to their families, careers and communities. The program uses several state motor pool cars to travel around the state to provide training and meet with members and their families. The program will transition to federal General Services Administration vehicles with little impact to the program.

2. How Achieved – General Fund appropriation is decreased (\$201,446), Other Funds limitation is decreased (\$14,893).

3. Staffing Impact – Abolish one position and fund shift one position in the Administration Program.

4. Quantifying Results – The results of this policy package will have a minimal to moderate impact on the Administration Program.

5. Revenue Source – (\$201,446) General Fund, (\$14,893) Other Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

Oregon Military Department – Operations Program – Executive Summary

Primary Outcome Area: Safety
 Secondary Outcome Area: Economy and Jobs
 Program Contact: Dave Stuckey, OMD Deputy Director (503) 584-3884

Program Overview

The Operations Program supports the mission of the Oregon National Guard through the ongoing maintenance and support of National Guard Facilities. Without the Operations Program the National Guard could not operate within the State of Oregon. The success of the Operations Program

Agency Request
 Governor’s Budget
 Legislatively Adopted
2015-2017

also directly affects the Governor's Safety Strategy as it impacts the state's ability to provide adequate infrastructure in response to natural or human-made disasters.

Program Funding

The Legislatively Adopted Budget (LAB) for the Operations Program within the Oregon Military Department includes expenditure authority of \$9,057,681 General Fund, \$4,571,092 Other Funds, and \$82,013,077 in Federal Funds. The LAB includes 339 positions and 296.51 FTE for the 2015-17 Biennium. This budget is a necessity to ensure the continued operation of the Oregon National Guard. The Operations Program provides the support structure to ensure National Guard facilities are functionally ready for use by the assigned units 24 hours a day 7 days a week. In addition these facilities can be utilized as emergency response centers and distribution centers by communities during emergency situations. Without adequate facilities the National Guard Bureau can remove units from the state. The removal of units includes loss of federal funds, and equipment such as trucks, trailers, helicopters, and Humvees which are used by the state when responding to emergency situations.

Program Description

The Operations Program's primary responsibility is to maintain and enhance the operational readiness of Oregon National Guard facilities for soldier and airmen training. Our statewide facilities serve a total tenant population of 10,611 made up of employees, students, BLM, State Police, USDF, OR Department of Veterans Affairs, the Coast Guard and many others. The majority of these tenants utilize our facilities on a daily basis, thereby requiring our staff presence daily. The facilities maintained by the Operations Program also function as rental facilities for the general public, for events such as business meetings, wedding receptions, trade shows, concerts, cultural events, Red Cross blood drives, and sporting events, all of which generate Other Funds Revenue. Other Funds rental revenue is essential for maintaining these facilities.

Facilities maintenance and support is primarily accomplished through the work of the Real Property Operations and Maintenance Program (RPOM) for Army Guard facilities, and the Civil Engineering Programs (CE) for Air Guard Facilities. RPOM is currently responsible for 395 buildings totaling 3.3 million square feet. To effectively manage the facility maintenance needs, RPOM conducts an extensive annual assessment of all facilities. This assessment, known as the Installation Status Report (ISR), helps identify which facilities are in critical need of support. The financing of facilities maintenance varies by facility, but a majority of our army installations operate under a 50/50 funding split where the state and federal governments partner to share costs equally.

The Civil Engineering (CE) programs at the Portland and Kingsley Field Air National Guard Bases perform a similar function to the RPOM program. Between the two airbases the CE programs are responsible for 164 buildings totaling 1.25 million square feet. In addition to facilities maintenance the CE programs are responsible for a considerable amount of airfield maintenance (i.e. snow removal, mowing, and sweeping) through the Airport Joint Use Agreement (AJUA). The financing of facilities maintenance varies by airbase. At the Portland Air National Guard Base the funding split is 80/20 with the federal government financing 80 percent of maintenance operations. At the Kingsley Field Air National Guard Base the funding split is 85/15 with the federal government financing 85 percent of maintenance operations.

Agency Request Governor's Budget Legislatively Adopted
2015-2017

The environmental services performed by the Operations Program are focused on compliance and stewardship. The Environmental Program works with all Oregon National Guard facilities to ensure compliance with federal, state and local regulations. This includes compliance work related to wastewater treatment plant operations, hazardous materials management, pollution prevention, recycling, air quality, asbestos removal, and drinking water quality. The majority of environmental operations are funded 100 percent with federal funds, with the exception of operations conducted at the two airbases.

24-7 security services are provided by the Operations Program at both the Portland and Kingsley Field Air National Guard bases. Security personnel are instrumental in protecting 48 F-15 fighter jets worth \$1.736 billion, and the facilities housing them, from sabotage, theft, vandalism and trespass. To accomplish this mission the Operations Program partners with the Oregon State Police, the FBI, the Secret Service, the Air Force Office of Special Investigation as well as local law enforcement. Security service costs at both airbases are financed 100 percent with Federal Funds.

The equipment refurbishment program within the Operations Division provided critical products and services to the National Guard worldwide. This program allowed states and territories to deploy fully functioning rebuilt equipment, such as generators, for disaster relief, infrastructure support, as well as homeland security operations. The program, located in Clackamas, was funded 100% with Federal Funds and purchased a significant amount of material from local vendors. In the fall of 2014 all five programs nationally were shut down by the National Guard Bureau, mainly due to the lack of demand following decreased deployments in the Global War on Terror. In Oregon, 62 positions were abolished and \$30.9 million Federal Funds limitation was phased-out in Policy Package 803 in the 2015-17 Legislatively Adopted Budget.

The counterdrug function of the Operations Program conducts a full spectrum campaign that bridges the gap between Department of Defense and Non-DoD institutions in the fight against illicit drugs and transnational threats. Soldiers and Airmen support multiple agencies at the local, state, and federal levels preventing illicit drugs from being grown, imported, manufactured and distributed. This program is funded 100 percent with Federal Funds.

The major cost drivers associated with our Operations Program include personal service costs, rising utility and fuel costs, deferred maintenance costs, and changes within the cooperative agreements requiring larger state funds participation (such as the Air National Guard Fire Protection Program). To offset the rising utility costs, where possible, both Army and Air facilities are utilizing green technologies to reduce consumption and therefore reduce costs.

To effectively manage facility maintenance our Operations Program relies on successful partnerships. These include partnerships with Treasure Valley Community College, home to the Ontario Armory, and Western Oregon University, home to the Regional Training Institute. Additionally, The Dalles Armory was recently constructed at the Columbia Gorge Community College, adding classroom space for the college with grant funds

 Agency Request Governor's Budget X Legislatively Adopted
2015-2017

from Community Colleges and Workforce Development. We also partner with the Marine Corp Reserve, US Naval Reserve, US Bureau of Land Management and the US Forest Service in the operation of our Springfield Armed Forces Reserve Center.

Program Justification and Link to 10-Year Outcome

The mission of the Oregon National Guard is to provide the citizens of the State of Oregon and the United States with a ready force of citizen soldiers and airmen, equipped and trained to respond to any contingency. “*When we are needed, we are there*” is our creed, and this creed supports the Governor’s safety vision of “Oregonians will be safe where they live, work and play”. The Operations Program is the primary support program which allows the Oregon National Guard to be ready to support local and national missions.

Facilities maintenance is the driving force behind the Operations Program. There is a direct nexus between facilities maintenance and the Governor’s Safety Strategy 3.3, primarily the requirement for maintained and enhanced facilities to provide for adequate response to natural or human made disasters. Oregon National Guard facilities act as centralized points for the support of communities during a disaster. Our facilities can be utilized to act as Emergency Coordination Centers, food and supply distribution centers, a gathering place for displaced citizens, as well as the launch sites for National Guard support. The majority of our facilities are funded with a matching requirement, so the burden for maintaining these facilities is shared by both the state and federal government. This is an important point to realize as it directly affects our ability to successfully leverage critical federal resources.

In additional to the role as a Safety organization, the Oregon Military Department acts as an economic stimulator due to federal funding. The almost 9,000 Citizen Soldiers bring valuable Personal Income Tax revenue into the state. Our equipment refurbishment program expends tens of thousands of dollars per month into the economy of the Clackamas region. Our Wildland Fire Program helps battle forest fires which devastate a key economic good, timber, for the state. These actions all tie into the Governor’s strategy to “Amplify local and state economic effects to make Oregon’s economy more resilient”.

The Economy and Jobs policy document calls for “long term energy policy that adds resilience and certainty to a low cost system that diminishes the reliance on carbon intensive fuels”. The Operations Program is working in conjuncture with other state agencies on the possible development of a solar energy site in the Christmas Valley Region. This solar site has the possibility to become a long term source of alternative energy for state agencies and private industry.

Program Performance

The primary performance tool of the Operations Program is the Installation Status Report (ISR). The ISR categorizes the readiness of our facilities as being unsatisfactory, adequate or better. The 2013 ISR results for Oregon’s armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor

 Agency Request Governor’s Budget X Legislatively Adopted
2015-2017

condition. While some improvement projects were executed, the slight improvement shown is a trend based upon the replacement of Armories through new construction, and changes in the ISR rating criteria established by the Army. A historical look at this metric is provided below. Another metric utilized by the Operations Program is the Percent of Available Armory Time Rented. During Fiscal Year 2012 approximately 28% of available armory time was rented. These metrics are utilized each year within the Annual Performance and Progress Report submitted to both the Chief Financial Office and the Legislative Fiscal Office.

Enabling Legislation/Program Authorization

The National Guard is authorized by the US Constitution Article I, Section 8 Clause 15 and 16. The Oregon National Guard is authorized by Article X of the Oregon Constitution. The Operations Program is authorized by ORS Chapters 396, 398 and 399. Further Federal Authorization is provided by National Guard Regulation 5-1.

Funding Streams

The program is funded with General Fund (7%), Other Funds (4%) and Federal Funds (89%). The Other Funds include Armory Rental Revenue. The Federal Funds carry a match requirement of zero to 50 percent and come from the National Guard Bureau. All Federal Funds are dedicated and subject to sequestration.

Significant Proposed Program Changes from 2013-15

The proposed budget for the Operations Program is an enhancement over the program’s Current Service Level budget. The agency’s top priority is to obtain additional General Fund for the Air National Guard Fire Protection Program at both airbases. Recent changes in the federal-state

Agency Request
 Governor’s Budget
 X Legislatively Adopted

2015-2017

cooperative agreement have created a requirement for state funds for the difference between actual payroll costs and the maximum amount of federal reimbursement. The program had been 100% federally reimbursed until this change.

The program is focused on improving the quality of National Guard facilities to enhance our functional role under the Governor's Safety Strategy. The majority of our facilities operate under a matching requirement which ranges from 15% to 50%. An increased state investment will allow the department to continue to improve the quality and condition of our facilities as reported in the Installation Status Report (Please see Program Performance for more details regarding the ISR).

Increased state investment will also allow the department to fully utilize federal investment. With each dollar the state invests we can obtain between 1 and 8.5 dollars of federal investment depending on the funding split. This increased federal investment, along with improvements to National Guard facilities, could lead to new Force Structure opportunities whereby new federal personnel and assets are placed within the state. This would lead to increased tax revenue from federal payroll as well as increased investment in the local economy.

The Operations Program is not planning to shift resources to new activities, but it is focused on improving the way it does business. This includes seeking to maximize federal investment in order to improve the quality of our National Guard facilities in support of the Governor's 10 Year Safety Strategy.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT OPERATIONS PROGRAM

The Operations Program includes all programs that support Oregon National Guard facilities operations and maintenance. It also includes the Air National Guard Programs, Oregon National Guard Counterdrug Program, Army National Guard Equipment Refurbishment Program, Oregon Army National Guard's Wildland Fire Management Program, Oregon National Guard Distributed Learning Program, and Army National Guard Telecommunications and Recruiting Program. There are 16 major programs within the Operations Program:

Army National Guard Facilities Operations and Maintenance:

The Army National Guard (ARNG) Facilities Operations and Maintenance Program, provides operation, maintenance, repair, and alteration support for Oregon Army National Guard facilities. The program is supported by a variety of state and federal funding match rates.

The program conducts an extensive annual analysis of all Oregon Army National Guard facilities. The analysis, titled "Installation Status Report" (ISR), is an annual requirement by the Department of the Army using standard Army-wide inspection and evaluation criteria. The ISR is a decision support system designed to improve management of our limited resources for facilities. The 2013 ISR results for Oregon's Armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor condition. While some improvement projects were executed, the slight improvement shown is a trend based upon the replacement of Armories through new construction, and changes in the ISR rating criteria established by the Army.

The backlog of maintenance and repair within the Army National Guard Facilities Operations and Maintenance Program is currently estimated at \$79M. In recent years this backlog has fluctuated from a high of \$110.6 million in 2007-09, to \$72.4 in 2009-11, and \$79.6 million in 2013. The reduction from the high point of \$110M was funded primarily by federal and State stimulus funding coupled with Armory Service Life Extension (ASLEP) projects. Since that point the Operations budget has been reduced each biennium eliminating the ability to fund maintenance and repair projects. The result has been a predictable increase in the backlog each biennium. The funded ASLEP projects in combination with federal project funds eliminate the backlog for specific facilities, leaving the majority of facilities unimproved. It is anticipated that this indicator of facility condition will continue to rise until sufficient state funds are available, as matching funds to the federal funds, to address maintenance and repair improvements.

Given significant General Fund reductions in armory operations, maintenance, supplies and services; as well as forecasted reductions, the most likely outcome will be a trend of increasing deferred maintenance and Emergency Board requests. The 2015-17 funding level is virtually

_____ Agency Request _____ Governor's Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

the same as the 1991-93 Biennium. Considering inflation, increases in fees, code related mandatory expenses, and an additional 1.3 million square feet of building space, it becomes apparent that the Army National Guard Facilities Operations Program cannot adequately maintain the current inventory of facilities. Within our eight maintenance regions, OMD continues to operate 28 Armories, 7 maintenance facilities, and 338 other facilities without a dedicated State Maintenance Worker. These facilities have part-time and mostly inadequate maintenance support.

The Army National Guard Facilities Operations and Maintenance Program continues to function with the mission of operating our under-funded facilities in the most cost-effective manner. The Operations and Maintenance Program has taken advantage of every opportunity to obtain federal funding to support the efficient operation of State of Oregon owned facilities and land. The National Guard Bureau completed a comprehensive facilities maintenance manpower requirement study for each state. The study thoroughly analyzed the type and amount of facilities operated by each state. The study then determined the number of employees required by skill type to operate and maintain the facilities based on a validated Department of Defense formula. The study determined the Oregon Army National Guard Facilities Operations and Maintenance Program requires 306 full-time equivalent (FTE) employees to operate and maintain our facilities to an acceptable level. The program currently has 117.11 FTE to support Oregon's large investment in Army National Guard facilities. Of these FTE, 10.98 are General Funded while 25.99 are Other Funded and 80.14 are federally reimbursed employees.

The primary computer program supporting the Facilities Operations and Maintenance Program is the Army National Guard's Planning Resource for Infrastructure Development and Evaluation (PRIDE) program. This federally funded program provides our Computerized Maintenance Management System, the real property database and programming module for federal project funding. As new facilities or lands are loaded into PRIDE, they become available in the maintenance module to load inventory of building systems and components. Manufacturer maintenance schedules are utilized to generate "planned" preventive work orders. The Oregon Military Department currently generates over most 1,200 planned work orders per week. Our current \$79 million backlog of operations, maintenance, and repair is projected to increase without additional funding and as we continue to catalog facility assets and input the corresponding preventative maintenance requirements into our PRIDE database.

The Facilities Operations and Maintenance Program operates a variety of standalone computerized facility management programs. Our Real Property Development Program and the Range and Training Land Program benefit us by providing the current status of our facilities, and given the agency vision and goals, project the future use of facilities. This provides us a statewide picture of facility priorities for the short and long-term. Our Maintenance Management software program allows us to apply resources to plan and schedule preventative work and to finitely track repair and maintenance costs, project status, and project cost. This allows us to prioritize projects and maximize our limited funding.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Our Energy Management software program allows us to review heating, ventilation, and air conditioning operations, troubleshoot systems, and perform preventive maintenance checks and services, thus saving time and money. Our Utility Tracking program has proven a great benefit to us by providing a tool to monitor monthly utility usage and make operational changes based on most favorable rates. We continue to save money by identifying and correcting inaccurate invoicing and inappropriate utility service usage.

The Army National Guard Facilities Operations and Maintenance Program is funded through a variety of General, Other, and Federal Funds sources. The base budget provides for 117.11 FTE as well as General Fund appropriation, Other Funds and Federal Funds limitation for required Services and Supplies.

Army National Guard Construction Operations:

The Army National Guard Construction Operations Program manages construction of Oregon Army National Guard facilities. The program is funded through a variety of General, Other, and Federal sources. The Army National Guard Construction Operations base budget provides General Fund for 1.00 FTE and required Services and Supplies. The base budget also provides federal limitation for 13.00 100% federally funded FTE for Army National Guard Construction Operations employees through a NGB Federal/State Cooperative Agreement.

Army National Guard Environmental Program:

The Oregon Army National Guard Environmental Program manages environmental issues for Army National Guard facilities and other sites in the state used for military training and support. Primary program pillars include Compliance, Cleanup, Conservation, Pollution Prevention, Assessments and Evaluations, and Integrated Training Area Management.

The Environmental Program applies to all Oregon Army National Guard facilities throughout the state, as well as other lands used for military training under various use agreements with public or private owners. It manages federal, state, and local regulatory compliance, such as wastewater treatment plant operations, wastewater discharge permits, hazardous materials management, solid and hazardous waste management, pollution prevention, recycling, air quality, drinking water quality, and natural resource management and conservation.

The Program manages Environmental Restoration efforts, which focus on the cleanup of areas used for military training or support facilities (such as underground storage tanks and munitions), and for which environmental contamination may continue to exist. Cleanup is managed in accordance with Department of the Army and National Guard Bureau standards, with close agency coordination with the Oregon Department of Environmental Quality. The Program also manages agency requirements for environmental site assessments to support real estate actions, in accordance with Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as supplemented by Department of the Army and National Guard Bureau standards.

_____	Agency Request	_____	Governor's Budget	_____X_____	Legislatively Adopted
-------	----------------	-------	-------------------	-------------	-----------------------

2015-2017

BUDGET NARRATIVE

The Program manages agency Government-to-Government consultation with the federally-recognized Native American Tribes in Oregon, in accordance with both federal and state requirements.

The Program manages other federal requirements applicable to the agency due to the use of federal funds, such as federal Executive Orders 13423, which requires the implementation of an Environmental Management System (EMS) to ensure “. . . environmental, transportation, and energy-related activities are conducted in an environmentally, economically, and fiscally sound, integrated, continuously improving, efficient, and sustainable manner” – in other words, in a sustainable manner. In addition, Department of the Army and National Guard Bureau directives require the EMS to be conformant with International Standards Organization (ISO) Chapter 14001:2004(E).

The Program maintains and implements an on-going external and internal Environmental Performance Assessment System, as well as an effective environmental training program, as integral parts of the Environmental Program. Through much of its management effort, the Program also advocates sound environmental stewardship. A stewardship ethic has been adopted by agency leadership and is fostered throughout agency planning and operations. The Environmental Program coordinates the preparation and processing of environmental documentation required by the National Environmental Policy Act for major agency actions. This requires coordination with applicable federal and state regulatory agencies, local jurisdictions, and the public. The goal is to appropriately plan and execute agency actions, resolve conflicts, and maximize land use compatibility near Oregon Army National Guard facilities.

In the spirit of stewardship and protection of natural resource values, the agency maintains an Integrated Natural Resources Management Plan (INRMP) for each of its three major military training sites: Biak Training Center (Redmond), Camp Adair (Corvallis), and Camp Rilea (Warrenton). The three INRMPs are designed to “integrate” military training with environmental protection, in the spirit of environmental stewardship. They are also designed to address compliance with requirements of the federal Sikes Act Improvement Act for managing military training lands; applicable regulatory requirements, such as the Endangered Species Act and wetlands management under the Clean Water Act; and Department of Defense, Department of the Army, and National Guard Bureau directives. The Program maintains a statewide Integrated Pest Management Program, which is a key component of the facilities management effort to control both floral and faunal pests and non-native species. Pest management activities and pesticide usage are tracked and reported to both state and National Guard Bureau by the Environmental Staff, in accordance with appropriate directives.

A statewide Operational Noise Management Plan has been developed, and is implemented and maintained for the major training sites managed by the agency. The plan is used to define and manage significant noise sources, and attempts to limit conflicts with incompatible land uses on adjacent lands.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Finally, a statewide Integrated Cultural Resources Management Plan has been developed and implemented, partially to document the heritage of the Oregon National Guard, but also to identify and appropriately define cultural resources management requirements at agency facilities and identify potential impacts at other sites from proposed agency actions. In several cases, older facilities and armories are “eligible” for the National Register of Historic Places and must be maintained in accordance with federal and state law. Particularly at the major training sites, the protection of archaeological, historical, and other cultural resources is important for sustaining mission requirements in the future. And, since the Program deals with a dynamic resource, continual monitoring and updates must be accomplished.

The Integrated Training Area Management (ITAM) Program focuses on balancing military training with resource conservation at the three major training sites (Biak Training Center, Camp Adair and Camp Rilea). The ITAM Program is designed to enhance the readiness posture of the Oregon Army National Guard by maintaining and improving military training opportunities at these training sites; monitoring the impacts of military training activities on the environment; identifying, evaluating, and restoring environmental damage caused by military training; and maintaining or fostering the reestablishment of natural ecosystems in concert and balance with military training. Integrated Natural Resources Management Plans provide guidance on meeting these needs. In addition, significant effort at Boardman is required to coordinate activities and address resource conservation issues with the U.S. Navy as the land manager.

The Environmental Program staff is 100% federally funded. The majority of environmental requirements resulting from a regulatory directive are 100% federally funded. However, under a “proponent pays” policy adopted by National Guard Bureau in 2006, some “environmental” requirements must be funded by other entities within the agency. As examples, requirements for National Environmental Policy Act documents (particularly Environmental Assessments) and environmental site assessments to support real estate actions must be paid by the proponent of the action and cannot be funded with environmental funds. This will affect execution of other programs. The ITAM program is 100% federally funded. The base budget provides Federal Funds limitation for 8.15 Environmental FTE, 2.85 ITAM FTE, and a small amount of General Fund match for one Environmental position. The base budget also provides Federal Funds limitation for required Services and Supplies to support these programs. Unfortunately, as long as the Environmental Program remains “compliance-driven”, funds for sustainability initiatives are not available through federal channels, making it difficult to meet goals and objectives that do not have a “regulatory driver”, and making it difficult to manage natural resources at agency training sites in a positive, proactive manner, which would concurrently enhance training opportunities.

Electronic Security Program:

The National Guard Bureau requires all facilities designated for storage of small arms or ammunition to be protected with an approved and operational electronic security system. Electronic security system equipment and replacement components are procured directly through the federal supply system with federal funds. Employees and equipment to install and maintain electronic security systems are 100% federally reimbursed through a Federal/State Agreement. The base budget provides Federal Funds limitation for two positions and necessary Services and

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Supplies. Federal funding provides for repair or replacement of computers, vehicles, tools, and the supplies and repair parts necessary to maintain the Intrusion Detection systems statewide.

Oregon Army National Guard's Wildfire Fire Management Program:

The Oregon Army National Guard's Wildland Fire Management Program is funded by 100% Federal funding from the US Department of the Army through the Master Cooperative Agreement with National Guard Bureau, which reimburses State expenses for this Program. The Oregon Army National Guard's Wildland Fire Management Program goals are: to comply with fire protection requirements set forth in Oregon Revised Statutes; support and sustain the Oregon National Guard's training mission; sustain the natural environment and native vegetation of the Oregon Military Department's training ranges and lands; to enhance both military and public fire safety in the vicinity of Oregon Military Department training ranges and lands; and to enhance Oregon National Guard support during State declared wildland fire emergencies or natural disasters.

Air National Guard Programs:

The Oregon Air National Guard has two primary missions. The first is its federal mission to man, train, equip and organize its members to provide for the defense and security of the United States and in a broader sense to support worldwide security goals and objectives. To provide the necessary skills to support this mission, a large amount of technical training is invested in Oregon Air National Guard members. These training opportunities many times have direct correlation to civilian occupations, thus providing a better-educated workforce for the state. The second mission of the Oregon Air National Guard is to provide public safety and protection of citizens during disasters when called upon by the Governor. As an element of the state's emergency communications plan, Oregon Air National Guard's satellite communications resources remain ready to assure adequate communications between fire bases and coordination centers operating from the Willamette Valley.

The Oregon Air National Guard is located at four sites:

The Oregon Air National Headquarters is co-located in Salem with the Oregon Army National Guard Headquarters, making the Joint Force Headquarters. This facilitates close coordination and integration of all Oregon National Guard resources during training and contingency operations.

The Portland Air National Guard Base is located at Portland International Airport. The 142nd Fighter Wing and the Combat Operations Group are stationed at the base. The 142nd Fighter Wing's mission is to provide air defense of the northwest United States from northern California to the Canadian border. The Combat Operations Group provides command and control for missions in tactical communications in support of theater operations and weather analysis support to several worldwide deployable Air Force and Army units.

_____	Agency Request	_____	Governor's Budget	_____X_____	Legislatively Adopted
-------	----------------	-------	-------------------	-------------	-----------------------

2015-2017

BUDGET NARRATIVE

Kingsley Field is located at Klamath Falls. The 173rd Fighter Wing and the 270th Air Traffic Control Squadron are stationed at the base. The 173rd Fighter Wing's mission is to train F-15 fighter pilots for air-to-air combat and air defense roles. The 270th Air Traffic Control Squadron operates the air traffic control tower for civilian and military operations at Kingsley Field. Kingsley Field is also being impacted with the assignment of a Total Force Integration (TFI) mission scheduled for Kingsley Field beginning in October 2014. Total Force Integration was initiated after the Chief of Staff of the Air Force directed increased production of F-15 pilots. TFI combines reserve and active components working side-by-side in the same organization for a common mission, which at Kingsley Field will be training additional F-15 fighter jet pilots. TFI brings an additional seven aircraft and 84 active duty personnel (regular Air Force) to the base.

Camp Rilea is located at Warrenton and is host to the 116th Air Control Squadron. The 116th Air Control Squadron's mission is to provide tactical radar command and control in support of theater operations. The mission includes offensive and defensive air operations and early warning radar and electronic intelligence operations.

There are seven major Air National Guard programs within the Operations Program:

Air National Guard Administration Program - The Air National Guard Administration Program provides command and administrative support for all Oregon Air National Guard programs. Administration Program employees are 100% federally funded. Administration Program General Fund is used to purchase Services and Supplies. The base budget provides General Fund for Services and Supplies.

Air National Guard Civil Engineering Program - The Civil Engineering Program provides facility operations and maintenance for the Portland Air Base, Kingsley Field, and Camp Rilea Air National Guard facilities. Civil Engineering programs are funded through Federal/State Agreements and require state matching funds. The match percentage varies depending on program location. The base budget provides Federal Funds limitation and required matching state funds to support 46 positions and necessary Services and Supplies.

Air National Guard Security Program - The Security Program provides security police protection at the Portland Air Base and Kingsley Field. Security personnel are instrumental in protecting aircraft and facilities against sabotage, theft, vandalism and trespass. The Security Program is 100% federally funded. The base budget provides Federal Funds limitation for 21 positions and necessary Services and Supplies.

Air National Guard Fire Protection Program – The Fire Protection Program provides fire protection at the Portland Air Base and Kingsley Field. Personnel are trained and certified to contain aircraft fires, perform air crew extraction, and provide structural fire fighting protection. The Oregon Air National Guard is the only crash/rescue and fire fighting resource at the Klamath Falls Airport. Civilian aviation would not have crash/rescue protection at Klamath Falls without the Oregon Air National Guard Fire Protection Program. The Fire Protection Program had been 100% federally funded until recently. In August 2012 the National Guard Bureau modified Appendix 1024 of the Master Cooperative Agreement

_____	Agency Request	_____	Governor's Budget	<u> X </u>	Legislatively Adopted
-------	----------------	-------	-------------------	--------------	-----------------------

2015-2017

BUDGET NARRATIVE

to institute a cap on the maximum amount of federal funds available to reimburse the state for firefighter payroll costs. Oregon implemented the changes effective October 1, 2013. The purpose of this change was to enable the long-term sustainability of this program at the federal level; however, it places a burden on the state to fund the difference between actual payroll costs based on collective bargaining agreements and the federal cap. The base budget provides Federal Funds limitation for 50 positions and necessary Services and Supplies.

Air National Guard Environmental Program - The Environmental Program manages environmental issues. The program monitors and ensures environmental compliance at the Portland Air Base, Kingsley Field, and Camp Rilea Air National Guard facility. Kingsley Field will be one of the first federal facilities in Oregon to apply for a Green Environmental Management System (GEMS) permit through Oregon Department of Environmental Quality. Kingsley Field is applying for a “Leader” GEMS permit which is the most stringent of the three GEMS permit options. The GEMS Leader permit is offered only to organizations with environmental management systems that have at least a three year record of excellent environmental performance and comply with International Standards Organization 14001 Environmental Management System Criteria. Air National Guard Environmental programs are funded through a Federal/State Cooperative Agreement and require state matching funds. The match percentage varies depending on program location. The base budget provides Federal Funds limitation and required matching state funds to support two positions and necessary Services and Supplies.

Kingsley Field Billeting Program - The Billeting Program provides lodging to Oregon National Guard members, F-15 fighter pilot students and flight medicine students from throughout the Air Force receiving training at Kingsley Field. The Billeting Program is 100% federally funded. The base budget provides Federal Funds limitation for two positions and necessary Services and Supplies.

Equipment Refurbishment Program:

The Equipment Refurbishment Program, also known nationally as the Oregon Readiness Sustainment Maintenance Site (RSMS), enables the Oregon Military Department to provide supplies and services in a cost effective manner to the Department of Defense, utilizing Federal Funds. This program enables the Military Department RSMS to provide critical products and services to the National Guard worldwide in a more cost-effective manner than is available to the Federal system. The sole revenue source for this program is Federal Funds received from Department of Defense entities in support of the program. The Oregon RSMS is funded annually up to \$18 million dollars to supply critical fully functioning electronic and electro-mechanical equipment to the States, Territories, and Units of the National Guard. The refurbished equipment allows the National Guard to be ready and capable to support the needs of the people and perform their specific mission. The equipment refurbished by the Oregon RSMS allows Oregon as well as other States and territories to deploy fully functioning search and rescue missions, natural disaster relief, infrastructure support, military operations and homeland security. This program is unique to any state program in that it utilizes the best business practices presently utilized in the private sector. The program is ISO 9001:2008 registered, and employ’s state of the art manufacturing techniques, computer tracking systems, customer service, and technical support. The Oregon RSMS is a full functioning business within state government which has afforded an after-cost tax savings of over \$210 million dollars to-date. The

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Oregon RSMS far exceeds the average private sector return on investment performance, through employee-based ownership practices and accountability. The program is operated at the Combined Support Maintenance Shop/Readiness Sustainment Maintenance Site at Camp Withycombe in Clackamas, Oregon. The program is 100% federally funded. The base budget provides Federal Fund limitation for 64 positions and the supporting Services and Supplies. **Note: The National Guard Bureau closed all five RSMS programs nationally in the fall of 2014, mainly due to the lack of demand following decreased deployments in the Global War on Terror. The Legislature approved Policy Package 803, which phases out 62 positions and \$30.9 million Federal Funds limitation for the Equipment Refurbishment program.**

Distributed Learning Program:

The Distributed Learning Program (DLP) is a nationwide National Guard program providing soldiers and their communities' access to a classroom environment providing multimedia capabilities for hosting video and audio teleconferencing, conducting computer-based training, web-based training, interactive video-Teletraining, electronic mail and electronic network systems. There are five DLP classrooms located in Oregon. The classrooms are located within armories at Clackamas, Springfield, Warrenton (Camp Rilea), Bend and Medford. These facilities provide necessary training resources for soldier readiness. The sites are also available for rental on a fee recovery basis to state and federal government agencies, and to the public. The program is 100% federally funded through a NGB Federal/State Cooperative Agreement and federal program income generated through video teleconferencing fees charged to the user. The funds may only be used to support the program. The base budget provides Federal Funds limitation for 1.40 Distributed Learning FTE. The base budget also provides Federal Funds limitation for required Services and Supplies to support this program.

Telecommunications Program:

The telecommunications portion of this program provides federal funding for Oregon Army National Guard telecommunications system procurement, maintenance, and monthly charges. Most costs are paid directly by the Federal Government and a smaller amount is handled through a Federal/State cooperative agreement. The base budget provides Federal Funds limitation for Services and Supplies.

Counterdrug Program:

The Counterdrug Support Program (CDSP) is a 100% federally funded program that combats illegal drug use within Oregon's communities. The program has been an integral part of our state's drug supply reduction efforts for over 20 years. The program is organized and functions through the Oregon National Guard using Soldiers and Airmen as well as equipment and facilities to add capabilities that otherwise might not be available to law enforcement agencies and community-based organizations. The Oregon National Guard personnel supporting the Counterdrug Program are placed on fulltime Title 32 Active Duty Operational Support (ADOS) orders under the control of the Governor and The Adjutant General of Oregon.

_____	Agency Request	_____	Governor's Budget	<u> X </u>	Legislatively Adopted
-------	----------------	-------	-------------------	--------------	-----------------------

2015-2017

BUDGET NARRATIVE

The Oregon National Guard is committed to approaching the fight against drugs as a Total Force: community leaders, anti-drug coalitions and law enforcement agencies working in partnership with Oregon's citizen-soldiers. Hundreds of millions of dollars in drugs and tens of millions of dollars in property involved in drug trafficking have been seized due to the support of the Oregon National Guard. Dozens of arrests are made each year as a result of Oregon National Guard Counterdrug mission involvement. The Oregon Military Department works closely through the efforts of the Counterdrug Support Program with law enforcement agencies to retrieve a portion of these funds through the "Equitable Sharing of Federally Forfeited Property" program to expand equipment, operations, and drug education and awareness programs.

The Counterdrug Support Program has two primary missions. The first is to support local, state and federal law enforcement efforts to stop the flow of illegal drugs into and manufactured in Oregon (supply reduction). The second is to support Oregon's community-based organizations in their efforts to educate, train and prevent drug abuse (demand reduction) among Oregon's citizens. Both supply and demand reduction efforts are required to meet the challenge that illegal drug abuse presents. By focusing on outcomes, measured in reduced supply, declining drug use and the resulting lessening social consequences, we can achieve our common goal of a drug free Oregon.

The Oregon National Guard Counterdrug Support Program offers the following cost effective National Guard unique support services to our community partners:

The UH-72A helicopter is equipped with advanced forward-looking infrared camera with thermal imaging, reversible polarity, zoom capability and "night sun" high power illumination system (searchlight).

The Light Armored Vehicle provides a secure platform for transporting police officers during high-risk search warrants.

Hand held thermal imaging equipment provides police officers a passive, non-intrusive device to detect thermal energy which can be used in an investigation of a concealed indoor marijuana growing operation.

National Guard unique counterdrug courses supporting law enforcement officers assigned to multi-jurisdictional drug task forces.

National Guard personnel with military-specific skills enabling civic leaders to build effective coalitions to illuminate and/or mitigate the use of illegal drugs in their community. By building coalitions that make communities more resistant to drug- and transnational criminal organizations (TCO) activity, Guardsmen help lessen the demand for drugs, thereby reducing the revenues flowing back to drug-linked TCOs.

The Counterdrug program is 100% federally funded. The base budget provides Federal Funds limitation for Services and Supplies.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

Anti-Terrorism Program Manager:

The National Guard Bureau provides 100% federal funding for one position to develop, implement, manage and monitor a comprehensive Anti-Terrorism program for protecting state and installation personnel, information, infrastructure and other assets from acts of terrorism. The base budget provides Federal Fund limitation for one position and the supporting Services and Supplies.

Expected Results from the 2015-17 Budget:

The Army National Guard Facilities Operations and Maintenance Program 2015-17 Base Budget will not fully support the needs of our Army National Guard facilities. The shortage of funding, compounded by new facilities that have not received State matching funds, increased usage of our facilities as a result of the Oregon National Guard performing crucial national defense missions throughout the world and Homeland Defense missions throughout the state, has reached a critical juncture. Despite implementation of significant energy reduction efforts, increased facility usage, continues to increase our utility expenditures. While Oregon Army National Guardsmen are risking their lives overseas, their Army Guard facilities are in jeopardy at home due to the lack of funding. Currently 60.6% of our armories are rated as dysfunctional or substandard and in overall poor condition according to U.S. Army standards. Additionally, the backlog and costs of maintenance and repair projects continues to increase partially due to inflationary pressure but primarily due to lack of adequate funding.

OMD Armory Other Funds rental earning potential is in jeopardy of being unable to adequately assist in funding our armories. Due to our heavy reliance on Other Fund revenues to operate Armories, any reduction in those revenues or mandated redirection of this funding to pay other agency costs directly corresponds to a further decline in facility condition. This in turn, diminishes OMD ability to generate required revenues. OMD has the statutory requirement to provide well maintained facilities for our soldiers, civilian employees, and the citizens and communities of Oregon, but our ability to generate Other Funds revenue is being hampered by economic conditions, in some cases facility conditions and in others local ordinances restrict rental activity beyond certain hours. As previously mentioned the Installation Status Report document is our facilities “report card” and it reflects that Oregon’s facilities are generally inadequate. Continued mobilizations and re-deployment activities continues to maintain high usage of our key facilities. This is causing increases in our operational expenses and reducing the number of days the facilities are available for rentals. Finally, changes to land use zoning and implementation of new ordinances in numerous communities threatens to restrict the type and frequency of rental activities within many of our high use armories.

The backlog of maintenance and repair within the Army National Guard Facilities Operations and Maintenance Program is currently estimated at \$79M. In recent years this backlog has fluctuated from a high of \$110.6 million in 2007-09, to \$79.6 million in 2013. The reduction from the high point of \$110M was funded primarily by federal and State stimulus funding coupled with Armory Service Life Extension (ASLEP) projects. At the same time OMD was the recipient of these additional resources, the Operations program received

_____	Agency Request	_____	Governor’s Budget	_____X_____	Legislatively Adopted
-------	----------------	-------	-------------------	-------------	-----------------------

2015-2017

BUDGET NARRATIVE

General Fund support near that of the 1991-93 biennium. The inadequacy of this funding level is resulting in an increase of deferred maintenance and a resumption of emergency maintenance issues. The 2015-17 base budget does not provide funding to address any preventive maintenance and repair. OMD facility maintenance is reactionary and focused on alleviating loss of equipment, systems or physical security. As a result the agency's deferred maintenance will increase.

Army National Guard Construction Operations – The program will continue to operate successfully within the level of resources budgeted.

National Guard Environmental Program - The program will continue to operate successfully within the level of resources budgeted, provided other “proponents” can fund requirements that cannot be supported with environmental funding allotted by National Guard Bureau.

Electronic Security System Program - The program will continue to operate successfully within the level of resources budgeted.

Wildland Fire Management Program- The program will continue to operate successfully within the level of resources budgeted.

Distributed Learning Program - The program will continue to be successful within the level of resources budgeted.

Air National Guard Program - The program will not be able to accomplish critical program functions without approval of Policy Packages 201 and 202. **Policy Package 201 requests \$1,390,116 General Fund to fund the estimated state costs to support the Fire Protection Program at both airbases: Approved by Legislature.**

Policy Package 202 requests eight new positions and \$361,770 General Fund and \$1,437,444 Federal Funds for the continued conduct of Facilities Operations and Maintenance Activities at the Portland Air National Guard Base. Legislature did not approve Policy Package 202 but did approve 3 new positions with \$89,563 General Fund and \$358,253 Federal Funds in Policy Package 840.

Equipment Refurbishment Program – The Equipment Refurbishment Program, also known nationally as the Oregon Readiness Sustainment Maintenance Site (RSMS), will provide over 64 medium to high technology jobs in the Portland metropolitan area, producing a local tax base in excess of five million dollars. The program will continue to purchase goods and services from local private sector companies, supporting economic stability in Oregon. **Policy Package 803 in the Legislatively Adopted Budget phases-out 62 positions and \$30,927,771 Federal Funds limitation.**

Distributed Learning Program - The program will continue to be successful within the level of resources budgeted.

Telecommunications Program - The program will continue to be successful within the level of resources budgeted.

2015-2017

BUDGET NARRATIVE

Counterdrug Program - The program will continue to be successful in the 2015-17 biennium through drug reduction and eradication programs. The program will continue to work with local, county, state, and federal law enforcement agencies to reduce drug demand and supply in Oregon communities. The Mentor Program will continue to be successful by increasing the number of local citizens and Oregon National Guard mentors in Oregon communities. The program will continue to support local community coalitions in a combined effort to curb the use of drugs.

Anti-Terrorism Program - The program will continue to be successful as the result of increased federal funding.

Operations Program objectives and expected results are directly linked to the agency's performance measures.

Respond to State Emergencies:

Oregon Army and Air National Guard facilities are located in 27 counties and provide a focal point for National Guard disaster response activities. Emergency response equipment is stored at the facilities and available for rapid deployment during emergencies. These facilities are used to stage and support and house; personnel and equipment arriving from other locations in response to emergencies. These facilities are used to house emergency relief organizations and citizens displaced by disasters. Specialized communication equipment allows the facilities to serve as emergency operations command centers. National Guard facilities strategically located around the state are a vital component of the State of Oregon's ability to provide timely and appropriate response during emergencies.

The Electronic Security Systems Program ensures the Oregon Army National Guard's weapons are securely stored and available for use during military training or state emergencies.

Revenue Sources:

The Operations Program is funded from a variety of General, Other, and Federal Funds. Other Funds are primarily received from facility rentals. Other Funds revenue estimates are based on historical information adjusted for projected future trends. Federal Funds are received through Federal/State Cooperative Agreements between the National Guard Bureau (NGB) and the State of Oregon. The funds may only be used to support programs for which they are received. Federal Funds estimates are based on historical trends and information provided by NGB Fund Managers. We do not anticipate any changes in revenue sources during the 2015-17 Biennium. Operations Programs are funded as follows:

<u> </u>	Agency Request	<u> </u>	Governor's Budget	<u> X </u>	Legislatively Adopted
-----------------	----------------	-----------------	-------------------	--------------	-----------------------

2015-2017

BUDGET NARRATIVE

Army National Guard Facilities Operations and Maintenance:

Training Facilities – These facilities are 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support designated facilities.

Logistical Facilities – These facilities are funded 75% federal / 25% state through a NGB Federal/State Cooperative Agreement. State matching funds are received from the General Fund. The federal funds may only be used to support designated facilities.

Readiness Centers (Armories) – The facilities are split funded based on type and use of the facilities.

Security – This program is 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support the program.

Range and Training Land Program – The program is 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support the program.

Army National Guard Construction Operations – The program has nine positions. Four of the positions are funded from the General Fund and five positions are 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support the program.

Army National Guard Environmental Program – The program is 100% federally funded through a NGB Federal/State Cooperative Agreement. The funds may only be used to support the program.

Electronic Security System Program – The program is 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support the program.

Anti-Terrorism Program - The programs are 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support the program.

BUDGET NARRATIVE

Essential Packages:

010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package increases General Fund \$27,274, increases Other Funds \$26,273, and decreases Federal Funds (\$17,176).

022 - Phases out the following items:

1. (\$134,645) General Fund and (\$538,585) Federal Funds for Services and Supplies at the Portland Airbase Civil Engineering Program that was received in Policy Package 811 in the 2013-15 Legislatively Adopted Budget. The funding received (as well as 8 limited duration positions) was temporary for one biennium only;
2. (\$3,587) General Fund in one-time funding that was approved in the February 2014 legislative session for the Fire Protection Programs at both airbases: Kingsley Field and Portland Air National Guard base. HB 5201 provided \$734,800 General Fund to fund the gap between actual payroll costs and the maximum amount of federal reimbursement. New requirements from the National Guard Bureau place funding caps on the Fire Protection programs. Because the \$734,800 was not tied to specific positions, it did not roll forward into the 2015-17 budget during the PICS freeze. The small amount remaining to be phased-out (\$3,587) is a non-PICS item (Mass Transit Tax); and
3. (\$5,971,696) Federal Fund limitation for Services and Supplies for the Umatilla Caretaker Contract. It was approved in Policy Package 203 in the 2013-15 Legislatively Adopted Budget, along with 23 limited duration positions (which did not carry forward into 2015-17). New positions and limitation to continue the contract will be requested in Policy Package 203 in the 2015-17 Agency Request Budget.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package decreases General Fund (\$78,469), increases Other Funds \$203,682 and increases Federal Funds \$662,844.

032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases General Fund by \$60, Other Funds by \$26 and Federal Funds by \$532.

050 – Fund shifts \$655,700 Services and Supplies from Other Funds into General Fund. As part of General Fund reductions in the 2013-15 Legislatively Adopted Budget, Policy Package 813 approved a one-time fund shift from General Fund into Other Funds. The source of Other Funds revenue was anticipated energy rebates and incentives on various maintenance and remodel projects.

<u> </u>	Agency Request	<u> </u>	Governor's Budget	<u> X </u>	Legislatively Adopted
-----------------	----------------	-----------------	-------------------	--------------	-----------------------

2015-2017

BUDGET NARRATIVE

Policy Packages:

090 – Reduces General Fund Services and Supplies in the Air Guard Administration Program by \$17,452 and fund shifts one position in the ARNG Environmental Program from 75% Federal Funds, 25% General Fund to 100% Federal Fund. This package totals (\$65,934) General Fund and \$48,482 Federal Funds. **Added by the Governor; included in Governor’s Budget. Not approved by Legislature (see Policy Package 801 below).**

201 – Air National Guard Fire Protection State Funds - \$1,390,116 General Fund. **Governor recommended. Included in the Legislatively Adopted Budget.**

202 – Portland Airbase FOMA - \$361,770 General Fund, \$1,437,444 Federal Funds. **Governor recommended. Not included in the Legislatively Adopted Budget (see Policy Package 840 below).**

203 – Umatilla Caretaker Agreement - \$6,500,000 Federal Funds. **Governor recommended. Included in the Legislatively Adopted Budget.**

801 – LFO Analyst Adjustments – (\$67,040) General Fund, \$48,482 Federal Funds. Fund shifts one position in the Installations Division Environmental Branch from 25% General Fund and 75% Federal Funds to 100% Federal Funds. Reduces General Fund for Services and Supplies in Air National Guard Administration. **Added by the Legislature.**

802 – Armory Lead Abatement - \$940,800 General Fund, \$940,800 Federal Funds to abate lead contamination and replace fire suppression pipes at the Forest Grove Armory. **Added by the Legislature.**

803 – Phase-Out Readiness Sustainment Maintenance Site – (\$30,927,771) Federal Funds, abolishes 62 positions. **Added by the Legislature.**

840 – SB 5507 End of Session – \$84,619 General Fund, \$354,977 Federal Funds. Establishes 3 positions at Portland Airbase and reduces Attorney General fees and motor pool costs. **Added by the Legislature.**

Proposed New Laws – None.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OPERATIONS PROGRAM
POLICY PACKAGE 090

1. Purpose– This Policy Package was added in the Governor’s Budget. It reduces General Fund services and supplies for the Operations Program by (\$17,452). It also fund shifts one Principal Executive Manager E position from 25% General Fund, 75% Federal Funds to 100% Federal Funds, for a reduction in General Fund Personal Services of (\$48,482). Both reductions were taken from the agency’s 10% reduction plan.

The (\$17,452) reduction in services and supplies will affect the Air National Guard Administration program, which supports the Director of Staff for the Oregon Air National Guard. The reduction will curtail purchases of office supplies, recognition awards and travel. This reduction would have a moderate operational impact to the program.

The position being fund-shifted to 100% Federal Funds is located in the Oregon Army National Guard Environmental Program, authorized by Appendix 2 of the Master Cooperative Agreement. The National Guard Bureau required a 25% state match on this position in until 2009, when 100% federal funding was authorized. The General Fund portion is no longer necessary. This reduction would have a minimal operational impact to this program.

2. How Achieved – Appropriation will be decreased by \$65,934.

3. Staffing Impact – Fund shift one position in the Operations Program.

4. Quantifying Results – The results of this policy package will have a minimal to moderate impact on the Operations Program.

5. Revenue Source – (\$65,934) General Fund.

Added by the Governor; included in the Governor’s Budget. Not approved by Legislature: refer to Policy Package 801 for reductions included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OPERATIONS PROGRAM
POLICY PACKAGE 201
PRIORITY 1

1. **Purpose**— The Oregon Military Department requests \$1,390,116 in General Fund appropriation to ensure adequate fire and emergency services support for the Air National Guard missions at the Portland Air National Guard Base and the Kingsley Field Air National Guard Base in Klamath Falls. Recent changes in federal requirements have capped the amount of federal reimbursements and created a liability for the state in order to keep the program operational and support the mission of both airbases.

The Portland Air National Guard Base's Fire Department (PANGB) supports the 142nd Fighter Wing's primary mission to provide air defense of the northwest United States from California to the Canadian border. The fire department for the Portland International Airport (Port of Portland) is not certified to perform extrication of flight crew from military aircraft equipped with weapons, weapons systems, and ejection seats: thus, the ANG program is necessary.

The Fire Departments at both airbases provide fire and emergency services in direct support of the women and men assigned to the Fighter Wings at Portland and Kingsley Field serving both the State of Oregon and the United States providing skilled and equipped personnel for disaster relief, homeland security, and national defense.

The Kingsley Field Air National Guard Base's Fire Department supports the 173rd Fighter Wing's primary mission to provide F-15 Fighter Pilot Training to all United States Air Force fighter pilots. Kingsley Field is the sole F-15 Flying Training Wing that provides Air Combat Training throughout the United States Force, Air Force Reserves and the Air National Guard. Kingsley Field Air National Guard Base also provides the facilities, training, equipment, and resources for over 800 Air National Guardsmen.

The Fire Department at Kingsley Field also provides fire and emergency services for the Klamath Falls airport and operates under a mutual aid agreement with the Klamath Falls fire department. The Kingsley Field fire department responds regularly under this mutual aid agreement for fire attack, EMT response, and nearby highway incidents. The Fire Department gets called each year there is a Conflagration Act declaration (wild land fire) in southern Oregon, with salaries and equipment costs reimbursed by the Oregon State Fire Marshal.

The Kingsley Field Fire Department is also being impacted this year with the assignment of a Total Force Integration (TFI) mission scheduled for Kingsley Field beginning in October 2014. Total Force Integration was initiated after the Chief of Staff of the Air Force directed increased production of F-15 pilots. TFI combines reserve and active components working side-by-side in the same organization for

_____ Agency Request	_____ Governor's Budget	<u> X </u> Legislatively Adopted	
2015-2017			107BF02

BUDGET NARRATIVE

a common mission, which at Kingsley Field will be training additional F-15 fighter jet pilots. TFI brings an additional seven aircraft and 84 active duty personnel (regular Air Force) to the base.

These Oregon Air National Guard Fire Protection programs are operated through an Appendix under the Master Cooperative Agreement (MCA) between the Oregon Military Department (State Government) and the National Guard Bureau (Federal Government) with the majority of funds being reimbursed by the federal government. There is no specific funding match requirement under this MCA Appendix. In 2012, National Guard Bureau issued a revised Appendix dealing with Air National Guard Fire Protection Activities. The revised Fire Services Appendix to the MCA became effective October 1, 2012 (Federal Fiscal Year 2013) nationwide. Prior to this revision, Air National Guard Fire Services were 100% federally reimbursed to the States. The revision stipulated salaries would be held in place for those States whose salaries exceed the federal General Schedule (GS) pay scale and that salaries would be grandfathered at Federal Fiscal Year 2012 rates, constituting a salary cap. In the 2013-15 biennium, every fire fighter at both airbases met or exceeded the Federal salary caps prior to the implementation of pay increases offered in collective bargaining negotiations.

The National Guard Bureau provided the following statement as to why it was necessary to make changes to the Appendix: *“The proponents for this Appendix, NGB-PARC and NGB/A7, are responsible for ensuring this Appendix reflects statutory and regulatory guidance, is current, and most important, fundable and executable. Taken into account are employee unions, current contracts and State budget cycles. Accordingly, the changes to Appendix 24, and the most recent revision dated August 2012, are necessary to maintain a sustainable program.”*

During the February 2014 legislative session, the Oregon Military Department (OMD) requested \$918,500 General Fund appropriation to fill the funding gap between the federal reimbursement and actual costs to run both fire programs during the 2013-15 biennium. Two issues of funding shortfalls that came to light are 1) bargaining negotiations for the International Association of Fire Fighters (IAFF) (modeling the agreements made with AFSCME and SEIU), and 2) the National Guard Bureau’s salary cap (the maximum amount the Federal Government will reimburse the State for firefighter salaries). The Oregon Military Department received \$734,800 of one-time General Fund from this request. This one-time appropriation was not placed into the base budget for 2015-17 and the Department must seek funds again for ensuring adequate support during the 2015-2017 biennium. The \$183,700 shortfall has required the Department to leave vacant Fire Fighter positions unfilled. The result for the Kingsley Field Fire Department is that two Fire Captain positions remain vacant, causing scheduling and shift difficulties. Overtime compensation and crew hours have had to increase to ensure adequate emergency protection.

