DESCRIPTION OF DUTIES

1. Specialty Summary. Maintains and operates fuels and cryogenic facilities and equipment. Inventories, receives, stores, transfers, and issues petroleum, cryogenics, and alternative fuel products. Performs quality analysis on petroleum and cryogenics products. Performs preventive and operator maintenance on fuel dispensing vehicles and handling equipment, fuel dispensing systems, and conducts operator inspection and maintenance on facilities. Prepares receipt, inventory, and issue documents to support fuel and cryogenic product accountability. Operates specialized fuels vehicles and support equipment. Related DoD Occupational Subgroup: 182100.

2. Duties and Responsibilities:

2.1. Directs receipt, storage, transfer, and issue operations for petroleum, alternate fuel, and cryogenic products. Forecasts product requirements, places orders for products, and performs product receipt operations. Ensures proper handling and segregation of products received and verifies quantity and quality. Documents discrepancies in product receipt quantities and quality. Isolates off-specification products and takes appropriate actions to correct quality problems. Ensures compliance with all safety and environmental regulations.

2.2. Manages, maintains, and operates storage and dispensing facilities. Rotates stock to prevent product quality degradation. Ensures an effective operator maintenance program is carried out. Maintains inspection and maintenance records for facilities. Reports facility deficiencies to appropriate maintenance activity. Initiates facility upgrades and construction projects. Inspects and maintains cryogenic storage tanks and support equipment. Operates and maintains cryogenic production plants. Manages, maintains, and operates Fuels Support Equipment (FSE) used for base and tactical operations.

2.3. Performs technical fuels functions. Operates Fuels Service Center (FSC) to monitor all product movements and ensure timely response to mission requirements. Coordinates fuel and cryogenic servicing requirements with supported agencies and ensures appropriate prioritization of support requirements. Ensures vehicle and equipment preventive maintenance program is effective and reliable. Operates mobile and hydrant servicing equipment to dispense products to aircraft and ground support equipment and facilities. Operates cryogenic storage tanks to receive and dispense products.

2.4. Maintains fuels and cryogenic records. Ensures accuracy of receipt, inventory, transfer, and issue documents. Processes computer transactions to ensure proper billing and payment for all product receipt and issue transactions. Monitors product temperature and handling gains and losses to ensure they are within tolerance. Coordinates gain/loss investigation when acceptable tolerances are exceeded. Compiles data and generates ad hoc and recurring reports. Monitors inventory levels to ensure adequate stocks are on-hand to support operating and war reserve stock requirements. Inputs data into the base-level support applications (BLSA) to ensure accurate accountability. Reconciles information systems to ensure all transactions have processed correctly.

2.5. Maintains quality control of fuel and cryogenic products. Operates and maintains laboratory test equipment. Collects and analyzes product samples from receipt sources, bulk storage tanks, and dispensing vehicles and equipment. Documents test results in Fuels Manager® Defense and conducts trend analysis on product quality. Establishes a sample correlation program with the Aerospace Fuels Laboratory to validate the integrity of the base-level analysis procedures. Collects petroleum, oil and lubricant samples from crashed aircraft and submits them to the Aerospace Fuels Laboratory for analysis. Ensures an effective product segregation and recovery program is implemented. Establishes and manages a lock out/tag out program.

2.6. Oversees unit personnel readiness. Monitors unit manning document and allocates personnel to authorized positions. Participates in mobility planning, submits resources and training system data, and evaluates and approves unit type code changes. Reviews and monitors status of unit type codes (UTCs) and provides updates to the Unit Deployment Manager (UDM).

2.7. Conducts preventive maintenance inspections on the fuel's vehicle and equipment. Determines the overall mechanical condition of equipment and corrects deficiencies as required. Analyzes malfunctions, documents deficiencies, and coordinates repairs with the Refueling Maintenance shop. Tests repaired fuel vehicles and equipment for proper operation. Adjusts fueling components and verifies installed safety devices for proper operation. Performs scheduled inspections, preventive maintenance, and on-the-spot repairs. Uses technical publications to maintain fuels vehicles and equipment. Prepares servicing equipment for shipment.

x. Other duties as assigned
