

Drinking Water Source Protection

DWSP Evaluation Criteria:

[OAR 695-048-0110](#)

Sensitive areas, potential pollutants, potential sources of pollution identified in Source Water Assessment

All projects will also be evaluated on the OWEB Climate-Related Evaluation Criteria described in [OAR 695-005-0045](#):

(1) How engagement with, and input from, local communities disproportionately impacted by climate change has informed or will inform the project.

(2) How changing climate conditions are incorporated into the project and how the project will contribute to durable adaptation and resilience for ecosystems, including human communities.

(3) How consideration of greenhouse gas emissions or long-term carbon sequestration or storage has informed the project.

Preference for longer-term agreements

Small population size

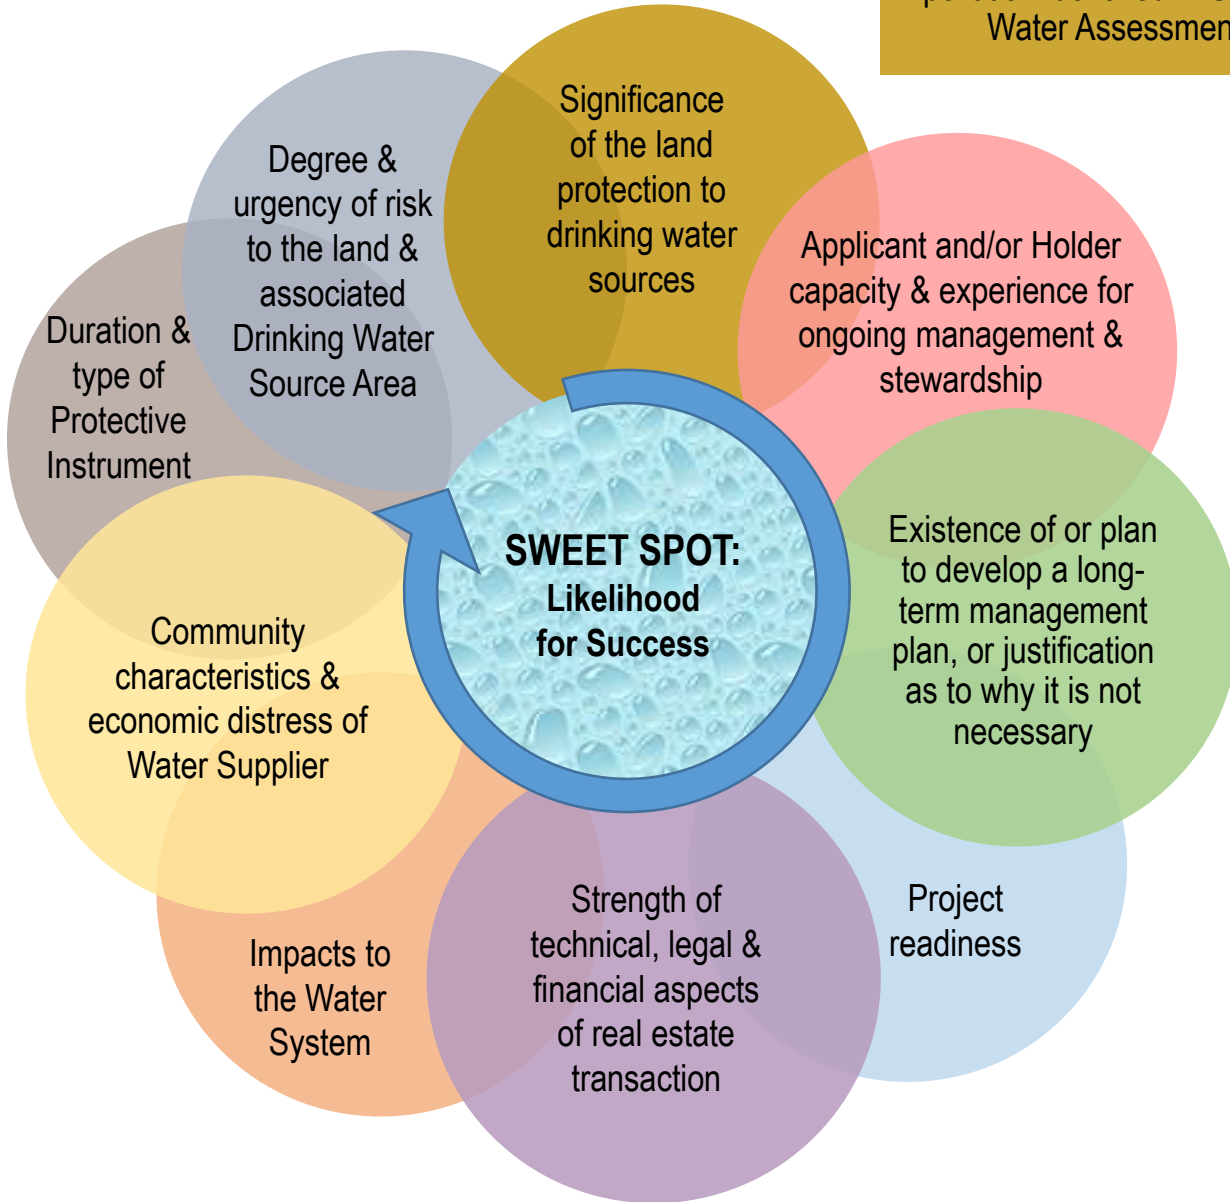

Lower income population

Rural population

Seasonal variations in number of users

Drought or low water supply

Extent of risks to water quality

For Partnership projects:

Clearly defined & documented partnership including respective roles & responsibilities

Partnership mission in support of protection or restoration of natural resources and/or drinking water.

Capacity & resources for long-term protection, restoration, and/or enhancement

Ability to complete transaction & due diligence within grant timelines

Quality of due diligence