The amount requested in this policy package was calculated by projecting salary costs for both Fire Protection programs through the 2015-17 biennium and comparing them to the maximum federal reimbursement, which is either 1. The Federal General Service (GS) pay cap by type of position or 2) the actual pay from August 2012 if the employee is still in the same position (grandfathered).

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

2. **How Achieved** – General Fund appropriation would provide the necessary state funds to properly support the Air National Guard Fire Protection Programs at both airbases. Fully functioning fire protection crews are necessary in order for the F-15 jets to fly. Without this funding, the ability of the airbases to fulfill their missions is endangered.
3. **Staffing Impact** – None.
4. **Quantifying Results** – The results of this package will be the ability of the Portland Air National Guard Base and the Kingsley Field Air National Guard Base to perform their missions. Operational reviews performed by the Department of Defense will also determine the effectiveness of air bases.
5. **Revenue Source** - \$1,390,116 General Fund.

Governor recommended. Included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OPERATIONS PROGRAM
POLICY PACKAGE 202
PRIORITY 2

1. **Purpose** - This Policy Package funds the Portland Air National Guard (ANG) Base and Camp Rilea Facility Operations and Maintenance Activities (FOMA) Appendices of the Master Cooperative Agreement (MCA) between the Oregon Military Department and the National Guard Bureau (NGB). The Federal government reimburses 80% and the State to matches 20% of the total facilities costs at Portland, while the Federal government reimburses 75% and the State matches 25% for the Air National Guard facilities costs at Camp Rilea.

The Facilities Operations and Maintenance Activities (FOMA) cooperative agreement encompasses day to day operations including supplies and labor for building maintenance, utility costs and runway fees for military aircraft. The funding of this infrastructure is critical to the 24/7 alert flying mission of the F-15 fighter jets assigned to the Oregon Air National Guard at Portland. State and Federal funding provides more than infrastructure for F-15 Air operations. The funding provides a base of operations for the Oregon Air National Guard to marshal thousands of Air National Guardsmen. These men and women serve both the State of Oregon and the United States providing skilled and equipped personnel for disaster relief, homeland security, and national defense. Federal support for these agreements requires State matching funds. Federal funds allocated to the Oregon Air National Guard during a federal fiscal year by the NGB under the MCA that do not receive state matching funds are lost and revert back to the NGB.

Starting in 2009, the state budget to support facility maintenance and operations at both Portland Air National Guard Base and Camp Rilea was progressively cut resulting in the return of over \$800,000 in Federal funding and the loss of 8 maintenance positions over the last five years. Personnel were furloughed, cost of living increases suspended, and vacancies remained unfilled in order to maintain basic utility and bare-minimum facility operations and maintenance. Due to personnel cuts, only 47% of facility maintenance tasks are being accomplished at Portland Air National Guard Base, leading to reduced facility operability and increased repairs. The reduced level of facility maintenance has directly impacted the base's ability to conduct its mission.

The legislature authorized the hiring of 8 limited duration positions in the 2013-2015 biennium to help fix the facility problems at Portland. When the additional funding was authorized, maintenance staffing was down to 18 out of 26 NGB-authorized and funded positions, or 70%. This is far below the 29 positions NGB calculates are need to maintain the 73 facilities and 250 acres of Air National Guard-leased property at Portland Air National Guard Base and Camp Rilea. The 8 limited duration positions have helped, but sustained staffing at the NGB reimbursable rate of 26 positions is required. This budget submission includes funding to convert the limited duration hires authorized in 2013-2015 into

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

permanent employees. Without continued staffing, the progress that was made during the 2013-2015 biennium will falter as will the Oregon National Guard missions that rely on the facilities at Portland ANG Base and Camp Rilea.

The 2013-15 Legislatively Approved Budget approved 8 limited duration positions and temporary General Fund of \$340,000. Subsequently, the February 2014 legislative session added \$78,000 in order to take full advantage of federal matching funds. The \$361,770 General Fund requested in this package to support Oregon Air National Guard facility maintenance and operations at Portland Air National Guard Base and Camp Rilea for the 2015-17 biennium would bring the total state match to \$1,407,617, in line with General Fund received in the 2013-15 biennium (\$1,387,125). The slight increase is due to Cost of Living increases in payroll authorized by the State, as well as projected utility cost increases. The \$1,407,617 requested from the state will lead to the maximum federal reimbursement of \$5,526,907, directly impacting the local economies around these Oregon Military Department installations.

In order to sustain Oregon Air National Guard facilities at Portland Air National Guard Base and Camp Rilea, \$361,770 in additional state funds are requested for this biennium. This funding maximizes the Federal match and ensures the minimum funding is available to meet basic personnel, utility, supply and contract requirements. This amount includes making the 8 limited duration positions authorized for 2013-2015 biennium permanent positions. Any amount less than the requested amount will lead to lost federal funding, reduced facility maintenance, personnel layoffs, and mission degradation for the Oregon Air National Guard.

Position #	Title	Classification	Federal/State %	General Fund	Federal Funds	Total

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OPERATIONS PROGRAM
POLICY PACKAGE 203
PRIORITY 9

1. Purpose - This Policy Package extends 23 Limited Duration positions in the Installations Division of the Operations Program. This package is critical to fulfilling the Oregon Military Department's (OMD) requirement to carry on a Caretaker Agreement with the U.S. Army to support functional activities at the Umatilla Chemical Depot (UMCD). The Caretaker Agreement started in July 2012 and will continue until such time as all of the former UMCD 19,000 plus acres have been transferred to new ownership. It is anticipated that this process may not conclude until 2018. This package is a continuation of the positions and limitation originally approved at the May 2012 Emergency Board and extended through the 2013-15 biennium with Policy Package 203. This policy package requests extension through the 2015-17 biennium.

Since 1980 the UMCD has been utilized as a training area (2,060 acres) by the Oregon National Guard (ORNG) and presently serves as the location for the ORNG Regional Training Institute (RTI) Military Occupational Specialty Qualification (MOSQ) School for Infantry Soldiers (11B), as well as a training site for the 3-116 Armor (Cavalry) Battalion based out of La Grande. Other ORNG units routinely utilizing this training site include the 1186 Military Police, as well as other ORNG units throughout the state.

In 2005, the closure of the UMCD was included in the Department of Defense Base Realignment and Closure (BRAC) Commission's recommendations which Congress adopted. In 2009 the Umatilla Local Re-use Authority (LRA) was officially recognized by the Department of Defense. The LRA's process requires that a plan be developed that considers all of the assets and infrastructure on the land before a property transfer from Federal to State and local grants can take place. The LRA was formed of representatives from the Confederated Tribes of the Umatilla Indian Reservation, Port of Morrow, Port of Umatilla, Morrow County, and Umatilla County. The LRA is responsible for working with the Army to determine the fate of the property after the demilitarization and decommissioning is complete.

The LRA developed a recommended plan for reutilization of UMCD after the chemical demilitarization. This recommended reutilization plan was submitted to the Army in August 2010. That plan provided the recommendation that 7,421 of the more than 18,000 acres of land be conveyed to the ORNG for use as a National Guard training site. This plan included the recommendation that the property be conveyed to the ORNG through congressional action. The language was introduced by Senators Wyden and Merkley in the 2012 National Defense Authorization Act (NDAA), which has since been signed by the President. The NDAA specified 7,500 acres be conveyed to the Oregon Military Department. The next largest portion, 5,600 acres, will be left natural for a wildlife refuge to preserve some of the best shrub steppe habitat left in the Columbia Basin. About 650 acres will be used for agriculture and already has been leased for farming. The remaining land has been designated for industrial use, with some in Morrow County and some in Umatilla County.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

In view of the above background and that an additional 7,500 acres of property on UMCD will be conveyed to OMD for use as a military training area for the ORNG, it is in the best interest of OMD to sustain a personnel infrastructure that will ensure the smooth the transition between the Federal Government and State of Oregon. It is anticipated that transitioning these LD positions to permanent Oregon Military Department staff will be implemented incrementally. It is anticipated that this process will start in late 2015. The incremental shifting of Caretaker employees from LD to permanent OMD staff will happen as the level of work required within the Caretaker contract is reduced. BRAC will reduce contracted employees as property is transferred to new ownership and the level of work required by the contract is reduced. This process will continue until all the Depot lands have been transferred to future owners by the end of 2018, at which point BRAC will no longer have an interest in the property and will no longer fund any positions.

Currently, the Umatilla Chemical Depot (UMCD) lands disposal process is being managed by the Army's Base Realignment and Closure Office. Locally the Local Reuse Authority has been established, recognized and operating for the last several years and is actively managing at the local level the processes necessary to transition or convey property to new ownership.

The Caretaker contract is currently on a one year extension, with the current period ending 30 January 2015. The BRAC office is working on the next one year extension to the Agreement. This contract is a 100% federal fund Firm-Fixed Price/Cost Reimbursable Caretaker Agreement. OMD anticipates amendments will extend the contract until such time as all of the property his under new ownership. The Contractor (OMD) will continue to serve as the Depot's operating contractor and be responsible for providing the depot with everyday services, which include support for facility maintenance, utilities (electrical and propane) grounds maintenance, security, safety, administrative support, environmental management and compliance, communications, purchasing, janitorial, postal services, security, surveillance, safety and Wildland Fire Services.

OMD's Adjutant General Installations (AGI) Division will continue to serve as the agency lead in administering terms of the Agreement. The typical Master Cooperative Agreement (MCA) instrument used to transfer federal funding between National Guard Bureau (NGB) and OMD does not apply in this situation.

Positions required to perform the basic functions and their basic duties are listed as follows:

fire protection districts. Maintains “safety first” as the foundation for all aspects of fire management. The primary responsibility is to provide technical guidance, program development and review, and to plan, coordinate, and monitor the fire management program and operations using data from various sources. The requested source of funding is 100% Federal Funds or \$137,560 per biennium.

1517007 Supply Specialist 1: This Supply Specialist 1 position, salary range 14, maintains the maintenance warehouse supply and performs property accountability operations. The requested source of funding is 100% Federal Funds or \$112,289 per biennium.

1517008 Information Systems Specialist 4: This Information Systems Specialist 4 position, salary range 25, provides technical Systems Administration (SA) support, training, maintenance, and repair services to maintain Caretaker Agreement for information system requirements. It assists in the evaluation of information management requirements that integrate, implement, and supports complex improvements to existing communications and computer systems. It aids in planning information technology (IT) needs in coordination with Joint Base Lewis-McChord (JBLM), Oregon Military Department Installations Division (AGI-IT), and ORARNG Deputy Chief of Staff for Information Management (DCSIM) staff. The requested source of funding is 100% Federal Funds or \$158,772 per biennium.

1517009 Carpenter: This Carpenter position, salary range 22, performs all carpentry related functions. The requested source of funding is 100% Federal Funds or \$159,779 per biennium.

1517010 Electrician 2: This Electrician position, salary range 26, maintains the electrical distribution system consisting of transformers, switch cabinets, primary/secondary power lines, communications cable and electrical services. It also maintains control systems for heating, sewer, alarm and lighting. The requested source of funding is 100% Federal Funds or \$194,471 per biennium.

1517011, 1517012, 1517023 Facility Maintenance Specialist: These Facility Maintenance Specialist positions, salary range 18, perform semi-skilled work assisting journey level and skilled trades’ people in building maintenance and repair, roads and grounds maintenance and painting. The requested source of funding is 100% Federal Funds totaling \$377,988 for three positions.

1517013, 1517014 Grounds Maintenance Worker 2: These Grounds Maintenance Worker 2 positions, salary range 17, oversee the roads and grounds operations for turf management, landscape, pesticide, and equipment functions. The requested source of funding is 100% Federal Funds or \$224,578 per biennium for both positions.

1517015, 1517016 Wildland Fire Suppression Specialist: These Wildland Fire Suppression Specialist positions, salary range 17, perform a wide variety of manual tasks in the areas of forest fire prevention, pre-suppression, and fire suppression. They will serve as a member or engineer-operator for an engine or on a hand crew, and coordinate and/or perform physical labor necessary to suppress and extinguish wildfires. Their duties include

2015-2017

107BF02

BUDGET NARRATIVE

detection, pre-suppression, prevention, and suppression. They also complete routine building and ground maintenance. The requested source of funding is 100% Federal Funds or \$214,564 per biennium for both positions.

1517017 Maintenance & Operations Supervisor: This Maintenance & Operations Supervisor position, salary range 27 acts as a working foreman and supervises a combination of skilled, semi-skilled, and unskilled employees, typically in the building maintenance trades under the Caretaker Agreement at Umatilla Chemical Depot (UMCD). The requested source of funding is 100% Federal Funds or \$201,403 per biennium.

1517018 Plumber: This Plumber position, salary range 24, maintains the water distribution system, interior plumbing systems, operate and maintain the waste water treatment plant. The requested source of funding is 100% Federal Funds or \$179,598 per biennium.

1517019, 1517027 Natural Resource Specialist 1: These Natural Resource Specialist positions, salary range 21, manage and operate a wastewater management program and ensure the water treatment system (drinking water) is in compliance with regulatory requirements. These positions are subject matter experts on wastewater treatment systems, storm water management, and compliance with regulatory requirements. They track and assess wastewater streams throughout the depot; coordinate with other entities to obtain required operating or discharge permits; implement permit requirements and conditions; prepare required plans and reports; perform required studies/surveys to evaluate quality control, treatment processes, suitable alternatives, and best management practices. These positions maintain current knowledge of regulatory requirements for both wastewater and drinking water; wastewater and drinking water treatment technologies, current permit requirements, and other applicable information. They execute projects; monitor contractor performance; maintain appropriate records; provide technical assistance to others; prepare and conduct training; and frequently represent the installation at meetings with federal, state, and local regulatory agencies, National Guard Bureau, and other agency directorates and personnel. The employees are required to be experts in wastewater management processes and technology, and must be certified by Oregon Department of Environmental Quality for wastewater treatment plant operations: Treatment System Class 1 and Collection System Class 1. The requested source of funding is 100% Federal Funds or \$261,196 per biennium for both positions.

1517020 Office Specialist 2: This Office Specialist position, salary range 15, provides administrative support to the Caretaker Agreement Facility Manager at UMCD and affiliated staff of the section. The requested source of funding is 100% Federal Funds or \$102,779 per biennium.

1517021 Procurement & Contract Specialist 2: This Procurement & Contract Specialist 2 position, salary range 27, performs procurement and contracting functions at UMCD to support Caretaker Agreement Responsibilities. The position works in a team-setting with the Supervisor and other staff to initiate, process, and track contracting documents to facilitate operations of the Site. The position aids in developing and recommending solicitation methods for quotations, invitations to bid, or requests for proposals. This position reviews, tabulates, and recommends contract awards and addresses questions regarding contracts at UMCD. It assists in maintaining records on contracts and procurement transactions in compliance with agency policies. The position performs duties that locate sources of supplies, products, and services, and determines the most appropriate method of procurement. The requested source of funding is 100% Federal Funds or \$153,942 per biennium.

BUDGET NARRATIVE

1517022 Accounting Technician 2: This Accounting Technician position, salary range 17, performs accounting functions to meet requirements of the Caretaker Agreement. The requested source of funding is 100% Federal Funds or \$108,704 per biennium.

1517024 Principal Executive Manager/ D Facility Manager: This Principal Executive Manager/ D Facility Manager position, salary range 31X, serves as the depot Caretaker Agreement Facility Manager responsible for providing the depot with the everyday services outlined in the Statement of Work, which includes support for maintenance of facilities, equipment, utilities (electrical and propane) and grounds, security, safety, administrative support, environmental management and compliance, communications, purchasing, janitorial, postal services, security, surveillance, safety, building maintenance, and vehicle support when required, Wildland Fire Services, and Government Furnished Property and Services. The requested source of funding is 100% Federal Funds or \$209,757 per biennium.

1517025 Custodian: This Custodian position, salary range 10, provides janitorial services for UMCD Caretaker buildings as assigned. The requested source of funding is 100% Federal Funds or \$93,180 per biennium.

1517026 Laborer: This Laborer position, salary range 12, assists journey-level trade workers by doing a wide variety of routine and semi-skilled tasks requiring sustained physical effort and the use of power equipment and tools specific to the assignment. The requested source of funding is 100% Federal Funds or \$95,432 per biennium.

1517028 Natural Resource Specialist 2: This Natural Resource Specialist 2 position, salary range 24 serves as the Environmental Compliance Manager at the UMCD. It implements the National Environmental Policy Act (NEPA), as applicable, for actions and activities that are required under the Caretaker Agreement. As prescribed in policy, this position maintains, implements, and enforces cultural, historic, and archeological resource protection programs; coordinates with OMD Native American Tribal Consultation and “Government-to-Government Relations” efforts; complies with applicable environmental documents and natural and/or cultural resource management plans; complies with agency environmental protection regulations and guidance; assists in preparation of requests for resource protection permits; attends meetings with federal and state regulatory agencies, and other agency directorates and personnel as may be required. The requested source of funding is 100% Federal Funds or \$159,779 per biennium.

2. How Achieved - Expenditure limitation approval and appropriation of these positions will allow the Agency to meet its mission by providing operations support to meet the requirements of the Caretaker Intergovernmental Agreement (IGA) set forth by the U.S. Army. The remaining functional activities at Umatilla Chemical Depot (UMCD) will require sustainment over the next 3 to 5 year period.

3. Staffing Impact - Establish 23 Limited Duration positions. 23 Positions- 23.00 FTE.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017 **107BF02**

BUDGET NARRATIVE

4.-Quantifying Results – The results of this package will be quantified through successful accomplishment of the Caretaker Agreement performance work statement terms by each of the aforementioned positions. Further, by acting as the Caretaker, OMD will be able to look after our future interests and build further expertise with UMCD infrastructure, which will be crucial to planning the transition of the property from the Federal Government to the OMD.

5. Revenue Source - \$6,500,000 Federal Funds.

Governor recommended. Included in Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT OPERATIONS PROGRAM POLICY PACKAGE 801

1. Purpose– This Policy Package was added by the Legislature. It reduces General Fund services and supplies for the Operations Program by (\$18,558). It also fund shifts one Principal Executive Manager E position from 25% General Fund, 75% Federal Funds to 100% Federal Funds, for a reduction in General Fund Personal Services of (\$48,482). Both reductions were taken from the agency’s 10% reduction plan.

The (\$18,558) reduction in services and supplies will affect the Air National Guard Administration program, which supports the Director of Staff for the Oregon Air National Guard. The reduction will curtail purchases of office supplies, recognition awards and travel. This reduction would have a moderate operational impact to the program.

The position being fund-shifted to 100% Federal Funds is located in the Oregon Army National Guard Environmental Program, authorized by Appendix 2 of the Master Cooperative Agreement. The National Guard Bureau required a 25% state match on this position in until 2009, when 100% federal funding was authorized. The General Fund portion is no longer necessary. This reduction would have a minimal operational impact to this program.

2. How Achieved – Appropriation will be decreased by \$67,040.

3. Staffing Impact – Fund shift one position in the Operations Program.

4. Quantifying Results – The results of this policy package will have a minimal to moderate impact on the Operations Program.

5. Revenue Source – (\$67,040) General Fund, \$48,482 Federal Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT OPERATIONS PROGRAM POLICY PACKAGE 802

1. Purpose– This Policy Package was added by the Legislature. It adds \$940,800 General Fund and \$940,800 Federal Funds to the Installations Division to address two urgent issues at the Forest Grove Armory: 1) unsafe levels of lead contamination throughout the building from the indoor firing range and 2) failure of fire suppression pipes in the ceiling of the facility.

The Forest Grove Armory was closed in January 2015 after a National Guard Bureau survey revealed high levels of lead on surfaces in the building from the indoor firing range. The lead dust created when bullets were fired in the indoor firing range had spread throughout the facility via the ventilation system. The ventilation system had been designed such that an exhaust fan drew lead-contaminated air from the firing range and distributed it near the front door. Lead can cause a variety of health problems if ingested, such as memory loss, brain and kidney damage, and infertility. It is especially harmful to children, who can develop learning disorders, anemia and hearing problems. The Oregon Army National Guard unit stationed there was relocated to the Jackson Armory in northeast Portland, and all rental activity ceased. The Forest Grove Armory was OMD’s third and fourth highest rental revenue producing armory in the 2009-11 biennium 2011-13 biennium respectively.

The remaining 11 indoor firing ranges around the state have also been closed pending further testing and clean-up activities: Ashland, Bend, Coos Bay, Kliever (Portland), McMinnville, Pendleton, Roseburg, Anderson Readiness Center (Salem), Baker City, Ontario and Lane County. Fortunately, blood tests performed on soldiers and staff located at these armories have come back within normal ranges. All indoor firing ranges will be converted to other uses. These include installation of simulations equipment or conversion of the range for equipment storage, to meet the military unit’s highest need. Forest Grove had the most significant levels of lead and requires the most work; the remaining ranges are being cleaned in-house or, for Roseburg, as part of the Armory Service Life Extension Program.

In addition to lead contamination, the fire suppression pipes in the ceiling at the Forest Grove Armory have failed, causing numerous leaks throughout the building. The entire system needs to be replaced. Repair costs are estimated at \$1,881,600; \$302,400 of which would replace the fire suppression pipes, and \$1,579,200 would abate the lead, replace the HVAC ductwork and convert the firing range to storage space. The building is a standard armory funded 50% with federal funds and 50% with state funds.

2. How Achieved – General Fund appropriation and increased Federal Funds limitation will enable appropriate repairs of the Forest Grove Armory and allow it to reopen to the National Guard unit and the public.

3. Staffing Impact – None.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

4. Quantifying Results – The results of this policy package will be quantified with favorable lead test results and construction inspection reports following construction and remediation work.

4. Revenue Source – \$940,800 General Fund, \$940,800 Federal Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OPERATIONS PROGRAM
POLICY PACKAGE 803

1. Purpose– This Policy Package was added by the Legislature. It phases-out all positions and Federal Funds limitation in the Readiness Sustainment Maintenance Site (RSMS) program, which shut down effective November 30, 2014. From 1994 to 2014, this program refurbished National Guard military equipment such as trucks, trailers, generators, chemical alarms and night vision goggles, saving the Department of Defense significant costs by refurbishing rather than replacing equipment. The RSMS program was 100% federally funded through a cooperative agreement with the National Guard Bureau and was located at Camp Withycombe in Clackamas. The Oregon program was one of five nationally. At its highest staffing levels in 2011 the program had 91 state positions.

With the recent drawdown in National Guard troops in the Middle East, the amount of equipment needing refurbishment decreased significantly. In September 2014 the National Guard Bureau decided to close all five RSMS sites in the United States. Sixty-two positions are abolished, and \$30,927,771 Federal Funds limitation is eliminated in this policy package.

2. How Achieved – Phase out all positions and limitation belonging to the Readiness Sustainment Readiness Site.

3. Staffing Impact – Abolish 62 positions – 62.00 FTE.

4. Quantifying Results –Not applicable.

5. Revenue Source – (\$30,927,771) Federal Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT OPERATIONS PROGRAM POLICY PACKAGE 840

1. Purpose– This Policy Package was added by the Legislature in SB 5507. It establishes three permanent full-time positions for the Portland Air National Guard (PANG) base operating under the Facilities and Maintenance Operations and Maintenance (FOMA) cooperative agreement. These are three of eight positions eliminated from PANG in 2011 budget cuts, and re-established as Limited Duration positions in the 2013-15 biennium.

The restored positions will maintain liquid jet fuel receiving, storage, and distribution for all 21 F-15 fighter jets at PANG; maintain pesticide and herbicide certifications to keep grassy areas in compliance with Port of Portland mandated wildlife standards to deter birds from the airfield; and maintain HVAC systems for climate control of critical communications equipment and fire alarm systems at the base.

Lastly, this policy package reduces the estimated Attorney General Fees and Department of Administrative Services Motor Pool costs by \$4,944 General Fund and \$3,276 Federal Funds.

Position #	Title	Classification	Type	GF	OF	FF
0014021	Facility Maintenance Specialist	AU C4012	Establish	\$27,512		\$110,048
0014024	Electrician 2 (HVAC)	AU C4008	Establish	38,894		155,577
0014027	Grounds Maintenance Worker 2	AU C4110	Establish	23,157		92,628
Total Personal Services				89,563		358,252
Services and Supplies (Attorney General, DAS Motor Pool)				(4,944)		(3,276)
Grand Total, Policy Package 840				\$84,619		\$354,977

2. How Achieved – The establishment of three positions will enable the Portland Air National Guard base to maintain critical HVAC systems, protect the F-15 jets from birds in the airfield, and ensure the liquid jet fuel system is operating effectively.

3. Staffing Impact – Establish 3 positions – 3.00 FTE.

4. Quantifying Results – The results of this package can be quantified by operational reviews performed by the Department of Defense.

Oregon Military Department – Office of Emergency Management – Executive Summary

Primary Outcome Area: Safety
 Secondary Outcome Area: Economy and Jobs
 Program Contact: Dave Stuckey, OMD Deputy Director (503) 584-3884

Program Overview

The Office of Emergency Management (OEM) coordinates statewide emergency services and maintains emergency communications systems used for public warnings, emergency notifications, and emergency support. OEM also provides cities, counties, and tribes throughout Oregon with planning, training, exercise and technical assistance as it relates to disaster preparedness, emergency response, recovery services, and hazard mitigation.

Agency Request
 Governor’s Budget
 X Legislatively Adopted

2015-2017

Program Funding Request

The Legislatively Adopted Budget (LAB) for the Office of Emergency Management within the Oregon Military Department includes expenditure authority of \$1,855,221 General Fund, \$89,099,316 Other Funds, and \$161,857,041 Federal Funds. The LAB includes 42 positions and 42.62 FTE for the 2015-17 Biennium.

This budget helps ensure a well-functioning Office of Emergency Management exists for the citizens of Oregon. A well-functioning OEM is critical to the success of the Governor's Safety Strategy as it relates to emergency preparedness, emergency response, disaster mitigation and 9-1-1 call taking activities. The impact of OEM to the citizens of Oregon is tremendous and will only increase as situations like the earthquake in Japan occur off Oregon's shores.

An additional benefit provided by OEM is the ability to leverage federal resources. The Emergency Management Performance Grant (EMPG), which is a primary funding tool for OEM, requires a 50% non-federal match. Each year excess federal funds are left on the table due to lack of state investment. The request for investment made by this budget would result in these federal funds being brought to Oregon for use in enhancing our emergency response efforts.

Program Description

The Office of Emergency Management encompasses four program areas: Administration, Plans and Training, Technology and Response and Mitigation and Recovery.

1. The Administration Program oversees the strengthening of Oregon's overall emergency preparedness by coordinating and providing intra-governmental, non-governmental, and private sector partners with the opportunities to collaborate on specific patterns of preparatory actions. The result of these efforts lead to planned, coordinated, and cooperative responses to natural and man-made disasters, which is the goal of the Executive and Legislative branches of government.
2. The Plans and Training Program (PTP) executes planning, training, and exercise programs with the goal of raising awareness. This increase in awareness leads to better statewide preparedness for all hazard incidents. The PTP also provides daily customer service to state and local agencies regarding Homeland Security Grant Programs, Emergency Operations Plans, Geological Hazard Programs, the National Incident Management System (NIMS), Training and Exercise Teams, Citizen Corp Program and the State Emergency Coordination Center.
3. The Technology and Response Program (TRP) is responsible for the seamless operation of the statewide Enhanced 9-1-1 system. This includes the responsibility for the continual coordination and management of the network necessary to deliver 9-1-1 calls to Public Safety Answering Points across the state. The TRP oversees the state Search and Rescue program which coordinates local search and rescue efforts with the National Guard, Coast Guard and the Civil Air Patrol. Finally the TRP coordinates with the Oregon State Police to manage the Oregon Emergency Response System (OERS).

Agency Request Governor's Budget Legislatively Adopted

2015-2017

4. The Mitigation and Recovery Program (MRP) leads the coordination among state, local, and federal agencies in the development, planning, and adoption of local community hazard mitigation plans. The MRP accomplishes this by administering multiple Department of Homeland Security programs including the Pre-Disaster Mitigation Program, the Flood Mitigation Assistance Program, the Severe Repetitive Flood Program, the Hazard Mitigation Grant Program, and the Robert T. Stafford Disaster Relief Fund (which encompasses Public Assistance and Individual Assistance for disaster recovery). Additionally the MRP leads the coordination of the Emergency Management Performance Grant which provides financial support for the day to day operations of county, city and tribal Emergency Managers. The MRP also leads efforts surrounding post disaster recovery activities as they relate to the Robert T. Stafford Disaster Relief Fund.

The major cost drivers associated with the OEM program include Personal Service costs. While increased costs are an issue, planned reductions in Homeland Security Grant Funds is a key issue affecting OEM. Oregon’s share of Homeland Security Grant funds fell by 32% from \$5,137,205 to \$3,459,364 between 2011 and 2013. Without an alternative means of financing, the identified reduction in federal support will impact the future ability of OEM to retain key program and grant administrative staff in coming years.

To accomplish its complex mission OEM heavily utilizes partnerships between federal, state, and local agencies as well as volunteer groups.

The Administration Program partners with state agencies, cities and counties to coordinate a holistic approach to emergency management. This approach includes helping create awareness, response, mitigation and recovery processes. The Plans and Training Program (PTP) partners with state agencies to administer the Oregon Emergency Response System Council. These partners also man the state Emergency Coordination Center during natural and human-made disasters. These partnerships help provide emergency support functions to determine the resources or assets needed to meet the needs of impacted areas. OEM has partnerships with all state agencies when responding to emergency situations.

The Technology and Response Program (TRP) partners with the 43 Public Safety Answering Points (PSAPs) around the state to ensure seamless operation of the 9-1-1 system. The TRP meets quarterly with members of the PSAP community to discuss new technologies, operational improvements and program requirements. The TRP also partners with the Amateur Radio Unit (ARU) during times of emergency. The ARU is staffed by volunteers and acts as a backup/alternative system for statewide communication when traditional means of communication have broken down.

The Mitigation and Recovery Program (MRP) works with local jurisdictions and state agencies to plan strategies for the mitigation of hazards across the state. The MRP also partners with the Federal Emergency Management Agency (FEMA) in effectively leveraging federal resources.

Opportunities to improve performance through alternative delivery methods: The creation of regional Emergency Management Teams is a strategy which would lead to more effective and coordinated response and recovery efforts across the state. An additional strategy would be to begin

Agency Request
 Governor’s Budget
 X
 Legislatively Adopted
2015-2017

incorporating mitigation practices during the development stages of construction and industrial expansion. It has been shown that mitigation is one of the most effective mechanisms for building disaster resilient communities.

Program Justification and Link to 10-Year Outcome

The mission of the Office of Emergency Management (OEM) is to support the safety and security of the citizens of Oregon. This mission goes hand in hand with the Governor’s goal of all “Oregonians will be safe where they live, work and play”. OEM accomplishes this mission through effective partnership development, planning and training, mitigation actions, educational outreach, research and development and leveraging of resources. The partnerships between OEM and the vast array of federal, state, and local agencies as well as public organizations tie directly to Strategy 3.3 which calls for the “coordination among state, local and federal agency efforts for emergency preparedness, response, recovery and hazard mitigation”.

The Safety Policy document says “Oregonians expect guidance, standards and information regarding prudent investments and mitigation strategies that reduce their vulnerability to natural and human-made disasters”. OEM provides this guidance through effective statewide leadership on disaster awareness, preparedness, mitigation, and response and recovery. This leadership helps ensure communities have prepared and planned for disasters and the corresponding recovery efforts which follow (Strategy 3.3). These planning actions help improve the resiliency of Oregon to the long term impacts of natural and human-made disasters (Strategy 3.3).

OEM is continually working to improve the services and materials needed to help educate communities. OEM has distributed thousands of brochures on hazard preparedness, especially as it relates to earthquakes. OEM also utilizes social media (Twitter and Facebook) to share the message of preparedness, as well as for disseminating real time information during a disaster (Strategy 3.2). Effective statewide communication is an integral part of the operations within OEM.

A major communication project underway within OEM is the development of the Next Generation 9-1-1 system. The development of this system will help coordinate shared public safety data and real time communication systems with the goal of increasing the capability and responsiveness of all public services. This project has a direct nexus with Strategy 3.2 which calls for “an effective and efficient 9-1-1 emergency response system that seamlessly integrates the most current technology”. In addition to Next Generation 9-1-1 OEM is working to improve the Oregon Emergency Response System (OERS). The improvements are focused on enhancing the communication and coordination between government agencies for responding to hazard incidents across the state (Strategy 3.2).

It is important to realize the work done by OEM impacts policy areas outside of safety. Having effective mitigation and disaster recovery plans in place along with proactive educational outreach helps improve the resiliency of Oregon’s economy (Strategy 1B). The work performed by OEM and its partnership with the federal government helps bring millions of dollars to Oregon to help improve public infrastructure and facilities as well as removing homes from flood zones. The result is less damage and injuries during future events and a quicker economic recovery to impacted areas.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

Program Performance

To date the Office of Emergency Management (OEM) has provided funding to 36 counties to help finance emergency management programs. Currently 100% of Oregon counties have a formal written Emergency Operations Plan on file with OEM. Our goal is continue to have 100% of counties with a plan on file with the office. Through the Emergency Communications Account all 43 Public Safety Answering Points (PSAPs) are able to maintain/upgrade 9-1-1 call taking equipment. Currently 80% of Oregon's population is covered by a FEMA approved hazard mitigation plan. This has resulted in several mitigation projects being approved for funding through the Pre-Disaster Mitigation Program.

Enabling Legislation/Program Authorization

The Office of Emergency Management (OEM) is a division of the Oregon Military Department which is authorized under Article X of the Oregon State Constitution. OEM is further authorized by Oregon Revised Statutes 401.052, 403.120 and 404.100. Federal program authority is authorized by Department of Homeland Security 44 CFR.

Funding Streams

The program is funded with General Fund (2%), Other Funds (35%) and Federal Funds (63%). The Other Funds include dedicated Emergency Communication Tax Revenue which is collected from any device capable of reaching the 9-1-1 system. Pre-paid telephones were added to taxable devices with HB 4055 (February 2014 legislative session), which applies to retail transactions beginning October 1, 2015. The Federal Funds carry match requirements of zero to 50 percent, are dedicated, and come primarily from the Department of Homeland Security.

Significant Proposed Program Changes from 2013-15

The proposed budget for the Office of Emergency Management is an enhancement over the program's Current Service Level budget. The Technology and Response Program is currently planning for the implementation of Next Generation 9-1-1 (NG9-1-1); this project, once completed, will allow technology such as text, video and photos to be received at a PSAP. NG 9-1-1 is new to the industry and is a nationwide initiative. OMD is requesting 10 new positions in Policy Package 301 to assist with the NG 9-1-1 project. To stay within the statutory limit of 4% of the Emergency Communications Account for administrative costs, a fund shift of existing staff from Other Funds to General Fund is requested in Policy Package 302. **The Legislature modified Policy Package 301 to provide \$500,000 Other Funds limitation for the conversion of the existing frame relay system to an Internet Protocol broadband network. Policy Package 302 was not approved by the Legislature.**

Policy Package 303 establishes two Program Analyst 2 positions to help manage projects and provide direct, tailored, technical assistance to city, county and tribal governments as it relates to Oregon's Hazard Mitigation Program. These positions are critical to Oregon regaining "Enhanced Status" for the *Oregon Natural Hazards Mitigation Plan*, which allows the state to be eligible to receive additional federal funding in the aftermath of a federally

_____ Agency Request _____ Governor's Budget X Legislatively Adopted
2015-2017

declared disaster. This is a significant incentive as it could result in millions of additional dollars coming to Oregon in the aftermath of a devastating event such as the Cascadia Subduction Zone earthquake. **Policy Package 303 was not approved by the Legislature.**

The last enhancement to the Current Service Level is Policy Package 304, which requests two Program Analyst 2 positions to develop the state's capacity to adequately plan and prepare for the legislative responsibility to respond to natural and manmade incidents as well as develop and coordinate critical infrastructure and key resource preparedness activities throughout the state. One position would lead and support state, tribal and local government with planning, training and exercises to enhance and further develop the state's Emergency Coordination Center (ECC). It would improve OEM operational plans, training, and exercises to assist and coordinate the actions of state, local and federal agencies, non-governmental organizations (NGOs), and local subject matter experts throughout Oregon to facilitate resource requests, situation awareness, and emergency communications. The second position would write and maintain the state Infrastructure Protection Plan, Critical Infrastructure and Key Resources (CI/KR) plan, and annexes. This position directs and coordinates with other state agencies in the development of their plans and responsibilities as outlined in the Oregon Infrastructure Protection Plan (OIPP); and ensure local government critical infrastructure plans are developed and kept current and in compliance with all applicable federal and state policy guidance. **Policy Package 304 was not approved by the Legislature.**

Agency Request Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT OFFICE OF EMERGENCY MANAGEMENT PROGRAM

The purpose of the Office of Emergency Management Program (OEM) is to coordinate, collaborate, maintain, and expand the Governor’s statewide emergency services system. This system is intended to facilitate, organize, resource, and manage a methodology in support of Oregon citizens and visitors to the state for both pre-event and post-event activities. This also supports the State’s ability to mitigate against, prepare for, respond to, and recover from a disaster. This entire effort is about strengthening Oregon’s overall preparedness. Preparedness is both a process and an effect. As a process it guides the Office of Emergency Management to provide intra-governmental, non-governmental, and private sector partners with the opportunities to collaborate on specific patterns of preparatory actions. The effect is that all state agencies’ responsibility to provide a service during or following a disaster do so in a planned, coordinated, and cooperative manner. The expectation expressed by the Governor and the Legislature is that the Office of Emergency Management is to initiate the coordination and provide leadership for all actions necessary to accomplish this mission.

Office of Emergency Management Administration:

OEM Administration is primarily funded by, and oversees the actions of, the Emergency Management Performance Grant Program (EMPG) which acts as the foundation of the state’s “All-Hazards” approach to disaster preparedness. EMPG funding comes to the Office of Emergency Management from the U.S. Department of Homeland Security (DHS) through the Federal Emergency Management Agency (FEMA). The purpose of the EMPG is to give state and local jurisdictions greater flexibility in determining an effective and tailored emergency management organization at the state and local level. The Emergency Management Performance Grant is the single federal funding source that specifically provides for personnel and day to day costs for state and local emergency management programs. The EMPG program requires a non-federal match of 50% at both the state and local level. OEM currently has 34 counties that participate in the program, two Tribal Nations, the Confederated Tribes of Grand Ronde, and the Confederated Tribes of Warm Springs, as well as six of Oregon’s largest cities, Portland, Beaverton, Gresham, Hillsboro, Salem and Eugene EMPG funds also support the state’s mitigation plans and projects, as well as natural hazard programs, including the State’s Earthquake/Tsunami and Volcanic Hazards programs. The Administration program supports the preparation of hazard analysis/vulnerability risk documents that local governments complete in order to understand which hazards they are most at risk for, and to plan accordingly to reduce that risk. The Administration program also focuses on coordination and planning activities among state agencies and links local jurisdictions in this effort. The identification of areas of deficiency support prioritization of limited resources and serves as the basis for determining processes that optimize those resources. The Administration program is also responsible for the day to day management of OEM. The OEM Director and Deputy Director work within this program area to provide guidance and direction regarding the future actions of the Office. Enterprise wide strategic planning is also directed through this program area, as is development of the Public Private Partnership Program.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

State 9-1-1:

The mission of the state 9-1-1 program is to ensure the seamless operation of the statewide Enhanced 9-1-1 system. The program is responsible for the continual coordination and management of the network necessary to deliver 9-1-1 calls, the customer premise equipment (CPE) used by the Public Safety Answering Points (PSAP) to process those calls, as well as consulting and assisting local governments with the challenges faced in the delivery of and participation in the statewide enhanced 9-1-1 emergency reporting system

The OEM 9-1-1 Program continues to upgrade and maintain the statewide E9-1-1 system for the delivery of 9-1-1 calls for service. We support the network and equipment maintenance and upgrades as necessary to sustain the current level of operations at every Public Safety Answering Point (PSAP) in Oregon. The State 9-1-1 Program is currently planning for the implementation of Next Generation 9-1-1 (NG9-1-1); this project, once completed, will allow technology such as text, video and photos to be received at a PSAP. NG 9-1-1 is new to the industry and is a nationwide initiative. Oregon's statewide initiative is vital to our citizens and it will fulfill public expectation. The NG 9-1-1 project will require extensive planning, testing and a complete upgrade to Oregon's current E9-1-1 network. NG9-1-1 will create a significant impact on PSAP personnel and will increase the amount of data being sent to the PSAP; this will require extensive standards and security protocols to protect Oregon's E9-1-1 network. In order to implement a successful statewide IT project of this magnitude, OEM will need to increase staffing to include ten (10) new 9-1-1 staff.

OMD / OEM State 9-1-1 Program is working closely with the Department of Administrative Services Chief Information Office (DAS CIO) and the Legislative Fiscal Office (LFO) to finalize the completion of foundational project management documents including a comprehensive business case, supporting the NG 9-1-1 initiative. In addition OEM / OEM continue to work with Oregon Department of Revenue to ensure that new technologies subject to the 9-1-1 tax are being researched and when appropriate collected. We continue to include the Public Utility Commission (PUC) in such discussion to ensure advanced coordination on all regulatory matters relating to telecommunications that impact 9-1-1 in Oregon.

The 9-1-1 Program continues to work with the public safety community, local governments, state partners, the Federal Communications Commission (FCC) and other national organizations to plan for the capability of answering a 9-1-1 call for help from any device, anywhere, anytime.

Domestic Preparedness:

The Domestic Preparedness Program receives Federal U.S. Department of Homeland Security Program Grant Funding to execute the programmatic functions of Oregon's Homeland Security Planning, Organization, Equipment, Training, and Exercise (POETE) Programs.

_____ Agency Request _____ Governor's Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

Oregon uses the funding very effectively to raise the awareness of the terrorist threat and catastrophic incidents and to increase the overall state preparedness for all hazards. The grant funds, for the past fourteen years, have been critical in assisting state agencies and local government entities at all levels in developing terrorism plans and annexes, conducting domestic preparedness training and exercise activities, and to acquire equipment to support these functions.

OEM's planning, training, and exercise programs provide preparedness and recovery training to local emergency managers, first responders, local elected and appointed officials, and state officials with direct and indirect emergency management authority and responsibilities. In addition, a wide variety of equipment is also provided under these grants to enhance first responder and emergency management professional capabilities in reducing the impact to life and safety, property, and the environment. Instituting the programs under these grants has provided a commonality in equipment, planning and training among state, local and non-governmental agencies. The results are well prepared emergency management organizations at all levels.

The foundation for conducting training and exercising is the development of plans and procedures for all hazards that are a potential and probable threat to Oregonians. This includes terrorism and catastrophic incident preparedness, response, and recovery activities. Conducting these programs incorporates the familiarization and orientation of state and local officials to federal and state laws, regulations, and policies that ensure eligibility for funding and other state and federal assistance during the times of disaster and during recovery and restoration following an event of national significance.

Disasters:

Since February of 1996, the State of Oregon has experienced natural disaster activity severe enough to warrant a Presidential Disaster Declaration on 15 separate severe weather events, and one Emergency Declaration for the Hurricane Katrina evacuees. These major disasters have included flooding, landslides, hurricane force wind events, as well as severe winter storm activity. Under a mandate from Congress to FEMA, emphasis has been added to expedite the expenditure and closure of old declared disasters. The December 2007 storm event was the third largest disaster in Oregon, following the 1996 flood event, and the 1962 Columbus Day Storm. These disasters have resulted in federal disaster relief excess of \$183 million to public entities throughout Oregon. In addition to Public Assistance to public entities, hazard mitigation grant funds have accompanied these disasters. The intended use of these funds is to reduce the effects of future events in Oregon.

Oregon's cities and counties continue to undertake developing, updating expiring, and adopting local community hazard mitigation plans. Through FEMA's Flood Mitigation Assistance Program, federal dollars are available to assist local jurisdictions with flood mitigation planning and flood mitigation projects. The Office of Emergency Management works with other state agencies, such as Department of Land Conservation and Development, to identify project implementation opportunities in order to achieve the greatest impact with the least amount of resources. Counties and cities with repetitive flood losses receive highest priority for consideration of grant funding and technical assistance to develop

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

hazard mitigation plans and funding which are approved by FEMA in order to be eligible for future grant funding for hazard mitigation projects. In 2014, nearly all Oregon counties have mitigation plans that are either current or are being updated to meet current requirements. Most of Oregon's larger cities also have mitigation plans; in fact, about 80% of Oregon's population is covered by a FEMA-approved hazard mitigation plan. This has resulted in a large number of mitigation projects that have been selected for funding from the pre-disaster mitigation program, which is a competitive federal program. Hazard mitigation staff is currently working with the University of Oregon, Oregon Partnership for Disaster Resilience, to provide technical assistance to both cities and counties in support of their local hazard mitigation planning needs. In addition, the Oregon University System has completed demonstration projects using PDM grant funding to seismically retrofit both dormitory and other university buildings. The successful implementation of projects on the PSU, OIT, WOU and OSU campuses in partnership with the Department of Geology and Mineral Industries helped lay the groundwork for the state's Seismic Rehabilitation Grant Program.

Hazard Mitigation Grant Program (HMGP) Funds accompany Major Disaster Declarations. Since 1996, Oregon has spent HMGP funds throughout the state on mitigation planning and projects. These funds total over \$38 million dollars and include HMGP funding as a result of the December 2007, the December 2008, the January 2012, and the February 2014 storm events.

Incorporating mitigation into codes and ordinances prior to new development is one of the most effective forms of hazard reduction and the keystone in building disaster resistant and resilient communities. FEMA's emphasis on pre-disaster mitigation encourages local communities to become "disaster resistant communities" by involving local volunteers, business and industry to promote mitigation measures, public education and an awareness of the hazards that a community may face, as well as developing incentive programs that encourage citizens and the business community to participate in available mitigation and preparedness programs. For example, the FireFree Program in Deschutes County brings together fuels reduction activities to create defensible spaces, codes and standards, first responder access, public awareness and other measures that reduce the impact of wildfires.

Expected Results from the 2015-2017 Budget:

The Oregon Military Department is home to the Oregon Army and Air National Guard, who aside from their recent prominent roles in the deployments to Afghanistan and Iraq, have played a critical role in preparing for and responding to natural disasters here in Oregon.

The Office of Emergency Management, likewise, has its central role, assisting local governments and state government to prevent, mitigate, prepare for, respond and recover from natural and man-made disasters.

OEM's 2015-2017 budget is seeking to expand the capability of the organization in multiple facets. This budget is also requesting much needed resources to help the organization fix operational shortfalls identified by both internal and external parties. One of the major priorities of the 2015-17 budget is to begin the statewide transition to Next Generation 9-1-1 Technologies. In order for this transition to be successful the Office of

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Emergency Management is proposing the creation of 10 new positions within the State 9-1-1 Program. These positions will work under the guidance of the ISS 8 Project Manager position which was approved by the 2013 Legislature. The mission of these positions is to work to craft the processes and policies needed to transition Oregon from an antiquated analog system to a modern technology with the capabilities to receive text messages, and videos from callers. These positions will be responsible for working with the Department of Administrative Services and the Legislative Fiscal Office to ensure the transition to this new technology is done in a seamless and efficient manner. These positions will work with contracted vendors in the development of the physical network which will replace the current system. In addition, these positions will coordinate outreach and education to the 43 Public Safety Answering Points (PSAP's) responsible for taking and dispatching 9-1-1 calls statewide, and who will be the functional users of this new system. This outreach will include discussions regarding equipment replacements, training, public messaging and expectation management, and cost implications. Further information is available in the Next Generation 9-1-1 Business Case and in Policy Package 301.

In order for OEM to be able to create the positions needed to transition the state to Next Generation 9-1-1 Technology, administrative financing needs to be made available. Currently all administrative costs associated with 9-1-1 are borne by the 4% administrative cap authorized by ORS 403.235. Past legislative actions to offset diminishing General Fund resources have caused OEM to increase costs charged against the 4% administrative cap. OEM is proposing a fund shift for nine positions, as well as services and supplies, which would increase General Fund appropriation and free necessary administrative financing for the 10 positions being requested in Policy Package 301. This proposal would provide the nine positions with an appropriate source of non-federal funding to be used as match for the Emergency Management Performance Grant.

OEM is also proposing two policy packages which seek to increase staff for mitigation and planning actions. OEM is working to regain Enhanced Status for the State Natural Hazard Mitigation Plan due to the increased levels of federal funding which an enhanced state is eligible to receive in the aftermath of federal disaster declaration. In order to regain this status OEM needs to improve its overall grants administration capabilities, especially with regards to performing proactive environmental and historical reviews of proposed mitigation projects. OEM is seeking two positions which will focus on hazard mitigation planning and project review with the explicit goal of improving the state's overall performance. OEM believes these positions will demonstrate to FEMA that Oregon is fully committed to mitigation planning and sound grant administration. This demonstrated commitment should assist FEMA with their decision regarding reinstating enhanced status. Additionally, regaining enhanced status will allow OEM to rectify a finding made by the Secretary of State during the 2013 Performance Audit of OEM.

The policy package is designed to develop the state's capacity to adequately plan and prepare for the legislative responsibility to respond to natural and manmade incidents as well as develop and coordinate critical infrastructure and key resource preparedness activities throughout the state. This proposal will provide technical and expert assistance to state, tribal, county, and city emergency management personnel in the planning, training, and implementing and execution of federal and state initiatives and requirements. Additionally, these positions will ensure the state's

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

threat and risk profile are accurate and coordinated with the federal government which influences preparedness grants and funding allocations. These positions will provide support throughout the state. The primary purpose will be to enhance the overall capabilities of state, tribal, county and city emergency management programs through comprehensive planning, training and program analysis.

Events of the past several years have shown that Oregon is prone to many natural hazard events, from wildfires, to floods, hurricane force winds and severe winter storms. Also, the state faces the catastrophic hazard of a Cascadia Subduction Zone Earthquake and Tsunami, which will result in destruction of entire portions of the Oregon Coast. OEM's current capacity is limited due to a shortage of staff and resources. The Emergency Management Performance Grant, which use to fund a majority of the division's employees, now only funds 36% of the staff, primarily due to lack of General Fund match monies. Additionally, since most OEM employees are funded by federally funded programs (even those that require GF match), they must work under the requirements of that grant program, which limits the flexibility the state has in prioritizing its needs in its preparedness programs. Staff members in the 9-1-1 program are funded from a dedicated funding source, which is not available on a day-to-day basis to concentrate on other agency programs. As many local governments suffer the loss of revenues and an economic downturn, the increasing requests made to OEM to provide technical assistance and other resources to assist with training, exercise and other events, strains the agency's capacity to deal with the requests while continuing to meet the basic needs of the state's program.

Revenue Sources:

Other Funds

9-1-1 Emergency Telephone- 9-1-1 Tax - Other funds received from the Department of Revenue from a .75/per device tax that is charged on all telephone lines (including cellular devices).

Department of Aviation- Other Funds are used to support the air search and rescue program and are matched with federal funding available through the Emergency Management Performance Grant.

Federal Funds

Emergency Management Performance Grant funds (administered by FEMA) may be used for necessary and essential expenses involved in the development, maintenance, and improvement of state, tribal and local emergency management programs. The grant is designed to give states more flexibility in deciding how to best use federal dollars to meet state specific needs. Local jurisdictions (34 counties, 6 cities, 2 Tribal Nations) also receive grant funding which is required to provide a 50% cash match to participate in the program.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Homeland Security Grant Program- Includes pass-through funding to statewide local and tribal jurisdictions to enhance and or develop capabilities in planning, organization, equipment, training, and exercises within the national core capabilities to address the threat and risk of terrorism and catastrophic incidents. This money also includes funding to support Citizens preparedness and Community Emergency Response Team (CERT) programs and the Non-Profit Security Grant Program. The Program also makes money available to the Portland Regional Area under the Urban Area Security Initiative Program. Regional agencies in Portland and the surrounding counties work together on projects and investments designed to improve the area's preparedness for a domestic preparedness event. These funds serve a dual purpose in that most projects also have a benefit in the area of natural hazards preparedness. One time grants from DHS for specific needs also come through Oregon as the State's Administrative Agency (SAA). For example, during the 2007-2009 biennium, the Public Safety Interoperability Communications Grant (PSIC), a \$12 million grant for interoperable communications, was also made available to Oregon and its local jurisdictions. It is also anticipated that funding for Emergency Coordination Centers nationwide has been and will continue to be made available through the existing grant channels.

