## Safe Travels

There is an uptick in travel during the holiday season as people drive around the state to see family and friends. Winter weather conditions can create dangerous situations when commuting across Oregon. Make sure your tires have enough tread and the correct air pressure. Keep the gas tank full to prevent ice in the tank and fuel lines. Replace windshield wiper fluid and consider a wintertime mix. Keep an emergency kit in your car.

Whether you are traveling for work or for pleasure one great resource from the Oregon Department of Transportation is the "Trip Check." This online tool allows you to check weather conditions along your planned route of travel. The website includes links to ODOT roadside cameras showing up-to-date visuals which are extremely helpful if traveling over a mountain pass or hilly area. It might even give you advance notice of heavily congested areas to avoid. ODOT Trip Check can be accessed at: [www.tripcheck.com](http://www.tripcheck.com)

## Reminder:

If there are hazardous conditions or inclement weather that interferes with normal work operations, refer to your direct supervisor for guidance. All staff considered "Essential Personnel" should have been notified by your supervisor by now, but reach out to them if you are unsure of your status. Staff are instructed to call the respective closure info line for your area per the enclosure to the attached Command Policy Memorandum #119. Please be aware the numbers have changed.
