Busy 2021 Legislative Session

- Oregon Senate Bill 762

  - Provided funding (including personnel) for creating fire-adapted communities, developing response resources, & increasing resiliency.

The 5 Es of CRR

- Education
- Engineering
- Enforcement
- Emergency Response
- Economic Incentives

Public Education

- Teaches new/unknown information
- Explains changes in research/evolving understanding
- Supports critical thinking and evaluation of current issues
- Encourages identification of problems
- Provides tools for applying information
- Fosters relationship building through shared perspectives
- Assists communities in creating solutions

Public Education

Main Goal =

## Build safer communities through information

The CRR Process

- CRR: Community Risk Reduction
- 5 Step Process with sub-steps
- Multi-layered, multi-agency approach
- Identify and evaluate risks
- Foster relationships

The Full CRR Process

http://riskreduction.strategicfire.org/components-of-crr-plan/alternate-crr-planning-model/

The CRR Process

Main Goal =

Build safer communities through data driven assessment and proven solutions

Differences:
Education Vs. CRR

- **Focus on interactions between people and ideas**

- **Community information with individual action**

- **Fosters buy-in for actions created through CRR**

Differences:
Education Vs. CRR

- Focus identification of **risks** and **hazards**

- **Community** rather than individual actions

- **Relies on education** for community understanding

Similarities:
Education & CRR

- **Focus on creating safer communities**

- **Combined goals**

- **Use same tools**

- **Focus on audience**