FEMA's Public Assistance and Hazard Mitigation Grant Programs. The Public Assistance Program pays for the repair/restoration of damaged public infrastructure in the event that the President declares a Major Disaster/Emergency. The Hazard Mitigation Grant Program pays for mitigation efforts after a Presidential declaration by providing 15% of all overall FEMA recovery costs to the State for mitigation projects. The majority of this funding is pass-through Federal Funding. Because this funding is unknown in advance of a disaster, OEM carries empty limitation as part of its budget so that funding is not slowed in the event of a Presidential disaster declaration.

FEMA's Pre-Disaster Mitigation Grant Program (PDM) and Flood Mitigation Assistance (FMA) Program. PDM is a nationally competitive grant program available to communities who have FEMA approved natural hazard mitigation plans. PDM funds can be used for both planning efforts and project implementation. Projects must be identified as a priority in the jurisdictions' local natural hazard mitigation plan. FMA Grants are made available yearly on a nationally competitive basis, and are geared toward repetitive flood loss properties insured through the National Flood Insurance Program. Oregon works closely with the Department of Land Conservation and Development on projects selected for funding under the FMA Program.

Essential Packages:

010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package decreases General Fund (\$23,456), increases Other Funds \$17,256, and decreases Federal Funds (\$43,217).

022 - Phases out (\$5,230) General Fund and (\$7,299,876) Other Funds for the Seismic Rehabilitation Program. This program was transferred to the Oregon Business Development Department effective January 1, 2014 with 2013 SB 813. Six months of General Fund and Other Funds limitation

_____ Agency Request _____ Governor's Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

(sourced with Article XI-M and XI-N bonds) was left in the Oregon Military Department to cover the period from July 1, 2013 through December 31, 2013. Essential Package 022 removes the remaining funding from the 2015-17 Current Service Level.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases General Fund \$85,453, increases Other Funds \$3,391,023 and increases Federal Funds \$4,598,616.

032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases General Fund by \$7, Other Funds by \$6,369 and Federal Funds by \$2,692.

050 – Fund shifts \$433,103 from Other Funds into General Fund: 50% funding on three positions at \$302,247 and Services and Supplies at \$130,856. As part of General Fund reductions in the 2013-15 Legislatively Adopted Budget, Policy Package 813 approved a one-time fund shift from General Fund into Other Funds for three positions in OEM and one position in the Administration Program. Essential Package 050 reverses this one-time fund shift.

Policy Packages:

090 – Reduces General Fund Services and Supplies by (\$87,722). **Added by Governor; included in Governor’s Budget. Not approved by the Legislature (see Policy Package 801 below).**

301 – Statewide Next Generation 9-1-1 Implementation - \$1,753,121 Other Funds. **Modified by the Governor to provide \$500,000 Other Funds limitation for the Department of Administrative Services to coordinate the conversion of the existing frame relay system to an internet protocol broadband network. Approved by Legislature at \$500,000 Other Funds.**

302 – Next Generation 9-1-1 Fund Shift - \$1,074,289 General Fund, (\$1,157,439) Other Funds, \$83,150 Federal Funds. **Governor did not recommend; not included in the Legislatively Adopted Budget.**

303 – Hazard Mitigation Support - \$169,539 General Fund, \$168,944 Federal Funds. **Governor did not recommend; not included in the Legislatively Adopted Budget.**

304 – Planning and CIKR Support - \$169,539 General Fund, \$168,944 Federal Funds. **Governor did not recommend; not included in the Legislatively Adopted Budget.**

801 – LFO Analyst Adjustments – (\$376,534) General Fund, (\$93,284) Federal Funds. **Added by the Legislature.**

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT OFFICE OF EMERGENCY MANAGEMENT ESSENTIAL PACKAGES

- Purpose** – Essential Packages adjust the base budget to reflect the agency 2015-17 current service level requirements.
- How Achieved** – The following Essential Packages adjust the Office of Emergency Management’s base budget to reflect 2015-17 current service level requirements:
 - 010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package decreases General Fund (\$23,456), increases Other Funds \$17,256, and decreases Federal Funds (\$43,217).
 - 022 - Phases out (\$5,230) General Fund and (\$7,299,876) Other Funds for the Seismic Rehabilitation Program. This program was transferred to the Oregon Business Development Department effective January 1, 2014 with 2013 SB 813. Six months of General Fund and Other Funds limitation (sourced with Article XI-M and XI-N bonds) was left in the Oregon Military Department to cover the period from July 1, 2013 through December 31, 2013. Essential Package 022 removes the remaining funding from the 2015-17 Current Service Level;
 - 031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases General Fund \$85,453, increases Other Funds \$3,391,023 and increases Federal Funds \$4,598,616.
 - 032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases General Fund by \$7, Other Funds by \$6,369 and Federal Funds by \$2,692.
 - 050 – Fund shifts \$433,103 from Other Funds into General Fund: 50% funding on three positions at \$302,247 and Services and Supplies at \$130,856. As part of General Fund reductions in the 2013-15 Legislatively Adopted Budget, Policy Package 813 approved a one-time fund shift from General Fund into Other Funds for three positions in OEM and one position in the Administration Program. Essential Package 050 reverses this one-time fund shift.
- Staffing Impact** – None.
- Revenue Source** – General Fund is increased \$489,877, Other Funds is decreased (\$4,318,331), and Federal Funds is increased \$4,558,091.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OFFICE OF EMERGENCY MANAGEMENT
POLICY PACKAGE 090

1. Purpose– This Policy Package was added in the Governor’s Budget. It reduces General Fund services and supplies for the Office of Emergency Management by (\$87,722). It was taken from the agency’s 10% reduction plan.

The (\$87,722) reduction in services and supplies will reduce purchases of office supplies, travel and related purchases through management imposed restrictions. This reduction would have a moderate impact to service delivery.

2. How Achieved – Appropriation for services and supplies will be decreased by \$87,722.

3. Staffing Impact – None.

4. Quantifying Results – The results of this policy package will have a moderate impact on the Office of Emergency Management.

5. Revenue Source – (\$87,722) General Fund.

Added by the Governor; included in the Governor’s Budget. Not approved by Legislature; refer to Policy Package 801 for reductions included in the Legislatively Adopted Budget.

The state 9-1-1 program goal is to facilitate emergency communications to protect the safety and security of people, property and critical assets. Achieving this goal requires seamless operation of the statewide Enhanced 9-1-1 system and smooth transitions to new technology. The program is responsible for the continual coordination and management of the network necessary to deliver 9-1-1 calls, the customer premise equipment (CPE) used by the Public Safety Answering Points (PSAP) to process those calls, as well as consulting and assisting local governments with the challenges faced in the delivery of and participation in the statewide enhanced 9-1-1 emergency reporting system.

BUDGET NARRATIVE

The state 9-1-1 Program is currently planning to implement Next Generation 9-1-1 (NG9-1-1). This project, once completed, will enable the public and PSAPs to communicate with various technology formats such as text, video and photos. NG 9-1-1 is new to the industry and is a nationwide initiative. Oregon's statewide NG9-1-1 initiative is vital to our citizens and it will fulfill public expectations to accommodate current and emerging communication methods. The NG 9-1-1 project will require extensive planning, testing and a complete upgrade to Oregon's current E9-1-1 network. NG9-1-1 will create a significant impact on PSAP personnel and will increase the amount of data being sent to PSAPs, requiring extensive standards and security protocols to protect Oregon's E9-1-1 network. In order to implement a successful statewide IT project of this magnitude, the Office of Emergency Management (OEM) will need to increase staffing to include 10 new 9-1-1 positions.

Position 0014005 - Deputy Project Mgr. / ISS 7: This position within OEM is the primary support position to the statewide expert (NG9-1-1 Project Mgr.) for the implementation of NG9-1-1. This position is responsible for providing project management leadership and the coordination of a statewide approach to deploy a modern, cost effective and secure wide area network for Oregon's 45 Public Safety Answering Points (PSAPs). This position supports and serves as a conduit to the primary point of contact of the awarded NG9-1-1 vendor. This position will interface with, direct and oversee the NG9-1-1 Project Team and vendor in all aspects of NG9-1-1 implementation including migration, installation and maintenance.

Position 0014008 - GIS Data Analyst / ISS 5: The GIS Data Analyst is responsible for collaboration with GIS stakeholders and collection, organization and conflation of GIS mapping data. This position assesses GIS Data readiness and completeness for NG9-1-1; documents information; and provides customer service and direction in the use of GIS standards and applications to public safety agencies and organizations both familiar and unfamiliar with the technology. This position holds expertise on NG9-1-1 GIS Data development and maintenance to ensure consistency and completeness of the digital data.

Position 0014009 - GIS IT Coordinator / ISS 5: This position is responsible for the coordinating GIS mapping data and its functional role in the NG9-1-1 databases and networks; documents information; and provides customer service in the use of GIS to organizations regardless of familiarity with the technology. This position serves as the NG9-1-1 GIS software and application expert related to digital data.

Position 0014010 - GIS QC Analyst / ISS 6: The GIS QC Analyst is responsible for the quality control and ongoing assessment of GIS mapping data and its functional role incorporating NG9-1-1 databases and networks. This position ensures proper reviews, controls and management processes are performed on a regular basis; identifies and documents information; and provides knowledge, skills and experience validating and maintaining standards. This position is an expert on GIS quality control and assessment tools needed for GIS data verification processes in a NG9-1-1 system.

Position 1517001 - Data Center Specialist / ISS 4 (LD): This position is the statewide NG9-1-1 data center expert for the implementation of NG9-1-1. The Data Center Specialist is a single point of contact for all data centers supporting NG9-1-1 in Oregon. The position is limited duration because it is anticipated that the timeline would include planning and implementation phases of the project but not ongoing maintenance.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

J:\17 Budget\LAB\003 OEM\3POL 301.docx

107BF02

BUDGET NARRATIVE

Position 1517002 - Network Specialist / ISS 4 (LD): This position performs complex work providing effective and efficient storage, retrieval, customization and archiving of data for the implementation of NG9-1-1. The position is limited duration because it is anticipated that the timeline would include planning and implementation phases of the project but not maintenance.

Position 0014006 - Accountant 2: This position assists with the administration and coordination of all fiscally related NG9-1-1 items.

Position 0014013 - Public Affairs Specialist 3: This position has the responsibility to plan, design and execute the public affairs and public relations programs for Oregon's statewide implementation of NG9-1-1. Changes in process, capabilities or access to the NG9-1-1 have a significant impact on the public. This position develops programs to encompass all facets of communication and public education including coordination with the Governor's office, Department of Administrative Services (DAS), Oregon Military Department (OMD) and other state agencies. The programs facilitate expedient and efficient systems to release information to the public and the media before, during and after NG9-1-1 implementation.

Position 0014007 - Office Specialist 2: This position provides direct administrative and fiscal support for the NG9-1-1 program and staff, part of the Division's Technology and Response Services Section. It serves as an Administrative Assistant to the Technology and Response Services Section Manager and the NG9-1-1 Project Manager.

Position 1517033 - Operations & Policy Analyst 3 (LD): This position serves as an agent of the Section Manager in the application of policies, procedures, and regulatory requirements. It develops policy recommendations for OEM's executive management team. It also position provides advice to management and staff on NG9-1-1 policy issues effecting operations, industries, and local jurisdictions. This advice serves as the basis for proposed legislation, administrative rules, or other major program decisions. This position serves as a primary liaison to several boards and committees, to specific industries and potentially to local government depending on the assignment.

This position services as a subject matter expert for the section; participates in activities related to development and interpretation of NG9-1-1 standards; and provides technical assistance to division staff, other agencies, local jurisdictions, and the public. Responsibilities include developing and drafting rules, rule interpretations, providing technical guidance on adopted rules, report and letter writing, and provision of technical information and training.

In addition to the positions identified above this Policy Package requests \$148,250 in Other Funds expenditure limitation for services and supplies.

All costs associated with this Policy Package will be financed through the Emergency Communications Excise Tax.

2. How Achieved – This Policy Package will be achieved by authorizing the statewide NG9-1-1 project. This project, once complete will accommodate and support new and emerging technologies and communication formats (e.g. text, video and photos) driven by consumer requirements and the rapid and widespread adoption of smartphone technology. This transition to new technology and infrastructure throughout the state will require a large scale,

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

sustained effort involving adequate funding, staff resources, technical expertise, and project management capabilities to ensure successful implementation of NG9-1-1. OEM will work closely with the vendor awarded the NG9-1-1 RFP to implement new technology solutions that are compatible for vulnerable populations to meet the needs of the deaf and hard of hearing community. Effective project management from cradle to grave of a project of this scale will ensure that the project size, budget, and scope stays on track and provides for effective operation and maintenance of the new system in the future. In order to implement a successful statewide IT project of this magnitude, OEM will need to increase staffing to include 10 new NG9-1-1 positions.

3. Staffing Impact – Establish 10 new positions - 10.00 FTE

4.-Quantifying Results – OEM will establish prescribed metrics of achievement to ensure all program requirements and project timeline deliverables and National Emergency Number Association (NENA) standards are being met and maintained. Full Next Generation 911 implementation includes migration from the current Frame Relay Network backbone, to an IP (internet protocol) based ESINET (Emergency Services IP Based Network), plus interfacing the network with all NG9-1-1 compatible PSAP equipment. In addition, the State 9-1-1 Program will conduct annual surveys to stakeholders to solicit customer feedback and input.

5. Revenue Source – \$1,753,121 Other Funds.

Modified by the Governor to provide \$500,000 Other Funds Services and Supplies limitation for the Department of Administrative Services Enterprise Technology Services to coordinate the conversion of the existing frame relay system to an internet protocol broadband network. Included in the Legislatively Adopted Budget at \$500,000 Other Funds.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OFFICE OF EMERGENCY MANAGEMENT
POLICY PACKAGE 302
PRIORITY 3

1. Purpose – This Policy Package requests a fund shift for the following positions: three Information Systems Specialist 7s; one Principal Executive Manager E; one Human Resources Analyst 3; one Administrative Specialist 2; one Accountant 2; one Program Analyst 2; one Program Analyst 3; and services and supplies within the Office of Emergency Management (OEM) from Other Funds to General Fund. The fund shift for the first two ISS 7 positions, the Principal Executive Manager E, the Administrative Specialist 2, the Accountant 2, and the Program Analyst 3 moves the positions from 50% Other Funds to 50% General Fund. The fund shift for the third ISS 7 moves the position from 100 percent Other Funds to 100 percent General Fund. Due to the enterprise nature of the work conducted by these positions, and the restrictions of use for federal grant funding, General Fund is the most appropriate source of financing. The fund shift for the Program Analyst 2 moves the position from 100 percent Other Funds to 76 percent General Funds and 24 percent Other Funds (transfer from the Department of Aviation). The Human Resources Analyst 3 is shifted from 100 percent Other Funds to 100 percent General Funds in Policy Package 302 in the Administration Program.

In previous biennia, Oregon has seen a flat line in the amount of General Fund made available for the non-federal share of the Emergency Management Performance Grant (EMPG). During the same time period, federal requirements for risk based assessments, trainings and exercises have increased. This shift has caused federal dollars to be expended rapidly throughout the state placing increased pressure on existing OEM staff. Staff members funded

BUDGET NARRATIVE

through the EMPG are tasked with providing the programmatic backbone for planning, training and exercise in an all hazard environment, as well as providing fiscal reporting services to both state and federal governments. This grant requires a 50 percent non-federal cash match which is traditionally provided via General Fund appropriation. However; due to the most recent economic recession, and the corresponding reduction in overall General Fund, different funding sources have had to be utilized. The purpose of this policy package is to reverse the funding for several positions which had been placed against the 9-1-1 Emergency Communications Tax. OEM is seeking to enhance its capacity in the areas of planning, training and exercise, and seeks the ability to sustain existing personnel with an appropriate source of non-federal funding. Additionally, states have a responsibility to not only effectively leverage federal resources, but to show a commitment to the field of emergency management beyond what is financed through the federal government. While this particular package does not increase the size of OEM it does show a commitment on behalf of the State of Oregon to invest and support the actions being conducted by the office.

Of greater importance is the impact this Policy Package will have towards the statewide transition to Next Generation 9-1-1 (NG9-1-1) services. Policy Package 301 requests establishing 10 positions, along with services and supplies, within the state 9-1-1 program to progress with the transition to technologies that support text, video and photo communications. These positions are slated to be funded through the Emergency Communications Excise Tax, as administrative costs, as prescribed within ORS 403.240. This fund shift is critical with regards to making necessary capital available within the Emergency Communications Account. It is anticipated that without approval of this fund shift, OEM will not have sufficient capital available to finance the positions identified within Policy Package 301. Without these identified positions and the necessary technical knowledge in this subject matter area, successful transition to NG9-1-1 is not feasible.

2. How Achieved - Sustaining existing staff would be achieved by shifting funding from the 9-1-1 Emergency Communications Tax and replacing it with General Fund. The General Fund would then act as the appropriate non-federal match for the EMPG, which provides the basic infrastructure for emergency management capabilities nationwide. EMPG funding has increased during the past three federal fiscal years, and while this has provided growth for our partners in local and Tribal governments, due to a lack of General Fund match, the State of Oregon has not been able to add capacity to provide increased support. The federal appropriation for FY 14 is expected to have a slight increase in funding from FY 13, as this program continues to have bi-lateral support in Congress. In addition, the freeing of Emergency Communications Tax revenue will allow that revenue to be reinvested in the state 9-1-1 program to provide oversight of the statewide transition to NG9-1-1 as described within the business case, the continued development of a Real Time Assessment and Planning Support tool, and overall information technology support within the program.

In addition to the position funding changes, \$166,300 Services and Supplies are fund-shifted from Other Funds to 50 percent General Fund and 50 percent Federal Funds.

3. Staffing Impact – Fund shift eight positions in the Emergency Management program and one in the Administration Program.

4.-Quantifying Results – Results in the state’s emergency management system are measured by how well the state responds to emergencies and disasters and the ongoing development of statewide capabilities. The ability to provide effective response is driven by developing plans, training staff, and

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

exercising plans. Training participants in the statewide emergency services system is essential to enhancing the state's capacity to respond and recovery from disasters. Additional quantifying results will be reflected in the timing, cost and overall success of the statewide transition to NG9-1-1. For example, several component pieces of the existing 9-1-1 system infrastructure are nearing end of life, and the costs associated with maintaining them are dramatic. The existing antiquated analog infrastructure needs to be decommissioned and updated to a current digital, Internet Protocol (IP) based network. The IP network is also required to accommodate and support new and emerging technologies driven by consumer requirements and the rapid and widespread adoption of smartphone technology. This is one of the key drivers behind the transition to NG9-1-1.

5. Revenue Source - \$1,074,289 General Fund, (\$1,157,439) Other Funds, \$83,150 Federal Funds

Governor did not recommend. Not included in the Legislatively Adopted Budget.

107BF02

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OFFICE OF EMERGENCY MANAGEMENT PROGRAM
POLICY PACKAGE 303
PRIORITY 5

Purpose – This Policy Package establishes two Program Analyst 2 positions as well as services and supplies to help manage projects and provide direct, tailored, technical assistance to city, county and tribal governments as it relates to Oregon’s Hazard Mitigation Program. These positions are critical to Oregon regaining Enhanced Status for the *Oregon Natural Hazards Mitigation Plan*.

Pos #	Title	Classification	Type	Impact		
				GF	OF	FF
0014003	Program Analyst 2	C0861	Establish	\$76,970	-	\$76,972
0014004	Program Analyst 2	C0861	Establish	\$76,970	-	\$76,972
Mass Transit Tax				\$599	-	-
Total Personal Services				\$154,539	-	\$153,944
Total Services and Supplies				\$15,000		\$15,000
Total Policy Package 303				\$169,539		\$168,944

Eligibility for federal funding offered through Federal Emergency Management Agency’s (FEMA) Unified Hazard Mitigation Assistance (HMA) grant programs, and the Emergency Management Performance Grant (EMPG) requires state and local jurisdictions (all counties, and some cities) to develop and update natural hazard mitigation plans. These plans are reviewed by the Office of Emergency Management (OEM) and FEMA, and are certified for five years. This Policy Package will assist Oregon in regaining Enhanced Status for the *Oregon Natural Hazards Mitigation Plan (NHMP)*. An Enhanced NHMP allows the state to be eligible to receive additional federal funding in the aftermath of a federally declared disaster. This is a significant incentive as it could result in millions of additional dollars coming to Oregon in the aftermath of a devastating event such as the Cascadia Subduction Zone earthquake. FEMA has stated that Oregon’s mitigation grants management shows a capability to handle funds appropriately and to implement mitigation projects. However, FEMA asserts that staffing levels and systems have been strained following large disasters, which resulted in increased workload to handle funds, disperse to sub-grantees, and monitor project progress. Lack of adequate staffing, has made it difficult for FEMA to justify Oregon’s ability to manage increased funding as a state with an Enhanced NHMP. Having a “basic” status versus an “enhanced” status was also identified as a major deficiency by the Secretary of State in its 2013 Performance Audit of OEM. Due to these factors, and the possibility of losing access to millions of dollars in federal funding, approval of this Policy Package is critical.

2015-2017

J:\17 Budget\LAB\003 OEM\3POL 303.docx

107BF02

BUDGET NARRATIVE

Funding for the creation of hazard mitigation plans and the projects identified within the plans come from Federal Funds offered through the Pre-Disaster Mitigation (PDM) Grant Program and the Hazard Mitigation Grant Program (HMGP). Both PDM and HMGP funds require a non-federal cost share match which for most sub-grants is 25 percent of the total project cost. General Funds, at both the state and local levels are often the source of this non-federal cost share. The use of these General Funds leverage federal monies to reduce our vulnerability to natural hazards. Funding for the actual implementation of plans and projects is generally awarded via a competitive process.

As the State Administrative Agency for the HMA program, OEM is tasked with providing outreach, training, and technical assistance to jurisdictions statewide. This work is critical to helping jurisdictions create applications which convey a compelling story and meet the criteria required by FEMA to receive funding. Without this type of tailored technical assistance, many jurisdictions, especially small rural communities, are not able to submit applications which can effectively compete for funding on a national level. OEM is committed to providing this assistance, but current staffing levels do not allow for the necessary one-on-one interaction that our customers need. Currently OEM has two positions that address programmatic pieces of hazard mitigation.

1. Position 0014003 is a Planner who reviews local hazard mitigation plans at the state level, and provides staffing support to the State Interagency Hazard Mitigation Team (IHMT) which accounts for approximately 35 percent of this position's workload. This position is also responsible for multiple other high priority activities which are outside the scope of mitigation and therefore accounts for a large volume of workload that cannot be addressed with current staffing levels.
2. Position 0014004, the State Hazard Mitigation Officer (SHMO), is overwhelmed with all remaining activities as the sole position providing programmatic support statewide for hazard mitigation. The SHMO is responsible for OEM activities related to:
 - a. Submitting, tracking, monitoring and reporting on all projects statewide which are funded through PDM and HMGP.
 - b. Administration of the Flood Mitigation Assistance (FMA) program involving close coordination with the Department of Land Conservation and Development during the application process and sole responsible as the Grantee to ensure successful project implementation and helping to develop project scopes, budgets, and timeframes.
 - c. The National Flood Insurance Program (NFIP) which requires significant efforts to explain dramatically increased flood insurance rates for many Oregonians with increasing interest in FMA flood mitigation grants.
 - d. Additionally, this position acts as the connection point between all local programs and FEMA which represents a tremendous workload and responsibility.

Increased staffing as proposed below, will allow the role of the SHMO to transition in a more strategic direction. The requested positions will allow the SHMO to focus on developing statewide strategies for mitigation projects, as well as developing sound mitigation training programs. The SHMO will also be available to provide in-depth support for the most challenging disaster related projects throughout the state.

_____ Agency Request

_____ Governor's Budget

 X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

Program Analyst 2 (two positions): The Program Analyst 2 positions will work with local jurisdictions in the development of hazard mitigation plans and projects through the Hazard Mitigation Assistance grant programs. The Program Analysts will serve as technical advisors to local governments with regard to program and application requirements. These positions will also be responsible for ensuring all environmental and historical preservation (EHP) issues are reviewed prior to an application being submitted to FEMA for funding. This entails close interaction with local historic preservation offices, the State Historical Preservation Office, and FEMA Region Ten Environmental Staff. EHP analysis includes reviewing applications for compliance with National Environmental Policy Act (NEPA), Section 106 and Endangered Species Act standards. This analysis is conducted for Public Assistance projects as well as Hazard Mitigation projects. After projects are selected for funding, these positions serve as program coordinators working with local jurisdictions regarding the ongoing progress of the plan/project. This includes the creation of quarterly progress reports shared with FEMA, OEM management, and identified leadership within the local jurisdiction. Duties also include on-site monitoring visits and providing technical assistance regarding program performance. In addition, these positions provide support to the SHMO for ongoing management and enhancement of Hazard Mitigation Assistance grant programs. Support will include review and analysis of project proposals, project status, federal reporting requirements, and customer interactions (both local and federal). This will allow the SHMO to build strategic planning capacity, focusing on a holistic approach to hazard mitigation across the state.

In addition to two positions, Services and Supplies funding of \$30,000 (\$15,000 General Fund and \$15,000 Federal Fund) is requested to finance rental costs, travel costs, professional service costs and other day-to-day operating costs.

2. How Achieved – The personal service costs and the services and supplies costs will be funded through the EMPG, which provides a 50 percent federal cost share.

3. Staffing Impact – Establish two Program Analyst 2 positions. 2 Positions – 2.00 FTE

4-Quantifying Results – The most important quantifying result associated with this Policy Package will be the reinstatement of Enhanced Status for the *Oregon Natural Hazards Mitigation Plan* (NHMP). An additional quantifying result will be an increase in the percentage of Oregon’s population covered by a FEMA approved Hazard Mitigation Plan. As funding for the updating of these plans is made available, local jurisdictions will be better able to plan and implement updates well in advance of the five-year plan expiration date. This will allow for Oregon to face fewer windows of time where plans are out of date. Currently 80% of Oregon’s population is covered by a FEMA approved local hazard mitigation plan. Another quantifying result is the decreased cost of future disasters due to the mitigation of identified risks, but this will only be measurable after projects are complete and we incur a large scale disaster.

5. Revenue Source - \$169,539 General Fund, \$168,944 Federal Funds

Governor did not recommend. Not included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OFFICE OF EMERGENCY MANAGEMENT
POLICY PACKAGE 304
PRIORITY 6

1. Purpose – This Policy Package establishes two positions: one Emergency Operations Program Analyst 2 and one Critical Infrastructure Program Analyst 2, and services and supplies for the Office of Emergency Management (OEM). This package is designed to develop the state’s capacity to adequately plan and prepare for the legislative responsibility to respond to natural and manmade incidents as well as develop and coordinate critical infrastructure and key resource preparedness activities throughout the state. This proposal will provide technical and expert assistance to state, tribal, county, and city emergency management personnel in the planning, training, and implementing and execution of federal and state initiatives and requirements. Additionally, these positions will ensure the state’s threat and risk profile are accurate and coordinated with the federal government which influences preparedness grants and funding allocations. These positions will provide support throughout the state. The primary purpose will be to enhance the overall capabilities of state, tribal, county and city emergency management programs through comprehensive planning, training and program analysis. These positions will be funded through the Emergency Management Performance Grant (EMPG) which requires a 50 percent non-federal match.

Pos #	Title	Classification	Type	Impact		
				GF	OF	FF
0014011	Program Analyst 2	C0861	Establish	\$76,970		\$76,972
0014012	Program Analyst 2	C0861	Establish	\$76,970		76,972
Mass Transit Tax				\$599		
Total Personal Services				154,539		153,944
Total Services and Supplies				\$15,000		\$15,000
Total Policy Package 304				\$169,539		\$168,944

Position 0014011 - Program Analyst 2 (Emergency Operations): The purpose of this position is to lead and support state, tribal and local government with planning, training and exercises to enhance and further develop the state’s Emergency Coordination Center (ECC). It is critical that OEM coordinate with many other entities such as the 22 Oregon Emergency Response System (OERS) agencies and other responding organizations, 36 county emergency management representatives, nine tribal jurisdiction representatives, and local officials throughout the state to ensure life safety and response systems are effective. The high engagement needs of critical collaboration structures and processes require coordination provided by this position. This added functionality will improve OEM operational plans, training, and exercises to assist and coordinate the actions of state, local and federal agencies, non-governmental organizations (NGOs), and local subject matter experts throughout Oregon to facilitate resource requests, situation awareness, and emergency communications. A primary function of this position is to develop and enhance plans, policies, procedures, and systems to support the ECC’s operations. This includes planning, preparedness and response activities. This position will also perform emergency operations functions during actual

Agency Request
 Governor’s Budget
 Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

activations of the ECC operations for disaster response, recovery, and hazard mitigation. Planning, training, and exercising critical disaster operations, will position the state, tribal, county, and city emergency responders to perform more efficiently and effectively when saving lives and protecting property. This position coordinates regularly with state agencies, counties, cities, and tribes as a primary point of contact and technical expert for operational planning needs and integration with the local level to ensure that OEM maintains a ready and capable ECC and supporting system of response plans. These capabilities are inherently vital to ensure that the response system is prepared and able to lessen the effects of an actual catastrophic disaster event. Planning response measures and clearly identifying decision-making structures prepares agencies to allocate limited resources and implement systems to address community needs such as evacuation, sheltering and mass care, and to alert and inform the public of required safety instructions.

Position 0014012 - Program Analyst 2 (Critical Infrastructure): The purpose of this position is to assist and coordinate the actions of critical infrastructure owners and operators, local and tribal governments, private sector organizations, state agencies, and local experts in the emergency management field to plan for and facilitate engagement among all parties to protect critical infrastructure and key resources from threats and facilitate restoration during incidents. It is critical that OEM coordinate with many other entities such as the Oregon Titan Fusion Center, the Department of Homeland Security's (DHS's) Protective Security Advisor, local community emergency professionals, and private and public sector owners and operators throughout Oregon to identify ongoing and evolving risks to the state and people of Oregon and to better understand critical interdependencies among various sectors. This is an imperative task directly related to federal funding allocations. OEM needs additional staffing to ensure coordination of cross sector participants to participate in the annual and ongoing critical infrastructure risk assessment processes.

This position has the responsibility to write and maintain the state Infrastructure Protection Plan, Critical Infrastructure and Key Resources (CI/KR) plan, and annexes. This position directs and coordinates with other state agencies in the development of their plans and responsibilities as outlined in the Oregon Infrastructure Protection Plan (OIPP); and ensures local government critical infrastructure plans are developed and kept current and in compliance with all applicable federal and state policy guidance. This position is responsible for monitoring and providing technical assistance to state, tribal, and local emergency managers on a continuous basis to integrate CI/KR plans into the all-hazard environment. Work in the capacity of instructor and course manager for critical infrastructure and emergency management classes. Additionally, critical infrastructure planning and coordination activities ensure the states threat and risk is documented and collaborated with the Oregon Titan Fusion Center, Oregon State Police, the Oregon Military Department, and other stakeholders. The coordination of CI/KR with state, tribal, county, city, and private stakeholders ensures the identification and appropriate preparation of communities to address the impact of these systems and needs throughout the state as well as develop response and restoration plans required to effectively respond.

DHS conducts annual evaluations for infrastructure systems and assets with national level significance that meets established DHS criteria. The benefit to Oregon of having additional capacity to identify, facilitate risk assessments, capture documentation related to risks, evaluate and convey risk and threats to local, state and federal partners will improve the state's ability to leverage federal funding and prioritize risk reduction activities throughout the state. This body of work involves developing partnerships with new organizations, establishing and maintaining lists of existing and new assets, clusters of assets, or sector-specific systems that, if destroyed or damaged, could result in significant lives lost, and/or economic impact to the State of Oregon or regions within the state. This data is used to establish Oregon and the Portland-UASI area's comparative risk rankings among other states and UASIs, which

_____ Agency Request _____ Governor's Budget X Legislatively Adopted

2015-2017

107BF02

BUDGET NARRATIVE

influences federal homeland security grant funding. This year, DHS is considering scenario based incidents, including catastrophic events such as Cascadia threat. OEM needs additional capacity to identify potential significant infrastructure systems at risk. Determining which clusters of assets may meet the Nationally Significant asset list requires a substantial time commitment and ability to maintain ongoing partnerships and dialogue.

In addition to two positions, Services and Supplies funding of \$30,000 (\$15,000 General Fund and \$15,000 Federal Fund) is requested to finance rental costs, travel costs, professional service costs and other day-to-day operating costs.

2. How Achieved – In order to meet the ever increasing demands of Federal and State mandates, requirements, and initiatives in the complex and constantly evolving environment of homeland security and emergency management these staff will be able to directly assist state, tribal, county, city, and private stakeholders in the implementation of these various programs which in turn will increase the systems capabilities to save lives, protect property, sustaining the economy, and preserve Oregon’s environment. This will facilitate a more informed response, develop focused capabilities, and assist in the overall planning and implementation of the various requirements to support mitigation, preparedness, response, and recovery throughout the state. These positions will be responsible for developing operational and CI/KR plans, procedures, training, and exercise programs and will provide input back to OEM and the whole community of cross sector participants.

3. Staffing Impact – Establish Two Program Analyst 2 positions. 2 Positions – 2.00 FTE

4.-Quantifying Results – The Plans and Training section of the Office of Emergency Management will develop an initial assessment of operational and CI/KR capacities with annual updates to determine the effectiveness of these two program initiatives. Additionally, the Office of Emergency Management will establish prescribed metrics of achievement to ensure all program requirements are being maintained and updated as required by law, rule, or program mandates.

5. Revenue Source – \$169,539 General Fund and \$168,944 Federal Funds.

Governor did not recommend. Not included in the Legislatively Adopted Budget.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
OFFICE OF EMERGENCY MANAGEMENT
POLICY PACKAGE 801

1. Purpose– This Policy Package was added by the Legislature. It reduces services and supplies in both General Fund and Federal Funds for the Office of Emergency Management (OEM) by \$93,284. It also eliminates the remaining \$283,250 General Fund for the Local Disaster Assistance Loan and Grant Account.

The services and supplies reduction will reduce the amount of federal funds available in the Emergency Management Performance Grant (EMPG), funded at 50% federal funds and 50% state funds. The EMPG is the main funding source to operate OEM. The anticipated decrease in Homeland Security federal grants will place higher reliance on the EMPG and General Fund. This reduction puts further pressure on dwindling state and federal funds and threatens OEM’s ability to effectively plan for, respond to and mitigate disasters.

The Local Disaster Assistance Loan and Grant Account was established by the Legislature in 2008. It provides state funds to local governments and school districts for costs incurred in response to federally declared disasters and as matching funds for federal disaster relief grants. The loss of the remaining funding will prevent assistance to local governments and school districts, which can only be remedied by legislative action (new appropriation).

2. How Achieved – General Fund Appropriation is decreased (\$376,534), and Federal Funds limitation is decreased (\$93,284).

3. Staffing Impact – None.

4. Quantifying Results – The results of this policy package will have a moderate impact on the Office of Emergency Management.

4. Revenue Source – (\$376,534) General Fund, (\$93,284) Federal Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

Oregon Military Department – Community Support Program – Executive Summary

Primary Outcome Area: Education
 Secondary Outcome Area: Safety
 Program Contact: Dave Stuckey, OMD Deputy Director (503) 584-3884

Program Overview

The Military Department’s Community Support Program offers a full spectrum of educational opportunities for the at-risk youth of Oregon. These opportunities are provided by the Oregon Youth Challenge Program in Bend and the STARBASE programs in Portland and Klamath Falls. Their goal is to provide the at-risk youth of Oregon an opportunity to build a future through education, structure and support.

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted

2015-2017

Program Funding Request

The Legislatively Adopted Budget (LAB) for the Community Support Program within the Oregon Military Department includes expenditure authority of \$197,381 General Fund, \$2,101,015 Other Funds, and \$8,419,836 Federal Funds. The LAB includes 46 positions and 46.00 FTE. The goal of this budget is to continue the current operations within the Community Support Program with minimal state investment and maximum leveraging of federal resources. Current operations within the Community Support Program tie directly to the Governor’s Education Strategy regarding focusing investment on student outcomes. The component programs which make up the Community Support Program include STARBASE and the Youth Challenge Program.

Continued investment in the Community Support Program will provide an opportunity for high school dropouts who have failed in a traditional school environment to complete their education and become valuable, productive members of society. This investment will also help keep young students focused on the need to continue their education as well as pursue studies in the core sciences. Finally, this investment will help ensure progress towards the Governor’s Education Strategy 2.3 and Safety Strategy 1.2.

Program Description

The Community Support program is comprised of two main program areas, the Oregon Youth Challenge Program (OYCP) and the Science and Technology Academies Reinforcing Basic Aviation and Space Exploration program (STARBASE). Both of these programs are in line with assisting the Governor reach the goal of 40-40-20 committed to preparing the youth of Oregon “for lifelong learning, rewarding work and engaged citizenship”.

Located in Bend, the Oregon National Guard Youth Challenge Program (OYCP) serves 16 to 18 year old male and female dropouts who have struggled to succeed in a traditional high school environment. The OYCP is Oregon’s only public *statewide* quasi-military based high school, which includes supervised work experience in community service and conservation projects. The program is fully accredited by the Northwest Accreditation Commission through the year 2014 with re-accreditation scheduled for November 18, 2014, and is a statewide public alternative high school. The OYCP is a residential 22 week program where student-cadets are provided all services 24 hours a day 7 days a week. The residential phase is followed by a 12 month post-residential phase which includes providing each graduate with a mentor. Two classes per year are conducted, serving 312 youth and graduating a minimum of 240 students each year. The OYCP within the Community Support Program has been recognized by the National Guard Bureau as the one of the “Best Overall Challenge Programs” every year since 2001.

The educational services of the OYCP are implemented through the use of an accredited high school curriculum taught by certified teachers approved by the Oregon Department of Education. The OYCP provides outreach to school districts in all 36 counties about alternative education opportunities. OYCP provides on-site orientations to interested applicants and their families, as well as training for mentors and mentees for the post residential phase of the program. The program also maintains ongoing service to community partnerships through student-cadet volunteer services, as well as

Agency Request Governor’s Budget Legislatively Adopted

2015-2017

scholarship opportunities for graduating student-cadets. 100% of graduating student-cadets earn either a high school diploma, a GED certificate, or 8 certified high school credits to take back to their communities to re-enroll in their hometown high schools.

The success of the Community Support program depends heavily on the utilization of partnerships. At the local level the OYCP partners closely with local contractors for nursing services, Bend LaPine School District for teaching services, Central Oregon Community College for GED testing and High Desert ESD for auditing services. OYCP partners with non-profit organizations and local industries to take part in the programs semi-annual career fair. The OYCP partners primarily with the Department of Education at the state level. The OYCP partners with the National Guard Bureau and BLM. The National Guard Bureau provides 75% of operational funding for the OYCP. The STARBASE Program partners with local school districts for contracted teaching services at both airbases.

The major cost drivers of the Community Support Program have been identified as Personal Service Costs, Contracting Service Costs, Direct Food Costs and Utilities. For the OYCP Personal Services account for 70.4% of annual operating costs, Contracting Services for student-cadet health care and certified teacher services account for 10% of annual operating costs, Direct Food Costs account for 6.2% of annual operating costs, and Utility Costs account for 2.8% of annual operating costs.

The Oregon Youth Challenge Program within the Community Support Program was developed to be *the* alternative solution for at-risk youth who are failing in the traditional high school setting. Therefore it is difficult to identify an alternative means of service delivery.

The STARBASE Program exposes third to eighth graders to the fields of Science, Technology, Engineering and Mathematics (STEM) with the hopes of inspiring them to pursue a career in these fields. This is done through the use of a highly acclaimed 25 hour curriculum taught by certified teachers from the local school districts. The program is focused on capturing student interest in STEM at the elementary and middle school levels and showing them why studying these courses is important to their future goals. The program is 100% federally funded and hosts approximately 2,100 students each year at the Portland Airbase and the Kingsley Field Airbase in Klamath Falls.

Program Justification and Link to 10-Year Outcome

The vision of the Community Support Program through the Oregon Youth Challenge Program (OYCP) and the STARBASE Programs is to be the premier program serving at-risk youth and those who are not likely to succeed in the traditional school setting, while creating economic value, long term cost avoidance, civic contribution and future responsible tax paying citizens of Oregon. The Community Support vision goes hand in hand with the goal of preparing Oregon's youth "for lifelong learning, rewarding work and engaged citizenship".

The mission of the Community Support Program is to provide opportunities for personal growth, self-improvement and academic achievement among at-risk third through eighth graders (STARBASE), and teens no longer attending or failing in high school (OYCP), through a highly

Agency Request Governor's Budget X Legislatively Adopted

2015-2017

structured non-traditional environment; integrating training, mentoring and diverse educational activities. This mission ties directly to Strategy 2.3 which calls for the investment in evidence-based programs and practices that improve outcomes. This strategy specifically calls for investment in programs which:

1. Are effective at accelerating learning for those furthest behind.
2. Support Science, Technology, Engineering and Math.
3. Develop career pathways for youth.

The Community Support Program was built specifically to help the youth of Oregon who are most at-risk of being left behind by the traditional educational system. The curriculum of both the Oregon Youth Challenge Program (OYCP) and the STARBASE programs emphasize the importance of math and science. The Community Support Program through the OYCP utilizes a work skills program which provides training in conjunction with public works and community service projects. Student-cadets at OYCP have worked with the Department of Fish and Wildlife, Oregon State Parks and the Department of Transportation on community service projects which provide exposure to a vast array of career fields. This community service provides over \$200,000 a year in benefits to the participating agencies.

OYCP averages a 90% graduation rate. Approximately 14% of the students that graduated earned their High School Diploma while 9% participated in the GED program, of which 61% passed all portions of the examinations. The remaining 77% of the graduating students participated in the high school credit curriculum, of which 100% earned 8 credits allowing them to fully integrate back into their local high school. This is accomplished with a cost per student of \$20,083, of which the state pays \$5,021; the remainder is financed through federal funds. Please note these are 2013-15 costs.

The Community Support Program also links to the Governor's safety strategy 1.2, preventing vulnerable youth from entering the public safety system. The strategy document calls for the development and utilization "of programs and policies that provide alternative means of education for vulnerable youth in Oregon who are struggling within the traditional education setting". Both the OYCP and the STARBASE program were developed to provide this service to the youth of Oregon, and both provide this critical service for little to no cost to the state.

Agency Request Governor's Budget X Legislatively Adopted

2015-2017

Program Performance

This chart shows OYCP student-cadets enrolled and graduated between 1999 and June 2014.

July 1999 was the first year the Oregon Youth Challenge Program (OYCP) was classified as a “Full Challenge Program”. Since that date the OYCP has accepted 4,525 student-cadets, of which 4,055 completed the 2 week acclimation phase and began classroom enrollment. 3,476 graduated for a graduation rate of 86%. The 2013-15 average cost per student-cadet is \$20,083 per year. 75% of this cost is financed through federal funds from the National Guard Bureau. The cost per student-cadet to the state of Oregon is \$5,021 per year. This is 27% less than the average cost per student in Oregon public schools, which as of 2014 is \$6,865.

The retention and graduation rates at OYCP of 240 per year exceed national standards. This in turn generates Other Funds revenue from the State Basic School Support fund which is needed to leverage the Federal Funds match of 75%. The Test of Adult Basic Education (TABE) score for graduating student-cadets have improved on average by 2.2 grade levels over the last 10 years.

Agency Request
 Governor’s Budget
 X
 Legislatively Adopted

2015-2017

The STARBASE Program acquisitions of a new facility, using federal funds, on the Portland Air Base will significantly expand student capacity over time. The average cost per student in Oregon to take part in the STARBASE program is \$326.

Enabling Legislation/Program Authorization

The Community Support Program is a division of the Oregon Military Department which is mandated by Article X of the Oregon Constitution. The National Guard Youth Challenge Program was created to provide opportunities for civilian youth and is authorized by Section 509, Chapter 5 of Title 32, United States Code. The authority for all National Guard Youth Challenge Programs in the nation falls under the Secretary of Defense, acting through the Chief of the National Guard Bureau (NGB), who has entered into an agreement (as described in 31 USC Sect. 6305) with the Governor of the State of Oregon. The OYCP agreement was established in 1994 and is currently funded through the 2013-15 biennium.

The OYCP utilizes a citizen member Advisory Board. The board’s primary role is to meet a minimum of twice per class as an oversight group to ensure the program meets the state plan and Federal Master Cooperative Agreement. It too serves as a conduit to the local community to ensure local citizens are aware of the program and preserve quality community relations. The board advises the Adjutant General of Oregon through the Deputy Director for the Military Department.

The STARBASE program is authorized and approved through a Congressional Appropriation.

Funding Streams

The OYCP is funded by General Fund (2%), Other Funds (23%) and Federal Funds (75%). The Other Funds include State Basic School Support (20.1%) and National School Lunch Meal Reimbursement (2.4%). The State Basic School Support funds are dedicated per ORS 336.615 – 336.675 and OAR 581-22-1350. The National School Lunch Meal Reimbursement funds are dedicated per PL 79-396 60 Stat.230 and PL 108-269, as well as ORS 326 & 327 and 7 CFR 210 and finally OAR 581-051. The Federal Funds carry a matching requirement of 25%, which is made up of General Fund and Other Funds. The Federal Funds are dedicated per Section 509 Chapter 5 of Title 32, United States Code. The STARBASE program is funded with Federal Funds (100%) which are fully dedicated.

Significant Proposed Program Changes from 2013-15

The proposed budget for the Community Support Program equals the program’s Current Service Level budget. No enhancements are proposed in the 2015-17 Governor’s Budget. The OYCP would like to increase the program and accept additional cadets to better meet demand, but this would require facility enhancements. Policy Package 499 in the Capital Construction program requests \$4,977,000 in Other Funds limitation and bond funds to significantly expand and remodel the facility, which would allow up to 84 more cadets per class, which would be 336 additional cadets per biennium. **The Legislature approved Policy Package 499.**

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted
2015-2017

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT COMMUNITY SUPPORT PROGRAM

The Community Support Program includes the STARBASE Program, the Oregon Youth Challenge Program, and the Emergency Operations Program.

STARBASE - The Oregon National Guard Science and Technology Academy Reinforcing Basic Aviation and Space Exploration (STARBASE) Program is designed to increase at-risk third through eighth grade students' awareness of the importance of math and science in today's high-technology work environment.

STARBASE involves a series of hands-on classes taught for the Portland Public School District at the Portland Air Base and for the Klamath County School District at Kingsley Field. The goal of the program is to motivate at-risk students to pursue math and science education. The curriculum demonstrates math and science applications in aerospace operations. In many instances, this is the first opportunity the students have to relate the application of math and science to a tangible result. Students tour the airbase and study high technology aircraft and associated support equipment. They observe flight operations, weather reporting and forecasting operations, and tour aircraft and electronics maintenance facilities and fire fighting facilities. Oregon National Guard members demonstrate applicability of math and science to the activities observed by the students during their tours. Approximately 20,000 students have participated in this 100% federally funded program. Base budget funding provides services and supplies for operations.

Youth Challenge Program - The Oregon National Guard Youth Challenge Program (YCP) offers high school dropouts and students failing at traditional high schools the opportunity to build a future. The program has 46 state employees working as counselors, group life coordinators, and support/administration staff. The program also contracts 6 teachers and 1 nurse-practitioner.

The program consists of two phases. The first phase is a 22 week residential program at the Oregon National Guard Central Oregon Training and Education Facility (COTEF) in Bend, Oregon. Students learn self-discipline, leadership, responsibility, and work skills that enable them to be successful in society. Students have the opportunity to complete educational credit with a goal of reintegrating into high school, earning a diploma, or to prepare for General Educational Development (GED) examinations.

The second phase of the program is a 12-month nonresident program. Program continuity is provided in this phase by incorporating positive role models from the community as mentors to the students. The mentors help students continue efforts to meet educational and/or career goals set by the student during the residential phase. This furthers student independence by making it possible to meet personally set goals and provide the groundwork to build productive and contributing Oregon citizens.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Students must be 16-18 years old and have dropped out of school or are failing high school. The student must be an Oregon resident, free of drugs, and not currently in the court system. The curriculum combines classroom work, community service, and challenging individual and team activities into one experience. Other major areas of instruction include health and drug abuse awareness, leadership, self-discipline, personal development, physical fitness, and basic work skills. All students participate in local community projects to encourage personal growth and development. Students have the opportunity to complete educational credit toward high school graduation or a GED certificate.

The program averages a 90% graduation rate. Approximately 14% of the students that graduated earned their High School Diploma while 9% participated in the GED program, of which 61% passed all portions of the examinations. The remaining 77% of the graduating students participated in the high school credit curriculum, of which 100% earned 8 credits allowing them to fully integrate back into their local high school. The State of Oregon pays \$5,021 per student who receives 6 months of continuous schooling, goal setting, and community service in a team environment on a 7 day a week and 24 hour basis. Over 21% of the students enrolled in Oregon Youth Challenge are Individual Education Planned (IEP) special needs students, for which the program receives no additional funding from the state for special IEP, rural school considerations, or transportation limitations as other public schools in the state. The program provides the equivalent of \$220,000 annually in community service to local, state and federal government entities.

The work skills portion of the program involves training in conjunction with public works and community service projects for the U.S. Forest Service, Bureau of Land Management, Oregon Department of Fish and Wildlife, Oregon State Parks, Oregon Department of Transportation, and the Deschutes County Parks and Recreation Department. The students provide an average of 12,000 hours of volunteer community service per class. At minimum wage of \$9.10 per hour this equates to an \$110,000 per class or \$220,000 per year benefit to these agencies.

Congress changed funding for the Youth Challenge Program from 65% federal and 35% state in fiscal year 2000 to 60% federal and 40% state in fiscal year 2001 and beyond. During fiscal year 2010 funding for the Youth Challenge Program was changed to 75% federal and 25% state. The majority of the required state matching funds are received from Average Daily Membership Other Funds revenue through the Bend-LaPine School District and the National School Lunch Program.

Youth Challenge is Oregon's only statewide public alternative high school. The Challenge program partners with and accepts students from every school district and all 36 counties in Oregon. On an average per class, students attending the Challenge program come from 40 different high schools and 25 counties throughout the state with a GPA of 1.2 at the entrance to the program. 100% of the students who graduate earn either a high school diploma, a GED certificate, or 8 Oregon certified high school credits to take back to their communities to re-enroll in high school. The Challenge program is certified by the Oregon Department of Education and is accredited by the Northwest Accreditation Commission.

The Oregon Youth Challenge Program has received numerous citations for excellence and recognition for outstanding public service. In 2001, 2003, and 2007 Oregon's Youth Challenge Program was recognized as the Best Overall Youth Challenge Program of 35 programs in the United States.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Emergency Operations – The Emergency Operations Program provides critical manpower and equipment support for emergencies in Oregon when called upon by the Governor, the Commander-in-Chief of the Oregon National Guard. Responding to state emergencies is part of our core mission:

“The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizen soldiers and airmen, equipped and trained to respond to any contingency, natural or man-made. When we are needed, we are there.”

The Oregon National Guard has highly trained personnel and various items of equipment provided by the Federal Government located throughout the state and available for response and recovery to natural disasters, Homeland Defense, or civil unrest.

Oregon Military Department and Oregon National Guard resources are called upon each year in efforts to suppress wild land fires. Oregon Army National Guard helicopters, flight crews, and support personnel and equipment assisted the Oregon Department of Forestry efforts during the current biennium, and state employee resources using federal equipment from the Kingsley Field Fire Department were called for assistance through the Conflagration Act under the management of the State Fire Marshal. Kingsley Field Fire Department state employees and federal equipment were also resourced in Incident Management Team operations as part of the Oregon-California agreement under the administration of the United States Forest Service.

Oregon Military Department and Oregon National Guard resources were activated and mobilized for operations in support of the Top Officials (TOPOFF IV) exercise in October 2007. When the winter storm of December 2007 caused severe wind damage and flooding in seven counties, the Oregon Military Department and the Oregon National Guard responded. In partnership with Oregon State Police and the Oregon Department of Transportation, Oregon National Guard personnel, trucks, and boats reached the City of Vernonia in the dark of night and began rescuing residents from roof tops. Oregon National Guard helicopters and trucks immediately started to provide transportation assets to affected communities within the Northwest portion of the state. Camp Rilea was placed into full operation to provide emergency lodging and feeding in partnership with the American Red Cross to affected residents. Camp Rilea also provided lodging and fuel for utilities workers making emergency repairs to power systems throughout the region, since normal lodging and gas station operations were disrupted. Oregon National Guard power generators were dispersed throughout the region to provide emergency power to hospitals, dialysis centers, nursing homes, county facilities, police stations and fire and water districts. Oregon National Guard resources delivered food and water to affected communities, and assisted in recovery and clean up actions.

Severe winter snow accumulation in January 2008 impacted areas of Marion and Linn Counties, and the Oregon National Guard responded with troops and equipment in snow removal operations. The Oregon National Guard also prepared to assist Lake County during the same period. In January and February 2008, Oregon National Guard troops and equipment were mobilized to Tillamook County to assist in reinforcing the Wilson River Dike, still suffering the effects of the December 2007 storm, in sand bagging operations.

Agency Request Governor’s Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Soldiers and Airmen become temporary state employees while on State Active Duty in response to disasters and emergencies. Because natural disasters, emergencies and associated State Active Duty requirements cannot be foreseen, there is no base budget for the Emergency Operations Program. Instead, the Oregon Military Department requests General Fund appropriation and Other Funds limitation at Emergency Boards after such operations occur. The Command Group, Financial Administration Division, and the Personnel Office as part of the Administration Program absorbs the increased workload, overtime, and/or temporary hire assistance associated with the management and administrative support required during emergency response operations. The General Fund appropriation and Other Funds limitation increase in result of emergency operations is not carried forward each biennium.

Expected Results of the 2015-2017 Budget:

The STARBASE Program will continue to support Oregon Youth through academic and practical application of mathematical and scientific principles. STARBASE increases third through eighth grade students' awareness of the importance of math and science. The program will impress upon students the need to continue their education as well as pursue studies in the core sciences. The program motivates at-risk students to become a valuable resource for Oregon's future.

The Youth Challenge Program will continue to support Oregon Youth through academic and motivational goal setting. The program provides an opportunity for high school dropouts to complete their education and become valuable, productive members of society. The program supports efforts to prevent potential juvenile offenders from becoming adult career criminals. In doing so, the Youth Challenge Program will help the State of Oregon to realize savings that would otherwise be spent incarcerating and rehabilitating many of these young citizens in the future.

Revenue Sources:

STARBASE - The STARBASE Program is 100% federally funded through a National Guard Bureau (NGB) Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support the program. Revenue estimates are based on NGB forecasts of future funding levels. There are no proposed changes in revenue sources.

Youth Challenge Program - Congress changed funding for the Youth Challenge Program from 65% federal / 35% state in fiscal year 2000 to 60% federal / 40% state in fiscal year 2001. The funding split for the Youth Challenge Program was changed to 75% federal and 25% state for 2010 and beyond. The federal funds are received through a NGB Federal/State Cooperative Agreement, and may only be used to support the program. Federal revenue estimates are based on NGB forecasts of future funding levels. The majority of the required state matching funds is received from Average Daily Membership Other Funds revenue through the Bend-LaPine School District and the National School Lunch Program. The remainder of the matching funds is received from the General Fund.

2015-2017

BUDGET NARRATIVE

Emergency Operations Program - The Emergency Operations Program provides critical manpower and equipment support for emergencies in Oregon when called upon by the Governor, the Commander-in-Chief of the Oregon National Guard. The Oregon National Guard has highly trained personnel and various items of equipment provided by the Federal Government located throughout the state and available for response and recovery to natural disasters, Homeland Defense, or civil unrest.

Essential Packages:

010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package increases General Fund \$4, decreases Other Funds (\$615), and increases Federal Funds \$3,153.

022 – This package phases-out the following items:

1. (\$1,404,971) one time Other Funds limitation authorized by the February 2014 Legislature. The expenditure limitation was provided to cover personal service costs associated with ground troops and flight crews for the Douglas County Complex Fire and the Government Flats Complex Fire during the 2013 wildfire season;
2. (\$218,000) one-time Other Funds limitation for the Youth Challenge Program. Policy Package 815 in the 2013-15 Legislatively Adopted Budget approved this limitation to allow the program to operate at a higher state participation rate for one year following federal sequestration cuts; and
3. (\$15,000) General Fund for the Youth Challenge Program that was approved in Policy Package 820 in the 2013-15 Legislatively Adopted Budget. The purpose of this funding was to reimburse the fuel costs of cadets' parents or legal guardians who travel to the program in Bend, Oregon.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases General Fund \$5,744, Other Funds \$155,779 and Federal Funds \$187,708.

032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases General Fund by \$573, Other Funds by \$64 and Federal Funds by \$3,663.

Policy Packages:

840 – SB 5507 End of Session – (\$192) Other Funds, (\$807) Federal Funds. **Added by the Legislature.**

Proposed New Laws - None.

OREGON MILITARY DEPARTMENT COMMUNITY SUPPORT PROGRAM ESSENTIAL PACKAGES

1. **Purpose** - Essential Packages adjust the base budget to reflect the agency's 2015-17 current service level requirements.

2. **How Achieved** – The following Essential Packages adjust the Community Support Program's base budget to reflect 2015-17 current service level requirements:

010 - Adjusts projected vacancy factor budget savings expected from staff turnover in the 2015-17 biennium. The package also adjusts the costs of non-PICS personal services items not included in the PICS generated total. Non-PICS personal services items include debt service on the Pension Obligation Bonds (POB). The package increases General Fund \$4, decreases Other Funds (\$615), and increases Federal Funds \$3,153.

022 – This package phases-out the following items:

1. (\$1,404,971) one time Other Funds limitation authorized by the February 2014 Legislature. The expenditure limitation was provided to cover personal service costs associated with ground troops and flight crews for the Douglas County Complex Fire and the Government Flats Complex Fire during the 2013 wildfire season;
2. (\$218,000) one-time Other Funds limitation for the Youth Challenge Program. Policy Package 815 in the 2013-15 Legislatively Adopted Budget approved this limitation to allow the program to operate at a higher state participation rate for one year following federal sequestration cuts; and
3. (\$15,000) General Fund for the Youth Challenge Program that was approved in Policy Package 820 in the 2013-15 Legislatively Adopted Budget. The purpose of this funding was to reimburse the fuel costs of cadets' parents or legal guardians who travel to the program in Bend, Oregon.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases General Fund \$5,744, Other Funds \$155,779 and Federal Funds \$187,708.

032 - Provides above-standard inflation for Services and Supplies costs: Professional Services in particular, which received .3% inflation above the standard rate of 3%. The package increases General Fund by \$573, Other Funds by \$64 and Federal Funds by \$3,663.

3. **Staffing Impact** - None.

4. **Revenue Source** - General Fund is decreased (\$8,679), Other Funds are decreased (\$1,467,743) and Federal Funds are increased \$194,524.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT DEBT SERVICE PROGRAM

The Debt Service Program provides funding to make payments on principal, interest and financing costs for Certificates of Participation (COP) and Article XI-Q general obligation bond debt used to construct and upgrade Army National Guard facilities, and for acquisition of land and facilities

Certificates of Participation have been instrumental in constructing new Army National Guard facilities throughout Oregon. Facilities built with COP funding include the LaGrande Armory, the Salem Anderson Readiness Center, the Baker City Readiness Center, the Salem Flight Operations Facility, the Lane County Armed Forces Reserve Center, the Ontario Readiness Center and the Camp Withycombe Armed Forces Reserve Center.

In November 2010, Oregon voters authorized Article XI-Q bonds in the Oregon Constitution for capital projects, and these less-expensive instruments replaced COPs for new capital project debt issued after 2010. In the 2011-13 biennium, COP and XI-Q bond funding is being used to renovate the Milton-Freewater Armory and construct the Polk County Readiness Center and a new readiness center in The Dalles. In the 2013-2015 biennium XI-Q bonds are requested to enhance and extend the life of the Roseburg and Grants Pass armories, and to acquire and remodel Sharff Hall in Portland (a former Army Reserve facility).

State funding such as XI-Q bonds is required to match federal funds provided by the National Guard Bureau with regards to Major Construction Projects. The required percentage of state match varies depending on the type of facility being constructed. Also, there are certain items that are not allowable federal costs (e.g. land). The agency has a Capital Construction Other Fund cash account that is funded with proceeds from sales of property and interest, but it is insufficient to fund the entire state share of most of the major construction projects, especially the larger projects. Therefore, the agency has come to rely on bond funding.

Expected Results of the 2015-2017 Budget:

The Debt Service Program will continue to make required principal and interest payments on outstanding COP and bond debt on capital projects. New debt service for XI-Q bond funding requested in the 2015-2017 budget is requested in Policy Package 498.

Revenue Sources:

General Fund is used for all debt service except for the 2011-O and 2014-A Article XI-Q bond refunding of the 2004-A COP (Baker City Readiness Center) which is being funded with Other Funds armory rental revenue.

2015-2017

BUDGET NARRATIVE

Essential Packages:

022 - Phases out \$237,345 Other Funds limitation from the 2013-15 Legislatively Approved Budget for costs of issuance related to Article XI-Q bonds issued during the 2013-15 biennium. It does not pertain to new debt issued during 2015-17.

Policy Packages:

498 – New Debt Service - \$649,181 General Fund, \$198,000 Other Funds. **Modified by the Governor: removed debt service for the Joint Forces Headquarters project; increased debt service for the Regional Training Institute relocation and Youth Challenge facility expansion projects; and adjusted Other Funds limitation for bond issuance costs pertaining to these projects. Revised totals are \$1,113,787 General Fund, \$153,000 Other Funds. Not approved by Legislature: refer to Policy Package 840.**

840 – SB 5507 End of Session - \$283,340 General Fund, \$153,000 Other Funds. **Added by the Legislature with \$434,833 General Fund for new debt service on Article XI-Q bonds for the Joint Forces Headquarters replacement, net of \$151,493 debt service savings on three Q-bonds issued in 2015. It also approved \$153,000 Other Funds limitation for issuance costs relating to the Joint Forces Headquarters Article XI-Q bonds.**

Proposed New Laws - None.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
DEBT SERVICE PROGRAM
POLICY PACKAGE 840

1. Purpose– This Policy Package was added by the Legislature in SB 5507. It authorizes \$434,833 General Fund for new debt service on Article XI-Q bonds for the Joint Forces Headquarters construction project (approved in HB 5006). The new facility will be located in Salem near the Anderson Readiness Center. Two-thirds of the \$6.7 million in bonds will be sold in spring 2016 and the remaining one-third will be sold in spring 2017. The new debt service appropriation of \$434,833 relates to the spring 2016 bond sale. Another project approved with bond funding in HB 5006 is the Oregon Youth Challenge Program expansion. The bonds are slated to be sold in spring 2017, which will not impact debt service until the 2017-19 biennium.

This package also reduces General Fund by \$151,493 to account for savings in debt service costs on 2015-F series Article XI-Q bonds issued for the Baker City, Sharff Hall and Medford construction projects. The estimated debt service for this sale included in the 2015-17 Base Budget exceeded the actual debt service costs by \$151,493, in both principal and interest.

Lastly, this policy package adds \$153,000 Other Funds limitation to cover issuance costs of the Joint Forces Headquarters and Youth Challenge construction projects. These costs will be funded by bond proceeds.

2. How Achieved – General Fund appropriation is increased \$283,340, Other Funds is increased \$153,000.

3. Staffing Impact – None.

4. Revenue Source – \$283,340 General Fund, \$153,000 Other Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

Oregon Military Department – Capital Improvement Program – Executive Summary

Primary Outcome Area: Safety
 Secondary Outcome Area: Economy and Jobs
 Program Contact: Dave Stuckey, OMD Deputy Director (503) 584-3884

Program Overview

The Capital Improvement Program works to meet the critical requirements for housing units of the Oregon Army National Guard. The primary difference between the Capital Improvement Program (CIP) and the Capital Construction Program is the CIP performs projects with a total cost of less than \$1 million.

Agency Request
 Governor’s Budget
 Legislatively Adopted

2015-2017

Program Funding Request

The Legislatively Adopted Budget (LAB) for the Capital Improvement Program within the Oregon Military Department includes \$250,000 General Fund appropriation, \$194,377 Other Funds limitation and \$4,770,599 Federal Funds.

The primary purpose of this budget is to improve the overall condition of our facilities. The success of these projects will be reflected in future issuances of the Installation Status Report which identifies the adequacy of our facilities. The implications of having substandard facilities are severe, and would have a direct impact on the Governor’s Safety Strategy. This is due to the role Military Department facilities serve in response to natural and human made disasters, as well as the response role conducted by National Guard soldiers. If existing facilities are substandard they cannot effectively be used by local communities. Additionally the National Guard Bureau (NGB) may determine the facilities cannot support the assigned unit which may cause NGB to remove the unit from the state.

There is also an economic impact associated with this budget request. Capital Improvement projects bring high wage jobs into the state, as well as increased local investment through the purchase of goods and services. In addition, the potential loss of units due to inadequate facilities would result in reduced personal income tax collected as well as the investment made by units in the local economy.

Program Description

The Capital Improvement Program’s primary responsibility is to perform critical deferred maintenance projects across 3.3 million square feet of facility space. Typical capital improvement projects are key facility roof, structural, HVAC system, and building envelope (i.e. window and door replacement) projects. These deferred maintenance projects directly affect the operational readiness of Oregon National Guard facilities used for soldier and airmen training. Increasing levels of deferred maintenance also impact our tenants. Our statewide facilities serve a total tenant population of 10,611 made up of employees, students, BLM, State Police, USDF, OR Department of Veterans Affairs, the Coast Guard and many others. The majority of these tenants utilize our facilities on a daily basis, thereby requiring our staff presence daily. National Guard facilities also function as rental facilities for the general public. Due to this heavy use, providing regular maintenance as well as reducing deferred maintenance is a top priority for the Capital Improvement Programs.

To successfully mitigate issues associated with deferred maintenance, the Capital Improvement Program relies on partnerships. Many of these partnerships are the same as those the Operations Program relies on for success. We partner with Treasure Valley Community College, home to the Ontario Armory, and Western Oregon University, home to the Regional Training Institute. The Dalles Armory was recently constructed at the Columbia Gorge Community College providing a new partnership. We also partner with the Marine Corps Reserve, US Naval Reserve, US Bureau of Land Management and the US Forest Service in the operation of our Springfield Armed Forces Reserve Center. The Anderson Readiness Center located in Salem houses OEM, ODOT, LEDS and the State Police. OMD, ODOT and State Police have 24 hour operations in this facility. These are but a few of the many partners who provide critical funding to help finance regular maintenance at some of our facilities.

Agency Request Governor’s Budget Legislatively Adopted

2015-2017

For facilities which do not benefit from partnerships, the levels of deferred maintenance continue to increase due to the rising cost of regular maintenance. Current reports show the statewide deferred maintenance backlog at \$79 million. The issue of split funding and limited General Fund resources will impact the effectiveness of the Capital Improvement Program to reduce this figure.

The Capital Improvement Program has evaluated contracting out a variety of services including maintenance. The results of this inquiry have found contracting out to be more expensive and less responsive.

Program Justification and Link to 10-Year Outcome

The mission of the Oregon National Guard is to provide the citizens of the State of Oregon and the United States with a ready force of citizen soldiers and airmen, equipped and trained to respond to any contingency. “*When we are needed, we are there*” is our creed, and this creed supports the Governor’s safety vision of “Oregonians will be safe where they live, work and play”. The Capital Improvement Program is a support program which allows the Oregon National Guard to be ready to support local and national missions.

Deferred maintenance of critical facilities is the driving force behind the Capital Improvement Program. There is a direct nexus between resolving deferred maintenance issues and the Governor’s Safety Strategy 3.3, primarily the requirement for maintained and enhanced facilities to provide for adequate response to natural or human made disasters. Oregon National Guard facilities act as centralized points for the support of communities during a disaster. Our facilities can be utilized to act as Emergency Coordination Centers, food and supply distribution centers, a gathering place for displaced citizens, as well as the launch sites for National Guard support. The majority of our facilities are funded with a matching requirement, so the burden for maintaining these facilities is shared by both the state and federal government. This is an important point to realize as it directly affects our ability to successfully leverage critical federal resources.

In addition to the role as a Safety organization, the Oregon Military Department acts as an economic stimulator due to federal funding. The almost 9,000 Citizen Soldiers bring valuable Personal Income Tax revenue into the state. By successfully dealing with critical deferred maintenance issues the Capital Improvement Program is mitigating the risk of losing National Guard Units. The risk of the National Guard Bureau removing National Guard units from Oregon is very real if sufficient facilities are not available. It is essential to the citizens of the State of Oregon that this never happens, as the National Guard is the primary resource for the states response to both human made and natural disasters, and brings millions of federal dollars into Oregon communities.

Program Performance

The primary performance tool of the Capital Improvement Program is the Installation Status Report (ISR). The ISR categorizes the readiness of our facilities as being unsatisfactory, adequate or better. The 2013 ISR results for Oregon’s armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor

Agency Request Governor’s Budget Legislatively Adopted

2015-2017

condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor condition. While some improvement projects were executed, the slight improvement shown is a trend based upon the replacement of Armories through new construction, and changes in the ISR rating criteria established by the Army. A historical look at this metric is provided below. Another metric utilized by the Operations Program is the Percent of Available Armory Time Rented. During Fiscal Year 2012 approximately 28% of available armory time was rented. These metrics are utilized each year within the Annual Performance and Progress Report submitted to both the Chief Financial Office and the Legislative Fiscal Office.

Enabling Legislation/Program Authorization

The National Guard is authorized by the US Constitution Article I, Section 8 Clauses 15 and 16. The Oregon National Guard is authorized by Article X of the Oregon Constitution. The Operations Program is authorized by ORS Chapters 396, 398 and 399. Further Federal Authorization is provided by National Guard Regulation 5-1.

Funding Streams

The program is currently funded with Federal Funds (100%). In past biennia, the most recent being 2007-09, General Fund has been approved through the Legislature. The Federal Funds carry a match requirement of zero to 50 percent and come primarily from the National Guard Bureau. All Federal Funds are dedicated and subject to sequestration.

Significant Proposed Program Changes from 2013-15

The proposed budget for the Capital Improvement Program maintains the Current Service Level budget. The program is working to improve how it does business. This includes identifying the most critical facilities in need of refurbishment or replacement, as well continually aiming to maximize federal investment while minimizing state costs. **In addition to the Federal Funds limitation, the Legislature approved one-time General Fund**

2015-2017

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT CAPITAL IMPROVEMENTS PROGRAM

The Oregon Army National Guard has identified capital improvement projects for the 2015-17 Biennium critical to the requirements for housing military units and fulfilling the agency mission. The department has not received sufficient Armory Program General Fund for the last several biennia to adequately maintain armories and associated facilities. The backlog of maintenance and repair within the Army National Guard Facilities Operations and Maintenance Program is currently estimated at \$79M. In recent years this backlog has fluctuated from a high of \$110.6 million in 2007-09, to \$72.4 in 2009-11, and \$79 million currently. The reduction from the high point of \$110M was funded primarily by federal and State stimulus funding coupled with Armory Service Life Extension (ASLEP) projects. Since that point the Operations budget has been reduced each biennium eliminating the ability to fund maintenance and repair projects. The result has been a predictable increase in the backlog each biennium. The funded ASLEP projects in combination with federal project funds eliminate the backlog for specific facilities, leaving the majority of facilities unimproved. It is anticipated that this indicator of facility condition will continue to rise until sufficient state funds are available, as matching funds to the federal funds, to address maintenance and repair improvements.

Given significant General Fund reductions in armory operations, maintenance, supplies and services; as well as forecasted reductions, the most likely outcome will be a trend of increasing deferred maintenance and Emergency Board requests. The current 2015-17 funding level is virtually the same as the 1991-93 Biennium. Considering inflation, increases in fees, code related mandatory expenses, and an additional 1.3 million square feet of building space, it becomes apparent that the Army National Guard Facilities Operations Program cannot adequately maintain the current inventory of facilities. Within our eight maintenance regions, OMD continues to operate 28 Armories, 7 maintenance facilities, and 338 other facilities without a dedicated State Maintenance Worker. These facilities have part-time and mostly inadequate maintenance support.

The Installations Staff at the Oregon Military Department conducts an extensive annual analysis of all Oregon Army National Guard facilities. The analysis, titled "Installation Status Report" (ISR), is an annual requirement by the Department of the Army using standard Army-wide inspection and evaluation criteria. The ISR is a decision support system designed to improve management of our limited resources for facilities. The 2013 ISR results for Oregon's Armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor condition. While some improvement projects were executed, the slight improvement shown is a trend based upon the replacement of Armories through new construction, and changes in the ISR rating criteria established by the Army. Construction of the new The Dalles Readiness Center in early 2014 and the Armory Service Life Extension Project remodeling the Milton Freewater Armory, in conjunction with other federally funded projects has reduced deferred maintenance and contributed to improved ISR results.

2015-17

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT
CAPITAL IMPROVEMENTS PROGRAM

The projects that are expected to be completed in the 2015-17 Biennium are:

- Camp Withycombe Military Museum
- ASLEP project at Roseburg
- HVAC Replacement Project at JFHQ Salem
- Kliever Maintenance Shop Compound Improvement
- Statewide Lighting Replacement Project

Expected results for 2015-17:

The capital improvement program expects to have results that are measured by two Key Performance Measures: #2- Armory conditions and #3 Revenue Generation.

Revenue Sources:

Federal Funds are used for capital improvement projects. Other Funds for Policy Package 801 are donated funds from the Historical Outreach Foundation, a non-profit organization supporting the Oregon Military Museum.

Essential Packages:

022 - Phases out \$385,000 Other Funds limitation approved in the February 2014 legislative session to purchase property in Forest Grove. This is one-time limitation no longer required in 2015-17.

031 - Provides a general inflation increase for Services and Supplies costs. The package also adjusts State Government Service charges to reflect 2015-17 changes. The package increases Federal Funds \$139,295.

Policy Packages:

801 – LFO Analyst Adjustments - \$194,377 Other Funds to restore the Quartermaster Supply Building at the Oregon Military Museum at Camp Withycombe. **Added by the Legislature.**

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT CAPITAL IMPROVEMENTS PROGRAM POLICY PACKAGE 801

1. Purpose– This Policy Package was added by the Legislature. It adds \$194,377 Other Funds limitation to use donated funds from the Historical Outreach Foundation (HOF) to relocate and restore the historic Quartermaster storehouse building at the Military Museum compound at Camp Withycombe in Clackamas, Oregon. This building, constructed circa 1911 to receive and store military supplies at the camp, will be relocated and restored to its original design and become part of the museum’s exhibit space.

OMD has several Memoranda of Understanding with the HOF prescribing the purpose of various donations supporting construction of the Museum complex. Memorandum of Understanding #24800-15-0006 specifies that the \$194,377 donated funds are solely for restoration of the Quartermaster storehouse. Other monetary MOU’s with the HOF will serve as the basis for future legislative limitation requests.

2. How Achieved – Other Funds limitation of \$194,377 will allow OMD to perform the relocation and restoration work at the Quartermaster storehouse in accordance with contractual agreements.

3. Staffing Impact – None.

4. Quantifying Results – The results of this policy package can be quantified by the successful completion of the relocation and restoration of the Quartermaster storehouse.

4. Revenue Source – \$197,377 Other Funds.

Added by Legislature; included in the Legislatively Adopted Budget.

Oregon Military Department – Capital Construction Program – Executive Summary

Primary Outcome Area: Safety
 Secondary Outcome Area: Economy and Jobs
 Program Contact: Dave Stuckey, OMD Deputy Director (503) 584-3884

Program Overview

The Capital Construction program is responsible for the planning, design, and construction of all capital construction projects of \$1 million or more for the Oregon Army National Guard. Due to the nature of Capital Construction funds the above chart only indicates approval of Capital Construction expenditure limitation. Actual expenditures may take place for up to six years.

Agency Request
 Governor's Budget
 Legislatively Adopted
2015-2017

Program Funding Request

The Legislatively Adopted Budget (LAB) for the Capital Construction Program within the Oregon Military Department includes Capital Construction expenditure limitation of \$11,813,281 Other Funds and \$21,297,418 Federal Funds. The source of revenue for the Other Funds expenditure request is the issuance of Article Q General Obligation Bonds and the Capital Construction Account. The LAB includes limitation for design and construction to occur during the 2015-17 biennium, as well as limitation for planning costs which will result in physical construction in future biennia.

The primary purpose of this requested budget is to improve the overall condition of a number of our facilities. The success of these projects will be reflected in future issuances of the Installation Status Report which identifies the adequacy of our facilities. The implications of having substandard facilities are severe, and would have a direct impact on the Governor’s Safety Strategy. This is due to the role Military Department facilities serve in response to natural and human made disasters, as well as the response role conducted by National Guard soldiers. If existing facilities are substandard they cannot effectively be used by local communities. Additionally the National Guard Bureau (NGB) may determine the facilities cannot support the assigned unit which may cause NGB to remove the unit from the state.

There is also an economic impact associated with this budget request. Capital Construction projects bring high wage jobs into the state, as well as increased local investment through the purchase of goods and services. In addition the potential loss of units due to inadequate facilities would result in reduced personal income tax collected as well as the investment made by units in the local economy.

Program Description

The Capital Construction program (CCP) addresses the agency’s most critical facility shortfalls either through replacing facilities that are no longer capable of serving the needs of the assigned units, or extending the lifespan of facilities through alterations and additions.

Similar to the Operations Program, the CCP heavily utilizes the Installation Status Report as a guide to identifying which facilities across the state will need to be replaced or modified. Once a project has been identified the CCP will begin the development of the Design/Build contracting vehicle. The transition to the use of a Design/Build vehicle has led to more efficient use of project resources, increased the certainty of project budgets and dramatically reduced the risk of conflict and potential litigation.

When planning capital construction projects the Capital Construction Program utilizes a three pronged strategy. First, they look at the possibility of constructing an Armed Forces Reserve Center (AFRC). The value in this type of project is the agency can access federal funds for up to 90% of total design and construction costs. Second, the CCP will seek out partnerships with federal, state and local agencies to share in the functionality of our facilities. The primary building areas shared include the entrance areas, assembly halls, parking lots, restrooms, classrooms, break rooms and kitchens. The value this strategy provides is access to external funding from the partners for the construction and ongoing operating costs of the facility. This external funding is used as a portion of the matching requirements placed on the federal funds. Third, the CCP will attempt to identify

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted
2015-2017

excess real property and facilities which can be disposed of by the construction of a new facility. The proceeds from the disposal of these excess items go into our Capital Construction Other Funds Account and are used to help offset construction costs.

Since 1986 the Capital Construction program has executed 44 construction projects throughout the state bringing in combined federal support in excess of \$246 million. The ratio of federal support to state support for capital construction projects currently sits at 7:1. The Capital Construction Program has 18 projects identified on the National Guard Bureau Long-Range Construction Plan. Estimates indicate these projects will extend through 2030, bringing millions in additional federal support to Oregon.

Material and labor costs have been identified as the primary cost drivers for the program. After several years of declining costs for both these areas the industry has begun to experience mild increases in labor costs, and moderate increases in material costs. These trends are expected to continue, with most industry analysts predicting a 3-4% annual increase in labor costs, and a 5-7% annual increase in material costs for the next 3-5 years.

A fundamental component of the program strategy is the pursuit and utilization of partnerships in the communities affected. These partnerships with local entities ensure the agency is relevant to the local community, improves the ability of the unit assigned to the community to conduct their missions, and leverages our facilities into community assets, providing maximum value for the invested funds.

Program Justification and Link to 10-Year Outcome

The Capital Construction Program has a direct nexus to the Governor’s Safety Strategy 3.3. This strategy asks that “communities are prepared for and resilient to disasters and that Oregon maintains and preserves infrastructure to prevent the loss of life and property”. The facilities constructed by the Capital Construction program are utilized throughout the state during times of crisis. During the December 2007 Winter Storm and the January 2012 Floods the Anderson Readiness Center was fully operational and providing 24 hour support through the Emergency Coordination Center. This facility is also designed above and beyond current seismic safety standards to ensure it is operational in the aftermath of a major earthquake.

In addition the CCP enables the State of Oregon to address its responsibility to provide facilities that support the assigned citizen soldiers in the performance of their duties. Providing suitable facilities for the assigned units is imperative, as it enables them to train, store their equipment, and conduct their missions. Furthermore, if sufficient facilities are not available to meet the needs of the National Guard Units, the National Guard Bureau has the authority to remove those units from the state. It is essential to the citizens of the State of Oregon that this never happens, as the National Guard is the primary resource for the states response to both human made and natural disasters, and brings millions of federal dollars into the communities.

As stated above the Capital Construction Program has been responsible for bringing hundreds of millions of dollars of federal revenue into the Oregon economy in the last 25 years. In the last ten years alone this program has spent over \$230 million on construction projects throughout the state. This investment cannot help but have the effect of enhancing local and domestic markets, which is a clear expectation within the Economy and

_____ Agency Request _____ Governor’s Budget X Legislatively Adopted
2015-2017

Jobs Policy Document. The investment made by this program also leads to the retention and development of high paid construction and consulting jobs throughout the state. There is a clear expectation within the Economy and Jobs Policy Document that the retention and development of these types of skilled positions needs to be a top priority for building a strong, diverse and globally engaged economy.

Program Performance

A primary tool utilized by the Capital Construction Program to gauge program performance is the Installation Status Report (ISR). The ISR categorizes the readiness of our facilities as being unsatisfactory, adequate or better. Based on the Fiscal Year 2013 ISR 39.4% of our major facilities are in overall good condition. Another metric utilized by the Capital Construction Program is the Percent of Available Armory Time Rented. While the Capital Construction Program is required to construct facilities to meet certain National Guard Bureau requirements, they do so while trying to enhance the marketability of the structure. This makes them more valuable to community due to the traffic associated with major events which can be held inside our installations.

Enabling Legislation/Program Authorization

The National Guard is authorized by the US Constitution Article I, Section 8 Clauses 15 and 16. The Capital Construction Program is a division within the Oregon Military Department authorized under Article X of the Oregon State Constitution. The program is further authorized under ORS Chapters 396 and 399. Federal Program Authority is authorized by National Guard Bureau (NGB) Military Construction Cooperative Agreements (for each federally funded project), based on the 415 series of regulations.

Funding Streams

The program has historically been funded with Other Funds (19%) and Federal Funds (81%). Over the last ten years, Federal funds were provided through the Military Construction (MILCON) program. Other Funds have been sourced from the agency's Capital Construction Account or through the use of Certificates of Participation (now Article XI-Q bonds) sold by the state. The Capital Construction Account is prescribed by ORS 396-525, which requires the agency to deposit revenue generated from the sale of its real property into the account, and restricts the use of the account to the department's capital construction expenses. Both the Other Funds and Federal Funds sources of revenue are dedicated.

Significant Proposed Program Changes from 2013-15

The proposed budget for the Capital Construction Program is an enhancement over the program's Current Service Level budget. Statewide budget policy requires removal of Capital Construction Limitation from the base budget in the subsequent biennium. Due to this nuance there is no 2015-17 Current Service Level budget within the Capital Construction Program. The program is not shifting resources to new activities, but it is working to improve how it does business. This includes identifying the most critical facilities in need of refurbishment or replacement, as well continually try to maximize federal investment while minimizing state costs. To this end several new capital construction projects being considered for the 2015-17 biennium. Refer to the Major Construction section of the budget document for more details on future capital construction projects.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT MAJOR CONSTRUCTION / ACQUISITION PROGRAM

The Oregon Military Department through the Oregon Army National Guard has three points in its strategy for funding and reducing the cost of facility replacements. First, by emphasizing construction of Armed Forces Reserve Centers (AFRCs) wherever possible, the agency can access federal funds for approximately 90% of the design and construction costs, and at the same time, eliminate old and obsolete facilities having high maintenance costs. Accessing the federal funds requires a relatively small percentage of state matching funds. Second, the agency is partnering with federal, state, and other agencies to share common functions of a facility, such as entrance areas, assembly halls, parking lots, restrooms, classrooms, break areas, and food service areas. This reduces the design and construction costs, and reduces the long-term operations and maintenance burden of each agency. Third, the agency is working to identify facilities and real property that are excess to the agency. These facilities and properties will be disposed of and the funds that are generated from their disposal will be added to Oregon Military Department's (OMD) Major Construction Other Funds Account.

The Installations Staff at the Oregon Military Department conducts an annual inspection of every facility and real property asset. The inspection titled "Installation Status Report" (ISR) is an annual requirement by the Department of the Army using standard Army-wide inspection and evaluation criteria. The ISR is a decision support system designed to improve management of our limited resources for facilities. The 2013 ISR results for Oregon's armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor condition. While some improvement projects were executed, the decrease of substandard readiness centers was due to changes in the ISR rating system.

Due to a decline in state and federal operations and maintenance resources, the agency is vigorously pursuing replacement and consolidation of facilities, primarily through the use of Federal Military Construction Funds. Facility replacement is based on the following criteria: (1) Mission requirements and equipment changes; (2) Age and serviceability of existing facilities; (3) Demographics of localities, community acceptance, community sensibilities; (4) Funds availability; (5) Site availability; and (6) Joint use or partnership ventures.

We have developed a long range armory renovation plan in an effort to extend the useful life of our current facilities. The ISR classified the YCP facility as inadequate to facilitate desired classloads.

Our ability to generate Other Funds revenue through rental of armories is being eroded statewide due to the appalling condition of many of our armories. Our ability to generate and sustain a repeat customer-base is in jeopardy and will result in a decline of funds from rentals. Armory rental funds are used to partially offset facility operation and maintenance costs. Additionally, asbestos, lead contamination, and non-compliance with the Americans with Disabilities Act create a property management risk. The foundation for training and sustaining soldiers is having adequate facilities. The declining condition of our armory infrastructure has a direct and negative impact on recruiting, training, and retaining Oregon National Guard soldiers.

BUDGET NARRATIVE

Our facilities must be capable of supporting local communities during floods, storms, fires, and other emergencies. The requested funding will allow these facilities to continue to be used during emergencies and also by Oregon's communities in support of local economic development activities. We have analyzed the use of our armories and determined that over 30% of the total use is by the public in direct support of community economic development. These activities, such as trade shows, cultural events, and regional meetings, attract many visitors to the communities, bringing additional revenue to local businesses. Renovation of our facilities will reduce lost opportunities to earn revenue and will allow us to continue our mission of responding to local emergencies.

Since 1986 the Capital Construction program has executed 44 construction projects throughout the state bringing in combined federal support in excess of \$246 million. The ratio of federal support to state support for capital construction projects currently sits at 7:1. The Capital Construction Program has 18 projects identified on the National Guard Bureau Long-Range Construction Plan. Estimates indicate these projects will extend through 2030, bringing millions in additional federal support to Oregon.

Policy Package 499 (Priority 8) requests \$18,313,281 Other Funds limitation, including \$13,177,000 Other Funds limitation using Q Bond financing and \$5,136,281 Other Funds from the Capital Construction Account (\$5 million of which is expected during 2015-17 as proceeds from the sale of the Regional Training Institute in Monmouth). In addition, Policy Package 499 requests \$18,603,770 Federal Funds limitation for design and construction during the 2015-17 biennium. Projects include the Joint Forces Headquarters Addition (phase 1), the Regional Training Institute Relocation, and an Armory Service Life Extension Project at the Youth Challenge Program facility in Bend. We are also requesting limitation for planning costs on the Boardman Multipurpose Machinegun Range and Armory Service Life Extension Projects for McMinnville, Jackson (Portland) and Grants Pass. Refer to the project narratives for more detailed descriptions of each construction project.

The Governor modified POL 499: removed limitation for the Joint Forces Headquarters project; increased bond revenue for the RTI replacement project from \$1,494,000 to \$6,500,000, and increased the expenditure limitation for the RTI from \$6,494,000 to \$11,500,000. The revised totals in the Governor's Budget for POL 499 are \$16,613,281 Other Funds and \$140,770 Federal Funds.

The Legislature approved a total of \$11,813,281 Other Funds and \$21,297,418 Federal Funds for the following capital construction projects:

- **\$6,700,000 Other Funds and \$18,463,000 Federal Funds for the Joint Forces Headquarters project;**
- **\$4,977,000 Other Funds for the Oregon Youth Challenge Program expansion;**
- **\$1,943,648 Federal Funds for the Medford Armory Service Life Extension Program;**
- **\$750,000 Federal Funds for Baker City Readiness Center; and**
- **\$136,281 Other Funds and \$140,770 Federal Funds for Planning and Predesign.**

MAJOR CONSTRUCTION/ACQUISITION PROJECT NARRATIVE

Project Title Joint Forces Headquarters Addition (Phase 1)		Land Use/Zoning Requirements Satisfied				Estimated Completion Date: December 2017
Project Address/Location Salem	<input checked="" type="checkbox"/> New <input type="checkbox"/> Addition <input type="checkbox"/> Remodel	Yes	X	No		Priority: 1
		Comments:		Comments:		No. of Floors/Square Footage: 2 / 59,000

Narrative

This request provides funding for planning, design and construction of a new Joint Forces Headquarters building located in Salem. This facility would create additional space for units and activities currently located in the Owen Summers building, also located in Salem. Since this facility's original construction, there has been a significant shift in federal program management from the National Guard Bureau to the states. The shift in the responsibility for the management of these programs has significantly increased the number of federal employees assigned to the state's Joint Forces Headquarters. This facility is currently inadequate for the number of assigned personnel, and is 86,982 square feet short of the current federal requirement. In order to adequately support assigned personnel, additional space is required. Currently, personnel are displaced at temporary locations away from the facility, creating gross inefficiencies in the performance of the critical missions of the agency. The estimated net additional cost to operate and maintain the new facility is \$21,091 General Fund per biennium. State funds required for construction are not available in the Major Construction Other Funds Account.

	Provision for Future Expansion	Structural Framing: Steel / Wood	Flooring: Tile / Concrete / Carpet
	Yes	Exterior Walls: Brick Veneer / Block	Heating/Cooling: Gas / Heat Pump
	Provisions for Use Change	Interior Finish: Gypsum Drywall / Block	Special Equipment:
	Yes	Windows: Low-E Glazing	Usable Unenclosed Areas: Yes

The Governor did not recommend this project. Legislature approved \$6,700,000 Other Funds (Q-bonds) and \$18,463,000 Federal Funds.

MAJOR CONSTRUCTION/ACQUISITION PROJECT NARRATIVE

Project Title Regional Training Institute (RTI) Relocation		Land Use/Zoning Requirements Satisfied				Estimated Completion Date: December 2018
Project Address/Location: Umatilla	<input type="checkbox"/> New <input checked="" type="checkbox"/> Addition <input checked="" type="checkbox"/> Remodel	Yes	X	No		Priority: 2
		Comments:		Comments:		No. of Floors/Square Footage: 2 / 59,920

Narrative

This request provides funding for planning, design and construction of major additions and alterations to facilities at Camp Umatilla, located in Umatilla. The 2013 Legislature approved the sale of the current Regional Training Institute (RTI) facility to Western Oregon University, and the relocation of the assigned units and activities to Camp Umatilla. The revenue from the sale of the existing facility would offset most of the cost to accomplish this relocation (\$5M of the \$6.494M request). The Agency intends to add 2,500 SF and alter and update 42,000 SF of existing facilities at Camp Umatilla to accommodate their use by the school.

	Provision for Future Expansion	Structural Framing: Steel / Wood	Flooring: Tile / Concrete / Carpet
	Yes	Exterior Walls: Brick Veneer / Block	Heating/Cooling: Gas / Heat Pump
	Provisions for Use Change	Interior Finish: Gypsum Drywall / Block	Special Equipment: Arms Vault / Distance Learning / Kitchen
	Yes	Windows: Low-E Glazing	Usable Unenclosed Areas: Yes

The Governor increased bond funding for this project from \$1,494,000 to \$6,500,000. Adding expected sale proceeds of the current RTI facility of \$5,000,000 brings the total Other Funds limitation and funding for this project to \$11,500,000 in the Governor's Budget.

This project was not approved by the Legislature.

		Comments:		Comments:		No. of Floors/Square Footage: 1 / 23,200

Narrative

This request provides funding for planning, design and construction of major additions and alterations to facilities that house the Youth Challenge Program (YCP), located in Bend. This project would provide alterations and additions to the existing facility in order to accomplish two purposes. First the added square footage will accommodate a significant increase in student enrollment, from the current maximum class size of 156 students to 240 students (an increase of 84 students per class cycle). Secondly; this square footage will serve as the agency’s Continuity of Operations (COOP) site. This COOP site will serve as a place for Agency command and senior staff to assemble and conduct command and control activities in response to a natural or manmade disaster. State funds required for construction are not available in the Major Construction Other Funds Account.

Provision for Future Expansion Yes	Structural Framing: Steel / Wood	Flooring: Tile / Concrete / Carpet
	Exterior Walls: Brick Veneer / Block	Heating/Cooling: Gas / Heat Pump
Provisions for Use Change Yes	Interior Finish: Gypsum Drywall / Block	Special Equipment: Kitchen
	Windows: Low-E Glazing	Usable Unenclosed Areas: Yes

The Governor recommended this project. Included in the Legislatively Adopted Budget at \$4,977,000 Other Funds (Q-bonds).

Narrative

This request provides funding for planning and pre-design activities to prepare for the design and construction of a Multipurpose Machinegun (MPMG) Range at the U.S. Navy’s Boardman Range Complex. This critical range will meet an immediate and long term need to train on live-fire ammunition ranges, which are currently not available in Oregon. This is a high priority readiness initiative, and is essential to meeting the training requirements of the Oregon National Guard. Operation and maintenance of the facility would be 100% federally funded. State funds required for construction are not available in the Major Construction Other Funds Account.

MAJOR CONSTRUCTION/ACQUISITION PROJECT NARRATIVE

Project Title Armory Service Life Extension Plan (McMinnville)		Land Use/Zoning Requirements Satisfied				Estimated Completion Date: May 2018	
Project Address/Location McMinnville	<input type="checkbox"/> New <input checked="" type="checkbox"/> Addition <input checked="" type="checkbox"/> Remodel	Yes	X	No			Priority: 5
		Comments:		Comments:		No. of Floors/Square Footage: 1 / 18,553	

Narrative

This request provides funding for the planning and pre-design activities to prepare for additions and alterations to the McMinnville Armory. The existing armory was constructed in 1978 and is in a state of total decline. Severe deficiencies in the electrical, mechanical, and structural components of this facility threaten its continued use for its intended purpose. The facility is more than 15,000 square feet short of the current federal requirement. This critical space shortage has resulted in an unproductive training environment, improper storage of sensitive items, premature aging of mission essential equipment and overcrowding. More than ever, our young men and women serving as citizen soldiers need facilities that adequately meet the training requirements needed to fulfill their homeland defense and world wide missions. The agency anticipates an increase in rentals as a result of this project. Funds from rentals would be used to partially offset facility operation and maintenance costs. A review of the long range federal funding forecast indicates that no federal funds will be available to replace this facility in the foreseeable future. State funds required for construction are not available in the Major Construction Other Funds Account.

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT FACILITIES MAINTENANCE NARRATIVE

OMD Operations and Maintenance Program & Funding: The Army National Guard Facilities Operations and Maintenance Program provides operation, maintenance, repair, and alteration support for Oregon Army National Guard facilities. The program is supported by a variety of state and federal funding match rates. The Oregon Military Department owns 122 of the state's facilities with a replacement value of \$1 million or greater. The agency also owns and operates another 273 smaller facilities throughout the state for a total of 395 facilities comprising nearly 3.3 million square feet.

Army National Guard Facilities Operations and Maintenance funding of facilities:

Readiness Centers (Armories) – The Operations Program maintenance employees, maintenance and repair projects as well as supplies and services are 50% GF / OF and 50% FF. Major projects are also generally 50% federally funded as allowed by the Federal/State Cooperative Agreement.

Ranges and Training Land – The program is 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support firing ranges, range support buildings and the wages for federally reimbursed employees.

Training Facilities – These facilities are 100% federally funded through a NGB Federal/State Cooperative Agreement. There are no required matching funds. The funds may only be used to support designated facilities.

Logistical Facilities – These facilities are funded 75% federal / 25% state through a NGB Federal/State Cooperative Agreement. State matching funds are received from the General Fund. The federal funds may only be used to support designated facilities.

Facility Inspections: The Installations Staff at the Oregon Military Department conducts an annual inspection of every facility and real property asset. The inspection titled “Installation Status Report” (ISR) is an annual requirement by the Department of the Army using standard Army-wide inspection and evaluation criteria. The ISR is a decision support system designed to improve management of our limited resources for facilities. The 2013 ISR results for Oregon's armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor condition. While some improvement projects were executed, the slight improvement shown is a trend based upon the replacement of Armories through new construction, and changes in the ISR rating criteria established by the Army.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

Estimating Deferred Maintenance: In addition to the Installation Status Report annual inspections, Oregon Military Department Operations and Maintenance staff also conducts an annual inspection to validate / update deferred maintenance needs. The backlog of maintenance and repair within the Army National Guard Facilities Operations and Maintenance Program is currently estimated at \$79 million. The reduction from the high point of \$110.6 million resulted primarily from federal and state stimulus funding coupled with Armory Service Life Extension (ASLEP) projects. Since that point the Operations budget has been reduced each biennium, eliminating the ability to fund maintenance and repair projects. The result has been a predictable increase in the backlog each biennium. The current calculated deferred maintenance resulted from a thorough inspection completed over the last several months. When deficiencies or needs are identified we utilize multiple sources to calculate costs. The Operations and Maintenance Branch has in-house staff trained to utilize RS Means estimating resources. Manual methods also include Internet research to price materials and BOLI labor rates to complete cost calculations. Additionally, cost calculations include comparisons with bids for current projects as well as Architectural & Engineers estimates.

Funding vs. Deferred Maintenance: Given significant General Fund reductions in armory operations, maintenance, supplies and services, as well as forecasted reductions, the most likely outcome will be a trend of increasing deferred maintenance and Emergency Board requests. The 2015-17 funding level is virtually the same as the 1991-93 Biennium. Considering inflation, increases in fees, code related mandatory expenses, and an additional 1.3 million square feet of building space, it becomes apparent that the Army National Guard Facilities Operations Program cannot adequately maintain the current inventory of facilities. Within our eight maintenance regions, OMD continues to operate 28 Armories, 7 maintenance facilities, and 338 other facilities without a dedicated State Maintenance Worker. These facilities have part-time and mostly inadequate maintenance support.

The Army National Guard Facilities Operations and Maintenance Program continues to function with the mission of operating our under-funded facilities in the most cost-effective manner. The Operations and Maintenance Program has taken advantage of every opportunity to obtain federal funding to support the efficient operation of State of Oregon owned facilities and land. The National Guard Bureau completed a comprehensive facilities maintenance manpower requirement study for each state. The study thoroughly analyzed the type and amount of facilities operated by each state. The study then determined the number of employees required by skill type to operate and maintain the facilities based on a validated Department of Defense formula. The study determined the Oregon Army National Guard Facilities Operations and Maintenance Program requires 306 full-time equivalent (FTE) employees to operate and maintain our facilities to an acceptable level. The program currently has 117.11 FTE to support Oregon's large investment in Army National Guard facilities. Of these FTE, 10.98 are General Funded while 25.99 are Other Funded and 80.14 are federally reimbursed employees.

Maintenance Management System: The primary computer program supporting the Facilities Operations and Maintenance Program is the Army National Guard's Planning Resource for Infrastructure Development and Evaluation (PRIDE) program. This federally funded program provides our Computerized Maintenance Management System, the real property database and programming module for federal project funding. As new facilities

Agency Request Governor's Budget Legislatively Adopted

2015-2017

BUDGET NARRATIVE

or lands are loaded into PRIDE, they become available in the maintenance module to load inventory of building systems and components. Manufacturer maintenance schedules are utilized to generate “planned” preventive work orders. The Oregon Military Department currently generates over 1,200 planned work orders per week. Our current \$79 million backlog of operations, maintenance, and repair is projected to increase as we continue to catalog facility assets and input the corresponding preventative maintenance requirements into our PRIDE database.

Operations and Maintenance Focus for the Future: The Oregon Military Department dedicates a great deal of staff time to meeting the robust federal reporting requirements as well as the DAS reporting requirements. Current workload versus staffing levels and reporting requirements have resulted in a shortage of planning time. An identified planning priority is to calculate life-cycle cost replacement and scheduling. Calculation of equipment, systems and component replacement scheduling and cost will allow OMD to project future costs by biennium. Of primary concern is the ability to sustain current infrastructure.

	\$ 8,176,895	\$ 76,792,211				

Briefly describe the software (or manual process) used to identify routine (including preventative) facility maintenance needs.

The primary computer program supporting the Facilities Operations and Maintenance Program is the Army National Guard's Planning Resource for Infrastructure Development and Evaluation (PRIDE) program. This federally funded program provides our Computerized Maintenance Management System, the Desktop Resource for Real Property and provides a project management system. As new real property is entered into PRIDE, it becomes available in the maintenance module to load inventory of building systems and components.

The maintenance module of PRIDE is Facility Center and is the electronic maintenance management software package utilized by Operations and Maintenance. Manufacturers recommended maintenance schedules are utilized to generate "planned" preventive work orders. The Oregon Military Department currently generates over 1,200 planned work orders per week. Demand work orders and purchase requisitions are also generated in Facility Center by maintenance staff located throughout the state.

Planned work orders are preventive in nature, and schedule the State Maintenance Workers tasks for everything from routine janitorial/custodial, landscaping, roof maintenance to mechanical systems maintenance. This is the system the OMD uses to identify and schedule preventive maintenance tasks by facility.

FACILITIES MAINTENANCE SUMMARY REPORT

What data elements do you track with software (or manual process) described above?

A Facility Center work order identifies the facility by a number generated by PRIDE, as reflected in the Facility Inventory & Support Plan (FISP)). Both PRIDE and FISP are National Guard Bureau required databases. In addition to the systems generated work order number, the work order identifies the State Maintenance Worker initiating the request, the priority, contact information; the system and task numbers as well as a complete description of the work. When the work order is completed and closed the maintenance workers time and final cost are accounted for.

Other data elements tracked:

- Shelf stock inventory

- Monthly and quarterly reports to include required safety inspections

- Track maintenance of "tagged" assets, fixed assets or Installed Building Equipment. Among these would be boilers, HVAC units, overhead cranes, fire extinguishers etc.

- Completed vs. un-completed work orders to ensure adequate maintenance of assets

- Vehicle maintenance

Briefly describe how the facilities maintenance budget is developed (note whether software (or manual process) described above is used in budget development).

The facilities maintenance budget is a derivative of both the State and Federal budgets. In both cases facilities maintenance budget becomes whatever is left over after Personnel and Utilities are funded. Any increases in facilities maintenance are accomplished through either mid-year plus-ups to the federal budget or Legislatively adopted Policy Packages in the state budget. As described below there is a reliance on our Other Fund revenue generation to pay our way through each biennium. Requirements unable to be funded become deferred maintenance or repair requirements.

State funding continues to hamper efforts to adequately maintain existing facilities. Current funding level in General Funds is **\$1,971,689** to support **3,348,188** Square feet of facilities. Facility operational expenses are averaging **\$5.45** a square foot. OMD has **908,250** Square feet of facilities that rely solely on GF for support. At **\$5.45** the requirement is **\$4,949,962**. The 2013-15 Budget, after personnel costs, is **\$1,971,689** leaving a deficit of **\$2,978,273**. This impact of this deficit includes the **inability to provide matching funds allowing expenditure of federal program funds**. This situation continues to exacerbate an already difficult budget posture. Until this State GF deficit is addressed the **Oregon Military Department will continue to see its facilities degrade** and be unable to bring federal resources to bear on the problem.

This situation described above is not optimal. There is no set funding level for facilities maintenance. What facilities maintenance is funded; fully depends on what is left after funding personnel and utilities. There are no other viable options. Both people and utilities must be funded. The result is biennium to biennium there is less funding per square foot for maintenance.

Agency Request Governor's Budget Legislatively Adopted

2015-2017

J:\17 Budget\LAB\Facilities Maintenance\107bf16a.docx

107BF16a

FACILITIES MAINTENANCE SUMMARY REPORT

Briefly describe the system or process used to identify Deferred Maintenance (e.g.; staff makes an annual estimate based on periodic assessments; evaluation of facilities using contract structural engineering firm, etc.)

The Installations Staff at the Oregon Military Department conducts an annual inspection of every facility and real property asset. The inspection titled "Installation Status Report" (ISR) is an annual requirement by the Department of the Army using standard Army-wide inspection and evaluation criteria. The ISR is a decision support system designed to improve management of our limited resources for facilities. The 2013 ISR results for Oregon's Armories are as follows: 39.4% of the total facilities infrastructure is in compliance with Army standards and in overall good condition, 55.3% do not fully meet Army standards and are in overall poor condition, and 5.3% are in overall very poor condition. The 2012 ISR results reflected that 37.8% met Army standards, 56.8% were adequate and 5.4% were in very poor condition. While some improvement projects were executed, the slight improvement shown is a trend based upon the replacement of Armories through new construction, and changes in the ISR rating criteria established by the Army.

Estimating Deferred Maintenance: In addition to the Installation Status Report annual inspections, Oregon Military Department Operations and Maintenance staff also conducts an annual inspection to validate *I* update deferred maintenance needs. The current calculated deferred maintenance of \$79 million resulted from a thorough inspection completed over the last several months. When deficiencies or needs are identified we utilize multiple sources to calculate costs. The Operations and Maintenance Branch has in-house staff, trained to utilize RS Means estimating resources. Manual methods also include Internet research to price materials and BOLI labor rates to complete cost calculations. Additionally; cost calculations include comparisons with bids for current projects as well as Architectural & Engineers estimates.

Briefly describe the process to provide funding for facilities maintenance. (e.g.; biennial appropriation; assessment to applicable programs to sustain a Capital Maintenance/ Improvement Fund authorized under ORS 276.285(2); etc.)

As stated above: The facilities maintenance budget is a derivative of both the State and Federal budgets. Funding in support of Real Property Operations and maintenance is through both the State biennial appropriation and federal funding on an annual fiscal year basis from National Guard Bureau. In both cases the facilities maintenance budget becomes whatever is left over after Personnel and Utilities are funded. Any increases in facilities maintenance are accomplished through either mid-year plus-ups to the federal budget or Legislatively adopted Policy Packages in the state budget. As described below there is a reliance on our Other Fund revenue generation to pay our way through each biennium.

FF Subtotal	\$26,629,290		\$18,709,217		\$26,468,600		\$30,757,281	
Total All Funds	\$30,886,205		\$24,292,025		\$30,953,400		\$35,512,236	

The Facilities Operations and Maintenance budget includes costs to operate and maintain facilities and keep them in repair including utilities, janitorial and maintenance costs. Maintenance costs are categorized as external building (roof, siding, windows, etc.); interior systems (electrical, mechanical, interior walls, doors, etc.); roads and ground (groundskeeper, parking lots, sidewalks, etc.) and centrally operated systems (electrical, mechanical, etc.). Agencies with significant facilities may include support staff if directly associated with facilities maintenance activities. Do not include other overhead costs such as accounting, central government charges, etc.

Y/N - If Y, how many times?	Purpose: L=Lifecycle Replacement; U=Upgrade existing system; N= New system	What Program or line of business does the project support?
Next Generation 9-1-1 Project	<p>The NG9-1-1 project is based on Internet Protocol (IP) transport, geographic information systems (GIS), new network functional elements, 9-1-1 CPE equipment at the PSAP, and in the data centers. The NG9-1-1 system will be based on digital broadband technology supporting voice, data, text, image, video, and multimedia applications on a secure, robust multipurpose network. By making the transition to a NG9-1-1 system, the State gains significant advantages over the existing E9-1-1 system, including:</p> <ul style="list-style-type: none"> • More Robust Feature Functionality • Enhanced Network Survivability and Resiliency • Improved Quality of Service • Faster Call Set-Up Times • Improved Alignment with Public Expectation for Text and Data • Improved Information Sharing and Interoperability Across PSAPs and Public Safety Agencies • Seamless Evolution with Technological Advancements in Modern Communications • Adaptability to the Unique Needs of PSAPs and Public Safety Agencies <p>The NG9-1-1 system in Oregon will provide a modern technology platform that will deliver more effective communication between the public and public safety agencies while providing for dynamic communications between PSAPs and the adaptability to meet future needs.</p> <p>Note: This spreadsheet is revised in the 2015-17 Legislatively Adopted Budget to reflect \$500,000 Other Funds limitation approved in Policy Package 301 for the conversion of the existing frame relay system to an Internet Protocol broadband network at all 43 Public Safety Answering Points. This is the first step in the Oregon State Chief Information Office's stage-gate process for the transition to NG9-1-1.</p>	7/1/2015	10/31/2016		\$500,000	\$500,000	POP	Initiation	No	New System	911 Program within the Office of Emergency Management

1 EXECUTIVE SUMMARY

Problem Statement

The Statewide Next Generation 9-1-1 Business Case concludes that the overall net cost/benefit of maintaining the existing 9-1-1 system is unacceptable and falls significantly short of providing the public with equal access to 9-1-1 emergency services that they expect and deserve. The legacy 9-1-1 system, while it has served the Nation reliably for decades, was largely built using circuit-switched infrastructure that does not support newer communications technologies and applications that the public is increasingly using for personal communications, such as sending text, images, and video. Much of the key infrastructure on which the legacy 9-1-1 system is built, is technologically obsolete and is increasingly vulnerable to failure.

For more than a decade, the National Emergency Number Association (NENA) has been developing national standards for the Next Generation 9-1-1 (NG9-1-1) system. The purpose of this work is to develop a set of open standards that define the preferred architecture for a NG9-1-1 system that meets the current needs of the public and emergency service community, and provides a smooth and uninterrupted transition from the legacy 9-1-1 system to a fully functional NG9-1-1 system. The importance of this effort has been acknowledged by the United States Congress in passing the Next Generation 9-1-1 Advancement Act of 2012 and the Twenty-First Century Communication and Video Accessibility Act.

Strategic Fit

The premise of this business case is that the OEM 9-1-1 Program is legislatively responsible for ensuring the seamless operation of the statewide Enhanced 9-1-1 system. It is further responsible for the continual coordination and management of the network necessary to deliver 9-1-1 calls, the customer premise equipment used by the Public Safety Answering Point (PSAP) to process those calls, and for consulting with and assisting local governments with the challenges faced in the delivery of and participation in the statewide Enhanced 9-1-1 emergency reporting system. OEM 9-1-1 cannot meet its primary responsibilities through continued reliance on existing 9-1-1 technologies. The public requires a 9-1-1 system that is capable of supporting voice, data, text, image, video and multimedia applications on a secure, robust multipurpose network. Existing 9-1-1 technologies simply cannot support these requirements. It is now an imperative that the State migrate this legacy 9-1-1 system to a Next Generation 9-1-1 system that is capable of meeting the needs of the public.

The NG9-1-1 Project is consistent with the goals and strategies contained within the Governor's 2010-15 Enterprise Information Resources Management Strategy. The recommended solution is fully funded by tax revenues collected on telecommunications services and via taking advantage of the emergence of a competitive 9-1-1 market for services the project will realize significant savings by utilizing a competitive request for proposals process. The multi-agency and shared services aspect of NG9-1-1 increases efficiency and interoperability throughout participating agencies while reducing IT complexity through the foundation of an open standard based system. A net result is improved citizen interaction with

government as NG9-1-1 opens up new ways for citizens of Oregon to request help from PSAPs throughout the state, increasing the safety of residents and public safety providers.

This project also directly supports the four (4) goals established in the current version of the OEM 9-1-1 Strategic Plan and the initiatives related to the statewide address repository project while integrating data into the Oregon Geospatial Data Library for the advantage of both PSAPs and other users.

Alternatives Analysis

Technology investments are complex but difficult decisions but must be made within the strategic context of the Oregon Government. This business case examined several alternatives for providing modern 9-1-1 services and consulted industry best practices to provide a comprehensive assessment of these alternatives before reaching a final conclusion. The approach taken in developing this business case is comprehensive and looked at both the financial and practical implications of providing the public with the most flexibility in reaching emergency services within the State of Oregon. It should be noted that the financial estimates are forecasts over a six year term and are based on technologies that are still evolving. Three alternatives were considered:

1. Maintaining the Status Quo
2. State Owned and Operated NG9-1-1 Network
3. Statewide NG9-1-1 System by Managed Service Provider

The benefits of a Next Generation 9-1-1 system are significant. By making the transition to a NG9-1-1 system, the State will gain several important advantages over the existing E9-1-1 system, including:

- Equal Access to Emergency Services
- More Robust Feature Functionality
- Enhanced Network Survivability and Resiliency
- Improved Quality of Service
- Faster Call Set-Up Times
- Improved Alignment with Public Expectation for Text and Data
- Improved Information Sharing and Interoperability Across PSAPs and Public Safety Agencies
- Seamless Evolution with Technological Advancements in Modern Communications
- Adaptability to the Unique Needs of PSAPs and Public Safety Agencies

Costs

It is estimated that the total project costs with a managed services contract, including Staff Administration, Legacy Costs, expenditures on consultants and contractors, and the contract with the NG9-1-1 Prime Contractor from July 1, 2014 to December 31, 2023, is projected to be \$146,078,568. More details about the projected costs can be found in Appendix D.

Conclusion and Recommendation

The technological inadequacies of the existing 9-1-1 system coupled with the clear need of the public to have equal access to emergency services from modern communication devices leaves the State with only one logical choice. The State must migrate from its legacy E9-1-1 system to a NG9-1-1 system. After considering all reasonable alternatives for providing NG9-1-1 services, the best approach for Oregon is

to provide NG9-1-1 through a managed service delivery model. Managed services is widely acknowledged as a best practice for providing IT services long-term and when the organization does not have the core resources to sufficiently provide the service. The NG9-1-1 managed services should be acquired through a competitive procurement that will result in a contract for the provision of a complete and fully functional NG9-1-1 system that meets the State's current and future needs. This business case seeks approval to enter into a managed services contract for the provision of a complete and fully functional NG9-1-1 system within the 2015 calendar year. Such managed services contract will be acquired through an open and fair competitive procurement for services in accordance with the State of Oregon's procurement processes. This NG9-1-1 system will be based on digital broadband technology to accept text messages, images, video, and other newer technologies such as automatic collision notification (ACN) and other sensor data as these technologies are deployed in the future.

Consequences of Failure to Act

If approval to migrate from the legacy 9-1-1 system to a NG9-1-1 system is not received, Oregon cannot provide equal access to emergency services that its citizens expect and need. Technological advances combined with public pressure for its emergency systems to keep pace with technology are driving a certain migration from legacy 9-1-1 to NG9-1-1. Oregon's failure to take the lead in planning an orderly migration will place the burden on its PSAPs to make the migration independently. This will result in a chaotic migration that results in dissimilar emergency services across the state. Failure to act increases risks to the State, public and the emergency responder community, and is not in keeping with best practices for delivering 9-1-1 services to the community.

2 PURPOSE AND BACKGROUND**2.1 Purpose**

The E9-1-1 system in place in Oregon providing emergency call response to citizens and visitors is built on end of life products and technology and does not provide the reliability and availability that is necessary and expected. In addition, the current system is unable to support the communications products the public now uses such as texting and data distribution. Finally, the cost for simply maintaining the current system will continually increase.

This business case fully describes the current systems and the alternatives the OEM 9-1-1 has researched to bring forward recommendations to act. It details the due diligence performed by members of the OEM 9-1-1 staff and PSAPs throughout the state. This Business Case makes a clear recommendation and provides a strong business justification for the investment required to implement the preferred alternative.

2.2 Background

Factors driving the Project: Originating Service Providers (OSPs) operating in the state are responsible for routing 9-1-1 calls made by their subscribers to the E9-1-1 system. The E9-1-1 system has two primary components;

1. The network and E9-1-1 call routing infrastructure, and
2. The systems at PSAPs that are used to accept the calls and begin the process of responding to the emergency.

The network and E9-1-1 call routing infrastructure is purchased as a managed service. None of these assets are owned, operated, or maintained by the state. The call handling systems are procured via commercial agreements that include a maintenance agreement. The driving force behind the project being evaluated by the OEM 9-1-1 is the manufacturers' end of life status of many of the components used in the current E9-1-1 system. These components include;

1. The 9-1-1 call switching systems known as selective routers.
2. The call taking equipment used by a PSAP to answer E9-1-1 calls.
3. The systems used by PSAPs to provide mapping of E9-1-1 calls.
4. The analog network used to deliver calls from the selective routers to the call handling systems at the PSAPs.

Since an improvement in the E9-1-1 system is required, the OEM 9-1-1 made the decision to evaluate alternatives to upgrading and updating the existing system. In June 2011, the National Emergency Number Association (NENA) released the first version of a set of technical standards defining a NG9-1-1 system. The OEM 9-1-1 staff participated on several of the committees that developed these standards. The OEM 9-1-1 staff also monitored the acceptance of the standards in the market place and other states that have chosen to begin their migration to NG9-1-1. The OEM 9-1-1 also took note of the legislation and regulatory action taken by the federal government in support of the migration to NG9-1-1.

The OEM 9-1-1 concluded that an investment in the migration to NG9-1-1 was an alternative that should be considered. The OEM 9-1-1 has led the evaluation effort which has included active participation by the PSAPs in the state. This evaluation has included a study conducted by LR Kimball, the release of a Request for Information (RFI) and the evaluation of responses, and the creation of a draft Request for Proposals (RFP). Background related to the evolution of 9-1-1 including NG9-1-1, a more detailed description of the efforts undertaken by the OEM 9-1-1, and a description of federal activity in support of the migration to NG9-1-1 can be found in Appendix A.

Current State - Operational: The current E9-1-1 system operates much as it has for the past 40 years. There are two Incumbent Local Exchange Carriers (ILECs) that provide E9-1-1 services to the PSAPs. Centurylink and Frontier offer these services as the E9-1-1 System Service Providers (SSPs). Each of the two SSPs operates in specified geographical areas. PSAPs are served by the SSPs. The two SSPs interconnect to provide a state-wide system. Operating as the SSPs, they provide E9-1-1 call handling and mapping systems as well as E9-1-1 call routing and network services. Call handling and mapping services are generally offered under a commercial agreement. E9-1-1 call routing services are currently offered on a tariff basis.

For the regulated services provided by the SSPs, the Oregon Public Utilities Commission (OPUC) has oversight responsibility for the fees charged. Setting fees associated with regulated services requires a standard rate-case process. The OPUC also has regulatory oversight of all OSPs operating in the state with the exception of wireless and internet. The OPUC has established requirements within the regulations for wire line carriers to interconnect to the E9-1-1 system. Interconnection requirements for the wireless and VoIP service providers are established at a federal level by the Public Safety and Homeland Security Bureau (PSHSB) of the Federal Communications Commission (FCC). All OSPs have an obligation to deliver calls initiated by their subscribers dialing the digits 9-1-1 to the appropriate SSP and provide the location of the citizen making the call. The PSAP responsible for taking the call is determined by the location of the caller. The regulations established governing the roles and responsibilities of both the SSPs and the OSPs have been in place for a number of years and enjoy a high level of compliance. Challenges to the regulations established by the OPUC are rare; however, challenges to regulations proposed by the PSHSB are frequent. PSHSB regulations concerning the accuracy of determining the subscribers location when an 9-1-1 call is made, the communications products and services that are obligated to deliver calls to the E9-1-1 system, and the party that assumes the financial burden for delivering E9-1-1 calls have all recently been contested and continue to evolve.

Emergency Communication Districts (ECD) in Oregon are established to oversee emergency communication services in their jurisdiction. These ECDs make policy level decisions and approve major purchasing decisions such as call handling and mapping systems. PSAPs have responsibility for making operational decisions and have a great deal of latitude in purchasing decisions related to call handling systems.

The OEM 9-1-1 is charged with providing leadership in all areas of 9-1-1. In this role, the OEM 9-1-1 interacts primarily with the SSPs and the PSAPs. The OEM 9-1-1's interaction with the SSPs has focused on E9-1-1 call routing, and delivery to the PSAPs. The nature of the interaction reflects the monopoly position held by the SSP. The OEM 9-1-1 monitors the performance of the SSPs and is involved in decisions related to changes in the network. However, with respect to the regulated services provided by the SSPs, the OEM 9-1-1 has little direct control over the services provided. The interaction between the OEM 9-1-1 and the PSAPs reflects the relative independence of the PSAPs. The OEM 9-1-1's interaction with the PSAPs is focused on the financial structure of E9-1-1 that will be discussed in the following section. The OEM 9-1-1 currently has a staff of seven.

The OEM 9-1-1, the PSAPs, the SSPs, the OSPs, and the PSHSB are all in alignment when it comes to their collective mission; to ensure that citizens and visitors of Oregon can depend on the E9-1-1 system to get emergency calls to a first responder that can help. Above all else, this project is focused on this mission.

Current state – Financial: The source of funding for the E9-1-1 system comes from a tax on all telecommunications services provided in the state. The OSPs include a \$0.75 tax on every monthly bill for service they send to subscribers. The OSPs collect this tax and remits it quarterly to the Department

of Revenue (DOR) which is paid to the state treasurer. Prepaid telecommunications services are required to pay the same tax; however, this fee is collected at the point of sale. The taxes collected are placed in the Emergency Communications Account and then appropriated to the OEM 9-1-1.

DOR is compensated for the services they provide. On a quarterly basis funds are deducted to cover the Department of Revenue's expenses. The legislature has set a cap on the amount DOR can be reimbursed for this responsibility. This cap is 0.5% of the quarterly revenue collected, but will increase to 0.75% on 1/1/15. The OEM 9-1-1 staff administrative costs are also paid for out of this account. The legislature has set a cap of 4% for use by the OEM 9-1-1 for staff administrative services. 35% of the total amount appropriated to the OEM 9-1-1 is then transferred to the Enhanced 9-1-1 Subaccount. All remaining funds are then distributed on a per-capita basis to the ECDs, 60.5% is distributed. Funds from the Enhanced 9-1-1 Subaccount are also used to reimburse the PSAPs for other expenses they incur. Quarterly expenditures out of the Enhanced 9-1-1 Subaccount have been less than the quarterly income. The excess funds have been used to pay for costs related to this project; however, not all excess funds have been used. As a result, the Enhanced 9-1-1 Subaccount has a growing balance.

Current state – Architectural: The current E9-1-1 system in the State follows the standards developed by the Bell Labs in the 1960s. The system has been operating at an acceptable level with only small number of major outages in the last 5 years.

In the E9-1-1 system, OSPs recognize that a subscriber has dialed the digits 9-1-1. The OSP determines the location of the caller and delivers the call and the location information to the appropriate selective router. The SSP operating that selective router then, based on the callers location, delivers the call to the PSAP designated to handle calls for the caller's location. This basic call flow is used for traditional wire line calls, calls from wireless devices, and calls from subscribers of VoIP services. In each of these cases there are some differences in the actual call flow primarily driven by the mechanism used by the OSP to determine the subscriber's location and the use of the caller's location for call routing and handling at the PSAP. Appendix B provides a more detailed description of the current E9-1-1 system.

As noted previously, the current E9-1-1 architecture has a number of limitations that cannot be addressed even with additional investment. For example, when a call gets delivered to a PSAP call taker, notes are taken and entered into the system. If the call has originated from a subscriber in a motor vehicle that is moving, the subscriber may enter into a different jurisdiction and the call may need to be transferred to a different PSAP that now has jurisdiction over the location. In this situation, the notes taken by the initial call taker cannot easily be transferred with the call. All information gathered must be communicated verbally from the original call taker to the new call taker. Occasionally the motor vehicle will travel into a PSAP jurisdiction that is not serviced by the same selective router as the previous PSAP. In this case, the voice call cannot be easily transferred. Note that the limitations inherent in the E9-1-1 architecture are addressed in the NG9-1-1 standards.

In addition to the inherent limitations in the current E9-1-1 system, the application of the NENA E9-1-1 standard in Oregon has highlighted an additional set of weaknesses. The E9-1-1 standard recommends

that the system be deployed with a high level of redundancy to ensure the high level of availability required. Ideally, every PSAP in the state would be connected to two different selective routers each with its own network link. Each OSP serving the PSAP's jurisdiction should connect to both of the selective routers servicing the PSAP. This ensures that there are multiple network paths between the subscriber making the 9-1-1 call and the PSAP that can send them help. In Oregon, 24 of the 43 PSAPs are serviced by a single selective router. This means that OSPs operating in these PSAP's jurisdiction have a single network connection to the selective router servicing the PSAP, so there is no redundancy. This implementation of the E9-1-1 architecture in Oregon is statistically less reliable than the implementation in other states. In addition to having a less reliable architecture, this implementation limits the ability of the state to address large scale emergency situations. If a selective router fails, no calls can be delivered to the PSAPs it services. Because of the implementation in Oregon, 9-1-1 calls from an OSP connected to the failed selective router cannot be redirected to another selective router to be handled by an alternate PSAP. These limitations can be addressed with additional investment in the E9-1-1 system

Assessment of the Current State: The current system has performed adequately. However, the limitations inherent in the E9-1-1 architecture have reduced the reliability and availability of the system. The end of life status of many of the components increases the vulnerability of the current system. Investments in the current system must be made. Some of the system components that are at end of life can be replaced, others cannot. Investments to address deficiencies are not practical or feasible on the analog system.

The current funding mechanisms for the E9-1-1 system have provided a steady stream of revenue to support the current operations. A conscious decision was made several years ago to defer some investments in the current system as the OEM 9-1-1 evaluated alternatives. Funds not expended during this period have been accruing in the Enhanced 9-1-1 Subaccount.

A significant investment in the state's E9-1-1 system must be made in the very near future to ensure the reliability and availability of the system. This business case evaluates the possible options and makes a recommendation for next steps in the process.

Project fit with the Governor's goals, priorities, and initiatives

In his 10-year plan for Oregon, the Governor lists 7 areas of focus (see first link below). One of the seven outcome areas is Safety. On the Oregon state website, the stated 10-year goal is that "Oregonians are safe and secure". Two specific strategies to achieve this goal are:

- Expand evidence-based criminal justice programs to prevent and solve crimes by investing in community corrections, and local and state law enforcement
- Apply advancements in technology to improve highway safety and get better results for transportation and infrastructure upgrades.

The OEM 9-1-1 NG9-1-1 Project is important in achieving the 10-year goal and in implementing these two strategies. Fast, reliable, and ubiquitous access to first responders through the E9-1-1 system is the

Business Case
Next Generation 9-1-1 Project

first step in responding to an emergency. A rapid response not only increases the safety of Oregonians but it is the first step in gathering evidence for use in prosecuting offenders. The 9-1-1 system is so important to the Federal Department of Transportation that the DOT is a key supporter of the migration to NG9-1-1 and in collaboration with other Federal Agencies has provided grants to assist states in moving forward with the migration to NG9-1-1.

The OEM 9-1-1 NG9-1-1 Project is very much in line with the Governor's 10-year plan and priorities.

<http://www.oregonbusinessplan.org/LinkClick.aspx?fileticket=FBbPIX6sAag%3D&tabid=76>

<http://www.oregon.gov/COO/Ten/Pages/index.aspx>

Project fit with the 2010-15 Enterprise Information Resources Management Strategy

The NG9-1-1 Project is consistent with the goals and strategies contained within the Governor's 2010-15 Enterprise Information Resources Management Strategy.

Funding/Shared expense – The project recommended is fully funded by tax revenues collected on monthly bills for telecommunications services. General tax revenues are not used in this project. In addition, the recommendations made in this business case take full advantage of the emergence of a competitive market for services. This project will realize significant saving by utilizing a competitive request for proposals process.

Multi agency and shared services – NG9-1-1 is inherently built to provide the ability for shared systems amongst multiple disparate entities to increase efficiency and interoperability throughout participating agencies. These agencies will be both local and state level partners, working together on a common platform to increase the ability for the effective and efficient delivery of public safety services throughout the state of Oregon.

Reduce IT complexity – Through the foundation of an open standards based system, NG9-1-1 is built to prevent silos in information technology and ease data flow throughout disparate systems.

Improve citizen interaction with government – NG9-1-1 opens up new ways for citizens of Oregon to request help from PSAPs throughout the state. Today, requesting help form a PSAP is available exclusively via voice communications. Many Oregonians use text messaging as their primary communications tool. The deaf, hard of hearing, and speech impaired in the state rely heavily on text messaging. NG9-1-1 will support calls for help via text to 9-1-1 thus dramatically improving citizen interaction with public safety. NG9-1-1 will also support the transmission of photos, full motion video, and data such as the medical records of the citizen. Communicating this broad array of information also improves citizen interaction with the government.

3 PROBLEM DEFINITION

The primary mission of the OEM 9-1-1 is to ensure the seamless operation of the statewide E9-1-1 system. To continue to fulfill this mission, the State of Oregon is faced with the requirement to make a sizable investment in the state's E9-1-1 current infrastructure. This requirement is precipitated by the fact that many of the components of the current system are at manufacturer's end of life and cannot be supported at a level that is required by the E9-1-1 system. In addition, the current system is not capable of supporting new communications products and services the public will adopt.

The requirement to invest is not debatable. What can and should be evaluated is the best use of the funds to be invested. This project is focused on determining the best choice of several options available to the state.

The NG9-1-1 Project will be measured by how well it achieves the OEM 9-1-1 strategic goals and the efficiency with which it does so. The critical success metrics used to assess the value of the project to the OEM 9-1-1 will be evaluated at significant project milestones as a gauge for possible realignment of the roadmap and project priorities.

The OEM 9-1-1 will continue to evaluate the relevance of the metrics and success factors at key points, such as during pre-implementation assessments and at critical project milestones. Additional metrics will be developed and modifications may occur to existing metrics to best represent the project's success.

The System Integration Contractor (SIC) will track these metrics using appropriate baselines and targets and provide regular Metrics reports throughout the project.

NG9-1-1 Project Success Metrics	
1	Project meets milestones (timeliness) and is completed within the approved schedule.
2	Project meets milestones (cost) and is completed within the approved budget.
3	43 Oregon PSAPs are delivered with a NENA standard NG9-1-1 solution, including specified service levels and deployment requirements of the local PSAP.
4	Deliverables meet or exceed call setup in one second or less, and system availability of 99.9999% uptime.
5	Delivery of benefits as described in the Project Charter.
6	Management and delivery of project scope as identified in the Project Requirements Document and RFP.
7	Delivery of all project elements at quality levels established in the Quality Management Plan (to be developed by QA/QC vendor).

4 ALTERNATIVES ANALYSIS

State E9-1-1 systems currently in production across the country are based on a set of technical and operational standards. All E9-1-1 systems are implemented using the same standard components and use the same network technology. While there are some architectural variations from state to state, the systems are all very consistent. The NG9-1-1 architecture now being implemented in many states is also based on a common set of technical and operational standards and is designed to be backward-compatible with the legacy E9-1-1 system. Given the requirement to conform to the standards and the fact that Oregon must have an E9-1-1 system, the range of technical alternatives available is constrained. Alternatives available for consideration address two questions; what standard should the state invest in and how should the state move forward with the investment. The analysis below considers alternatives that address these two questions.

4.1 Assumptions

- The project scope includes call routing, call handling and mapping, and the underlying network.
- Oregon must have a functioning, state-wide 9-1-1 (E9-1-1 or NG9-1-1) system.
- The E9-1-1 system currently in use in Oregon requires a substantial investment over the next 2 to 5 years to replace old, unsupported components and technology.
- 9-1-1 Systems must be very stable, predictable, and reliable. For this reason, 9-1-1 systems (E9-1-1 or NG9-1-1) should remain architecturally unchanged for long periods of time. Ideally, once implemented, a 9-1-1 system should remain in place for 6 to 10 years.
- The execution of the approved plan must minimize the possibility of any service disruption during the implementation.
- The approved plan will meet or exceed the performance, reliability, availability, and functionality features of the system in place today.
- The standards for NG9-1-1 are stable. Vendors have built products compliant with the standard, and NG9-1-1 systems are being implemented.
- Investments will be made from funds in the Enhanced 9-1-1 Subaccount, from the taxes collected on a monthly basis by the OSPs, and from the taxes collected at the time of sale for pre-paid telecommunications services. All of these funds come from the 9-1-1 tax from subscribers.
- The OEM 9-1-1 can find, hire, and retain the necessary staff (quantity, skill set, expertise, leadership, etc.) required to execute the approved plan.
- No material changes in the population of the state, the volume of 9-1-1 calls, or the revenue collected from the 9-1-1 tax will occur during the planning window.
- Alabama, Connecticut, Iowa, Maine, Massachusetts, Vermont and others have faced the decision that Oregon is now facing. We will focus our analysis on alternatives selected by other states with similar circumstances. We will avoid alternatives that are dramatically different than those chosen by these other states.

4.2 Selection Criteria and Alternatives Ranking

There are three primary criteria for selecting a path forward. The recommended path will be the alternative that provides the best balance of these three criteria:

1. The solution that provides the highest level of 9-1-1 service and has the flexibility to meet future demands and can accommodate evolving technologies.
2. The option that delivers the best value for the amount invested.
3. The option that minimizes risk to the public during the implementation of the plan and for the remaining useful life of the investment.

4.3 Solution Requirements

The solution selected must meet the following requirements

Functional requirements. Selected solution must:

1. be in compliance with the applicable 9-1-1 standards (E9-1-1 or NG9-1-1);
2. deliver the functionality for call handling specified by the PSAPs in the State;
3. and meet or exceed the diversity, redundancy, and functionality for call routing specified by the OEM 9-1-1.

Non-functional requirements. Selected solution must:

1. meet or exceed the reliability, availability, and performance of the existing E9-1-1 system;
2. be affordable using the existing funds in the Enhanced 9-1-1 Subaccount and future revenue; from 9-1-1 taxes while still meeting financial guidelines related to maximum biennium outflows and minimum account balances;
3. and have a high probability of being successfully implemented.

A detailed outline of Functional and Non-functional requirements and their related elements, including governing standards, are provided with the Project Requirements Document.

4.4 Alternatives Identification

There are three possible alternatives for statewide 9-1-1 services the OEM 9-1-1 has considered.

Alternative 1: Invest in a technology refresh of the current E9-1-1 system

Description

The first alternative considered is maintaining the existing E9-1-1 system. Oregon's legacy E9-1-1 network is owned and operated by two SSPs; Centurylink and Frontier Communications. It consists of a network that connects the public to the 43 PSAPs primarily by analog copper circuits. This network supports E9-1-1 calls from wire-line telephones as well as services from cellular and VoIP OSPs.

The telephone system used to deliver 9-1-1 calls is based on technology first developed for telegraphy which was adapted to provide automatic number identification and location information. They were

specifically designed for these applications but they are now obsolete and alternative solutions would have to be specially designed and built to replace failing computers.

Despite the technological difficulties, it is possible to continue to use the existing analog E9-1-1 system. Doing so would require significant planning and coordination between the OEM 9-1-1 and CenturyLink and Frontier. It would require significant investment by CenturyLink and Frontier to custom manufacture the E9-1-1 call routing components of the network. The cost of upgrading the network would be recovered by the system service providers through an increase of the cost of E9-1-1 services.

Both SSPs utilize systems that are at the manufacturers' end of life in three areas;

1. E9-1-1 call routing
2. E9-1-1 call transport including routers, firewalls, and other network components
3. E9-1-1 call handling and mapping

The end of life E9-1-1 call routing equipment are the (eleven) selective routers deployed in the state. There are no upgrade options available for these products. They can be maintained using spare parts; however, there are no options available to replace these systems with new, supported equipment.

The underlying Time Division Multiplexing (TDM) network is end of life and CenturyLink and Frontier have alerted the OEM 9-1-1 to the fact that the E9-1-1 Frame Relay network in use today will not be maintained and will be decommissioned. CenturyLink has filed necessary notifications of discontinuance advising that existing contracts will not be renewed after December 31, 2014. CenturyLink and Frontier will not make the necessary investments required to upgrade the network. There are no other options available to upgrade the E9-1-1 transport other than working with the two SSPs on a sole-source basis.

The end of life components used at the PSAPs includes most of the call handling and mapping systems, and network routers currently in use. An audit was conducted of the PSAP call handling and mapping systems. The results of the audit showing which systems require replacement and a replacement plan are included in Appendix B.

Implementation

Implementation of this alternative is the fastest since it does not require new technology. The upgrades that CenturyLink and Frontier would have to make to components of the system can be accomplished over time, providing there are no catastrophic failures of existing network components. PSAPs would not require any changes in equipment or training to continue operating on the legacy network.

Costs

If this alternative is selected, the total project costs including Staff Administration, Legacy Costs, expenditures on consultants and contractors, and the contract with the NG9-1-1 Prime Contractor from July 1, 2014 to December 31, 2023 are projected to be \$133,275,891. More details about the projected costs can be found in Appendix D.

Benefits

Maintaining the status quo would result in no material benefits to the OEM 9-1-1, the PSAPs, public safety agencies or the public. The status quo requires the OEM 9-1-1 to maintain and operate an E9-1-1 system that is not in strategic alignment with the OEM 9-1-1's vision that defines advanced services and collaboration capabilities of a NG9-1-1 system.

Risk

Maintaining the legacy E9-1-1 system in Oregon as the primary means of accessing emergency services is too great a risk for the OEM 9-1-1. It would mean embracing technology that is not in keeping with the needs of the public to easily access the E9-1-1 system and prevents emergency responders from obtaining critical information necessary to the response and their safety.

It also represents a financial risk to the OEM 9-1-1. Increased costs to custom manufacturer, maintain, and operate antiquated technologies cannot be accurately predicted and planned. Lack of competition risks higher costs than could be obtained through open and fair competition.

Alternative 2: The OEM 9-1-1 Owned and Operated NG9-1-1 Network**Description**

NG9-1-1 is a national effort that is seen as an interconnected network-of-networks based on a national standard. This national system will be executed through statewide networks that will provide a state-level gateway to and from the OEM 9-1-1 network; border control services, call routing, location validation, security and rights management, and the databases to make the network function.

At the OEM 9-1-1 level, there are several critical network components that must be in place to make the NG9-1-1 function properly. The first component is a new statewide IP network that connects all of the PSAPs in the state to the gateways, call routing, location validation, security and rights management, and databases. This network is known as the E9Net, Emergency Services Internet Protocol Network, which functions something like a private Internet.

The E9Net is typically a fiber optic network connecting data centers to the PSAPs, although other mediums such as high-capacity microwave radio systems can also serve as the E9Net. The existing infrastructures and networks maintained and operated by DAS currently do not meet the NENA i3 standards; including the 99.999% reliability, 24/7/365 monitoring and troubleshooting, geo-diverse Tier IV data centers and network diversity benchmarks.

The 9-1-1 calls entering the E9Net must be routed to the correct PSAP. This call routing function is a special server that routes incoming E9-1-1 calls based on their location to the proper PSAP. It is feasible for the OEM 9-1-1 to build its own call routing servers but there are, at the time this plan was written, several commercial vendors offer call routing solutions.

Business Case**Next Generation 9-1-1 Project**

Once the call has been routed to the appropriate PSAP, there must be a system in place to answer the incoming call. NG9-1-1 communications systems (call-handling system) are IP telephone systems that have been configured to support the needs of NG9-1-1. Every PSAP in the state must have a compliant system in place to properly operate on the network. These systems can be purchased by the individual PSAPs or the OEM 9-1-1 could purchase the system and provide the necessary equipment to the PSAPs.

One of the most important features of E9-1-1 systems is its capability of displaying the call location on a mapping system available to the E9-1-1 calltakers and dispatchers. To accomplish this, a mapping system takes the call location data and pin-points the call on a map that is displayed at the call taker position. The OEM 9-1-1 has the expertise and capabilities of creating its own mapping system for use in the NG9-1-1 system but there are several third party alternatives available that can be acquired and deployed much faster and more economically.

It will be necessary to establish multiple data centers to house network components, servers, and database repositories described. These data centers must be secure fault tolerant facilities designed and operated to tolerate the cumulative impact of every site infrastructure component, system and distribution path disrupted by a failure. Typically known as Tier IV sites, the infrastructure topology considers that any one of its systems or components may fail or experience an unscheduled outage at any time and will tolerate these cumulative impacts without affecting the operation of its systems. These data centers can be purpose built or they can be co-located in other data centers currently owned and operated by the OEM 9-1-1 or in commercially available co-location data centers. Whatever the configuration, the center must meet standards for a Tier IV data center, must provide for the physical and logical separation of all NG9-1-1 components and network, must limit access to the NG9-1-1 infrastructure to personnel authorized pre-authorized by the OEM 9-1-1, and support the requirement of 99.999% availability.

The OEM 9-1-1 will also be responsible for the systems installed within the data centers; systems such as the border control services, call routing, location validation, security and rights management, and the databases like GIS. Additionally, the OEM 9-1-1 would also purchase and operate the 9-1-1 call-taking equipment installed in PSAPs. Network components of this system would be located in the data centers and call-taking equipment would be installed at each PSAP.

A Network Operating Center (NOC) or network management center will be necessary to oversee this complex network environment 24/7. NOC personnel would be responsible for monitoring the network for conditions that may require special attention to avoid degraded services or result in a disruption of service.

Implementation

Implementation of this alternative would involve a large multi-year project and require coordination between the OEM 9-1-1 and several other State agencies. It is the most complex implementation of all the alternatives requiring the engineering of the E9-1-1 and other system components. It is estimated

that the planning, engineering and construction of the network, data centers, NOC and other components of the system would require about 5 years to complete.

Cost

Cost of building and owning the NG9-1-1 system are dependent upon how much of existing resources (e.g., fiber optic network and data centers) can be leveraged for use for the NG9-1-1 system and the location (e.g., rural vs. urban) of the sites that must be connected. While construction costs for fiber optic networks vary widely, a cost of about \$5,000 per location plus \$13,000 per mile of fiber is a reasonable estimate. Further analysis is necessary to determine an accurate cost estimate.

Additional costs will be incurred through the acquisition of additional staffing to support the NOC as well as IT support staff.

Assuming that the NOC would work eight (8) hour shifts with a minimum of two operators, a total of 24 FTEs would be necessary to support the NOC 24/7. Further, assuming an annual salary of \$51,500, the total cost of employing 24 FTEs would be approximately \$1.9 million annually.

Benefits

The broadband network serving NG9-1-1 cannot be compared to a municipal-owned broadband service. This network and all of its components is a mission-critical non-revenue producing network.

The OEM 9-1-1 and its municipal partners can leverage their rights-of-ways, existing fiber, personnel, and other assets to more efficiently build a network than a third party could. Owning the network provides the OEM 9-1-1 more control over the network and reduces security concerns. Ownership ensures access to the full capacity of the network, ensuring that the network can adequately manage the bandwidth-intensive traffic NG9-1-1 is expected to produce. Some areas of the State are underserved by the local telephone incumbents. An OEM 9-1-1 owned network can be built-out faster and easier in these areas than a network being built by a private company.

Risks

Higher construction costs are expected if existing fiber resources, data centers, and NOCs are not available and have to be provided. The OEM 9-1-1 would have to construct additional fiber circuits to PSAP that are not already connected to the OEM 9-1-1's fiber network or a network that has capacity that the OEM 9-1-1 could acquire. Compliant data centers would have to be constructed or leased in which to house vital network components and systems.

The OEM 9-1-1 would have to hire and train additional IT staff to monitor, operate and maintain the network if no other qualified and experienced staff exist within the State.

The owned network might not contain the flexibility and capacity to change with NG9-1-1 technology. The OEM 9-1-1 cannot accurately foresee the impact emerging technologies will have on the network.

The potential risks of overburdening a network that cannot be easily expanded and adapted would result in degradation of service.

Alternative 3: Statewide NG9-1-1 System by Managed Service Provider

Description

In this alternative, the OEM 9-1-1 would procure all NG9-1-1 system components through a managed services contract with a third party NG9-1-1 Prime Contractor. Such services would be acquired through a competitive procurement and would be based on a network design that is specific to the needs of the OEM 9-1-1. The network provider would be responsible for providing all of the equipment and services necessary to the operations of the network. This includes the E911, the gateways, call routing and location functions, security and rights management, databases, data centers, and Network Operations Center. The NG9-1-1 network provided under contract would meet the same requirements and provide the same level of service as the network that the OEM 9-1-1 would provide as part of Alternative 2.

Implementation

Implementation of the NG9-1-1 system under a managed services contract would be conducted in a process designed to ensure multiple opportunities to refine the network and services to be provided over time.

Costs

If this alternative is selected, the total project costs including Staff Administration, Legacy Costs, expenditures on consultants and contractors, and the contract with the NG9-1-1 Prime Contractor from July 1, 2014 to December 31, 2023 are projected to be \$146,078,568. More details about the projected costs can be found in Appendix D.

Benefits

The OEM 9-1-1 is expected to realize several benefits from a managed service solution including:

- Improved management and remediation of problems within the network by having a single source responsible for the entire network. With more mature toolsets available to managed solution providers, events causing service degradation can be quickly identified and addressed. There is less finger-pointing in an environment where one vendor is responsible for all network components than in a system that is partially owned by the OEM 9-1-1 and also includes other vendors who are responsible for various other components of the network.
- Many of the costs associated with monitoring and operating the network can be shared across a broader client base.
- Flexibility in adapting to changes in requirements caused by increased 9-1-1 call volumes or new standards and features becoming available for use in the NG9-1-1 system. Third party vendors are prepared to adapt to changing requirements, providing network enhancements and capabilities.

- Faster implementation of new communications technologies. The NG9-1-1 network must be adaptable to accommodate future products and services. A managed solution is more able to accommodate change.
- The managed service provider assumes most of the risk in operating a mission-critical communications network based on recognized standards and in accordance with service-level guarantees afforded to the OEM 9-1-1.

Risks

With any managed services solution there is a risk that the managed services solution provider will not provide the support and services the

OEM 9-1-1 requires for such a critical system. Contracts must be carefully crafted to ensure that the OEM 9-1-1's interests are protected. Even with the best contract, there is still a level of trust that the service provider remains solvent and provides the services they agreed to provide in the manner in which they agreed.

Managed service providers are going to offer a network that makes the most business sense for them but is still compliant with the OEM 9-1-1's requirements. This does not necessarily mean that they will offer the most efficient network topology available. The OEM 9-1-1 must consider the benefits and risks of the managed service provider's network design and its service guarantees in order to make an informed decision.

Impacts on PSAPs

All three alternatives include changes that will have an impact on the PSAPs:

- All three alternatives include the replacement of the current call handling and mapping systems. This will require training of PSAP staff responsible for using the equipment and for operations.
- All three plans will change the existing network infrastructure. This includes network routers and the network facilities. Some amount of re-training will be required.

None of the three options will affect other systems at the PSAP:

- Those PSAPs that have separate Computer Aided Dispatch (CAD) systems will not need to change these systems. The selected vendors will interface with the systems as they are.
- PSAPs using standalone Records Management Systems (RMS) and Management Information Systems (MIS) will not need to change these systems. The selected vendors will interface with these systems as they are.
- Radio systems in place at the PSAPs will not be affected.

Both options that migrate to NG9-1-1 will have an impact on PSAP policies and procedures:

- NG9-1-1 includes functionality that enhances the ability of PSAP management to control the system. New features in NG9-1-1 that will require modifications to policies and procedures include:

- The diversion of calls to other PSAPs for planned and unplanned outages using Policy Routing Rules.
- Refining call routing to address special situations such as large scale emergency events by temporarily adjusting PSAP boundary files.
- NG9-1-1 also creates a few new challenges PSAP management will need to consider:
 - The IP network to be deployed is a dedicated, managed IP network. As such, it is very secure. However, as with any IP network, new threats by hackers, such as denial of service attacks, should be anticipated. NG9-1-1 provides the tools necessary to address these new threats but will require some training of PSAP staff and more awareness on the part of PSAP management.

5 CONCLUSIONS AND RECOMMENDATIONS

5.1 Conclusions

The analog E9-1-1 system currently providing services in the state is in need of significant investment. The OEM 9-1-1, in collaboration with the PSAPs in the state and with the support of consultants that are experts in 9-1-1, has evaluated the option of migrating to NG9-1-1. Not making an investment in the state's E9-1-1 infrastructure is not an option. Therefore, the three investment options available to the OEM 9-1-1 are to update the existing E9-1-1 system or invest in the migration to NG9-1-1 either by the OEM 9-1-1 owned and operated solutions or the procurement of a turnkey managed service.

There are benefits to each of the three alternatives. Updating the current E9-1-1 system will be less intrusive to operations in the near-term; however, a migration to NG9-1-1 will provide improved service to the citizens of the state. Because of the long list of benefits that can be realized by a migration to NG9-1-1, there are also risks associated with each alternative. NG9-1-1 is in the early stages of rollout across the country. All stakeholders are still learning with each new project that is initiated and each new phase entered. While Oregon is not one of the first to initiate a migration to NG9-1-1, it is definitely in the "early adopter" category.

The risk associated with implementing an OEM 9-1-1 owned and operated solution is substantial. This option requires significantly more research to determine costs, requires significantly more involvement and ownership of the project by the OEM 9-1-1, and would take substantially longer to implement than either of the other two options. This alternative is rejected by the OEM 9-1-1 based on lessons recently learned in failed State procurements.

Investing in updates to the current E9-1-1 system carries a number of risks as well. The system current architecture does not provide the reliability and availability expected in an E9-1-1 system. In addition, some of the components in the current E9-1-1 system are at the manufacturer's end of life and cannot be replaced.

Both remaining options are affordable using some of the funds in the Enhanced 9-1-1 Subaccount but largely paying for the investments from tax revenues collected by the OPSS in the state on monthly bills and by tax revenue collected at the time of sale for prepaid telecommunications services. The total cost of ownership of a migration to NG9-1-1 via a managed service contract is \$12.8 million or 9% more than an update of the existing analog E9-1-1 system over the 10.5 year planning window. The OEM 9-1-1 believes that the cost of migrating to NG9-1-1 will increase over time. An increase in cost combined with the use of funds currently in the Enhanced 9-1-1 Subaccount to update the current E9-1-1 system may make a migration to NG9-1-1 in the future unaffordable.

The OEM 9-1-1 believes that the benefits the citizens of the State will realize by migrating to NG9-1-1 are significant. The cost projections indicate that a migration to NG9-1-1 is affordable. While there are risks associated with the migration, the OEM 9-1-1 has concluded the risks are fairly well understood and avoidance and mitigation plans can be implemented to ensure a high probability of a successful migration.

This Business Case makes many assumptions in the technical approach a NG9-1-1 Prime Contractor may take, their knowledge and experience level, and the costs they are likely to propose. These assumptions are based on the experience of the OEM 9-1-1 and the consultants used to develop this Business Case. The vast majority of assumptions used in this Business Case can be validated by issuing an RFP that solicits detailed proposals from qualified vendors.

5.2 Recommendations

The OEM 9-1-1 recommends the initiation of a project to migrate to NG9-1-1 through a managed services contract (Alternative 3). The core of this project is the selection of a NG9-1-1 Prime Contractor that will provide a complete, end to end, NG9-1-1 system as a managed service. As presented within Alternative Analysis above; the total cost of ownership, risk to benefit ratio and migration process within this alternative provides the most secure, cost effective and manageable solution to upgrade to aging analog E9-1-1 service currently provided. To complement the services to be provided by the NG9-1-1 Prime Contractor, the OEM 9-1-1 will undertake sub-projects that reach out to the OSPs operating in the state (see Appendix F) and the Public (see Appendix G). The OEM 9-1-1 will also contract with a SIC to provide oversight to all activities related to the migration to NG9-1-1. Finally, the OEM 9-1-1 will contract with a QA/QC vendor per DAS recommendations/ requirements.

Next Steps

The OEM 9-1-1 proposes to execute several steps to reduce uncertainty in cost and schedule projections, and prepare for the execution of the migration to NG9-1-1. Specifically, the OEM 9-1-1 proposes the following next steps:

1. Finalize system requirements, release the RFP to qualified vendors, and receive fixed, firm proposals for the migration project. This will reduce uncertainty related to cost projections and the proposed schedule. As with all RFPs, the OEM 9-1-1 will not commit to signing a contract with any of the proposers. The current plan is to release the RFP within calendar year 2015 with

responses due shortly thereafter. Information gathered will then be used to improve the accuracy of the cost and schedule projections in the next version of the business case.

2. Execute the first phases of the OSP outreach sub-project. The goals of the first phase of this sub-project are to refine and/or validate:
 - a. The current interconnections between the OSPs and the selective routers. Specifically, an inventory of OSPs connecting to each selective router and the current capacity of each OSP.
 - b. The preference each OSP has in interconnecting to the NG9-1-1 system. Specifically, the choice between interfacing with a Legacy Network Gateway (LNG), the Border Control Function (BCF) using IP, and the BCF with full NG9-1-1 functionality.
 - c. The amount of time each OSP requires to order network facilities to the NG9-1-1 data centers, to install and test the new facilities, and to be prepared for testing with the applications and appliances at each data center.
 - d. The willingness of each OSP to support the project or the likelihood any OSP will not cooperate.This information will be used to reduce uncertainty within this business case with respect to cost and schedule. Ideally, this first phase of the OSP outreach sub-project will be completed and the goals accomplished before the fixed, firm bids from proposers are available.
3. The preparation and release of an RFP for a Systems Integration Contractor. The Systems Integration Contractor will be critical if/when the project is approved to move forward. The Systems Integration Contractor will develop plans to coordinate the activities of the OEM 9-1-1 NG9-1-1 and Legacy E9-1-1 teams, the NG9-1-1 Prime Vendor, the PSAPs, and other stakeholders. The SIC will report to the Executive Sponsor and provide information to the Executive Steering Committee. The SIC RFP will be issued and a preferred vendor identified prior to the receipt of NG9-1-1 Prime Vendor proposals. If the migration moves forward, the SIC contract will be signed prior to the contract with the NG9-1-1 Prime vendor. The fixed pricing provided by the Systems Integration Contractor will be used in the next version of the business case
4. Propose legislation authorizing the use of 9-1-1 taxes for NG9-1-1 services and the granting of authority to the OEM 9-1-1 to execute their role in the project. Legislation has already been prepared to authorize the use of 9-1-1 taxes collected to be used to pay for the NG9-1-1 system. This legislation also includes authority the OEM 9-1-1 requires to execute their role in the project during the migration and during steady-state production of the system.

5.3 Project Fit With the OEM 9-1-1 Strategic Plan

This project directly supports the four (4) goals established in the current version of the OEM 9-1-1 Strategic Plan:

Strategic Plan Goal A: Enhance the quality of the statewide E9-1-1 answering system to ensure that all citizens and visitors have access to public safety answering services that are reliable, redundant, secure and diverse.

When implemented, NG9-1-1 will immediately reduce EG-1-1 call setup times and will allow PSAPs to transfer misdirected calls to the appropriate PSAP with all notes and information gathered. Soon after the implementation of the new NG9-1-1 system, text to 9-1-1 will also be available and is within the scope of this project. Long-term, the NG9-1-1 system will allow the delivery of photos and full motion video from incident scenes. This capability is designed into the NG9-1-1 architecture; however, as the OSPs make these additional capabilities available, the vendor chosen will assess and implement any changes to the network bandwidth to accommodate these additional capabilities.

Strategic Plan Goal B: Enhance Network capabilities statewide for emerging technologies, disaster recovery, and multi-jurisdictional cost efficiencies.

NG9-1-1 links all PSAPs statewide into a single, unified system. This allows PSAPs across the state to support each other when a disaster strikes. The selected NG9-1-1 architecture implements hosted call-handling systems, which reduces costs due to sharing of infrastructure costs.

Strategic Plan Goal C: Enhance the communication and information exchange between the OEM 9-1-1 and public safety agencies and strengthen relationships with Oregon’s public safety communications community.

The OEM 9-1-1 engaged all PSAPs in the State in the project. Not only has this resulted in a higher quality plan, it has also created a level of teamwork that is necessary for the migration to NG9-1-1 and will strengthen the bonds between PSAPs and the OEM 9-1-1 well after the implementation of the new system.

Strategic Plan Goal D: Ensure the financial stability of the OEM 9-1-1 and public safety communications systems to sustain their long-term viability as state-of-the-art communications networks.

The NG9-1-1 system proposed has a lower operating cost than the existing EG-1-1 system due to its use of open standards and commercially available, off-the-shelf products. While costs will increase during the implementation, over the long term the NG9-1-1 system is much more cost effective and provides new services and future growth capabilities.

An update to the OEM 9-1-1 Strategic Plan is due to be completed in 2014. The current version of the OEM 9-1-1 Strategic Plan is located at:

http://www.oregon.gov/OMD/OEM/or911/docs/oregon911_strategic_plan_09_2009.pdf

5.4 Consequences of Failure to Act

If approval to execute the next step as outlined above is not given, the OEM 9-1-1 will continue updating the current EG-1-1 system in accordance with its mission and within current operating guidelines.

Specifically:

- Call handling and mapping systems will be replaced on the schedule used in this Business Case. This will be driven by the PSAPs as is the current practice.
- Planning for the evolution to a Multi-Protocol Label Switching (MPLS) network will begin.
- Planning for a migration to NG9-1-1 will be placed on hold.

- The NG9-1-1 RFP will not be completed and released.
- The RFP for a Systems Integration Contractor will not be developed or released.
- Outreach to the OSPs will not be initiated.
- No additional hiring for the OEM 9-1-1 will be done to support a migration to NG9-1-1.
- No additional information will be sought to refine the business case.
- Contracts with the QA Vendor and the NG9-1-1 Consultants will be terminated.
- The Executive Steering Committee recently formed will be disbanded.

The net results of the above have important consequences:

- Time and money spent by the OEM 9-1-1 on planning for a migration to NG9-1-1 will be largely wasted. When the OEM 9-1-1 re-initiates the project, some of the information gathered may be useful, but not without a significant amount of review and rework.
- The call handling systems and mapping systems purchased prior to the reinitiating of the project may or may not be able to be used in a new NG9-1-1 system. Every effort will be made to ensure that the systems purchased can be used in a NG9-1-1 system. However, this will raise the cost to the OEM 9-1-1 and will add to the complexity of any migration to NG9-1-1 approved in the future.
- Ultimately, Oregon will migrate to NG9-1-1 as will all 50 States. It is not a question of if, but of when the migration will occur. The use of funds in the Enhanced 9-1-1 Subaccount to update the current E9-1-1 system combined with an increase in cost to migrate to NG9-1-1 will force a substantial delay in re-initiating the project. The momentums lost by not proceeding with the migration now will also impact the migration to NG9-1-1 when it is re-initiated.
- The FCC guidance outlining the migration, future funding and governance of 9-1-1 to the NG9-1-1 model may place Oregon in noncompliance with FCC directives to meet 9-1-1 requirements; including but not limited to equal access, security and reliability parameters. The migration to NG9-1-1 from current analog systems is not a matter of “if” but when. The continual delay in transitioning to NG9-1-1 will burden Oregon with the ever increasing cost to maintain an antiquated E9-1-1 system.

APPENDIX A – Additional Background Information

Background - National

The Enhanced 9-1-1 (E9-1-1) system currently in use in the State was designed over 35 years ago. At the time of its design, the choice of telephone services was limited to what we now refer to as traditional landline service. Technologies employed in the original design were selected based on their capabilities and reliability. Since the original design and implementation of the E9-1-1 system, improvements were made to: provide automatic location information to the call takers at the Public Safety Answering Points (PSAPs); support calls for subscribers of wireless telephone services; and support calls from Voice over Internet Protocol (VoIP) subscribers. While the system design has evolved to support advances in communications technology, it has not been an easy evolution nor does it fully support the communications services citizens of the state currently use. For example, the current E9-1-1 system does not support texting to 9-1-1 for the deaf and hard of hearing community, which is far superior to today's TDD/TTY.

Recognizing the limitations of the current E9-1-1 system, the National Emergency Number Association (NENA) initiated a project to define the Next Generation of 9-1-1 (NG9-1-1). This effort was initiated seven years ago and has resulted in a new, open standard, utilizing today's state-of-the-art technologies. Known as NENA Standard 08-003 or "i3" for short (see Appendix H for more information), the standard defines an architecture that can support "any device, anytime, anywhere". A number of states are already in the process of migrating from their legacy E9-1-1 system to a NG9-1-1 system based on the NENA 08-003 standard.

Industry stakeholders representing Government Authorities, individual PSAPs, current E9-1-1 System Service Providers, traditional telephone service providers, wireless carriers, VoIP service providers, and vendors providing the full range of products and services all participated and collaborated in development of the NG9-1-1 standard. NENA Working Groups continue to work on enhanced versions of the existing standards and the development of new standards that complement the core body of work. This technical effort is what many people think of when NG9-1-1 is discussed. However, there is another fundamental change that is occurring because of NG9-1-1. The entire procurement model is changing.

When AT&T designed the 9-1-1 system in Bell Labs, they also began the nationwide implementation of the new system. Government authorities began purchasing services from AT&T who held a monopoly on 9-1-1 much as it did on all telecommunications services in the country. Neither the breakup of AT&T by Judge Greene, nor any of the other changes to the telecommunications industry has altered the way 9-1-1 services were provided.¹ With very few exceptions, the dominant Incumbent Local Exchange Carrier (ILECs) has provided 9-1-1 services to the states. However, the introduction of NG9-1-1 has changed that. The OEM 9-1-1 is now free to choose from whom they buy 9-1-1 service. The ILECs still

¹ Judge Greene presided over *United States v. AT&T*, the antitrust suit that broke up the AT&T vertical market monopoly on the telecommunications industry in the United States. The case, one of Greene's first after being named to the bench, resulted in the 1982 consent decree between AT&T and the Federal Trade Commission

Business Case**Next Generation 9-1-1 Project**

compete for this business, but in addition, a number of very competent companies are able to provide this service. Competition in NG9-1-1 systems brings better customer service, lower prices, and the opportunity to select the products and service best suited to the particular needs of Oregon at an affordable price.

The migration to NG9-1-1 has already begun. The federal government has been active in promoting the migration by passing supportive legislation and providing funding for state level initiatives through the Department of Transportation. The FCC's Public Safety and Homeland Security Bureau have several open proceedings that deal with NG9-1-1 in particular. Later in this Appendix is a high level overview of Federal activities related to NG9-1-1. The states of Iowa, Maine, Alabama, Connecticut, Vermont, and Tennessee have all signed contracts with vendors to migrate to NG9-1-1. Massachusetts, Nebraska, South Dakota, New Jersey, Kentucky and Kansas are all in the process of evaluating their migration to NG9-1-1 with a goal of going through the RFI/RFP process. At a local level, PSAPs across the country are ensuring that the equipment they buy today is capable of working in a NG9-1-1 system even if the state they are in does not have a formal plan for the migration. Within Oregon, the citizens and visitors, the OEM 9-1-1, and the PSAPs are the primary stakeholders.

Background - State

The staff of the OEM 9-1-1 and several of the PSAPs in Oregon have been longtime members of NENA and participate in the standards development processes. As the NG9-1-1 standards progressed and neared completion, the OEM 9-1-1 staffed a multi-phase evaluation of migrating to NG9-1-1.

Contract with LR Kimball: In 2010, the OEM 9-1-1 contracted with LR Kimball to study migration to NG9-1-1 and recommend a high-level implementation plan. One of the variables that drive the cost of implementing NG9-1-1 is the number and location of PSAPs in the state. For this reason, the Kimball study spent a significant amount of time on the idea of consolidating PSAPs. The study also looked at the alternative of not migrating to NG9-1-1. The study helped the OEM 9-1-1 determine that a migration to NG9-1-1 was in the best interest of the state from both a quality of service and financial perspective and that PSAP consolidation would likely occur "organically" but there should be no undue influence from the OEM 9-1-1 in this process.

Formation of a Next Generation 9-1-1 Committee: Recognizing the need for cross-functional support for a statewide migration to NG9-1-1, the OEM 9-1-1 facilitated the formation of a Next Generation 9-1-1 Committee with representatives from a number of organizations including from the OEM 9-1-1 and local agency PSAPs. This committee has helped focus all activities related to NG9-1-1.

Request for Information (RFI): With the support and encouragement of the Next Generation 9-1-1 Committee, the OEM 9-1-1 signed a contract with RCC in 2012 to develop and issue an RFP for the migration to NG9-1-1. After a review of work previously completed, the Next Generation 9-1-1 Committee and RCC concluded that an RFI would be a logical next step. An RFI was developed and issued. Eight proposers responded to the RFI and all 8 presented to the Next Generation 9-1-1 Committee over a 2-week period in late 2012. These proposer presentations were also carried on a

Business Case**Next Generation 9-1-1 Project**

webcast and all PSAPs in the state were invited to participate. The RFI helped the Next Generation 9-1-1 Committee to shape its thinking and develop a list of requirements for a migration to NG9-1-1

Request for Proposals (RFP): With the knowledge gained from all previous steps, the OEM 9-1-1 and the Next Generation 9-1-1 Committee along with RCC proceeded to develop an RFP. This process was initiated in December 2012 and involved the entire Next Generation 9-1-1 Committee. The core of the RFP, including requirements, the Statement of Work, and details of the current system are close to completion. The next step in the procurement process is to work with the OEM 9-1-1's procurement officer to issue an RFP.

Budget Notes: Because of the size and complexity of the proposed project, the OEM 9-1-1 has been directed to comply with the DAS/Information Technology Investment Review/Approval Policy. This business case and seven other documents found in the Project Document Status have been developed to meet this requirement.

GIS Data Development and Management: In parallel with all of the activities outlined above, the OEM 9-1-1 and the PSAPs have focused on the development and enhancement of GIS data required by the NG9-1-1 system. Oregon currently has 43 centers that take 9-1-1 calls. These Public Safety Answering Points (PSAPs) each have a coverage area. When all phones were installed in fixed locations, a PSAP coverage area could be defined by a set of addresses. With the introduction of wireless phones, PSAP coverage areas changed to incorporate Cell Sites and polygons that represented PSAP boundaries. NG9-1-1 builds on this direction and requires consistent, accurate, up-to-date GIS information for routing and responding to all 9-1-1 calls. This work has seen meaningful progress; however, much work remains. Completing the development of the GIS data and creating processes for provisioning this information in the NG9-1-1 system is a part of this project.

Audit of current PSAP CPE, Mapping, and Network: the OEM 9-1-1 has initiated a full audit of call handling equipment, mapping, and network in place today at all PSAPs. With this information, the OEM 9-1-1 has determined a plan for updating all components necessary. This plan has also been used to determine the cash flow if no migration to NG9-1-1 is initiated. The results of the audit and the replacement schedule are located in Appendix B.

To deliver a call from a subscriber with an emergency to the PSAP that can dispatch first responders, the current E9-1-1 system in Oregon requires three separate groups to interoperate. The first group is the Originating Service Providers (OSPs). It includes traditional wire line telephone service, wireless carriers, Voice over Internet Protocol (VoIP) Service Providers, and cable companies. This group has two responsibilities. First, each must determine when one of their subscribers has dialed 9-1-1 and then route the call to the appropriate E9-1-1 system interface point; the selective router. Second, the OSP must provide accurate, up-to-date, location information for their subscriber. The second group of stakeholders is the two E9-1-1 System Service Providers (SSP); CenturyLink and Frontier. These two companies provide several services to the state. First they deploy, operate and maintain the selective routers that receive calls delivered by the OSPs. Second, they provide a system, the Automatic Location Information (ALI) database that provides subscriber location information to the first responders. And third, the E9-1-1 SSPs provide the network between the selective routers and the PSAPs. The final group

is the PSAPs that take the calls and dispatch emergency personnel. In the figure below (Typical E9-1-1 Architecture), the OSPs are highlighted in orange, the SSPs in blue, and the PSAPs in green.

The process for accepting calls at the selective router and delivering them to the PSAP is virtually identical for all types of E9-1-1 calls. The selective router accepts the call and using the ALL database determines which PSAP is responsible for handling calls from that location. It then delivers the call to the appropriate PSAP along with the caller's telephone number. When the PSAP answers the call, the PSAP call handling system uses the telephone number of the subscriber making the call to query the ALL database to retrieve the subscribers address and/or location. This location information is used to dispatch first responders.

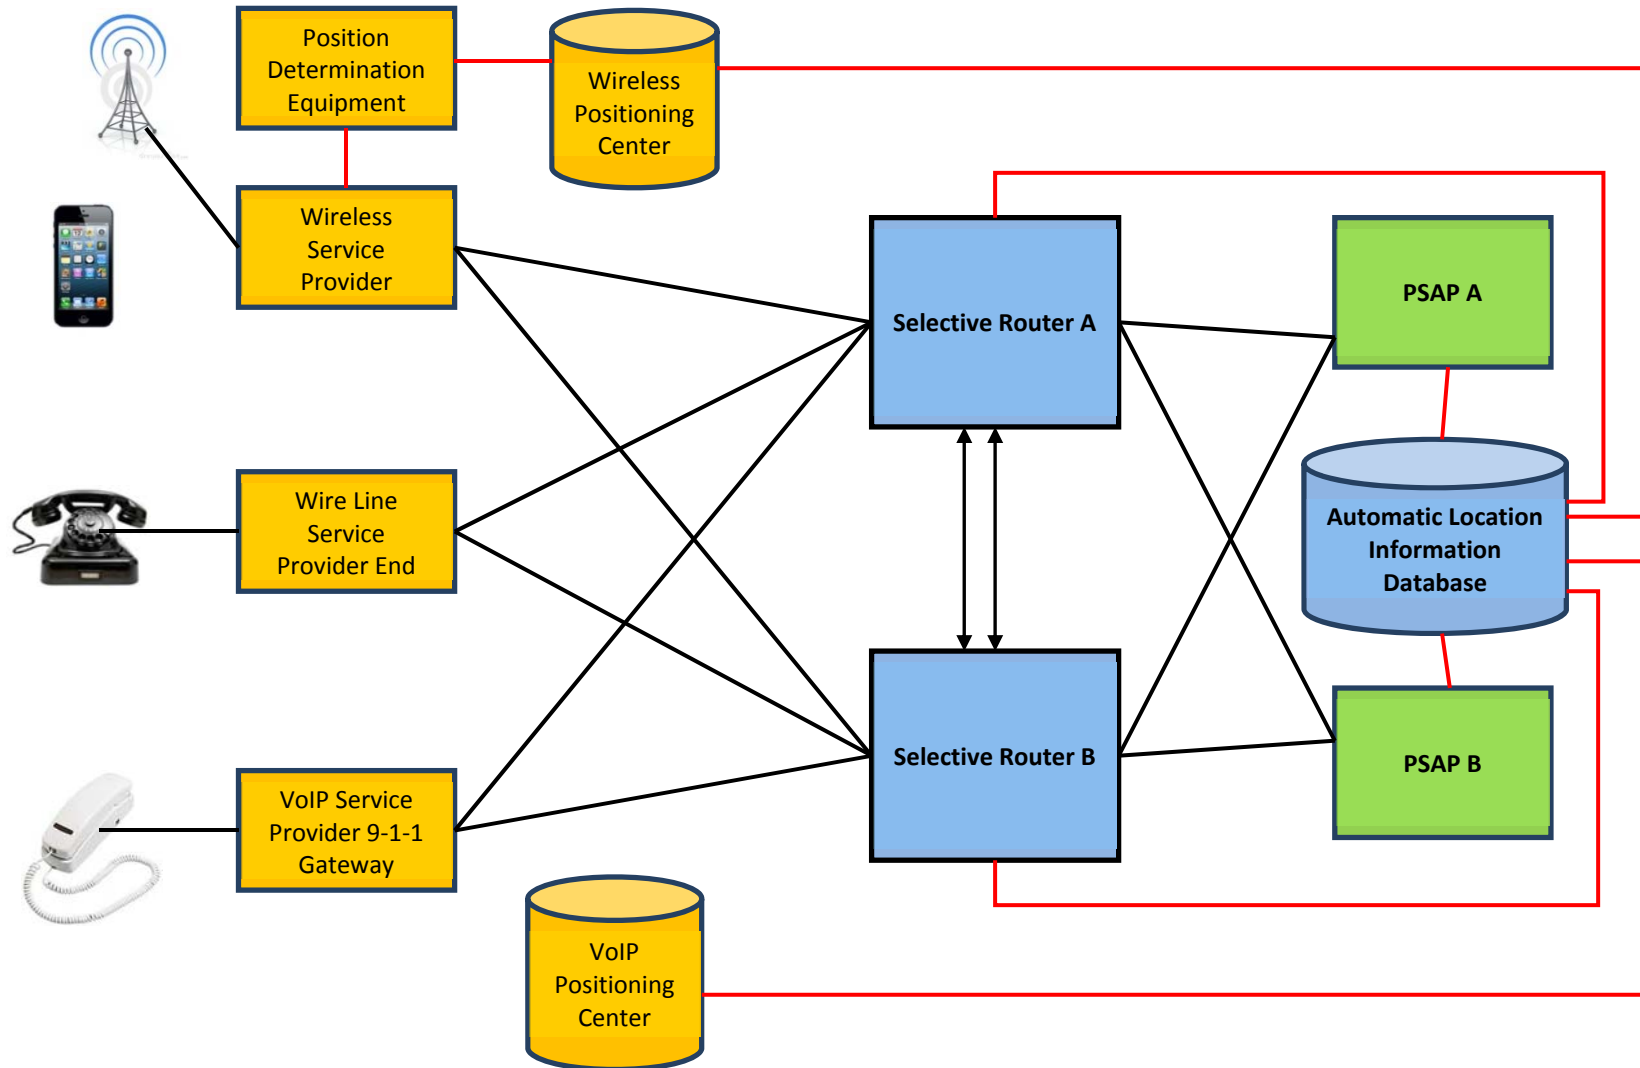

The processes used by traditional wire line carriers, wireless service providers, and VoIP service providers to establish the subscriber's location and provide it to the ALL database are different. Telephone numbers for traditional wire line telephone service are assigned the address where the service is installed. The ALL database is populated with the telephone number and address at the time the telephone number is provisioned. Over time telephone numbers are re-used and assigned different addresses, and the subscriber might change or might change their name. The information in the ALL database is updated by the wire line service provider whenever any information in the ALL database changes.

Subscribers of wireless services are not continuously tracked by their service provider just in case they make a 9-1-1 call. Instead, when a subscriber to wireless service makes a 9-1-1 call, the carrier recognizes it and begins the process of determining the subscriber's location. First the wireless carrier's Mobile Switching Center (MSC) handling the call uses the Position Determining Entity (PDE) to determine the subscriber's location. The PDE can use several methods to determine the subscriber's location including GPS and several methods of triangulating the location using the cell towers in the area. It could take 30 seconds or longer to determine location information accurately. A 9-1-1 call cannot be held for this time pending location determination. To address this, the wireless carrier places records in the ALL database for every cell tower and all three sectors within each tower. The carrier knows which cell tower and sector the caller is in so they use a telephone number associated with that location to deliver the call to the selective router. The selective router uses the telephone number to determine which PSAP should get the call and delivers it to that PSAP. The PSAP then uses the telephone number to look up the address in the ALL database. The ALL initially returns the location of the cell tower and sector. As the E9-1-1 call progresses, the dispatcher at the PSAP can request updated location information from the ALL database. When this request is received, the ALL database recognizes the telephone number is assigned to a wireless carrier and uses the number to query the carriers Wireless Positioning Center (WPC). If the PDE has determined the location of the subscriber, this more accurate information is deposited in the WPC and returned to the PSAP as they have requested. Since the wireless caller could be changing location, the PDE continues to update the caller's location so that at any time when a dispatcher requests and update, they will receive it.

VoIP service providers offer a service that is a hybrid between fixed wire line service and mobile wireless service. A subscriber to VoIP service can attach their device to the internet at any available location using a wired or Wi-Fi connection. However, once they are connected, their connection point to the internet cannot change. No technology available today allows a VoIP service provider to automatically determine the location of a subscriber, VoIP service provider require the subscriber to register their location every time they change their connection to the internet. The ALL database is not set up to accommodate real-time changes to support VoIP subscribers. To accommodate the need to support frequent changes to location information, VoIP service providers used some of the techniques employed by the wireless service providers. Specifically, they set up a VoIP Positioning Center (VPC) that contains the current location of all of their subscribers. In addition, they place telephone numbers in the ALL database that is a proxy for a general location. When a 9-1-1 call is made by a VoIP subscriber, the VoIP service provider sends the call to the appropriate selective router using the placeholder telephone number already registered in the ALL database. This allows the call to be routed and delivered. When the dispatcher at the PSAP queries the ALL database for location information, the ALL queries the VPC for the requested information.

The figure below (Typical E9-1-1 Architecture) below shows the architecture used for each of the three service types described. Note that this architecture is not capable of supporting new types of calls to 9-1-1 such as texting and mobile VoIP. Also note that the preferred architecture requires that all service providers and all PSAPs connect to at least two selective routers. This configuration can tolerate the loss of network between an OSP and a selective router, the loss of a selective router, and the loss of a network link between the selective router and a PSAP and still process 9-1-1 calls. This highly redundant architecture is not fully implemented in Oregon. Twenty four PSAPs in the state are serviced by one and only one selective router. OSPs providing service in the jurisdiction of these PSAPs connect to the single selective router providing service to the PSAP. In these areas, 9-1-1 service is much more vulnerable to a service outage that will affect 9-1-1 calls.

Typical E9-1-1 Architecture

APPENDIX B – Current System Audit Results

PSAPs Serviced by Selective Routers

APPENDIX C – Survey of Approaches Selected by Other States

(Note that the approaches selected by other states should not be confused with the alternatives evaluated in this business case. After a review of the approaches other states took, the OEM 9-1-1 has decided to use the approach taken by Maine.)

An analysis of the situations each state faced and the migration approach they chose can be useful for Oregon to consider. Below are case studies of a number of states organized into categories defined by the approach the state is taking to implement NG9-1-1.

NG9-1-1 Migration Approach 1

Approach overview: Three states have or soon will have issued RFPs that include a NG9-1-1 Prime Contractor, systems integration, underlying IP network, NG9-1-1 call routing, NG9-1-1 call handling, and GIS data creation and management.

States selecting this approach: Maine, Massachusetts, Connecticut

Relevant characteristics of the states selecting this approach

	ME	MA	CT
Number of PSAPs	28	250	106
State population:	1.3 m	6.7 m	3.6 m
Size of the State 9-1-1 staff:	Small	Large	large
Availability of funds for NRC	No	Yes	Yes
Current Status	Implemented	RFP to be released soon	Implementation has not started

Primary Strengths/Benefits of this approach:

1. One vendor is responsible for delivering the entire solution within budget, resulting in reduced or eliminated finger pointing.
2. The NG9-1-1 Prime Contractor addresses any incompatibility between components.

Primary Weaknesses/risks of this approach:

1. Multiple changes occurring simultaneously result in increased challenge of diagnosing problems.
2. Substantial markup on all products and services provided to the NG9-1-1 Prime Vendor passed on to the state.
3. States are forced to choose the package offered by the NG9-1-1 Prime Contractor. They cannot pick the “best of breed” components.

Assessment of this approach for Oregon:

This approach was validated through the RFI process and represents the best balance of benefits, risks, and cost.

NG9-1-1 Migration Approach 2

Approach overview: One state decided to contract with one vendor for the underlying IP network and a different vendor to provide NG9-1-1 call routing. This state left purchasing decisions on call handling equipment and the creation and maintenance of the required GIS data to the individual PSAPs. Since only two of the 5 components of a NG9-1-1 system were involved, the state decided that a single individual was required to act as a project manager on behalf of the state. No NG9-1-1 Prime Contractor was required or selected.

States selecting this approach: Alabama

Relevant characteristics of the states selecting this approach

	AL
Number of PSAPs	83 ECDS
State population:	4.8 mil
Size of the State 9-1-1 staff:	None
Availability of funds for NRC	\$1.9m
Current Status	Currently taking live calls from Wireless Carriers and delivering to PSAPs via the existing Selective Routers

Primary Strengths/Benefits of this approach:

1. Cost of the NG9-1-1 Prime Contractor (system integration and markup on all products and services) was avoided.
2. Limiting the scope of the RFP provided more vendors to respond and allowed selection committee to pick the vendor for each piece separately.

Primary Weaknesses/risks of this approach:

1. Increased risk due to reliance on vendors to work together.
2. No single point of accountability.
3. Use of Legacy PSAP Gateways (LPG) increases the price. The LPGs will eventually be decommissioned resulting in waste and rework.
4. This option leaves the PSAPs on their own to upgrade their CPE. This will cost significantly more, puts more of a burden on the PSAPs, and increases the risk and complexity of integration with the rest of the NG9-1-1 system.

Assessment of this approach for Oregon:

This option is not available to Oregon since no state network exists. The OEM 9-1-1 could consider procuring the network separately from the Applications and Appliances; however, the risk associated with this approach is unacceptable to the OEM 9-1-1.

NG9-1-1 Migration Approach 3

Approach overview: Several states decided to implement the underlying IP network and call routing and selected a single NG9-1-1 Prime Contractor to provide the service. As with Approach 1, call handling and GIS was not part of the state procurement. The NG9-1-1 Prime Contractor also provided system integration services.

States selecting this approach: Iowa, Tennessee

Current status: Both states are in the implementation phase. No information is publicly available.

Relevant characteristics of the states selecting this approach

	IA	TN
Number of PSAPs	105	89
State population:	3.1 m	6.5 m
Size of the State 9-1-1 staff:	Small	Medium
Availability of funds for NRC:	Yes	Yes
Current Status	Still being implemented	Still being implemented

Primary Strengths/Benefits of this approach:

1. NG9-1-1 Prime Contractor is responsible for delivering much but not all of the solution, reducing finger pointing.
2. Limited scope makes it easier to manage and allows for more focus.

Primary Weaknesses/risks of this approach:

1. Costs are higher due to the NG9-1-1 Prime Vendor markup on subcontractor provided services.
2. The potential for incompatibility between call routing system and call handling system is increased due to individual CPE upgrades at the PSAPs. State is responsible for arbitration between vendors.
3. Use of Legacy PSAP Gateways (LPG) increases the price. The LPGs will eventually be decommissioned resulting in waste and rework.

Assessment of this approach for Oregon:

This approach again leaves the PSAPs on their own to upgrade their CPE. This eliminates the opportunity to negotiate for a better price at a state level and makes it more difficult to move to a hosted CPE architecture, dramatically increasing the risk of the project.

NG9-1-1 Migration Approach 4

Approach overview: Two states are taking a phased approach to implementing NG9-1-1. In the first phase, they are replacing all PSAP Call Handling Equipment with NG9-1-1 systems but continuing to have calls delivered via the existing selective routers. In a second phase, they will implement NG9-1-1 call routing and the underlying IP network to the Call Handling Equipment (hosted and standalone). Kentucky will be implementing statewide GIS and since each phase is relatively contained, they are not insisting on a NG9-1-1 Prime Contractor.

States selecting this approach: Kentucky, Washington

Relevant characteristics of the states selecting this approach

	KY	WA
Number of PSAPs	92	47
State population:	4.4 m	7.0 m
Size of the State 9-1-1 staff:	Medium	Medium
Availability of funds	No	Yes
Current status	Multiple vendors currently implementing shared Call Handling Systems	Call handling systems have been deployed across the state

Primary Strengths/Benefits of this approach:

1. Implementing in phases reduces the amount of change in any one phase. Opportunity to focus on a smaller number of simultaneous changes decreases risks.
2. Issuing separate RFPs gives the opportunity to select the preferred vendor for each component as opposed to selecting the best overall offer.
3. Perhaps the biggest benefit of this approach is the extra time the OSPs have to prepare for their transition.

Primary Weaknesses/risks of this approach:

1. When the time comes to implement the E911net and NG9-1-1 call routing, there may be an incompatibility with the installed call handling systems.
2. With no single NG9-1-1 Prime Contractor and system integrator, there could be finger pointing.
3. PSAPs may not initially realize many of the benefits of NG9-1-1, i.e. transferring notes along with a call may be supported but not in a standards-compliant manner and disaster planning may not be as robust.

Assessment of this approach for Oregon:

This approach is workable for Oregon; however, it comes at a higher cost. This cost may be justified based on the other advantages it represents for the state

Side by side comparison of state NG9-1-1 migration:

	ME	MA	AL	IA	TN	CT	KY	WA
NG9-1-1 Prime Contractor /Systems Integrator included?	Yes	Yes	No	Yes	Yes	Yes	No	Yes
IP Network included?	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Call Routing included?	Yes	Yes	Yes	Yes	Yes	Yes	No	No
Call Handling procured?	Yes	Yes	No	No	No	No	Yes	Yes
Mapping included?	Yes	Yes	No	No	No	No	No	No
System operations included?	Yes	Yes	Yes	Yes	Yes	Yes		Yes

APPENDIX D – Detailed Cost, Benefit, and Risk Analysis

Detailed Cost Analysis

Overview

Two alternatives were modeled; Alternative 1, the update of the current E9-1-1 system and Alternative, the migration to NG9-1-1 using a NG9-1-1 Prime Contractor to provide a turnkey managed services. Alternative 2, an OEM owned and operated NG9-1-1 system, was not analyzed due to the shortcomings previously outlined that eliminated this alternative from further study. Actual data from the last Biennium was used to create a baseline of spending. Spending projections were then made using; (i) Budgetary estimates provided by Centurylink and Frontier for call handling and mapping equipment replacement, (ii) Vendor bids made in response to RFPs issued by other states, (iii) Policy decisions made by the OEM 9-1-1, (iv) Staffing plans prepared by the OEM 9-1-1, (v) Consultant and Contractor costs from signed and planned contracts, and (vi) Financial guidelines for vendor payments provided by the OEM 9-1-1.

Using the best data available, costs and revenue were projected for both of the alternatives and cash-flow projections were developed. Below is a more detailed explanation of assumptions for the two alternatives followed by the results of the modeling.

Note that all of the assumptions below will be tested and refined over the next 6 months. Respondents to the RFP will be required to provide detailed information as to their proposed project schedule, underlying costs, the architecture they will deploy, their use of subcontractors, and a number of other topics. In addition, the RFP will probe at available payment options and the impact of all options on the total price. As indicated in the assumptions below, we have assumed that neither payments for recurring costs nor payments for any capital outlay will be made to the NG9-1-1 Prime Contractor until the system is in production state wide.

Assumptions common to both alternatives

1. Revenue from taxes collected
 - a. Revenue forecasts using a 4 quarter moving average.
 - b. No material changes in any of the factors that impact revenue (population, number of communications devices, monthly tax collected on each device, etc.)
 - c. Revenue from Pre-paid telecommunications services cannot be predicted at this time. Revenue projections from pre-paid services will be made when we have sufficient history on which to base a projection.
2. 35% of all taxes collected will continue to be allocated to the Enhanced 9-1-1 Subaccount.
3. No funds in the Enhanced 9-1-1 Subaccount will be re-directed to any non-9-1-1 use.
4. Expenditures from both the OEM 9-1-1 Staff Administration Account (a.k.a. the 4% account) and the Enhanced 9-1-1 Subaccount are included in the projections.
5. All costs incurred prior to the beginning of the 2015-17 biennium are treated as sunk costs and are not included.
6. Both alternatives are compared from the beginning of Fiscal 2015 to the middle of Fiscal 2024.

Assumptions for updating existing E9-1-1 system

1. Budgetary estimates for replacement of CPE systems were provided to the OEM 9-1-1 by Centurylink. Frontier did not provide estimates. For Frontier PSAPs the average price per seat from the Centurylink quotes were used to derive replacement costs for Frontier PSAPs.
2. Budgetary estimates for replacement of mapping systems were provided to the OEM 9-1-1 by Centurylink and Frontier.
3. Call handling and mapping systems will be replaced only once at the beginning of the planning window.
4. The OEM 9-1-1 established a schedule for replacement of all systems.
5. PSAPs will make all CPE and mapping system purchasing decisions as they do today. They will be reimbursed from the Enhanced 9-1-1 Subaccount as they are in today's system.
6. Centurylink and Frontier will make all capital investments required to update the network. The selective routers will not be replaced and the level of redundancy in selective routers and interconnections from OSPs and the PSAPs will not be increased.
7. No new staff will be hired by the OEM 9-1-1.
8. QA/QC vendor contract will be terminated 8/31/15.
9. All contracts with RCC will be terminated 8/31/15.
10. Any contract with a Systems Integration Contractor will be terminated 8/31/15.

Assumptions for migrating to NG9-1-1

1. Project schedule
 - a. Project schedule based on RCC experience with projects of similar size, scope, and complexity. See Figure 1 below.
 - b. RFP to be released in calendar year 2015. All other major milestones are to assume this date.
2. Project staffing
 - a. The OEM 9-1-1 will gain approval to hire the necessary staff as outlined in the Governance Plan in July 2015.
 - i. All new staff will be qualified to fulfill their role at the time they start.
 - ii. Each expenditure category was analyzed to determine treatment if/when a migration to NG9-1-1 is approved. See Figure 2 below for more detail.
 1. The OEM 9-1-1 will cease disbursements for some categories immediately.
 2. The OEM 9-1-1 will cease disbursement for some categories when a contract with the selected vendor is signed.
 3. The OEM 9-1-1 will cease disbursements for some categories when the NG9-1-1 system is in production.
 - b. Consultant staff applied will be in accordance with the associated SOWs.
3. Expenditures from the Enhanced 9-1-1 Subaccount
 - a. Expenditures to and on behalf of the PSAPs
 - i. Projections of future expenditures calculated using a four (4) quarter moving average.
 - ii. Each expenditure category was analyzed to determine treatment if/when a migration to NG9-1-1 is approved. See Figure 2 below for more detail.
 1. The OEM 9-1-1 will cease disbursements for some categories immediately.
 2. The OEM 9-1-1 will cease disbursement for some categories when a contract with the selected vendor is signed.
 3. The OEM 9-1-1 will cease disbursements for some categories when the NG9-1-1 system is in production.

4. Some disbursements will continue unaffected by the migration to NG9-1-1.
- b. Payments to consultants and contractors hired to support the project
 - i. Payments to RCC per the change orders now in process.
 - ii. Payments to Gartner per the signed agreement.
 - iii. Payments to a Systems Integration Contractor commencing in April 2015. Projected costs are based on industry averages for such services although no NG9-1-1-specific benchmark data is available.
- c. Payments to the vendor selected as the NG9-1-1 Prime Contractor responsible for implementing the new system
 - i. Procurement is for a complete, end to end, managed service provided by a NG9-1-1 Prime Contractor.
 - ii. No payments to the NG9-1-1 Prime Contractor are made until the system is in production.
 - iii. Contract will be for 6 years of full production.
 - iv. All costs incurred by the NG9-1-1 Prime Contractor prior to production will be amortized across the 6 years of production.
 - v. NG9-1-1 Prime Contractor Cost projections
 1. All based on competitive bids from a variety of vendors in other states.
 2. Adjustments made to adapt for special circumstances in Oregon
 - a. Estimated number of wire line carriers, wireless carriers, cable companies, and VoIP service providers.
 3. All non-recurring costs increased by 15% to be conservative. Quarterly Recurring Costs are calculated as a percentage of the non-recurring costs. As such, they are uplifted by 15% as well.
4. Sub-project assumptions
 - a. OSP and Public Outreach sub-projects (See Appendices F & G)
 - i. Both of these sub-projects will be executed primarily by the OEM 9-1-1 staff. The public outreach project will be executed in collaboration with Oregon NENA & APCO and Public Information Officers (PIOs) at the state and local levels.
 - ii. No capital outlay is anticipated in these sub-projects.

Figure 1: High level project schedule

Figure 2: Treatment of current disbursements from the Enhanced 9-1-1 Subaccount

Expense Categories	Treatment of Expense Category in Cashflow Analysis
MSAG/GIS Maintenance	Will continue on current trend
GIS Data Development	Will continue on current trend
Mapping Software	Will be included in project costs until the beginning of the migration
Mapping Software Maint	Will be included in project costs until the system is in production
Mapping Hardware	Will continue on current trend
Telecommunications/Tech Services	Will be included in project costs until the system is in production
Telecom/Network Services	Will be included in project costs until the system is in production
Telecom/Network Equipment	Will be included in project costs until the system is in production
Terminal Lines	Will be included in project costs until the system is in production
Comp Tech PC Software	Will continue on current trend
Professional Services	Will stop now. Future expenses will be shown in project expenses
Phone Bills	Will be included in project costs until the system is in production
CPE Equipment	Will be included in project costs until the beginning of the migration
CPE Maintenance	Will be included in project costs until the system is in production
Call Reporting Contractor	Will be included in project costs until the system is in production
Wireless Service Charge	Will be included in project costs until the system is in production
UPS	Will be included in project costs until the system is in production
UPS Maintenance	Will be included in project costs until the system is in production
Facility	Will continue on current trend
Call Reporting Labor	Will be included in project costs until the system is in production
All Database Management	Will be included in project costs until the system is in production

Notes:

- New line items may be established to capture payments to RCC and Gartner

Figure 3: Projected costs for GIS, Applications and appliances, call handling and mapping, and network

Costs	Total Capital Outlay Plus Contingency	QRC Projected Cost
NG9-1-1 Prime Vendor Contract		
GIS Data	\$ 409,688	\$ 15,363
Legacy network Gateway Ports (LNGs)	\$ 2,430,238	\$ 91,134
Border Control Functions (BCFs)	\$ 563,500	\$ 21,131
NG9-1-1 Applications & Appliances	\$ 2,875,000	\$ 215,625
Call Handling	\$ 9,763,500	\$ 732,263
Terrestrial Network - Data Center 1 to PSAPs	\$ 211,600	\$ 138,240
Terrestrial Network - Data Center 2 to PSAPs	\$ 184,000	\$ 120,209
Alt Net Data Center 2 to PSAPs	\$ 51,750	\$ 9,000
Vendor Project Management		\$ 71,935
Totals	\$ 16,079,588	\$ 1,327,601

Notes:

- All figures are based on benchmarks established by RCC from vendor RFP responses in a number of other states
- Capital outlay will be the responsibility of the NG9-1-1Prime Contractor
- Payments on the capital outlay and any accrued recurring costs will commence once the system is in production state wide.

Figure 8: Enhanced 9-1-1 Subaccount cash balance

Summary of Cost analysis

Costs to update the current E9-1-1 system:

- All projected costs associated with replacement of call handling and mapping systems at the PSAPs can easily be covered by funds in the Enhanced 9-1-1 Subaccount. Lowest projected balance in the Enhanced 9-1-1 Subaccount is \$4.4 million.
- Quarterly disbursements from the Enhanced 9-1-1 Subaccount are projected to be 82% of projected quarterly tax revenue once all systems are installed.
- Based on budgetary estimates provided to the OEM 9-1-1 by CenturyLink the cost per seat for call handling systems is nearly \$60,000 and the cost of mapping systems is \$19,500.

Costs to migrate to NG9-1-1:

- All projected costs to implement the new system can be covered using tax revenue allocated to the Enhanced 9-1-1 Subaccount. Lowest projected balance in the Enhanced 9-1-1 Subaccount is \$4.7 million.
- Quarterly disbursements from the Enhanced 9-1-1 Subaccount are projected to be 92% of projected quarterly tax revenue once all systems are installed.
- Based on vendor bids to previous RFPs that RCC was involved with, the cost per seat for call handling and mapping is roughly \$35,000.
- Cost to defer all payments to the NG9-1-1 Prime Contractor until the system is in production is \$8.8 million.
 - Key cost sensitivities in a migration to NG9-1-1 as planned include the following:
 - The number of PSAPs and the total number of workstations to be replaced.
 - The number of OSPs, the selective routers the OSPs are currently connected to, and the network capacity each OSP has to each selective router.
 - The OSPs willingness to support the project and migrate to the new system according to the planned schedule and according to the planned interconnection strategy.
 - The willingness of the current System Service Providers to support the project.
 - Longer term, the cost of migrating to NG9-1-1 will be affected by the following sensitivities:
 - As NG9-1-1 Prime Vendors successfully deliver projects, the risk level will go down and their bids may be less than today.
 - If a few large NG9-1-1 Prime Vendors start winning all of the state level procurements, competition will be lessened and bids will likely increase.

Detailed Benefit Analysis

Benefits of Updating the existing E9-1-1 system:

1. There will be very limited re-training of PSAP staff on the call routing system required. The existing selective routers will continue to be used. All routing table information used to drive the routing of calls by the selective routers will remain unchanged. The processes used by the PSAPs to view, modify and change the routing tables will also remain unchanged. The process and procedures used by PSAPs when they are taken out of service will remain unchanged. Very few if any processes or procedures followed by the PSAPs will change as a result of executing Alternative 1. This means very little distraction for the PSAPs.
2. Re-training on new call handling and mapping equipment at the PSAPs will be limited to user training. NEW call handling equipment will include new functionality. The look and feel of the user interface will also likely change. The interface to the network and to the existing ALI databases will remain unchanged. Retraining that is required will be limited to the users of the call handling equipment. Again, this means distractions and time away from taking calls will be kept to a minimum.
3. Additional staff in the OEM 9-1-1 will not be required nor will additional training be required as a result of the system upgrades. The roles and responsibilities of the OEM 9-1-1 will not change under Alternative 1. The interface between the OEM 9-1-1 and the SSPs will not change. The interface between the OEM 9-1-1 and the PSAPs will not change. As a result, no additional headcount or staff training will be required by the OEM 9-1-1. This limits the distraction to the OEM 9-1-1 management team to hire new staff and limits the need for training and retraining.
4. No impact on the OSPs operating in the state. The OSP interconnection points will remain unchanged for all OSPs operating in the state. The systems and procedures used to load the ALI database will not change. Alternative 1 does not impact the OSPs in any way. This will eliminate the need for any OSP outreach and therefore any investment of time by the OEM 9-1-1.
5. No change in the SSPs providing E9-1-1 services. CenturyLink and Frontier will continue to provide services to the PSAPs and the OEM 9-1-1. No change in how the OEM 9-1-1 and the PSAPs interface with the SSPs is required in Alternative 1. This means business as usual with no time required to create new relationships and interfaces with the SSPs providing 9-1-1 services in the State.

Benefits of Migrating to NG9-1-1:

1. A NG9-1-1 system as defined in the draft RFP should have a higher level of availability and reliability than the current system. The technical specifications in the draft RFP require full redundancy and diversity per the NG9-1-1 architecture. In addition, the Service Level Agreement specifies 99.999% system availability. The NG9-1-1 system specified will deliver a higher level of overall availability than the current E9-1-1 system.

2. Call setup time in the new system will be faster than the existing system. The NG9-1-1 architecture and the use of an IP network will result in faster call setup times. The Service level agreement requirements in the draft RFP calls for call setup to be less than 1 second. The NG9-1-1 specified will reduce emergency call setup time thus reducing the time it takes to send help.
3. PSAP dispatchers will be able to transfer calls to any other PSAP in the state along with notes taken prior to the transfer. Inherent in the NG9-1-1 architecture is the ability to transfer a call with all notes to another dispatcher in the same PSAP or in any other PSAP in the state. This requirement is also called out in the draft RFP. The NG9-1-1 specified will provide for a higher level of service to residents and visitors that need help.
4. An NG9-1-1 system will allow the state to develop more flexible plans to divert 9-1-1 calls to any available PSAP during major emergency events. NG9-1-1 uses a set of Policy Routing Rules (PRRs) to divert calls intended for a PSAP that is out of service to any other available PSAP in the system. PRRs are a powerful tool to address situations caused by large scale emergencies. The NG9-1-1 specified will provide the residents and visitors a much higher level of service if and when a large scale disaster, manmade or natural, occurs.
5. An NG9-1-1 system will make it easier for dispatchers to accept text to 9-1-1. An interim text to 9-1-1 solution is being rolled out by the four largest wireless carriers. Smaller wireless carriers will follow. The FCC is also considering requiring text to 9-1-1 support with any two-way texting service. The network and systems used in a pre-NG9-1-1 environment are separate, and are used to go around the current E9-1-1 system. A fully implemented NG9-1-1 system supports the delivery of text messages within the system. This allows for faster delivery of the text, faster response, and more accurate location information. The NG9-1-1 system specified will allow users of non-voice communications products and services to receive the same level of support as those using voice based 9-1-1 services.
6. An NG9-1-1 system can support the delivery of data, photographs, and full motion video associated with the caller and/or the event. The delivery of multi-media content is part of the design of NG9-1-1. PSAPs and the OEM 9-1-1 will need to decide if supplemental information is desirable and if so, what type of information to receive and under what circumstance. An example of supplemental data is telematics information provided by companies such as OnStar. Systems in cars that are involved in an accident are aware of the number of occupants, which occupant was wearing a seatbelt, the speed the vehicle was traveling, and other information that could help dispatchers determine how to respond to an incident. The NG9-1-1 system specified will provide first responders with a broad range of information related to the incident enabling a more efficient and timely response.
7. An NG9-1-1 system provides more information to the Emergency Operation Centers. The NG9-1-1 system ESInet will link all of the PSAPs in a statewide network. Inherent to the NG9-1-1 system is an awareness of the operational status of each PSAP, the number of 9-1-1 calls currently in each PSAPs call queue, the number of calls that are being diverted from a PSAP to other PSAPs, and the location of all callers. This information is available directly from the NG9-1-1 system and does not require any request to the 9-1-1 service provider. The NG9-1-1 system will provide information needed for the optimum level of command and control allowing state and local level emergency management to better address large scale emergency situations.

8. An NG9-1-1 system provides mechanisms to divert calls destined to the assigned primary PSAP to address abnormal situations. In an NG9-1-1 system, the PSAPs and the OEM 9-1-1 define Policy Routing Rules which identify the routing scenarios for NG9-1-1 emergency request. These Policy Routing Rules allows the characteristics of the call and the operational status of participating PSAPs to determine alternate routing paths as warranted. The NG9-1-1 system specified ensures that all emergency calls placed will be answered by a PSAP that is capable of handling the emergency request.
9. An NG9-1-1 system will support new communications devices and services the state and/or the Federal Communications Commission may require. Text to 9-1-1 is just the latest example of a service the FCC determined should support 9-1-1. As others are identified, the NG9-1-1 architecture will make it easier and faster to provide these services. The NG9-1-1 system specified ensures that as citizens and visitors adopt new communications technologies, 9-1-1 service can be provided.
10. By procuring a NG9-1-1 system through an RFP process, the state and the PSAPs have an opportunity to buy precisely the system they want. The NG9-1-1 system defined in the draft RFP requires adherence to the NENA NG91-1 standards but it also takes it further to specify many characteristics of the desired system. A compliant response to the RFP must address each feature the RFP development team has listed. The taxpayers in the state will get the best value in the investment made in a new 9-1-1 system for the state.

Detailed Risk Analysis

Note that in the following tables, the rating scales used for defining the impact and probability of each risk is as follows:

Risk Impact Rating	Cost Effect	Schedule Effect	Technical/quality Performance
1 - Very Low	<1%	Possible slip of non-critical activities	Possible reduction in performance
2 - Low	2-4%	No milestone slips, work-around require	Slight reduction of performance
3 - Moderate	5-7%	Minor slip of milestone	Minor performance degradation
4 - High	8-10%	Major slip of milestone	Serious performance degradation
5 - Very High	>10%	Unacceptable slip of milestone	Unacceptable performance degradation
Probability Assessment			
Probability Rating	Probability Percentage	Probability Definition	
Very Low	10%	Remote - risk event not expected to occur.	
Low	30%	Unlikely - Risk event less likely than not to occur.	
Probable	50%	Likely - Risk event may or may not occur.	
High	70%	Highly Likely - Risk event more likely than not to occur.	
Very High	90%	Nearly Certain - Risk event expected to occur.	

Also note that more information is in the Risk and Issues Management Plan. The Risk Log will be initially populated by the risks in the table below corresponding to the alternative selected. As a living document, the Risk Log will then be managed by the Project Manager

Risks in updating current E9-1-1 Systems:

Risk Number	Primary Risk Category - Technology, Organizational, Business, Financial	Risk Identification Date	Risk Reporter	Probability of Risk - Low, Medium, or High	Impact of Risk - Low, Medium or High	Risk score	Risk Timeframe - Project Phases	Assess Date	Risk Title/Description	Risk Triggers	Recommended Action - Avoid, Transfer, Mitigation, Accept	Risk Own	Risk Response Strategy
Update E9-1-1 - 1	Technical	9/1/2014	RCC/ The OEM 9-1-1	Low	High	3	Implementation	9/1/2014	Disruption of Operations	PSAP reporting disruptions	Avoid	Project Manager	Well thought out implementation plan with roll-back options at each step
Update E9-1-1 - 2	Technical	9/1/2014	RCC/ The OEM 9-1-1	Medium	High	6	Implementation and Production	9/1/2014	Repair of Selective Routers not possible	SSPs notifying the OEM 9-1-1 that repairs are no longer possible	Mitigate	Project Manager	Planning with current SSPs to stockpile spare parts and continue to train technicians
Update E9-1-1 - 3	Technical	9/1/2014	RCC/ The OEM 9-1-1	High	Medium	6	Implementation and Production	9/1/2014	E9-1-1 System Outages increase due to level of redundancy	Outages reported due to lack of redundancy	Mitigate	Project Manager	Increase redundancy where possible
Update E9-1-1 - 4	Financial	9/1/2014	RCC/ The OEM 9-1-1	Low	High	3	Implementation and Production	9/1/2014	Funds in the Enhanced 9-1-1 Sub-Account are diverted	Legislature votes to divert funds	Avoid	Executive Steering Committee	Educate the Legislature
Update E9-1-1 - 5	Financial	9/1/2014	RCC/ The OEM 9-1-1	Low	High	3	Implementation and Production	9/1/2014	Decline in population of telecommunications devices resulting in reduced revenue	Tax revenues decline	Mitigate	Executive Steering Committee	Establish budget with buffer for contingencies

Risks in migrating to NG9-1-1 (Page 1 from the Risk Log):

Risk Number	Primary Risk Category - Technology, Organizational, Business, Financial	Risk Identification Date	Risk Reporter	Probability of Risk - Low, Medium, or High	Impact of Risk - Low, Medium or High	Risk Score	Risk Timeframe - Project Phases	Assess Date	Risk Title/Description	Risk Triggers	Recommended Action - Avoid, Transfer, Mitigation, Accept	Risk Own	Risk Response Strategy
NG9-1-1 - 1	Technology	11/5/2013	RCC/The OEM 9-1-1	High	High	9	Production	4/15/2014	Disruption to service due to compromise of network security	NOC identifies breaches	Mitigate	Project Manager	(i) Ensure NG9-1-1 Prime Vendor adherence to NENA standards, including security aspects. (ii) Limit access to systems, via cyber and physical security measures. (iii) Low level access to vendor. (iv) User training (v) Periodic audits using NG-SEC checklist.
NG9-1-1 - 2	Technology	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Implementation	4/15/2014	Technical risks during cutover and migration	Problems encountered during cutover	Mitigate	Project Manager	(i) Detailed test and cutover plan to be developed by NG9-1-1 Prime Vendor and approved by the OEM 9-1-1. (ii) Strict adherence to QA/QC Plan throughout the design and implementation phases. (iii) Conduct a thorough go-no go evaluation prior to system commissioning (iv) Involvement by all stakeholders including SSPs and OSPs.
NG9-1-1 - 3	Business	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Implementation	4/15/2014	Not meeting the target schedule	Project schedule does not achieve milestones as laid out in Business Case	Mitigate	Project Manager	(i) Develop and adhere to a schedule management plan. (ii) Develop a realistic schedule with contingencies built in. (iii) Collaborate with NG9-1-1 Prime Vendor on scheduling issues. (iv) Stakeholder involvement in negotiate vendor project schedule prior to contract execution.
NG9-1-1 - 4	Technology	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Implementation	4/15/2014	Inadequate cooperation of System Service Providers during migration	System Service Providers delay or refuse to provide required information, data, or network facilities	Avoid	Project Manager	(i) Execute SSP outreach sub-project.
NG9-1-1 - 5	Technology	11/5/2013	RCC/The OEM 9-1-1	Low	Medium	2	Implementation & Production	4/15/2014	New requirements imposed on system from outside	New requirements identified not anticipated in the project plan	Avoid	Project Manager	(i) Strict adherence to the NENA standards
NG9-1-1 - 6	Technology	11/5/2013	RCC/The OEM 9-1-1	Low	High	3	Production	4/15/2014	Lack of GIS data currency and accuracy	GIS data is incomplete or inaccurate	Avoid	Project Manager	(i) Execute GIS Sub-project
NG9-1-1 - 7	Technology	11/5/2013	RCC/The OEM 9-1-1	Low	Medium	2	Implementation & Production	4/15/2014	NG9-1-1 Prime Vendor's system readiness for NG9-1-1	NG9-1-1 Prime Vendor's system are not in compliance with their BID	Avoid	Project Manager	(i) Request specific information on this issue in RFP. (ii) Thorough vetting during NG9-1-1 Prime Vendor selection process. (iii) Penalties for non-compliance
NG9-1-1 - 8	Technology	11/5/2013	RCC/The OEM 9-1-1	Low	Medium	2	Implementation	4/15/2014	Connectivity to neighboring states (Lack of cooperation of Other State SSP)	Neighboring states are not cooperative	Avoid	Project Manager	(i) Clear requirements in the RFP. (ii) Discussions with neighboring states prior to RFP release. (iii) Thorough exploration of the proposer's ability to meet the requirements, during the selection process
NG9-1-1 - 9	Organizational	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Production	4/15/2014	Training and retention of PSAP staff	PSAP staff turnover exceeds target level	Avoid	PSAP directors	(i) Provide for sufficient training requirements in the RFP. (ii) Management training on retention issues.

Risks to migrating to NG9-1-1 (Page 2 from the Risk Log):

Risk Number	Primary Risk Category - Technology, Organizational, Business, Financial	Risk Identification Date	Risk Reporter	Probability of Risk - Low, Medium, or High	Impact of Risk - Low, Medium or High	Risk Score	Risk Timeframe - Project Phases	Assess Date	Risk Title/Description	Risk Trigger	Recommended Action - Avoid, Transfer, Mitigation, Accept	Risk Own	Risk Response Strategy
NG9-1-1 - 10	Organizational	11/5/2013	RCC/The OEM 9-1-1	Low	High	3	Planning & Implementation	4/15/2014	Buy in from PSAP (not accepting change, big brother, lack of knowledge)	Concerns expressed by PSAPs or county boards	Avoid	Executive Sponsor	(i) Continuous communications. (ii) Open, transparent process. (iii) Seek inputs from PSAPs on key decisions especially related to CPE. (iv) Representation on proposer selection committee. (v) Involvement in Governance process
NG9-1-1 - 11	Organizational	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Planning & Implementation	4/15/2014	Loss of key personnel	Loss of Key staff	Avoid	Executive Sponsor	(i) Develop and adhere to change management plan (ii) Management training
NG9-1-1 - 12	Organizational	11/5/2013	RCC/The OEM 9-1-1	Low	Low	1	Throughout	4/15/2014	PSAP consolidations and changes	Notification from vounties of impending consolidations	Avoid	Executive Sponsor	(i) Requirements and pricing necessary to address consolidation in the RFP and NG9-1-1 Prime Vendor contract. (ii) Monitor discussions involving consolidation.
NG9-1-1 - 13	Business	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Production	4/15/2014	Disruption to the PSAPs	Any loss of productivity at the PSAP	Mitigate	Project Manager	(i) Detailed implementation plan to be provide by NG9-1-1 Prime Vendor and approved by the OEM 9-1-1. (ii) Thorough testing in accordance with QA/QC plan prior to go-live. (iii) Ensure the ability to fall back to previous step in the migration.
NG9-1-1 - 14	Business	11/5/2013	RCC/The OEM 9-1-1	Low	High	3	Production	4/15/2014	Risk to the safety of the public	Any loos of calls or misroutes to PSAPs	Mitigate	Project Manager	(i) Complete, detailed requirements in the RFP. (ii) Detailed NG9-1-1 Prime Vendor implementation plan approved by the OEM 9-1-1. (iii) Adherence to QA/QC plan (iv) Fallback options at every step. (iv) Complete redundancy
NG9-1-1 - 15	Business	11/5/2013	RCC/The OEM 9-1-1	Low	Low	1	Production	4/15/2014	Risk of not meeting public expectations with regard to access to 9-1-1 with new technology	Feedback from the public and/or PSAPs	Mitigate	Executive Sponsor	(i) Execute Public Outreach sub-project
NG9-1-1 - 16	Business	11/5/2013	RCC/The OEM 9-1-1	High	High	9	Implementation	4/15/2014	Legislation, legislative control, lack of legislative endorsement	Project is not approved	Mitigate	Executive Sponsor	(i) Add staff to focus on legislative activities. (ii) proactive outreach to legislature. (iii) Information sessions for legislators.
NG9-1-1 - 17	Business	11/5/2013	RCC/The OEM 9-1-1	Low	High	3	Planning	4/15/2014	Failure of contract negotiations	No agreement on contract terms	Mitigate	Project Manager	(i) Clear requirements and expectations in the RFP - no surprises during negotiations. (ii) Ensure multiple qualified bids.
NG9-1-1 - 18	Business	11/5/2013	RCC/The OEM 9-1-1	Low	Medium	2	Planning	4/15/2014	RFP Protest	Protest(s) fled by one or more proposers	Mitigate	Project Manager	(i) Ensure the RFP is unbiased. (ii) Open transparent, defensible NG9-1-1 Prime Vendor selection process.

Risks in migrating to NG9-1-1 (Page 3 from the Risk Log):

Risk Number	Primary Risk Category - Technology, Organizational, Business, Financial	Risk Identification Date	Risk Reporter	Probability of Risk - Low, Medium, or High	Impact of Risk - Low, Medium or High	Risk Score	Risk Timeframe - Project Phases	Assess Date	Risk Title/Description	Risk Trigger	Recommended Action - Avoid, Transfer, Mitigation, Accept	Risk Own	Risk Response Strategy
NG9-1-1 - 19	Business	11/5/2013	RCC/The OEM 9-1-1	Low	Medium	2	Planning & Implementation	4/15/2014	QA/QC objections	Feedback from Gartner	Mitigate	Project Manager	(i) Ensure open, ongoing dialogue. (ii) defensible decisions.
NG9-1-1 - 20	Business	11/5/2013	RCC/The OEM 9-1-1	Low	Low	1	Production	4/15/2014	Managing public expectations	Feedback from the Public	Mitigate	Project Manger	(i) Execute Public Outreach sub-project
NG9-1-1 - 21	Business	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Planning	4/15/2014	Insufficient number of vendors responding	Low number of proposals	Mitigate	Project Manager	(i) Structure RFP to encourage vendor responses. (ii) Provide adequate time for vendors to respond. (iii) Ensure the project is attractive to vendors - no reason to no-bid.
NG9-1-1 - 22	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Implementation	4/15/2014	Dual analog and digital networks in tandem for too long	Running in parallel for longer than planned	Mitigate	Project Manager	(i) Ensure master schedule is realistic. (ii) Negotiation of schedule with proposer prior to contract execution (ii) Execute OSP outreach sub-project.
NG9-1-1 - 23	Financial	11/5/2013	RCC/The OEM 9-1-1	High	High	9	Implementation	4/15/2014	Diversion of 9-1-1 funds	Funds in the Enhanced 9-1-1 Sub-account ddiverted	Mitigate	Executive Sponsor	(i) Hire staff to work with legislature. (ii) Proactive outreach to the legislature. (iii) Educational session for the legislature.
NG9-1-1 - 24	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Implementation	4/15/2014	Inadequate bandwidth sections causing additional capital outlay	Additional network infrastructure required	Mitigate	Executive Steering Committee	(i) Additional research prior to issuing the RFP or, at a minimum, prior to contract negotiations. (ii) Explore microwave and/or satellite as options. (iii) Seek options from the vendors in the RFP.
NG9-1-1 - 25	Financial	11/5/2013	RCC/The OEM 9-1-1	High	High	9	Implementation	4/15/2014	Readiness of OSPs to migrate to NG9-1-1 within timeline	OSP's not able to mee the project schedule	Mitigate	Project Manager	(i) Execute the OSP outreach sub-project.
NG9-1-1 - 26	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	Low	2	Implementation	4/15/2014	Economy in the State declines and revenues decline	Projectons made made by the State budget office	Mitigate	Executive Steering Committee	(i) Decide on appropriate financial buffer and structure the contract to ensure success.

Risks in migrating to NG9-1-1 (Page 4 from the Risk Log):

Risk Number	Primary Risk Category - Technology, Organizational, Business, Financial	Risk Identification Date	Risk Reporter	Probability of Risk - Low, Medium, or High	Impact of Risk - Low, Medium or High	Risk Score	Risk Timeframe - Project Phases	Assess Date	Risk Title/Description	Risk Trigger	Recommended Action - Avoid, Transfer, Mitigation, Accept	Risk Own	Risk Response Strategy
NG9-1-1 - 27	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Implementation	4/15/2014	Running over budget	Projections cost exceeding projections	Mitigate	Executive Steering Committee	(i) Costs in plan are very conservative. (ii) Get fixed, firm pricing fromproposers and include in contract. (iii) Ensure all optional and/or variable costs are established in the contract.
NG9-1-1 - 28	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Planning	4/15/2014	Proposals higher than budget Inadequate funding	Bids from Proposers in excess of projections	Mitigate	Executive Steering Committee	(i) Financial analysis in the planning process is conservative. (ii) Ensure project requirements are clear, concise, detailed, and accurate to avoid proposers building in unnecessary contingencies.
NG9-1-1 - 29	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Planning	4/15/2014	Lack of qualifying bids	Bids from Proposers do not meet requirements	Mitigate	Executive sponsor	(i) Ensure RFP is fair and provides incentives to proposers. (ii) Provide sufficient time for vendor responses. (iii) Wide notification of the RFP.
NG9-1-1 - 30	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	Medium	4	Implementation & Production	4/15/2014	Managing major change orders	Change order proposed by the NG9-1-1 Prime Vendor	Mitigate	Executive Steering Committee	(i) RFP should be complete and contain all necessary information for an informed proposer response. (ii) RFP should solicit pricing for all variable elements. (iii) Contract should cover anticipated variables. (iv) Any changes required after contracting should be managed through the process defined in the Scope Management Plan.
NG9-1-1 - 31	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Implementation	4/15/2014	Data not gathered or incorrectly gathered during developing of RFP	Data gathered after the RFP that is incomplete or inaccurate	Mitigate	Project manager	(i) QA/QC of RFP. (ii) Additional reviews of the RFP by RCC and the OEM 9-1-1. (iii) Encourage questions from proposers covering missing or questionable information.
NG9-1-1 - 32	Financial	11/5/2013	RCC/The OEM 9-1-1	Low	Medium	2	Implementation	4/15/2014	Unknowns at PSAPs and facility modifications	PSAPs facilities require modifications not identified in the RFP	Mitigate	Project manager	(i) Build a PSAP audit into the NG9-1-1 Prime Vendor contract.
NG9-1-1 - 33	Financial	11/5/2013	RCC/The OEM 9-1-1	Low	Low	1	Throughout	4/15/2014	Prepaid Funding	Tax revenues from Prepaid fall below expectations	Mitigate	Executive Sponsor	(i) Do not include possible revenue stream from prepaid into planning models.
NG9-1-1 - 34	Financial	11/5/2013	RCC/The OEM 9-1-1	Medium	High	6	Implementation	4/15/2014	Risk of running out of money in reserve fund	Project cost over runs are projected	Mitigate	Executive Steering Committee	(i) Begin with very conservative planning cost model. (ii) Decide on project funding model that provides sufficient buffer. (iii) Eliminate cost unknowns continuously through the planning and implementation phases. (iv) NG9-1-1 Prime Vendor contract is fixed cost. (v) Adhere to Scope Management Plan.

APPENDIX E - GIS Data

The application of Geographic Information System (GIS) technology to public safety is not a new concept; it has been widely used to aid in the efficient delivery of emergency services to the public for years throughout the nation. Primarily, the role of GIS data has been for caller location validation once the call for assistance has been received within the appropriate Public Safety Answering Point (PSAP). While this use of GIS data has proven extremely beneficial, disparate systems in use within PSAPs have resulted in segmented, standalone GIS datasets which traditionally only extend to jurisdictional boundaries, with spatial discrepancies between these different jurisdictions, and conflicting schema and attribution due to use in proprietary systems.

As movement is made towards Next Generation 9-1-1 (NG9-1-1), accurate and standardized GIS information becomes paramount to the success of any implementation. GIS data comes into play much earlier in the call delivery process – it is now responsible for validation of end point devices before an E9-1-1 call is made and replaces the Master Street Address Guide (MSAG). It now becomes the authoritative data for the correct routing of NG9-1-1 calls to PSAPs, in addition to caller location validation within the PSAP once the correct route is made.

The guiding principles within NG9-1-1 are the ability to promote increased interoperability by removing proprietary data structures and utilization of standards based systems and architecture. The majority of NG9-1-1 initiatives are being planned and implemented on a regional or state-wide basis due to the system complexity and expense and to aid in interoperability. These regional implementations require coordination, sharing and conflation of GIS data across jurisdictions into a seamless, regionalized dataset.

The OEM 9-1-1 will act as the provisioning agent for all GIS information required to be used within the NG9-1-1 system. This requires the development of two distinct plans; the policies that govern the conflation process from the local authority to the OEM 9-1-1, and ultimately consumption of GIS data by the Next Generation 9-1-1 provider, and all processes to ensure data completeness, accuracy and standard adherence.

In order to eliminate the duplication of effort and resources associated with the development and maintenance of NG9-1-1 required GIS datasets (i.e. street centerline, address points) that are also useful for non-9-1-1 applications, the implementation of data sharing agreements between PSAPs, OEM and DAS CIO GEO is applicable. The existing Oregon GeoSpatial Data Library/Clearinghouse stores and distributes geospatial data to both internal and external agencies per state procedures, including local PSAPs and LGAs. Leverage the existing Oregon GeoSpatial Data Library/Clearinghouse to store and distribute non-critical, reference datasets for PSAP and LGA use while the OEM 9-1-1 provides address based datasets to DAS CIO GEO is critical for a successful NG9-1-1 GIS integration and implementation. Establishing the roles, outline of responsibilities, policies and processes for all entities involved in the creation, maintenance, conflation and provisioning of GIS data is essential for any implementation to be successful. The NENA i3 model is built upon utilization of local GIS data due to the need for the most

accurate, detailed, and up to date information possible and, at the same time, to avoid duplication of efforts between multiple agencies. Therefore, the decision has been made for the OEM 9-1-1 staff to coordinate with the local GIS providers, in an oversight and support role, to assist in the data maintenance process. The OEM 9-1-1 staff will not be responsible for the creation or maintenance of any GIS data in use within the NG9-1-1 system. Rather their role is to ensure overall project management and support services, while ensuring data quality, consistency, and accuracy. This requires a high level of coordination between the parties responsible for the creation and maintenance of data and the group administering the NG9-1-1 system.

The process that will be used to provide routinely scheduled updates of GIS data to the OEM 9-1-1 is already in place. Currently, the OEM 9-1-1 is provided with GIS updates from the local GIS authorities/designees on a quarterly basis. This practice has been in place and overall participation rate is high. A refinement of this process to include distribution to NG9-1-1 applications (LCRF/LVF) and the Oregon Geospatial Data Library/Clearinghouse would enhance the process while meeting GIS needs for both NG9-1-1 participates and non-public safety entities.

Due to the rural nature of much of the area involved and using historical GIS and MSAG data changes as a guide to estimate updates to GIS data in a NG9-1-1 environment, it has been determined that a weekly, bi-weekly or monthly update is not necessary for the majority of jurisdictions within the State of Oregon during normal conditions. The update schedule for submittal of GIS data for inclusion into the state-wide dataset has been defined as a minimum of once a quarter, additionally throughout the period when any change in data warrants update into the NG9-1-1 system. The expectation is that jurisdictions across the state will fall into both categories. Several more rural counties, where construction, annexation and other factors that necessitate data change are less frequent will not require updates more frequently than a quarterly basis. Larger metropolitan areas, such as Portland or Salem are expected to see more frequent changes in their data due to a more dynamic nature. In these cases, when changes to the GIS data are made that have an impact upon 9-1-1 call location validation and delivery, the local GIS authorities will be required to submit their updated GIS data to the OEM 9-1-1 for provisioning into the NG9-1-1 system.

Although GIS data updates will continue to be required on the same quarterly schedule, an overall increase in the number and frequency of updates can be expected due to the need for mid-cycle changes of the NG9-1-1 system. These updates need to be archived for a minimum of one year for both historical and system roll back requirements. The impact of storing GIS data and orthophotography spanning such a large area, 98,381 square miles, is significant. The OEM 9-1-1 does not have network storage, adequate in terms of space nor replication and recovery processes, to house and provide for adequate back up of this data. It is imperative that any network or power outages, natural or manmade disaster or any other incident does not affect the ability of the OEM 9-1-1 staff to access, update, and retrieve the state-wide conflated GIS dataset.

In order to ensure that GIS data is being updated in accordance with the established schedule of once a quarter, records will need to be maintained of all submissions, by agency. Although there is little

complexity in performing this task, the potential workload impact can be high in times of significant updates.

The OEM 9-1-1 has a responsibility for overall system understanding that requires staff to be knowledgeable of all updates that have potential to impact the system. Ensuring a statewide perspective is of utmost importance, and all updates have to be considered in not only the area in which they are placed, but also any impacts these changes can have on other jurisdictions. Policies and procedures that ensure multiple layers of data quality and validation are required. Due to the significant impact of GIS data in NG9-1-1, coupled with the amount and complexity of data involved, there is a need for an independent GIS data assessment process and specific action item plan to be developed to ensure data is ready within the existing project schedule. The scope of work and schedule for this assessment is currently under way and is an immediate priority.

The GIS data assessment process has seven (7) main steps: identification of missing data; MSAG, GIS and ALL data synchronization; development of the OEM 9-1-1 data standards; spatial discrepancy resolution; attribute discrepancy resolution; a formalized error resolution process and a final data check before data provisioning into Next Generation 9-1-1. These tasks are not independent from one another, and will occur contemporaneously.

In the current application of GIS in 9-1-1, the required GIS data is vendor specific and varies greatly. While there are some standard datasets in use, not all data that will be required for NG9-1-1 call routing exists currently. This missing GIS data presents a large risk for the implementation of NG9-1-1. The development of GIS data requires potential significant local resources to create it, and it also requires the OEM 9-1-1 resources to oversee this process and support these efforts. These processes are currently underway and significant progress has been made; however, this process is not complete. The OEM 9-1-1 will work with the GIS data vendor to ensure all missing data required for NG9-1-1, in accordance with all relevant NENA i3 standards, is identified and a plan is documented to obtain or create this data. This process will take place in cooperation with local GIS data providers.

With the transition to NG9-1-1, the role of the MSAG is replaced with GIS data. In order to ensure no data loss or discrepancy, the GIS, MSAG and ALL data must be synchronized to ensure no fall out occurs. This process is documented in NENA 71-501 v1. The OEM 9-1-1 staff has begun this process for the GIS data within the state and is providing necessary information to the GIS data providers to allow for source data corrections. This portion of the assessment is a long process, and after the first round of synchronization is complete, it must be repeated to validate the errors have been completed correctly. The GIS data assessment will expedite the synchronization process.

NENA i3 standards define the specific GIS data attribute requirements for use within NG9-1-1. Adherence to these standards is critical to promote and utilize the interoperability inherent within a system based upon open systems and standards. The processes involved in multi-agency, multi-jurisdictional and multi-regional incidents and call transfer are simplified by utilization of these standards, allowing multiple PSAPs, even across state lines, to utilize a seamless GIS infrastructure. This

allows for the creation of a common operating picture, to see beyond borders, without need for on the fly data conversion or translation tables.

Although adherence to these NENA i3 standards will provide enormous benefit to PSAPs in a NG9-1-1 environment, these data structure and schema changes present a large challenge to local GIS data providers. Currently, few local GIS authorities across the country maintain their data in the exact format that is required for NG9-1-1. The GIS assessment will assist the OEM 9-1-1 in the development of automated tools to convert local source GIS data into the NENA i3 standards prior to submission to the OEM 9-1-1 for inclusion in the statewide dataset. This also allows the local GIS authority the ability to validate the data, after the conversion process and before it is submitted to the OEM 9-1-1. This process also reduces the potential for human error to adversely affect the update process as each local GIS provider will be performing a singular conversion process.

In addition to data schema and structure concerns, spatial accuracy and conformance on a statewide level is critical to the successful deployment of NG9-1-1. Most local GIS authorities currently maintain their data independently of one another, often using different software, datums and projections. Although typically minor in size, when GIS data from two adjacent jurisdictions are compared relative to one another, there are inaccuracies that can be seen in regards to spatial extent. Street centerline features are not connected across city and county lines, resulting in a fragmented network incapable of performing routing analysis. PSAP and county boundaries have gaps and overlaps. In the current E9-1-1 environment, where GIS data is not used to perform call routing to the appropriate PSAP, these small inaccuracies have little impact on the delivery of public safety services. However, in a statewide implementation of NG9-1-1, these discrepancies must be resolved. The OEM 9-1-1 is currently working with local GIS data providers to ensure a seamless, borderless GIS dataset throughout the state. Through the development of “stitch points” along city and county borders, local GIS authorities are able to agree upon these boundaries and ensure all data is consistent. While the OEM 9-1-1 is assisting in this process, local GIS data providers are responsible for correcting their source data to include any changes to the spatial extent of their data to prevent these errors from continuing in subsequent updates. As previously discussed, local GIS data is consumed by multiple agencies for multiple purposes, and any spatial changes to the data will have broad impact throughout this user community. The OEM 9-1-1 has been involved in a significant amount of outreach to their user community to promote cooperation, via the annual GIS/MSAG Conference and other formats, to ensure the user community at large understands the reasons for these changes.

As part of the GIS data assessment process, the spatial accuracy of the statewide conflated dataset will be tested and validated. The OEM 9-1-1 will liaise with local providers to correct any inaccuracies identified.

The OEM 9-1-1 staff must verify GIS data attribute accuracy and adherence to all relevant data standards. This process is largely already in place, with all quarterly updates being reviewed on several key factors, but will change dramatically with the implementation of NG9-1-1. Currently the GIS data updates that are submitted to the OEM 9-1-1 are not under the stringent response time constraints that

will exist when this data is used for 9-1-1 call routing. A large emphasis must be placed upon establishing procedures and internal policy to ensure all updates are received and all quality control checks are employed immediately². The GIS data assessment will ensure data attribution is consistent with all data standards, including: NENA i3 standards, US Postal Service Publication 28 Appendix B, and the Federal Geographic Data Committee United States Thoroughfare, Landmark and Postal Address Data Standard. Documentation of discrepancies will be provided and the OEM 9-1-1 will liaise with the local GIS data providers to ensure all corrections are made.

The most significant consideration of ensuring data quality is the error resolution process employed jointly by the OEM 9-1-1 staff and all local GIS data providers. It is imperative that all inaccuracies identified within the GIS data updates be reported back to the local GIS authority and fixed within the local source data to avoid re-submittal in subsequent updates. Failure to do so will result in reduced level of effort by the OEM 9-1-1 staff during the quality control and data validation process causing potential significant impacts and delays to data updates. In order to prevent this risk from achieving significant impacts on the process, a formal written policy, agreed upon by all local GIS data providers and the OEM 9-1-1 must be put in place, tested and validated before any NG9-1-1 system can be implemented. The GIS data vendor will document all processes and report any inefficiencies noted throughout the assessment period and outline all recommendations to correct these. The vendor will also recommend language to be added as a part of this document that will be adopted by the OEM 9-1-1 and all local GIS authorities. This document will clearly define the priority placed upon performing these updates, and an agreed upon acceptable timeframe for implementation. All errors identified within the GIS datasets will have to be submitted to the local GIS data provider, corrected and resubmitted before updates can be incorporated into the statewide GIS dataset.

At the completion of the first six (6) steps included in the GIS data assessment, the NG9-1-1 Prime Vendor will conduct a final data check, using the same criteria from the beginning of the project. This process will serve as validation that all steps and processes provide, or are adjusted to provide, a sufficient workflow model, sustainable for future iterations. Once the GIS datasets are determined to be acceptable in terms of completeness and accuracy, the data is ready for initial testing within the Emergency Services Routing Proxy (ESRP) in coordination with the NG9-1-1 service provider.

The workload associated with the data validation process will be significant³, especially during the implementation and go live phases of NG9-1-1. This process will require the OEM 9-1-1 staff be dedicated to this function until all processes are validated and data meets all accuracy requirements warranted for use in a NG9-1-1 system. Any estimation of the period in order to achieve this is complicated due to the high number of parties involved in the process. Cooperation from all local authorities is critical to the success. Consideration must be taken to include the workload of all staff,

² Streamlining the procedures and adding staff in OEM is expected to eliminate any additional burden on the local authorities.

³ The projected workload in OEM is addressed in the financial analysis in Appendix D in the staffing assumptions. The workload on the PSAPs remains and ongoing cost shown in the expenditures from the Enhanced 9-1-1 Subaccount included in the analysis.

local GIS providers and the OEM 9-1-1, and the inclusion of other job functions outside of this process and any delay that might cause.

A transitional approach to this problem offers the best value, provides data safeguards, and aids in the development and testing of all policies regarding data updates and testing during the initial phases of this project. Due to the high volume of work associated with these updates, and the absolute requirement for accurate data, the OEM 9-1-1 is including GIS data provisioning services in the NG9-1-1 contract during the project implementation and for a minimum of one year after go-live to ensure that all established policies and procedures, staffing and coordination are adequate for this process. This will allow for a system of double checks to be performed on all aspects and assistance with specific GIS requirements until statewide data reaches a period of maintenance mode and lower workload demands on all staff involved. A benefit of contracting these services with the NG9-1-1 service provider or 3rd party is that it allows for the OEM 9-1-1 management to evaluate, analyze and better predict ongoing GIS workload requirements as compared to current staffing levels to determine if this project will necessitate the addition of staff members to accommodate this process.

The final phase of the GIS plan is for the OEM 9-1-1 to begin management of the data provisioning into the NG9-1-1 system. During the transition period from NG9-1-1 vendor management to the OEM 9-1-1, all processes must be validated and documented, and specific policies developed to ensure the system's sustainability.

APPENDIX F - OSP Outreach Sub-Project

Originating Service Providers (OSPs) include the wireless, legacy wire line, cable companies and VoIP Service Providers. The OSPs have a regulatory mandate to recognize that an emergency call has been made, determine the subscriber's location, and deliver the call to the 9-1-1 system so that it can be delivered to the appropriate PSAP. The OSPs are as important to the success of the Next Generation 9-1-1 (NG9-1-1) system as the PSAPs. For this reason, the OEM 9-1-1 will launch an outreach program to the OSPs to solicit their support, cooperation, and commitment to the Oregon NG9-1-1 system.

Outreach Tone and Approach

It is inconceivable that OSPs operating in the State are totally unaware of the migration to NG9-1-1 nationwide. It is equally unlikely that they haven't picked up some indication of the work the OEM 9-1-1 has done with the NG9-1-1 Committee. However, as with any new program, most OSPs probably do not have all the facts, may be basing their understanding of NG9-1-1 on rumors, and in general are coming from a perspective that this is another expensive mandate⁴ that will be a distraction with no benefits to them. The OSP outreach program anticipates this negative bias and will endeavor to gain the support of the OSPs by adopting a collegial, cooperative, accommodating style. The communication of a clear, consistent plan that embraces the OSPs as a partner in the migration is instrumental to getting buy-in from the OSPs. While the approach will be welcoming even in the face of what will likely be a somewhat hostile group of OSPs, the migration to NG9-1-1 is underway and their participation is not optional⁵.

Collaboration with the FCC and Oregon State PUC

The OEM 9-1-1 will lead the effort to NG9-1-1 in the State of Oregon. However, the OEM 9-1-1 does not currently have any regulatory authority over the OSPs operating in the state. There are some administrative rules in place that support the OEM 9-1-1's role, but the wireless and VoIP OSPs look to the FCC for their regulatory requirements and the legacy wire line OSPs look to the Oregon Public Utilities Commission (OPUC) for theirs. Given the current structure, the OEM 9-1-1 intends to collaborate with the OPUC and the Public Safety and Homeland Security Bureau (PSHSB) of the FCC. At a minimum, the OEM 9-1-1 will create a detailed project plan for reaching out to the OSPs and will file periodic progress reports with both the OPUC and the PSHSB. These reports will detail any issues in gaining support from the OSPs. By providing this ongoing status, if the help of the OPUC or the PSHSB is required, a record of the progress will already be established. While there is no established process for

⁴ The initial reaction from the OSPs will focus on the costs associated with the additional work they will need to do to move their interconnections from the existing selective routers to the new NG9-1-1 data centers and to switch from TDM to SIP. Some OSPs with outdated switching equipment might need to replace or augment their equipment.

⁵ There are technical and financial carrots and sticks at OEM's disposal to address concerns (real and perceived) of the OSPs. Once the breadth and depth of OSPs concerns is understood, OEM can determine an appropriate path.

this type of interacting with the regulatory bodies, the OEM 9-1-1 is confident that both regulators will welcome the collaboration.

Multi – Phase Approach

The OSP Outreach program will progress through multiple phases listed below. Note that these phases are aligned with the High Level Project Schedule outlined in Figure 1.

Phase 1 – Program announcement and awareness campaign. Immediately after the release of the RFP, the OEM 9-1-1 will reach out to the OSPs with a general announcement of the planned migration to NG9-1-1. Information disseminated in this phase will be based on the information in the RFP. A very wide net will be cast to ensure all OSPs are aware of the program. Press Releases, emails using the OPUc distribution lists, presentations at the Oregon Telecommunications Association meetings, and other vehicles will all be used to make the OSPs aware of the project, the schedule, and expectations of the OSPs and the rest of the OSP outreach process. Success for this phase is a base level of knowledge of the project by all OSPs and State expectations of participation in the remaining outreach phases.

Phase 2 – Group meetings with OSP Business & Regulatory executives. Phase 2 will involve holding webinars and “town hall meetings” with the business and regulatory executives of the OSPs. Presentations will be given about NG9-1-1 in general and the Oregon implementation plan and schedule. The presentations will also provide a compelling value proposition for the OSP that include cost reduction opportunities and new subscriber services that can be delivered once NG9-1-1 is implemented. While some technical information will be provided, the goal of these sessions is to gain support for having senior OSP technical staff participate in webinars and town hall meetings where the technical aspects of interconnecting to the NG9-1-1 system will be covered. It is likely that Phase 2 with some OSPs will begin before Phase 1 with other carriers is completed.

Phase 3 - One-on-one-meetings with the OSPs. No two OSPs will have the same challenges, concerns, and financial issues. For this reason, one-on-one meetings with the OSPs are required. These meetings will be predominately with the business and regulatory executives; however, technical staff may participate. The goal of these meeting is to gain a detailed understanding of how to work with each OSP and their interconnection method and implementation timeline.

Phase 4 – Negotiation and signing of an interconnection agreement. Interconnection agreements between the OSPs and the OEM 9-1-1 are the functional equivalent of the agreements the OSPs currently have with Centurylink and Frontier. The agreements formalize all aspects of the interconnection including roles and responsibilities of each party, problem identification and reporting, interconnection fees (if any), and the technical specifications for the interconnection. The NG9-1-1 vendor selected from the RFP process will contribute to the technical aspects of the interconnection agreement.

Phase 5 – Migration to the NG9-1-1 system. At this point in the outreach program, the OEM 9-1-1 will introduce the OSPs to the vendor selected through the RFP process. While the OEM 9-1-1 will oversee

the interaction between the OSPs and the NG9-1-1 vendor, it will be up to the NG9-1-1 vendor to drive the migration to NG9-1-1.

Phase 6 – NG9-1-1 in steady-state production. After migrating to the NG9-1-1 system, the OSPs will continue to be a part of the end to end system for the life of the project. Communications will be required on an ongoing basis to alert the OSPs to any changes affecting them. New OSPs that begin offering service in Oregon will also need to be accommodated.

Communications Tools

The OEM 9-1-1 will create several communications vehicles to keep OSPs up to date on the project. Most importantly, the OEM 9-1-1 will create a website specifically dedicated to the OSPs. This site will have a calendar of upcoming events, vendor and the OEM 9-1-1 contact information, templates for any required reports, and other information relevant for the OSPs.

Estimated Level of Effort

An authoritative list of all OSPs operating in the state has not been developed. For planning purposes, the OEM 9-1-1 has used the number of OSPs by category below for all project planning, including the costs in Appendix D.

Wireless Carriers:

- Verizon
- AT&T
- T-Mobile
- Sprint
- Another 4 regional service providers

Legacy Wire line Carriers

- CenturyLink
- Frontier
- Windstream
- 20 other CLECs

Cable Operators

- Comcast
- Cablevision

VoIP Service Providers (residential)

- 5 other local providers
- Vonage
- 14 others

Other Vendors providing relevant services to the OSPs

- Intrado
- TCS

- Level(3)

As a Sub-Project, a project manager will be assigned and a full project plan will be developed. The execution of the plan and progress reporting will be overseen by the OEM 9-1-1 NG9-1-1 Project Manager who will provide status updates to the Systems Integration Contractor.

APPENDIX G - Public Outreach Sub-Project

The transition to Next Generation 9-1-1 (NG9-1-1) in Oregon could take several years after the selection of a vendor and contracts signed. The migration in neighboring States will vary with Washington leading, and California and Idaho behind. The migration across the rest of the country will take at least a decade if not more. Residents of the State will hear about new emergency service enabled by NG9-1-1 from local and national news, friends and family both in State and out of State, and from a variety of other sources. Visitors to Oregon will bring their expectations with them from their home States. Visitors from Alabama, Iowa, and Tennessee for example will expect Oregon to be implementing NG9-1-1 on the same schedule and with the same services as their states that are several years ahead. It is important to keep residents and visitors up to date on changes to emergency services as they become available in Oregon. Fortunately, simply dialing the digits 9-1-1 will always work.

Compounding the confusion that could occur with respect to 9-1-1 are changes required by the FCC. For example, an interim text to 9-1-1 solution is rolling out nationwide per FCC requirements. NG9-1-1 will further improve text to 9-1-1 for both those reaching out for help and the calltakers and dispatchers at the PSAPs. However, text to 9-1-1 will roll out somewhat independently of NG9-1-1 and will probably be implemented differently on a state-by-state basis. Keeping the citizens and visitors aware of the availability of enhanced 9-1-1 services like text to 9-1-1 will also help in containing confusion.

Finally, while Oregon is not the first state to begin the migration to NG9-1-1, it is on the leading edge of this effort. The citizens of Oregon are fortunate that the OEM 9-1-1 has been involved in the standards development process and has created a plan to move to NG9-1-1. Public safety might not be the first thing citizens think of with respect to government services. However, everyone recognizes that dialing 9-1-1 might be the most important call anyone makes. Reminding the citizens of the State that their government is focusing on this important evolution of emergency services and getting some credit for the effort is a nice side benefit.

The OEM 9-1-1 is working with the Public Information Officer aligned with them to develop a comprehensive Public Outreach plan.

As a Sub-Project, a project manager will be assigned and a full project plan will be developed. The execution of the plan and progress reporting will be overseen by the OEM 9-1-1 NG9-1-1 Project Manager who will provide status updates to the Systems Integration Contractor.

APPENDIX H - Reference - NG9-1-1 Architecture

Overview

The National Emergency Number Association (NENA) has driven the development of the Next Generation 9-1-1 (NG9-1-1) architecture and supporting standards. Over a period of eight years, representatives of every stakeholder group participated in the process. The NG9-1-1 standards use foundational standards developed by the Internet Engineering Task Force (IETF). Several key individuals are active in both IETF and the NENA standards groups ensuring consistency and compatibility. The NG9-1-1 standards are open and available to all stakeholders.

The NG9-1-1 standards were developed with a few basic concepts in mind. First, to drive down the cost of implementing and maintaining a NG9-1-1 system, the standards promote the use of commercially available, off-the-shelf hardware components. NG9-1-1 specific features are largely implemented in software. Second, the standards assume current Session Initiation Protocol (SIP)-based technology. This ensures a long life for the newly created standards. Finally, with an understanding of the structure of emergency services and an awareness that NG9-1-1 would roll out over a number of years, the standards groups designed NG9-1-1 as a “system of systems”. This approach embraces the fact that emergency services are fundamentally a local service while still allowing for a national system.

The developers of the NG9-1-1 architecture began by documenting the capabilities of the current Enhanced 9-1-1 (E9-1-1) system that needed to be maintained. They then documented the inefficiencies and deficiencies in the current system. Finally, a vision of future capabilities was established. The combination of all three formed the basic requirement for NG9-1-1.

The Oregon RFP prescribes the NENA NG9-1-1 architecture and asks responders for specific implementation details. The remainder of this Appendix provides a general overview of the NG9-1-1 architectures.

Applicable standards

NENA Standard 08-003 forms the core of the NG9-1-1 architecture. Other NENA standards compliment 08-003 and cover specific aspects of the architecture such as security and diversion of calls during outages. NENA 08-003, which is commonly referred to as the NENA I3 standard, is currently going through a revision. Like any standard, it evolves as new requirements are identified and where additional clarity is required. The OEM 9-1-1 staff continually monitors the status of 08-003 and all other NENA standards. The RFP requires responders to comply with the current version of the standards and to ensure compliance with all future versions.

Architecture

The basic architecture is relatively straightforward. All Originating Service Providers (OSP) operating in the state send calls to a “datacenter”. Within the datacenter, information about the call including and especially the location of the caller, is used to determine the appropriate Public Safety Answering Points (PSAP). Once the target PSAP is identified, the call is delivered along with information about the call including their location. At a high level, this is how E9-1-1 operates today. The difference is that from the time the call enters the NG9-1-1 system to the point where it is handed off to the PSAP, all communications are based on SIP and all routing is performed by functional elements described in the standard.

Session Initiation Protocol (SIP) based network

NG9-1-1 is built on SIP, the same protocol used by the public internet. The Internet Engineering Task Force (IETF) developed the base standards and has taken on many enhancements required for NG9-1-1. SIP enables several key features of NG9-1-1. First, SIP allows for adaptive routing. Unlike today’s point-to-point networks where each network segment represents a single point of failure, SIP allows for connections between any two points in the network as long as any path between them is available. This dramatically increases the resiliency and availability of the network. SIP transports all payloads digitally. There is no difference between voice, photos, text messages or full motion video on the network. This feature of SIP provides a path for support of any payload type in the future. Finally, SIP is an international standard that a large number of product manufacturers support. NG9-1-1 will benefit from this by being able to take advantage of the huge amount of Research & Development being done on standards network building blocks. The current E9-1-1 network is built largely on specialized, custom products driving the price for systems up. Building on a SIP-based network will help control costs well into the future.

Functional Elements for Call Routing

There are 3 primary functional elements; The Emergency Services Routing Proxy (ESRP), the Emergency Call Relay Function (ECRF), and the Location Information Server (LIS).

The ESRP is the “switch” that performs all call routing. All calls flow through the ESRP. The ESRP uses the ECRF to determine the target PSAP.

The ECRF is a database that contains information about each PSAPs coverage area. Coverage areas are defined geospatially. The ESRP provides the ECRF with the location of the caller. The ECRF returns the address of the target PSAP.

The LIS contains more detail about the caller and their location. The ECRF has enough information to allow the ESRP to route the call but the LIS is used for actual dispatch.

In addition to the 3 primary functional elements listed above, the standard describes two other functional elements that support the transition from E9-1-1 to NG9-1-1; the Legacy Network Gateway (LNG) and the Legacy PSAP Gateway (LPG).

The LNG provides an external interface that mimics the E9-1-1 interface for OSPs. The internal interface of the LNG is NG9-1-1. The LNG addresses all aspects of the conversion from TDM to NG9-1-1 including and especially the protocol conversion. LNGs are relatively expensive and avoiding their deployment is highly desirable. To that end, the OEM 9-1-1 has initiated a project to reach out to the OSPs and encourage them to connect to the new system natively⁶ thus avoiding the need for LNGs. The OEM 9-1-1 is also exploring the possibility that they have, or can have, the authority to demand an IP connection to the new system.

LPGs provide an external interface that mimics the E9-1-1 interface legacy PSAP equipment utilizes. It allows the PSAPs to continue to use equipment they have in place today. The internal interface accepts NG9-1-1 calls and converts the protocol to accommodate legacy PSAP equipment. Because the Oregon plan is to replace all legacy PSAP equipment with new NG9-1-1 equipment, LPGs should not be required unless responders wish to use them to facilitate the migration.

In the Oregon RFP draft, collectively the functional elements described above are referred to as “Applications and Appliances”. With the exception of the LPG, all of the NG9-1-1 functional elements are shown in Figure 10 below.

Call Handling Equipment

Call handling equipment in the new NG9-1-1 system is simultaneously very similar to existing call handling equipment and very, very different.

The similarities between the current E9-1-1 and the new NG9-1-1 are primarily in the user interface. Calltakers and dispatchers in the state expect a tool that looks, feels, and behaves in a way that they have become accustomed to. There will no doubt be some differences in the user interface that will require training; however, handling of voice NG9-1-1 calls will be handled in a manner very similar to today. As text to 9-1-1 and other forms of calls for help are supported, the interface will evolve and training will be required⁷.

The differences in the old and new systems are primarily unseen. A few examples that are invisible to the calltakers and dispatchers include:

⁶ The lower level protocol for NG9-1-1 is SIP. The NENA NG9-1-1 standard details requirements for the higher levels of the protocol. This includes, for example, the service provider initiating a request to the NG9-1-1 system for routing the call based on the location of the caller as presented by the service provider. Another example is the delivery of the caller’s location information in the body of the message.

⁷ Training is a required service in the RFP.

- The location of the caller will be delivered with the call. For traditional wire line E9-1-1 calls, this eliminates a need for a dip into the All database;
- For wireless and VoIP calls, a location by reference will be provided indicating the current location of the caller and
- Instead of locating servers that handle the bulk of the processing of calls at each PSAP, servers will be hosted in the data centers and shared amongst many of the PSAPs.

This deployment model is less expensive, allows for a higher level of availability, provides more choices for call diversion, and supports a higher level of collaboration and cooperation between PSAPs. Some PSAPs in the state may have characteristics that call for an on-premise call handling system. This option will be explored in the RFP; however, the OEM 9-1-1 has a clear preference for a hosted deployment of call handling equipment.

Both the hosted and on-premise deployment modes are shown in Figure 10 below.

Emergency Services IP Network (ESInet)

Collectively, the SIP-based network, functional elements for call routing, and call handling equipment are referred to as the ESInet. Figure 10 below shows that the external edge of the ESInet is at one of the two types of interconnections available to OSPs; a BCF or a LNG.

High Availability

The new NG9-1-1 system is expected to have a system availability of 99.999% or better. To accomplish this using standard, commercially available, off-the-shelf product, the system uses a combination of redundancy and diversity.

Instead of having a single data center, which would be a single point of failure, the system in Oregon will have multiple data centers. Each will have the capacity to handle the state-wide peak load of 9-1-1 calls. The data centers will be created in geographically diverse locations minimizing the possibility that multiple data centers will be affected by any single natural or man-made disaster or technical outage. All OSPs will connect to a minimum of two data centers and have the ability to switch 9-1-1 calls to either as necessary. Similarly, all PSAPs will be connected to a minimum of two data centers, providing the system with multiple paths to deliver a call to a PSAP. To further enhance the availability of the network between the datacenters and the PSAPs, Multi-protocol Label Switching (MPLS) architecture has been specified.

Within each data center, RFP responders will provide redundancy and diversity with respect to the functional elements in each. This can be handled in a number of ways but is a requirement.

Also inherent in the NG9-1-1 system is the ability to divert calls from a target PSAP to an alternative PSAP or other location if and when necessary. This capability allows the system to divert calls when PSAPs are unavailable for scheduled and unscheduled, planned and unplanned events.

Datacenter redundancy is shown in the Figure 10 below.

Management, Provisioning, and Reporting

The NG9-1-1 focuses on routing of emergency calls. The data used in the ECRF and LIS is critical to successful operation of the NG9-1-1 system. To provision the necessary data, a provision platform is part of the overall system. The provisioning system is also used to manage and monitor the system as well as request and receive reports. Standards for this aspect are available within NENA 08-003 4.3, Provisioning SPML 2.0.

Network Management

The Oregon NG9-1-1 system will be monitored 7 x 24 x 365. Every component of the system will be constantly evaluated to ensure everything is working properly. The methodologies employed by the vendor will ensure that failing components are identified well before there is a problem and repairs are made quickly. Given the redundancy built into the system, the failure of any single or multiple component failures is manageable and will not disrupt the routing of 9-1-1 calls. When an outage occurs, the “window of vulnerability” will be held to a minimum by deployment of spares and a well-established problem identification and escalation process.

System Security

System and Network security is of utmost importance in a NG9-1-1 system. To address security, NENA formed a standards committee to focus on this aspect of NG9-1-1. The first version of the NG9-1-1 security Standard (NG-SEC) was released in February 2010 (see reference 3 and 4). This document takes a comprehensive view of all security-related aspects of NG9-1-1. Like all of the NENA standards, NG-SEC will evolve and new version will be developed, reviewed, approved and released as appropriate. In addition to the standard, a checklist was developed to support the audit of security measures implemented in a NG9-1-1 system (see second link below).

Compliance with these standard and all revisions of the standard will be required of any vendor selected to implement NG9-1-1 for the state. The roles and responsibilities for establishing security policies and operating within the policies are contemplated in the OEM 9-1-1 Next Generation 9-1-1 Project Management Plan.

Since the standard covers all aspects of NG9-1-1 security, it needs no further discussion, however, there are a few implementation decisions already made by the OEM 9-1-1 that further strengthen the security of the system that should be highlighted:

The use of a closed, dedicated network: From the point a call is handed off to the NG9-1-1 system, the call will traverse a dedicated and private, purpose-built network. The only systems and components that touch the call will be newly acquired as part of the project and will be housed in facilities that provide physical security to complement the logical security described in the standard. Once the call is in the NG9-1-1 system, there is very little opportunity for security breaches.

The physical and logical interface to the NG9-1-1 system will be restricted to Originating Service Providers (OSPs) that have signed an interconnect agreement governing such access. Only OSPs that can demonstrate they have the proper security policies, procedures, and systems in place will be allowed access to the NG9-1-1 system. For OSPs that choose to interface with the NG9-1-1 system via a TDM interface (CAMA or SS7), their demarcation point will be a Legacy Network Gateway (LNG). This will require a fixed, point-to-point connection. Security using this interface is extremely tight since the source of calls coming across this circuit will be determined by the physical link. OPS that choose to interface with the NG9-1-1 system via SIP will likely have several options to deliver calls. However, in all cases, their logical demarcation point is the Border Control Function (BCF). Based on a standard Session Border Controller (SBC), the BCF will authenticate all calls before allowing the call to enter the NG9-1-1 system. This level of security is well understood and in place in virtually all carrier networks today. The third link below describes the possible demarcation points for OSPs. Note that this is a technical document. Policies for interfacing to the NG9-1-1 system are left to the state.

The use of hosted CPE tightens security when PSAPs need internet access: Many PSAPs have access through the internet from the call handling equipment they use to take 9-1-1 calls. Some PSAPs have decided not to allow internet access from these systems due to the inherent security risks it opens up. PSAPs that do allow access to the internet have accepted responsibility for implementing appropriate security precautions.

The OEM 9-1-1 has decided to favor hosted, or shared, call handling systems to be acquired under the procurement contemplated. This configuration provides internet access through the shared server that hosts the application. This limits the number of links to the internet, but more importantly, centralizes the responsibility for implementing security measures with the vendor implementing the system. The knowledge level of the selected vendor and the security options available on a shared basis far exceed what any individual PSAP can apply. Security related to internet access by the PSAPs will be very strong for PSAPs using a hosted system.

It is possible that some PSAPs in Oregon will get an on-site, standalone system. The security features built into this new generation of CPE is much greater than in older, legacy systems; however, PSAPs implementing this configuration will have more responsibility for ensuring system security. Appropriate expectations will be set with PSAP management opting for their own systems.

As noted previously, adherence to the NENA Security Standards will be a contractual requirement of the vendor selected for this project and security related roles documented in the standard will be implemented by the OEM 9-1-1 in collaboration with the PSAPs.

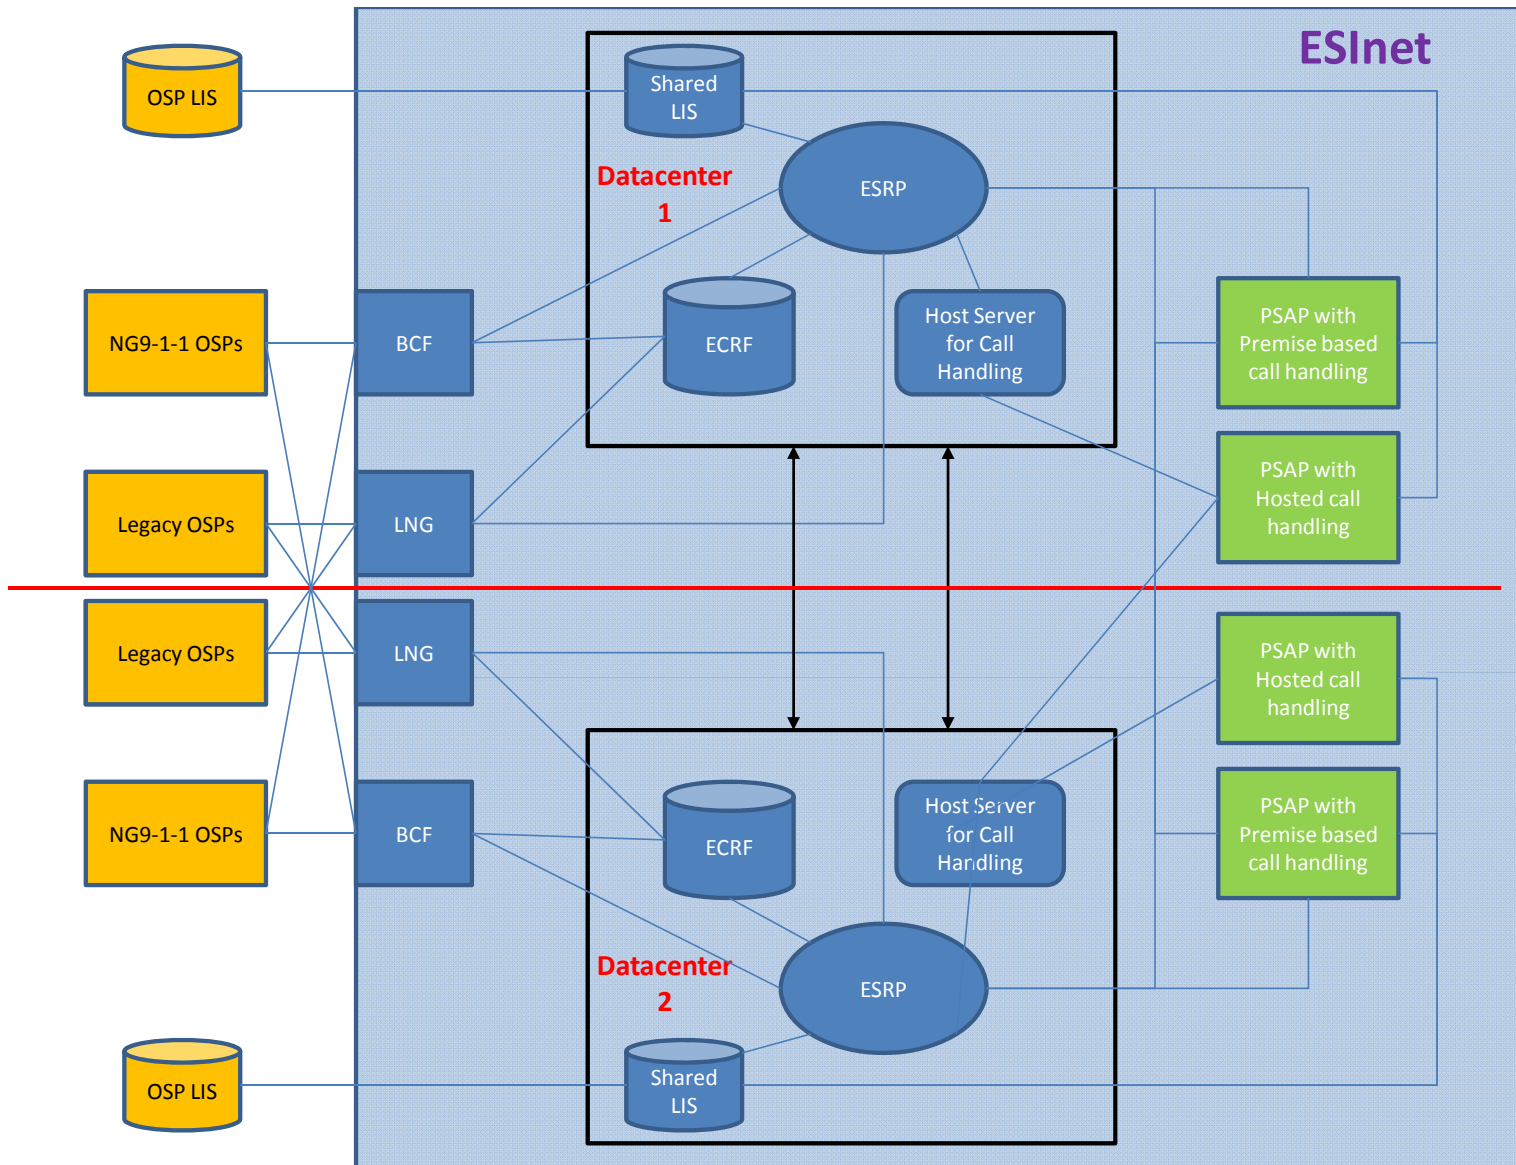

Summary

The description of a NG9-1-1 system contained in this Appendix is generic. The NG9-1-1 standard can be implemented in many ways. Each proposer is likely to have a different approach to implementing the standard. However, the RFP is quite clear that all proposals must be consistent with NENA Standard 08-003.

MILITARY DEPARTMENT, STATE of OREGON

Annual Performance Progress Report (APPR) for Fiscal Year (2014-2015)

Original Submission Date: 2015

Finalize Date: 11/12/2015

2014-2015 KPM #	2014-2015 Approved Key Performance Measures (KPMs)
1	RECRUITING - Percent of soldiers and airmen recruited vs. recruiting goal.
2	ARMORY CONDITION - Percent of statewide armories in adequate or better condition.
3	REVENUE GENERATION - Percent of available armory time rented.
4	EQUIPMENT AVAILABILITY - Percent of equipment on hand in Oregon vs. equipment authorized.
5	YOUTH CHALLENGE™-Percent of youth who complete the academic phase of the program with a GED, high school diploma, or credit recovery at graduation
6	REINTEGRATION - Percent of members successfully referred for reintegration services.
7	DOMESTIC PREPAREDNESS PLANS - Percentage of counties with National Incident Management System (NIMS) compliant Emergency Operations Plans (EOPS).
8	HAZARD MITIGATION PLANS - Percentage of state population covered by a FEMA approved local hazard mitigation plan.
9	CUSTOMER SATISFACTION - Percent of customers rating their satisfaction with Military Department customer service as "good" or "excellent": overall customer service, timeliness, accuracy, helpfulness, expertise and availability of information.

New Delete	Proposed Key Performance Measures (KPM's) for Biennium 2015-2017
	Title: Rationale:

MILITARY DEPARTMENT, STATE of OREGON		I. EXECUTIVE SUMMARY	
Agency Mission: The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizens soldiers and airmen, equipped and trained to respond to any contingency, natural or manmade.			
Contact: Bryce Dohrman		Contact Phone: 503-584-3601	
Alternate: Debbie Stratman		Alternate Phone: 503-584-3873	

1. SCOPE OF REPORT

The Oregon Military Department offers performance measures, developed to gauge progress toward achieving the agency goal of responding to state emergencies, linked to, and impacting the agency's mission. Central emphasis on providing a rapid and effective force in responding to state emergencies rests with being able to recruit new members into the Oregon National Guard to assure force strength. Critical to the success of the organization is the maintenance of armories located throughout the state. This assures a fully prepared assembly place for soldiers and their equipment. It also provides a physical gathering center for communities affected by disaster or threats. 39 armories are located throughout the state, and serve as vital components of Oregon's emergency

preparedness and Homeland Security efforts. The Office of Emergency Management was transferred to Oregon Military Department from Oregon State Police by the 2007 Legislature. Two performance measures within this report evaluate progress in assisting city and county governments with emergency preparedness and hazard mitigation planning. Also offered is one performance measure to gauge the progress of the Oregon Youth Challenge Program (OYCP). Although not linked to the agency mission, it links to the National Guard Bureau's Youth Challenge mission statement. Oregon Youth Challenge targets Oregon's at-risk youth, ages 16 to 18, who have dropped out or were failing in the traditional high school setting. In addition, a performance measure to gauge the percent of service men and women successfully referred for reintegration services has been added, along with a measure which gauges the percentage of equipment on hand vs. levels authorized by the National Guard Bureau. The final performance measure is a customer service survey which gauges the percent of customers rating their satisfaction in six different categories as good or excellent. This multifaceted measure allowed survey respondents to choose the Oregon National Guard, Oregon Military Department or The Office of Emergency Management individually or rate all three sections if they choose.

2. THE OREGON CONTEXT

The Oregon National Guard is a ready force to support the Governor during unrest or natural disaster and a reserve force to the United States Air Force and the United States Army. Assure a Ready Trained Force for Rapid Response to Statewide Emergencies; and Enhance Community Support and Readiness for Emergency Response: These strategic goals of the Oregon Military Department are at the heart of the agency's core state mission. The Oregon Military Department offers key performance measures aligned with two goals (ready-trained force and community support) and the mission statement. No primary Oregon benchmark linkages are associated with these two goals. The Office of Emergency Management performance measures are primarily linked to Oregon Benchmark 67, Emergency Preparedness. Actions the Oregon National Guard, Oregon Military Department and the Office of Emergency Management must take in achieving these goals include: Continuing recruiting and retention efforts to assure force strength; Supporting our Guard families and assisting in their transitions back into the family and community folds after federal deployments; Managing and improving emergency coordination efforts through the agency's emergency operations center; Effectively partnering with Federal, State and Local Governments in securing funds and identifying emergency preparedness requirements; Strategically stationing its military units and equipment assets, and maintaining asset accountability; Supporting its volunteer organization - the Oregon State Defense Force; and Maintaining real property assets to a standard for assuring immediate emergency use of armories, buildings, and installations located in 27 counties throughout Oregon. The Military Support to Civil Authorities (MSCA) section of the Oregon National Guard performs as a conduit for the coordination in use of personnel and equipment assets and resources in times of crisis or emergency. At the State level, MSCA provides liaison to state and county officials, conducts and creates emergency plans and coordination, operates the Joint Operations Center (JOC) and identifies and mobilizes Oregon National Guard resources in response to emergencies. Nationally, MSCA provides linkage to the United States Northern Command (NORTHCOM), the National Guard Bureau, Regional State Partners, and Department of Homeland Security. MSCA remains able to expand in support of all incident areas. MSCA partners with many agencies and participates in various emergency councils including: Governors Security Council; State Interoperability Executive Council; Office of Emergency Management; Oregon Emergency Response System Council; Federal Emergency Management region 10; Oregon State Drought Council and Oregon Department of Forestry Incident Command System. MSCA and the Oregon National Guard's Civil Support Team participate in county and state emergency preparedness exercises to include: earthquake; flood; chemical and biological attacks; power outages and drought support. The Oregon Youth Challenge Program offers high school dropouts and students failing at traditional high schools the opportunity to get their education back on track and build a future. Youth Challenge is Oregon's only statewide alternative high school. The Youth Challenge program accepts students from all 36 counties in

Oregon making the program available to all dropouts and school districts with students who are failing academically. In 2014, students attending the Challenge program came from 102 different high schools throughout the state with a GPA of 1.24 when entering the program. 100% of the students who graduated earned either an accredited high school diploma (GED), or Oregon certified high school credits to take back to their communities to re-enroll in high school. The Challenge program is certified by the Oregon Department of Education and is accredited by the Northwest Accreditation Commission. The work skills portion of the program involves training in conjunction with public works and community service projects such as: The American Red Cross, Habitat for Humanity, Oregon Department of Fish and Wildlife, Oregon State Parks, Oregon Department of Transportation and the Deschutes County Parks and Recreation Department. In 2014, Challenge program students provided 23,897.5 hours of volunteer community service. At minimum wage of \$9.10 per hour, this equates to a \$217,458.15 benefit to these agencies.

3. PERFORMANCE SUMMARY

Key Performance Measures whose trends are static and remain either at or above targets are KPM #5 (Youth Challenge), KPM #6 (Reintegration) and KPM #7 (Domestic Preparedness Plans). Key Performance Measures whose trend declined but remains above their target is KPM #4 (Equipment Availability). Key Performance Measures whose trends are downward and not making progress are KPM #1 (Recruiting), KPM #2 (Armory Condition), KPM #3 (Revenue Generation) and KPM #8 (Hazardous Mitigation Plans).

4. CHALLENGES

Since the first muster of three militia regiments in Salem, Massachusetts, on December 13, 1636, the National Guard has protected America at home and abroad. Nearly every generation in American history can attest to the significant contribution citizen-soldiers and subsequently airmen have made in defense of our freedoms and way of life. Long before September 11, 2001, the Oregon National Guard, both at home and abroad, had served this great state and nation at unparalleled levels. In the near past, the Oregon National Guard contributed substantial forces, equipment and people to critical stabilization forces in Bosnia, peacekeeping forces in the Sinai, no-fly zone operations in Southern and Northern Watch, Operation Desert Storm, State to State partnerships, domestic emergencies, humanitarian operations in the aftermath of the devastating hurricanes on the gulf coast and numerous combat operations across the world. We are increasingly the man or woman the world sees in uniform. Today's Oregon National Guard deploys citizen-soldiers and airmen to dangerous and austere conditions in places like Afghanistan and Southwest Asia where we conduct ground, air and space combat operations in support of the Global War on Terrorism. Where this anti-terrorist effort goes the Oregon National Guard will go with it alongside our partners in the other Active and Reserve Components. For the past 377 years, the National Guard has been engaged in the business of securing the homeland and our roots are firmly established in the Homeland Security mission. The National Guard leads the Department of Defense efforts in providing force protection, critical infrastructure protection, border security, missile defense, intelligence, transportation, Weapons of Mass Destruction, communication support, as well as medical and air sovereignty capabilities. The Oregon National Guard is present for duty, bringing diverse skill, talent and capabilities to bear in an increasingly dangerous world. Oregon National Guard units under the control of their Governor and Adjutant General will be the first military responders on the scene. One of the most important lessons that Legislative leaders can take from the recent past and today is a fuller appreciation of the adaptability of the National Guard's three different duty statuses: State active duty as the state militia; our federal role as the National Guard of the United States in Title 10 status; and the federally funded and state-executed operations under

Title 32 as the National Guard of Oregon. This flexibility must be protected and well-resourced at all times. Increased frequency of mobilization is an issue. Constant and continued use of Oregon National Guard forces has changed the context of the term reserve duty. The manner in which personnel are accessed to duty, length of tours, and personnel programs all need to be examined in light of the new reality of military service. Most of the issues that surfaced following mobilization of National Guard personnel for Operations Noble Eagle and Enduring Freedom revolved around the disparity of benefits associated with different status of service. Those mobilized under USC Title 10 could claim protection under the Soldiers & Sailors Civil Relief Act, while those serving under USC Title 32 could not. Many factors influence the abilities of our forces to meet today's increasing demands. Infrastructure and facilities are increasingly important. Many Oregon National Guard facilities are well past their useful life. Inadequate facilities impact both the training and quality of life of our members as well as drain valuable resources. Our facilities have to reflect the developing roles and missions for increased Oregon National Guard participation in both global warfare and Homeland Security. We need to ensure decision-makers know and understand the value of our infrastructure for both homeland security and distributed wartime capability. Infrastructure includes maintaining and upgrading our information technology capabilities. Our nation's defense leaders have gone on record repeatedly stating that America cannot go to war without the National Guard. We take this responsibility for national security seriously, recognize it as one of the keys to our future as a relevant, reliable, and ready force that is transformed for the 21st Century. History demonstrates repeatedly, both the benefits and costs associated with inclusion of the National Guard in war fighting efforts. This means National Guard members must be prepared to fight in new combat environments that include high-technology systems, complex weapons and equipment. As major contributors to the force structure and capability of the US Army and US Air Force, the National Guard must be a full partner and integral part of any plan to transform our military services from the outset. Now more than ever, the Oregon Army and Air National Guard are critical components of the Total Force and used in a much different manner than just 20 years ago. Operational tempos are using up equipment at a much greater pace than planned. For those legacy systems that cannot be replaced, we must re-capitalize them with technology infusion to preserve their combat capability and enhance our investment in these systems. The National Guard must be a full partner within all Services' modernization plans. This relationship will allow the National Guard to provide the modern forces needed by combat commanders. The leadership in our Oregon National Guard is strong, our personnel ready, and our missions relevant. Whether at home or deployed, fighting the Global War on Terrorism or securing the safety of Oregonians through Homeland Security efforts, the Oregon National Guard is continually transforming. With proper resourcing of both people and equipment, we will always be there when our nation and state calls. The late Congressman Sonny Montgomery had repeatedly said, "This nation would be nearly paralyzed by various crises if the Guard did not exist." We must ensure this never happens. Together we can lead our Oregon National Guard toward the future with determination and vision, but it must be one that is well-thought out, resourced, and maintains the relevance and the spirit of the National Guard and the citizen-soldier and airman.

5. RESOURCES AND EFFICIENCY

The Oregon National Guard is an organization of over 10,000 people who are our citizen soldiers and airmen, and civilian (federal and state) employees. 2,500 soldiers, airmen, and civilians work full-time for the Guard and the Oregon Military Department. The Oregon National Guard and the Oregon Military Department are supported primarily by Federal Funds. Close to 69% of total budgeted funds in fiscal year 2014 are Federal Funds, 5% comes to the Oregon Military Department as General Fund, and 26% is generated as Other Funds. The majority of our state employees are working in programs that exist through federal/state cooperative agreements, wherein the Military Department (acting on behalf of the State of Oregon) enters into contractual and grant supported relationships with the National Guard Bureau (serving on behalf) of the federal government. During fiscal year 2014 only 14 of OMD state employees are fully

supported by the state General Fund, and the remainder are either fully funded by federal dollars or by mixed funding of state and federal dollars.

KPM #1	RECRUITING - Percent of soldiers and airmen recruited vs. recruiting goal.	2003
Goal	Assure a ready trained force for rapid response to statewide emergencies.	
Oregon Context	Mission.	
Data Source	National Guard Bureau State Performance Indicator Reporting System (SPIRS).	
Owner	Recruiting and Retention Command. Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Attract and actively recruit those who would want to serve in the Oregon National Guard.

2. ABOUT THE TARGETS

The target for achieving 100% of the recruiting goal is established to assure force strength in the Oregon National Guard and nationally. An upward trend in recruiting is desired to ensure adequate force strength at both the state and federal level.

3. HOW WE ARE DOING

Recruiting goals have proven to be challenging during the past 14 years of conflict, but Oregon has enjoyed great success in recent years, with the exception of Federal Fiscal Year 2014. For Federal Fiscal Year 2014 the Oregon National Guard's recruiting target was 1,196 soldiers and airmen, actual recruitments totaled 925. This equates to the Oregon National Guard meeting 77% of its combined target. The downward trend from FY 2013 resides within Oregon Army National Guard recruiting which met 72% of target. Oregon Air National Guard recruiting met 99.6% of its target.

4. HOW WE COMPARE

Nationwide, the National Guard Bureau reports meeting 99% of its combined recruiting goal for the Army and Air National Guard. By meeting 77% of its combined goal, Oregon placed 38th out of 54 (states, territories, and the District of Columbia) in Army National Guard recruiting and 38th out of 54 (states, territories, and the District of Columbia) in Air National Guard recruiting.

5. FACTORS AFFECTING RESULTS

The Oregon Legislature has enacted several bills in prior bienna supporting troops, their families, and veterans. Legislative support provided a modification to property tax exemptions for Guard members ordered to federal active duty, continuation of emergency relief assistance for Guard members and their families, delegation of parental powers by parents serving in active military service and an increase in the Oregon state tax deduction for military pay and exemption of Tri-Care health care expenses from federal taxable income for two years. Recruitment and retention bonuses coupled with programs to reward Guard members who sponsor new enlistees are federal provided incentives also helps with strength management. The decline for FFY14 recruiting from the prior year within the Oregon Army National Guard is related to several very productive recruiters being promoted to higher rank and responsibilities and the soldiers hired to replace them having to attend required training for the recruiter specialty. This left a gap in time newly hired recruiters had to perform their mission.

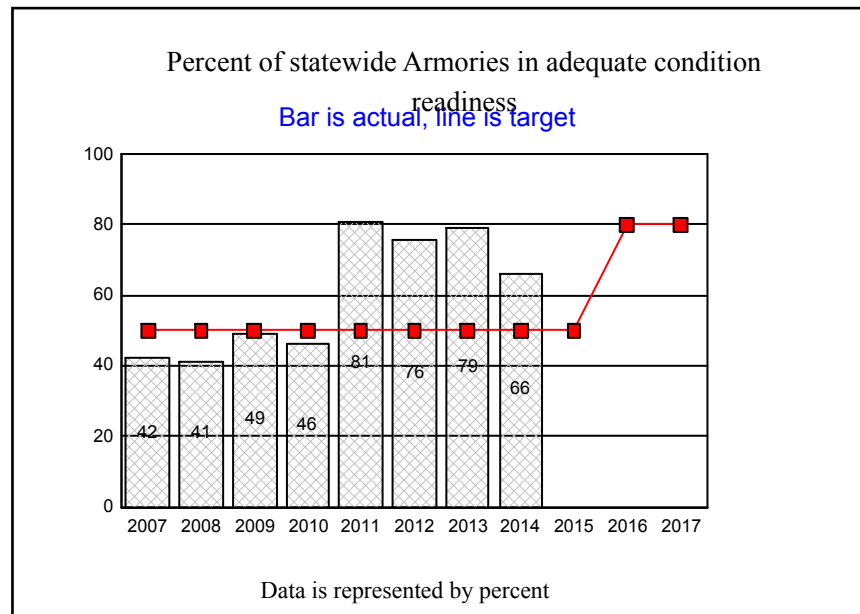

6. WHAT NEEDS TO BE DONE

Continued command emphasis and on-going assessments of what is working and redirecting efforts to mitigate what is not working. Legislative actions over the last 11 years have provided a significant support for current and former soldiers, airmen and their families, and this should continue. The recruiting goal needs to remain aggressive to drive efforts and emphasis toward assuring force strength.

7. ABOUT THE DATA

The reporting cycle is the federal fiscal year (October through September). This measured data with other extensive readiness reporting is compiled at the national level for further analysis, planning, and reporting. Oregon is able to compare its efforts against similar reporting entities and a national mean. <http://www.oregon.gov/OMD/index.shtml> is the Oregon Military Department website - selecting related sites will point to related national websites.

KPM #2	ARMORY CONDITION - Percent of statewide armories in adequate or better condition.	2003
Goal	Enhance community support and readiness for emergency response.	
Oregon Context	Mission.	
Data Source	U.S. Army Installations Status Report (ISR).	
Owner	Installations Division. Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Ensure armories throughout the state are capable to house military units and ready to serve communities during emergencies. Our ongoing mission is to replace or re-fit aging armories as rapidly as funding becomes available. Partners in this strategy include the National Guard Bureau, the Oregon State Legislature, the

Governor of the State of Oregon, City and County governments, Colleges and Universities, as well as engaged citizen groups.

2. ABOUT THE TARGETS

The targets were adjusted higher for years 2004 and 2005 in anticipation of increased state and federal funding. Increased funding did not materialize. Targets were adjusted back to a reasonable, yet aggressive 50%.

3. HOW WE ARE DOING

The federal fiscal year 2014 percentage of National Guard facilities in adequate or better condition reflects an overall 13% decrease from the prior year. This is largely attributable to an increase in deferred maintenance backlog from the prior year. Some armories status improved partly due to a state funded Armory Service Life Extension Program which was begun by Governor Kulongoski and funded by the Legislature. Additionally the Military Department has completed a number of federally funded capital improvement and capital construction projects, federally and state funded stimulus projects, as well as Legislatively approved COP funded projects. A series of deferred maintenance projects funded in the 2007-09 budget provided a temporary improvement in the conditions of some of our facilities. That being stated, budget reductions in the 2009-11, 2011-13 and 2013-15 budgets have resulted in the elimination of maintenance staff responsible for the upkeep of our facilities. The loss of these positions may result in facility conditions deteriorating while prospectively adding to the deferred maintenance deficit.

4. HOW WE COMPARE

The Oregon National Guard operates and maintains an inventory of facilities totaling 3,348,188 square feet. This is the fourth largest inventory by square footage within state government. Deferred maintenance needs have increased from \$79.6 million last year to over \$80.9 million for this reporting year.

5. FACTORS AFFECTING RESULTS

The maintenance and readiness of Oregon's armories are dependent upon funding. The 2007-2009 budget, and additional stimulus projects were instrumental in providing short term relief to deferred maintenance issues across our facilities. However budget reductions during 2009-11 2011-13 and 2013-15 legislative sessions resulted in the loss of critical maintenance staff as well as operational funding which lead to increased levels of deferred maintenance. The loss of maintenance staff and funding, coupled with nominal increases in utility rates erodes the ability to stem an ongoing decline of the condition of our facilities.

6. WHAT NEEDS TO BE DONE

Previous increases in state funding have proven effective in helping to mitigate levels of deferred maintenance. State funding of National Guard facilities is even more critical due to political unrest at the federal level, and the ongoing concerns related to the potential sequestration of federal funds.

7. ABOUT THE DATA

The reporting cycle is the federal fiscal year (October through September). Data is arrived through extensive annual analysis for submittal of the U.S. Army Installations Status Report, an annual requirement. This report is the basis for leveraging federal funding participation, requiring state match.

KPM #3	REVENUE GENERATION - Percent of available armory time rented.	2005
Goal	Rent armory facilities to generate the maximum amount of rental revenue possible.	
Oregon Context	Mission.	
Data Source	Oregon Military Department internal rental revenue reports.	
Owner	Installations Division. Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Actively market armory facilities and seek partnerships with local, state, and federal agencies for long term rental agreements.

2. ABOUT THE TARGETS

Targets for this measure were established by the Legislative Fiscal Office.

3. HOW WE ARE DOING

This performance measure was established by the suggestion of Legislative Fiscal Office during and nearing the end of the 2005 extended session. The actual data suggests an overly aggressive target. The more heavily rented Armories are near population centers, have a lack of community competition or have long term renters. Gain in rental activity in rural locations is a much slower process. Increased rental activity in rural locations is dependent upon growth of the community, new business, governmental relocation, and lack of community competition. Gains in rental activity in more heavily rented facilities, is also slower as they have fewer dates available for additional rentals, competition is greater in populated areas because rental venues are so close in proximity of each other. The economic recession and staffing reductions from prior biennium cuts continues to hamper efforts to increase revenue. Armories located in populated areas are rented an average of 28% of available time. Armories located in rural areas rent an average of 16% of available time. Statewide, armories were rented an average of 22% of available time. This is a 5% decline from the prior year. Reasons for decline include private sector competition that has a lower overhead burden than OMD. Armory rentals require private security services and a Military Lease Agent (MLA) on site to monitor the event.

4. HOW WE COMPARE

The Oregon National Guard operates and maintains the 4th largest inventory of facilities by square footage within state government. Of that inventory only the 39 Armories and a few other facilities / land areas are available for rentals. We manage a sizeable deferred maintenance requirement (\$80.9 million) compared to a nearly non-existent schedule within the Department of Administrative Services. Information is not available from other state agencies, or if any agencies conducted similar analysis relating to the rental of armories or similar facilities.

5. FACTORS AFFECTING RESULTS

The maintenance and readiness of Oregon's Armories is dependent upon both rental revenue generation and state funding. The agency's rental revenue somewhat mirrors that of the state budget and the Oregon economy. Higher levels of private sector unemployment and economic conditions during the past several years have reduced revenues generated by the rental program. These economic conditions also add to the shortfall of funding required to adequately maintain facilities. Rising energy costs further impact availability of limited operations & maintenance funds.

6. WHAT NEEDS TO BE DONE

Restore funding that replaces armory maintenance staff positions eliminated in previous budget cycles. Continue state funding support to provide the means to modernize, alleviate deferred maintenance, repair and maintain armories to a level that attracts rental use. Increased rental revenue generation can help replace appropriated funding when the armories reach appealing conditions for marketing rentals.

7. ABOUT THE DATA

The reporting cycle is the federal fiscal year. Data is arrived through analysis of internal rental contracts and revenue reports.

KPM #4	EQUIPMENT AVAILABILITY - Percent of equipment on hand in Oregon vs. equipment authorized.	2008
Goal	Provide consistent availability of equipment for Oregon National Guard Missions	
Oregon Context	Mission.	
Data Source	Oregon National Guard Deputy Chief of Staff (Logistics).	
Owner	Oregon National Guard Deputy Chief of Staff (Logistics). PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Our strategy is to strive to continually have equipment available to perform in the event of a disaster occurring anywhere in Oregon.

2. ABOUT THE TARGETS

The target measures the percentage of equipment on hand in Oregon vs. equipment authorized by the National Guard Bureau for the State of Oregon.

3. HOW WE ARE DOING

For the purposes of this measure we analyzed certain types of equipment to be utilized in disaster recovery situations; HMMV (Humvee), 5-Ton Cargo Trucks, HEMTT Fueler Vehicles and Tactical Water Purification Systems (TWPS). The result of this analysis shows for HMMV the state of Oregon is authorized 647 vehicles with 658 on hand, or 102% of authorized levels. For 5-Ton Cargo Trucks the state of Oregon is authorized 189 vehicles with 152 on hand, or 80% of authorized levels. For Fueler Vehicles the state of Oregon is authorized 53 vehicles with 47 on hand, or 89% of authorized levels. For TWPS Water Purification Systems the state of Oregon is authorized 1 system with 1 on hand. In Federal Fiscal Year 2014, Oregon was authorized 890 total units of the aforementioned equipment with 858 units on hand, or 96% of authorized levels. Although 96% represents a decline from the prior year, the equipment available metric is still above KPM target.

4. HOW WE COMPARE

Currently there is no comparable data for us to draw from for the purposes of this measure.

5. FACTORS AFFECTING RESULTS

Factors affecting the availability of equipment on hand include disaster recovery situations which the Oregon National Guard would be called upon under interstate compacts. The December 2007 and December 2008 storms that affected the coastal region of Oregon were major actions for the Oregon National Guard. Hundreds of soldiers and dozens of pieces of equipment were utilized to effectively mitigate the damage inflicted on this region. Upon completion of the Oregon National Guard's duties during the December storms much of the equipment used needed repair and refurbishment before it could be placed back into active service. Although the frequency and tempo of overseas combat deployments are declining compared to previous years, when National Guard troops deploy they require sufficient equipment on hand to accomplish their mission and this would negatively impact on the availability of equipment on hand for disaster response.

6. WHAT NEEDS TO BE DONE

Emphasize the need for pre-disaster mitigation in commonly affected areas such as the coastal region.

7. ABOUT THE DATA

The reporting cycle is the federal fiscal year (October through September).

KPM #5	YOUTH CHALLENGE™-Percent of youth who complete the academic phase of the program with a GED, high school diploma, or credit recovery at graduation	2015
Goal	Provide alternative education solutions for Oregon youth.	
Oregon Context	National Guard Youth Challenge Mission.	
Data Source	National Guard Bureau Annual Youth Challenge Report. [www.ngycp.org]	
Owner	Youth Challenge Program. Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Cost effective and purpose oriented intervention in the lives of Oregon's at-risk youth.

2. ABOUT THE TARGETS

The target measures the percentage of youth who enter the academic (residential) phase of the program and graduate each year. The target is to graduate 85% of the students.

3. HOW WE ARE DOING

The Youth Challenge curriculum successfully prepares students to pass General Education Diploma (GED) and High School diploma requirements, whereas these same students were failing in the traditional setting. All students not earning academic credentials who graduate the program earn 8 accredited High School credits towards acquiring diplomas.

4. HOW WE COMPARE

Of the 262 students graduated in the 2014 reporting cycle, 11 earned a GED and 21 earned High School diplomas, a total of 12%. 230 of the 262 graduating students earned 8 High School credits and chose to return to their home High School and pursue their diploma. Of the 290 students entering the academic phase of the program in 2014, 262 graduated, for a total of 90%. We consistently exceed the National graduation target number for our program of 240. These figures are provided by staff within the Oregon Youth Challenge Program and are reflected in the National Guard Bureau Annual Youth Challenge Report.

5. FACTORS AFFECTING RESULTS

Applicants who are enrolled in Youth Challenge are 16-18 year olds who were not successful in the traditional High School setting and have dropped out or were failing. Challenge offers these youth an alternative for success. The military setting and the curriculum combines classroom work, community service and challenging individual and team activities into one experience. The students learn how to work with others, set personal goals and plan their direction for life. Their personal goals and motivations to succeed provide a base for them to become positive, productive, taxpaying and contributing citizens in their respective communities.

6. WHAT NEEDS TO BE DONE

Continued Legislative support for State Funds to match the Federal Funds needed to operate the program.

7. ABOUT THE DATA

The reporting cycle is the federal fiscal year (October through September). www.ngycp.org and www.oregon.gov/OMD/YCP/ national and state sites.

KPM #6	REINTEGRATION - Percent of members successfully referred for reintegration services.	2008
Goal	Provide reintegration services to soldiers and airmen returning from overseas deployments.	
Oregon Context	Mission.	
Data Source	Oregon National Guard Service Member and Family Support Program (SMFS).	
Owner	Oregon National Guard Service Member and Family Support Program (SMFS). Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Provide outreach and referral to services for Service Members and their families.

2. ABOUT THE TARGETS

The target measures the percentage of Service and Family Members who have been successfully referred for reintegration services.

3. HOW WE ARE DOING

The Service Member and Family Support Program (SMFS) has successfully referred or provided reintegration services to 100% of ORNG Service Members returning from deployment since federal fiscal year 2009. This has been accomplished by providing Yellow Ribbon Reintegration Program training, conducting seminars and workshops during unit training assemblies, and establishing a network of public and private sector organizations located throughout Oregon communities available to support Service Members and their families.

4. HOW WE COMPARE

The Service Member and Family Support Program accomplishes its Reintegration mission by deploying the Joint Transition Assistance Program (JTAP). The National Guard Bureau (NGB) considers Oregon's JTAP Program a nationwide best practice for other states to emulate. During the most recent twelve month reporting period (October 1, 2013 - August 21, 2014) the JTAP team conducted 5,110 interactions with Service Members and their Families throughout Oregon and 1,868 unit interactions. The team met with 1,003 employers to discuss employment opportunities. The employment outreach resulted in over 295 confirmed hires. The Department of Defense calculates that each confirmed hire could save the government \$27,040 in unemployment compensation for a potential savings of over \$7M. This figure represents a Return On Investment (ROI) of approximately 8:1 for the program. The JTAP team conducted 1,577 individual veteran health and welfare checks and referred 3,514 veterans, service members and family members to service organizations for assistance. Each of the JTAP team members have received Applied Suicide Intervention Skills Training (ASIST) and the team participated in interventions for 116 individual suicide ideation/attempts in FY14; more successful suicide interventions than any other single organization in the Oregon National Guard.

5. FACTORS AFFECTING RESULTS

The non-execution of the JTAP contract in federal fiscal year 2014 reduced reintegration support available to Service Members and their Families. The SMFS section did adapt to the loss of this contract staff group and bridged the gap. As there are no active duty installations in Oregon to support Service Members and their Families, Oregon relies upon local resources. The closest active duty installations are Joint Base Lewis-McChord located 130 miles north of Portland, Mountain Home Air Force Base located 500 miles east of Willamette Valley population centers and Travis Air Force Base located 500 miles south of Willamette Valley population centers. The lack of active duty military installations in Oregon limits resources available to Service Members and their Families who then seek assistance from the Service Member and Family Support team to avoid the expense and long travel to active duty installations in neighboring

states. The JTAP contract was reestablished in federal fiscal year 2015 going forward and as long as the federal money is distributed to Oregon this very worth while program can continue. Federal fund reductions will reduce support available to Service Members and their Families in Oregon. The large geographic dispersion of Service and Family Members in Oregon creates challenges in providing support to individuals living in rural areas.

6. WHAT NEEDS TO BE DONE

The most critical factor affecting the Service Member and Family Support team is the projected federal budget reduction. The program's approximately \$1.4M federal fiscal year budget is funded over 99% by the National Guard Bureau and less than 1% by the state of Oregon. We have no funding projected past September 30, 2014 and lost the program entirely. An increase in State funding and positions is critical to continuation of a viable Deployment Cycle Support Team.

7. ABOUT THE DATA

The reporting cycle is the Federal fiscal year (October through September).

KPM #7	DOMESTIC PREPAREDNESS PLANS - Percentage of counties with National Incident Management System (NIMS) compliant Emergency Operations Plans (EOPS).	2002
Goal	Emergency Preparedness - Assure that cities and counties are prepared for disasters and emergencies.	
Oregon Context	OBM #67 - Emergency Preparedness	
Data Source	Quarterly reports from the counties provide current data on plan development, training, and exercises.	
Owner	Oregon Emergency Management, Andrew Phelps, (503) 378-2911 Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

The goal of the Office of Emergency Management (OEM) is to ensure all 36 counties in Oregon have emergency operation plans which effectively protect their citizens and their property during an emergency situation. To accomplish this goal OEM is measuring the percentage of counties which have a National Incident

Management System (NIMS) compliant Emergency Operations Plan (EOP). The NIMS is a comprehensive, national approach to incident management which provides a template for managing an incident regardless of cause, size, location or complexity. The applicability of the National Incident Management System crosses local, state, and federal jurisdictions and all functional disciplines within in emergency response. There are five functional components of NIMS – Preparedness, Communications and Information Management, Resource Management, Command and Management, and Ongoing Management and Maintenance. Each of these functional components must be included in a county EOP to be deemed compliant with NIMS. Funding for the completion of these Emergency Operations Plans is provided by the Homeland Security Grant Program and the Emergency Management Performance Grant, which are administered by the Office of Emergency Management.

2. ABOUT THE TARGETS

The target for this measure is for 100% of Oregon counties to have a National Incident Management System compliant Emergency Operations Plan on file with the Office of Emergency Management (OEM). Over the past number of years it has been shown that between 90-100% of counties have kept an up to date Domestic Preparedness Plan on file with OEM, and this trend has continued with Emergency Operation Plans. These plans have a four-year promulgation life cycle and must be updated every two years and re-submitted to OEM for review and approval.

3. HOW WE ARE DOING

Currently 100%, of Oregon's counties have a National Incident Management System compliant Emergency Operations Plan on file with the Office of Emergency Management (OEM).

4. HOW WE COMPARE

Currently comparable information is not readily available regarding this particular measure in other states or at the national level. The link provided below will take the reader to the NIMS homepage where more information is available regarding the component pieces of NIMS, FAQ's, and the relationship between NIMS and the National Response Framework.

<http://www.fema.gov/national-incident-management-system>

5. FACTORS AFFECTING RESULTS

A primary issue affecting the results of this measure is available resources, at both the state and local level. Economic conditions have required state and county governments to find new, more efficient ways to conduct business without hampering service delivery. To date OEM has been able to maintain the

records showing when local governments need to update and re-submit their Emergency Operations Plans. In addition OEM has been able to continue to offer support services to local governments as they work to refine these plans. That being said, the support services being provided to local governments are the responsibility of one or two key staff members within OEM, and there are no readily available resources to help provide back-up or support. At the county level it is taking a longer period of time for plans to be modified and re-submitted due to lack of qualified personnel and other resources. OEM is anticipating a major reduction in the level of Homeland Security Grant funding in future years. This grant is the primary funding source for the development of Emergency Operations Plans. A significant reduction may cause several local jurisdictions to fall behind in the ongoing development and maintenance of these plans.

6. WHAT NEEDS TO BE DONE

Continued support for the Office of Emergency Management to increase staff to assist county governments with the ongoing requirements associated with Emergency Operations and Preparedness planning. While there is a limited number of options available to State Government as it relates to local emergency management, acknowledging the fact that help is needed at the local level will provide moral support to local governments. OEM is continuing its efforts to encourage local governments to be as proactive as possible with regards to this type of planning due to level of federal funding which currently exists.

7. ABOUT THE DATA

Data is collected quarterly and reported annually.

KPM #8	HAZARD MITIGATION PLANS - Percentage of state population covered by a FEMA approved local hazard mitigation plan.	2002
Goal	Emergency Preparedness - Assure that cities and counties are prepared for disasters and emergencies.	
Oregon Context	OBM #67 - Emergency Preparedness	
Data Source	OEM maintains an inventory of mitigation plans, which will be updated to include completed plans, which meet FEMA requirements and have been approved by FEMA.	
Owner	Office of Emergency Management, Andrew Phelps (503) 378-2911, Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Measuring the percentage of Oregon’s population covered by a FEMA approved local hazard mitigation plan helps the Office of Emergency Management determine the effectiveness of local planning efforts, as well as the distribution of federal hazard mitigation grant funds. Hazard mitigation is defined by the

Federal Emergency Management Agency as “sustained action taken to reduce or eliminate long-term risk to people and their property from hazards”. The benefits provided to local communities through effective hazard mitigation planning includes identifying cost effective actions for risk reduction that are agreed upon by stakeholders and the public, focusing resources on the greatest risks and vulnerabilities, building partnerships by involving people, organizations, and businesses, increasing education and awareness of hazards and risk, communicating priorities to state and federal officials, and aligning risk reduction with other community objectives. As the percentage of population covered by these plans expands or retracts OEM is able to identify the regions which are causing the fluctuation to occur. OEM can then interact with these communities to determine what course of action needs to be taken to ensure the population is covered by an approved plan.

2. ABOUT THE TARGETS

Currently OEM has set the target for 90% of Oregon’s population to be continually covered by a FEMA approved hazard mitigation plan. This target was deemed appropriate as hazard mitigation plans, per Code of Federal Regulation (CFR), Title 44, Chapter 1, Part 201, have a cycle life of five years. Every five years a local jurisdiction must review and revise its plan to reflect changes in development, progress in local mitigation efforts, and changes in priorities. The plan must then be re-submitted to the Office of Emergency Management for review and approval. Meeting this five year deadline is a requirement for a local community to be eligible to retain federal hazard mitigation grant funding.

3. HOW WE ARE DOING

For the current reporting period, 73.2% of Oregon’s population was covered by a FEMA approved hazard mitigation plan. In Fiscal Year 2015 FEMA reported that 77.58% of the nation’s population was covered through community and/or tribal hazard mitigation plans.

4. HOW WE COMPARE

As of Fiscal Year 2015 the Federal Emergency Management Agency is reporting that 77.58% of the nation’s population is currently covered through a community and/or tribal mitigation plan. Based on a percentage of total population Oregon is behind the national trend by 4% as it relates to population covered by hazard mitigation plans. The link below will take the reader to the FEMA web site where a map is displayed showing mitigation plan statuses across the United States.

<http://www.fema.gov/multi-hazard-mitigation-plan-status>

5. FACTORS AFFECTING RESULTS

A primary issue affecting the results of this measure is available resources, at both the state and local level. Economic conditions have required state and local governments to find new, more efficient ways to conduct business without hampering service delivery. To date OEM has been able to maintain the records showing when local governments need to update and re-submit their hazard mitigation plans. In addition OEM has been able to continue to offer support services to local governments as they work to refine these plans. That being said, the support services being provided to local governments are the responsibility of one or two key staff members within OEM, and there are no readily available resources to help provide back-up or support. At the local level it is taking a longer period of time for plans to be modified due to lack of qualified personnel and other resources.

6. WHAT NEEDS TO BE DONE

Continued support for the Office of Emergency Management to increase staff to assist local governments with the ongoing requirements associated with hazard mitigation planning. While there is a limited number of options available to State Government as it relates to local emergency management, acknowledging the fact that help is needed at the local level will provide moral support to local governments. OEM is continuing its efforts to encourage local governments to be as proactive as possible with regards to hazard mitigation planning due to the potential for increased federal funds resulting from a future disaster.

7. ABOUT THE DATA

Data is collected quarterly and reported annually.

KPM #9	CUSTOMER SATISFACTION - Percent of customers rating their satisfaction with Military Department customer service as "good" or "excellent": overall customer service, timeliness, accuracy, helpfulness, expertise and availability of information.	2006
Goal	The goal of this measure is to ensure the customers of the Oregon Military Department are satisfied with the level of service they receive from the department. This measure consolidates data regarding overall customer satisfaction, timelines of information, and accuracy of information, helpfulness of information, expertise, and the availability of information provided by the Oregon National Guard, the Oregon Military Department, and the Office of Emergency Management.	
Oregon Context	Mission.	
Data Source	The source of data for this measure is an online survey run through Survey Monkey. The survey is sent to all current Oregon senators and representatives, city and county officials, county sheriffs and local emergency managers.	
Owner	Agency Leadership. Agency PM Coordinator is Bryce Dohrman (503) 584-3601	

1. OUR STRATEGY

Our strategy is to ensure that information and assistance is available to the citizens of Oregon at all times. Successful implementation of this strategy is especially important as it relates to disaster preparedness and response, as well as the functional readiness of our armories. The Military Department wants to ensure that information and assistance is available to anyone needing it before, during, and after a disaster situation. This strategy is also necessary to ensure our armories throughout the state are prepared to house military units, and are ready to serve the surrounding communities in times of crisis.

2. ABOUT THE TARGETS

Targets were established by Legislative Fiscal Office and from data collected from the 2006 Customer Satisfaction survey.

3. HOW WE ARE DOING

2015 survey results for federal fiscal year 2014 indicated Expertise was the highest rated category with 74% of respondents rating it as good or excellent. This is a decrease of 5% from the 2014 survey where 79% of respondents rated Expertise as good or excellent. Accuracy was the second highest scoring category in the 2015 survey with 71% of respondents rating it as good or excellent.

4. HOW WE COMPARE

While other state and Federal agencies do customer satisfaction surveys, there is no known comparable agency that aligns with the department's mission, goals and customer pool. The Oregon Military Department operates and maintains the 4th largest inventory of facilities by square footage within state government. These facilities are critical to maintaining force structure as well as providing our citizen soldiers with a home base in which to prepare for deployments. The Office of Emergency Management (OEM) works with city and county governments to ensure that proper hazard mitigation and emergency operations plans are in place. OEM works with the 43 Public Safety Answering Points across the state on communication and technical issues related to 9-1-1 services. OEM also works with communities to help them recover from natural or human made disasters. Our Community Support Program operates the only statewide alternative high school for students 16-18 who are failing in the traditional high school environment.

5. FACTORS AFFECTING RESULTS

The maintenance and readiness of Oregon's armories are dependent upon funding. Federal funding is leveraged to the maximum extent. Decline in armory condition is due in part to reduced General Fund services & supplies, and personal services. Limited funding does attribute to timeliness in responding to facilities issues unless major mechanical or structural failures occur, expenses for non-critical repairs for one armory give way to critical repairs required at another armory. Limited staffing does not provide for a maintenance technician at each facility, so a regional system is in place wherein maintenance technicians

travel distances to address service needs. The Office of Emergency Management is affected by limited General Fund support and reductions in Federal Grant monies which are critical for hiring and retaining key staff members. Limited staffing does have a major impact on the timeliness of responding to customer requests for assistance post disasters. Staff time is directed towards the most critical situations first and then follow-ups are conducted to ensure that all customer needs are met.

6. WHAT NEEDS TO BE DONE

Continued state funding support will provide the needed investment to improve armory readiness and increase the capabilities of the Office of Emergency Management to effectively respond to disaster situations throughout the state.

7. ABOUT THE DATA

For the 2015 Customer Service Survey for federal fiscal year 2014, the Oregon Military Department requested that respondents classify themselves as one of 43 distinct options. This allows the department to analyze which customers are responding to our survey and which ones should be engaged further. The OMD survey also asks respondents to identify if they are a member of the Oregon Army or Air National Guard, or a member of another Armed Forces Component. The survey allows the respondent to critique customer service for the Oregon National Guard, the Oregon Military Department, and the Office of Emergency Management. In calculating response percentages, “Don’t Know” responses were omitted. Data results for the Oregon Military Department and Oregon National Guard components is very weak since only five survey respondents chose to evaluate them.

MILITARY DEPARTMENT, STATE of OREGON	III. USING PERFORMANCE DATA
---	------------------------------------

Agency Mission: The Oregon National Guard will provide the citizens of the State of Oregon and the United States with a ready force of citizens soldiers and airmen, equipped and trained to respond to any contingency, natural or manmade.

Contact: Bryce Dohrman	Contact Phone: 503-584-3601
-------------------------------	------------------------------------

Alternate: Debbie Stratman	Alternate Phone: 503-584-3873
-----------------------------------	--------------------------------------

The following questions indicate how performance measures and data are used for management and accountability purposes.

<p>1. INCLUSIVITY</p>	<p>* Staff: • Staff: The Adjutant General, Deputy Director, Senior Leaders within the Command Group and military units, and Division Directors remain involved in the maintenance, analysis and review of agency performance measures and numerous performance indicators reported at the national level. The Departments of the Army and Air Force, and the National Guard Bureau have established extensive federal reporting systems which include performance indicators. The performance measures used by the Oregon Military Department that directly link to the agency’s goals supporting its mission to the State of Oregon are just a few of the many performance indicators developed, tracked and analyzed in on-going federal reporting systems.</p> <p>* Elected Officials: • Elected Officials: Congressional involvement in the development of Department of Defense reporting systems was exercised for analysis of services and appropriation. With exception of Legislative directed customer service performance measures, the performance measures developed for state reporting were established and developed from extensive and existing Department of Defense and National Guard Bureau reporting systems.</p> <p>* Stakeholders: The National Guard Bureau, Department of Defense and Department of Homeland Security officials continually review performance results and operational statuses for the purposes of providing support and coordination, and for compiling reported data into higher systems for national level reporting, analysis and review.</p> <p>* Citizens: Citizens of the state of Oregon are welcomed and encouraged to view the agency's key performance measures. Our customer service survey directly involves the end users of our facilities and our staff and it provides them a forum to voice opinions which are listened to and acted upon by agency leadership. We strive to continually engage the communities where are services are utilized and we encourage citizens to voice their comments and concerns as it provides us the information necessary to better perform our duties.</p>
<p>2 MANAGING FOR RESULTS</p>	<p>The Adjutant General and the senior leadership of the Oregon National Guard review statistics, operational status, and performance indicators presented by every division and command on a frequent and regular basis. It is here further</p>

	<p>studies, research, or change in priorities or operation is ordered by the Adjutant General. The Adjutant General and senior leadership is briefed regularly by every unit command, on force strength, personnel, equipment and facility readiness, and operational status.</p>
<p>3 STAFF TRAINING</p>	<p>Federal reporting requirements including performance indicators have been in existence for decades. Division Directors of the Oregon Military Department and leaders in the Oregon National Guard have been tracking, presenting, and interpreting performance indicators and status reports during the evolution of their careers. Directors, Program Managers, and staff attend national conferences and workshops sponsored by the federal grant funding directorates within the National Guard Bureau, and the Department of Homeland Security part of which includes performance indicator review and reporting. National Guard soldiers and airmen continually attend military schools and training events, many of which involve review and analysis of performance indicators and actions.</p>
<p>4 COMMUNICATING RESULTS</p>	<p>* Staff : • Staff: Regular and frequent presentations, meetings and reviews to assess operational results, determine what works well and what does not, and to adjust operational processes to achieve desired results.</p> <p>* Elected Officials: • Elected Officials: The Governor as the Commander-in-Chief of the Oregon National Guard is involved and maintains awareness of operational issues and results for the purpose of leadership and direction. Legislative members are presented performance results through various presentations. Oregon’s Congressional delegation and their staff are communicated with on issues where they may impact performance results. Members of Congress are presented performance results from Department of Defense and the National Guard Bureau through presentations and testimony.</p> <p>* Stakeholders: National Guard Bureau, Department of Defense and Department of Homeland Security officials review performance results and operational statuses for the purposes of providing support and coordination, and for compiling reported data into higher systems for national level reporting, analysis and review.</p> <p>* Citizens: The agency posts its performance measure results on the agency website. Concerning Youth Challenge; parents, educators, and local officials are invited for tours and presentations, and attend graduation ceremonies. All are provided information concerning program performance. Local central Oregon business leaders, Legislative members, and former Legislative members receive briefings on Youth Challenge performance for the purpose of awareness, communication, and assistance. Citizens perform as mentors in the post-residential portion of the program.</p>

BUDGET NARRATIVE

OREGON MILITARY DEPARTMENT SPECIAL REPORT AUDIT RESPONSE REPORT

The Oregon Military Department has received two completed audits by the Secretary of State Audits Division during the 2011-2013 biennium and five during the 2013-2015 biennium to date.

2011-13 biennium

Selected Financial Accounts for the year ended June 30, 2012

This audit was to express an opinion on whether the financial statements contained in the State of Oregon's Comprehensive Annual Financial Report were fairly presented, in all material respects, in conformity with generally accepted accounting principles. The accounts selected for fair presentation in accordance with generally accepted accounting principles were various payroll expenditures, SFMA general ledger account 0852 - Buildings and Building Improvements and SFMA general ledger account 0875 - Accumulated Depreciation. For these selected accounts, the audit did not identify any reportable findings or deficiencies in internal control over financial reporting.

Statewide Single Audit for the year ending June 30, 2012

This audit was conducted in accordance with the Single Audit Act and OMB Circular A-133, which has two components: federal compliance and effective internal controls over federal compliance. One federal program was selected for federal compliance audit, Catalog of Federal Domestic Assistance number 12.401, National Guard Military Operations and Maintenance. Federal regulations prohibit grant recipients from contracting with parties suspended or debarred from participating in federal programs or activities. The 2012 audit found the department needed to improve its process for checking vendors for Suspension and Debarment by checking the Excluded Party List System (EPLS). While the department has a policy to perform a review of EPLS and maintain documentation of that review prior to the execution of a contract, the policy did not require verification when a DAS price agreement is used. Agency response: The department will conduct an EPLS check for all procurements, inclusive of those on State Price Agreements (PA) and place records of search results in applicable contract files.

BUDGET NARRATIVE

2013-15 biennium

Selected Financial Accounts for the year ended June 30, 2013

This audit was to express an opinion on whether the financial statements contained in the State of Oregon's Comprehensive Annual Financial Report were fairly presented, in all material respects, in conformity with generally accepted accounting principles. The accounts selected for fair presentation in accordance with generally accepted accounting principles were SFMA general ledger account 0852 - Buildings and Building Improvements and SFMA general ledger account 0875 - Accumulated Depreciation. The audit did not identify any reportable findings or deficiencies in internal control over financial reporting.

Statewide Single Audit for the year ending June 30, 2013

This audit was conducted in accordance with the Single Audit Act and OMB Circular A-133, which has two components: federal compliance and effective internal controls over federal compliance. Catalog of Federal Domestic Assistance number 12.401, National Guard Military Operations and Maintenance was selected for audit. For the year ending June 30, 2013 the department substantially complied with all requirements tested by auditors relevant to the federal program. In the prior fiscal year, a finding indicated the department needed to improve its process for checking vendors for Suspension and Debarment by checking the Excluded Party List System (EPLS). The department response and corrective action was reported in the Statewide Single Audit Report for fiscal year ended 2013 with a status of "corrective action was taken."

Statewide Single Audit for the year ending June 30, 2013

This audit was conducted in accordance with the Single Audit Act and OMB Circular A-133, which has two components: federal compliance and effective internal controls over federal compliance. Catalog of Federal Domestic Assistance number 97.036, Disaster Grants-Public Assistance (Presidentially Declared Disasters) was selected for audit. Federal regulations require recipients of federal awards to report grant information on the Federal Funding Accountability and Transparency Act (FFATA) reporting system. An audit finding was issued for the department not having written policies and procedures that ensuring required information was reported. Agency response: The department will evaluate awards monthly to determine if additions or modifications to FFATA are required and document the evaluation. A second audit finding was issued for inadequate documentation within quarterly financial reports submitted to Federal Emergency Management Administration (FEMA) for each disaster grant administered by the department. Agency response: Department grant accounting staff has identified additional documentation to include in the report that clearly substantiates report data. A third audit finding was issued for the department not having a written policy and methodology for identifying transactions subject to fiscal year end accounting accruals. Agency response: The department will develop a formalized process to identify fiscal year end accrual transactions.

BUDGET NARRATIVE

Office of Emergency Management: Rebuilding the Organization to Strengthen Oregon's Emergency Management (OEM)

This performance audit focused on OEM's internal management practices. The audit objective was to identify improvements OEM can make to better help the state prepare for, respond to and recover from disasters. The audit recommended OEM resolve management issues with clear and specific recommendations, improve policies and work processes, improve communications strategies and feedback to improve its performance.

Agency response: The department generally agrees with audit recommendations and has already begun to implement many of them. OEM has a new leadership team that recognizes the need to improve processes and procedures, improve internal communication, professional development training and alignment of staff resources with strategic objectives for disaster planning. OEM is working with the Center for Executive and professional Education at Portland State University to help facilitate changing management processes and implement organizational changes.

Selected Financial Accounts for the year ended June 30, 2014

This audit was to express an opinion on whether the financial statements contained in the State of Oregon's Comprehensive Annual Financial Report were fairly presented, in all material respects, in conformity with generally accepted accounting principles. The accounts selected for fair presentation in accordance with generally accepted accounting principles were SFMA general ledger account 0852 - Buildings and Building Improvements and SFMA general ledger account 0875 - Accumulated Depreciation. The audit did not identify any reportable findings or deficiencies in internal control over financial reporting.

Statewide Single Audit for the year ending June 30, 2014

This audit was conducted in accordance with the Single Audit Act and OMB Circular A-133, which has two components: federal compliance and effective internal controls over federal compliance. Catalog of Federal Domestic Assistance number 97.036, Disaster Grants-Public Assistance (Presidentially Declared Disasters) was selected for audit due to open findings from prior year audit. The audit objectives were to determine whether the state has complied with laws, regulations, and the provisions of contracts or grant agreements pertaining to federal awards, whether the schedule of expenditures is presented fairly in relation to the state's financial statements as a whole and to obtain an understanding of internal controls over compliance and test those controls. The audit did not identify any reportable deficiencies or findings.

Selected Financial Accounts for the year ended June 30, 2015

This audit was to express an opinion on whether the financial statements contained in the State of Oregon's Comprehensive Annual Financial Report were fairly presented, in all material respects, in conformity with generally accepted accounting principles. The accounts selected for fair presentation in accordance with generally accepted accounting principles were SFMA general ledger account 0852 - Buildings and Building Improvements and SFMA general ledger account 0875 - Accumulated Depreciation. **Oregon Military Department
Affirmative Action Statistics: 2013-15 Biennium**

This report is submitted to provide an update of the Oregon Military Department's progress toward the 2013-15 biennium goals and programs for the agency's six year plan.

The Oregon Military Department has 521 positions, the majority of which are full time. Over 80 positions are part-time. Some positions have multiple employees who work less than quarter time and share positions. The State uses the Civilian Labor Force (CLF) as the comparison for hiring outcomes. The summary of percentages show: 89.5% White, 10.5% People of Color (POC), 1.68% African American, 5.04% Hispanic, 2.52% Asian Pacific, 1.26% Native American, 2.73% Disabled and 25.42% are women.

Historically, positions in the Oregon Military Department have been male dominated work groups. The Oregon Military Department continues to reach out to attract qualified minorities and women as vacancies occur. Our paramount goal however, is to employ as many returning veterans as possible and a mission clearly relating to mobilization and deployment of soldiers in the event of State and National Emergencies. Our outreach efforts, including providing quality service and recruitment to that group is occasionally limited due to budget constraints and some layoffs. We have an expansive distribution list for our job postings and research hard-to-fill positions to locate areas for advertisement. These efforts increased our applicant pool of qualified minority candidates and we continue to look for ways to reach more minority applicants. We contact colleges, related associated fields and the Employment Department. We use the Neo-Gov software to post announcements on the State of Oregon jobs page. We are actively involved with the ever changing E-Recruit process and stay current and updated on new and improved ways to take advantage of networking opportunities with other State agencies, recruiters, job fairs and events. We also place recruitment announcements on the federal Oregon National Guard website and other veteran assistance programs. Our goals continue to be finding a variety of ways to expand our outreach efforts in bringing a diverse workforce to the Oregon Military Department.
